Option "F", Fan/Cover Assembly: Cover with integral ball-bearing fan provides proper cooling to achieve full ratings, at 50°C ambient temperature. 2.5" dim. increases to 3.8".
Option "G", DC Power Good: Provides a TTL "1" when output #1 is above 4.6 Vdc nominal. Not available if Option "P" is selected.
Option "P", Power Fail: Provides TTL "0", 5 ms before output voltage goes out of regulation band, upon loss of AC power. VMEbus compatible, provides 48ma sink current capability. Not available if Option "G" is selected.
Option "V": Low profile, end venting cover with integral ball-bearing fan. See page 8.

Consult factory for other available options.

The Shoe Box Alternative

Featuring:

- Cost/Watt Savings of 30%
- 58% Smaller than Equivalent Shoe Box
- 4 watts/in^3
- Meets International Safety Agency Requirements
- All Outputs Fully Regulated
- High Peak Current for Motor Starting
- High Efficiency MAGNA-FLUX Post Regulators
- Reliability Approaching 100,000 hours MTBF
- AC Automatic Line Selection Option

Specify in the appropriate MAX-700 or MAX-750 and get new design freedom for your high-end computer products. Use a system air cooled MAX-700, an optional self-cooled MAX-700 or standard self-cooled MAX-750. You can reduce your product size by replacing a 5″ x 8″ x 11″ shoe box with a 58% smaller MAX-750. Build in power supply redundancy by replacing one shoe box switcher with two MAX-700's in the same space.

Check the specifications and dimensions of these alternatives to shoe box power supplies.

SPECIFICATIONS:

AC Input: 90-132 Vac/180-264 Vac, 47 to 63 Hz. User selectable. See Option “A” for automatic line selection. Internally fused for 15 A.

Adjustability: All outputs user adjustable ± 5% minimum, except where noted.

Line & Load Reg: ±1% over AC input range and 0 to 100% load change. Main +5V output requires minimum load of 10%.

Ripple & Noise: Less than 0.2% rms, 1% p-p or 100 mV, whichever is greater.

Remote Sense (+5V): Compensates for 250 mV total line drop. Open sense lead protection.

Temperature Coefficient: 0.02% per degree C.

Stability: 0.1% over 8 hours after 30 minutes warm-up.

Transient Response (+5V): Output voltage returns to within 1% in less than 500 µsec for a 50% load change. Peak transient does not exceed 5%.

Overload Protection: All outputs are protected against overload and short circuit. Automatic recovery upon removal of fault.

Overvoltage Protection (+5V): Protects load against power supply induced overvoltage. Trip point is factory set so that output voltage cannot exceed 6.8V.

Peak Output Current: Dual current ratings define continuous and peak currents. The peak current shown can be delivered for a maximum period of 30 seconds.

Inrush: Cold Start AC current is less than 90 A at 115 Vac, 30 A at 230 Vac. Limited by surgistor.

Brownout Protection: Holds regulation to 85 Vac or 170 Vac.

Thermal Protection: Shuts down power supply if overheated. Automatic recovery.

Holdup Time: 16 ms minimum after removal of power, at nominal line, full load.

Temperature Range: 0 to 50°C full ratings. Derate to half power at 70°C.

Efficiency: 80% typical.

Safety Agencies: Approved UL478, UL1950, CSA22.2 bulletins 1402c and #234, IEC950, VDE 0805/VDE 0806 class 1 SELV and EN 60 950.

Conducted RFI: Meets FCC Part 15, Subpart J, Class A; EN 55022 Level “B”; and German Decree “VFG 243.”

Output Isolation: Isolated from ground 50 V.

Reverse Voltage: Protected against reverse voltage up to supply current rating.

Cooling: MAX-700 models require 60 CFM of air to achieve full ratings except when specifying option “F”, Fan Assembly. 750 watt models have built-in ball-bearing fan.

Reliability: Over 80,000 hours MTBF, when calculated in accordance with MIL-HDBK-217.

Remote Inhibit: Contact closure to the negative sense line, drops output power to nominal zero.

OPTIONS:

Option “A”, AC Auto-Range: Automatically selects proper AC line voltage range to enable power operation at either 115 or 230 Vac, without user intervention.

Option “F”, Fan Assembly: Integral ball-bearing fan provides proper cooling to achieve full ratings, at 50°C ambient temperature. 750 watt models have built-in ball-bearing fan.

Option “G”, DC Power Good: Provides a TTL “1” when output #1 is above 4.6 Vdc nominal. Not available if Option “P” is selected.

Option “P”, Power Fail: Provides TTL “0”, 5 ms before output voltage goes out of regulation band, upon loss of AC power. VMEbus compatible, provides 48ma sink current capability. Not available if Option “G” is selected.

Consult factory for other available options.

The Price Leaders

Featuring:

- 9″ x 5″ x 2.5″ Package
- TODD's Lowest-Cost Power Supplies
- Over 100,000 hours MTBF
- High Power Densities
- Meets International Safety Agency Requirements
- High Peak Currents for Motor Starting
- AC Automatic Line Selection Option

The leaders of TODD's lower priced switching power supplies, these units are ideal for new OEM Products which are designed for future expansions. Outputs start at 160 Watts and power needs can go to 350 Watts by using the MAX-350 series without changing the footprint.

You'll get up to 30 Amps for logic and memory and peak currents up to 16 Amps for motor starting in a package measuring only 9″ x 5″ x 2.5″. Other features like 100,000 hours MTBF reliability, high power densities, AC autoline select option, and meeting international safety requirements, give design flexibility, low price, and world-wide marketability.

Check the specifications of these "Price Leaders" for your next OEM computer-based or Telecom product design.

MDT MODELS

SPECIFICATIONS: ALL MODELS.

AC Input: 90-132 Vac/180-264 Vac, 47 to 63 Hz. User selectable. Internally fused for 7 A.

Adjustability: Main output and output #3 user adjustable ±5% minimum. Output #4 (Output #3 on MTC series) is not adjustable, and has ±5% initial accuracy.

Line & Load Reg: ±1% over AC input range and 0 to 100% load change. On MDT series only, Output #2 holds ±5% total regulation band, including the combined effects of line regulation, load regulation for a load change of ±40% from 60% initial load, and cross regulation due to a load change of ±25% on the +5V line from 60% initial load. Maximum combined currents on Output #1 and #2 cannot exceed Output #1 rating, except for MDT-223-1212R. Main +5V output requires a minimum load of 20%, for all models.

Ripple & Noise: Less than 0.2% rms, 1% p-p or 100 mV, whichever is greater.

Remote Sense (±5V): Compensates for 250 mV total line drop. Open sense lead protection.

Temperature Coefficient: 0.02% per degree C.

Stability: 0.1% over 8 hours after 30 minutes warm-up.

Transient Response (+5V): Output voltage returns to within 1% in less than 500 µsec for a 50% load change. Peak transient does not exceed 5%.

Overload Protection: All outputs are protected against overload and short circuit. Automatic recovery upon removal of fault.

Overvoltage Protection (+5V): Protects load against power supply induced overvoltage. Trip point is factory set so that output voltage cannot exceed 6.8V.

Peak Output Current: Dual current ratings define continuous and peak currents. The peak current shown can be delivered for a maximum period of 30 seconds.

Inrush: Cold Start AC current is less than 16 A at 115 Vac, 32 A at 230 Vac. Limited by surgistor.

Brownout Protection: Holds regulation to 85 Vac or 170 Vac.

Thermal Protection: Shuts down power supply if overheated. Automatic recovery.

Holdup Time: 16 ms minimum after removal of power, at nominal line, full load.

Temperature Range: 0 to 50°C full ratings. Derate to half power at 70°C.

Efficiency: 75% typical.

Safety Agencies: Approved UL478, UL1950, CSA22.2 bulletins 1402c and #234, IEC950, VDE 0805/VDE 0806 class 1 SELV and EN 60 950.

Conducted RFI: Meets FCC Part 15, Subpart J, Class A; EN 55022 Level "B"; and German Decree "VFG 243."

Output Isolation: Isolated from ground 50 V.

Reverse Voltage: Protected against reverse voltage up to supply current rating.

Cooling: 30 CFM required to achieve full ratings at 220 watts. 160 watt models are convection cooled.

Reliability: Over 100,000 hours MTBF, when calculated in accordance with MIL-HDBK-217.

OPTIONS:

Option "A", AC Auto-Range: Automatically selects proper AC line voltage range to enable power operation at either 115 or 230 Vac, without user intervention.

Option "P", Power Fail: Provides TTL "0", 5 ms before output voltage goes out of regulation band, upon loss of AC power. VMEbus compatible, provides 48ma sink current capability.

Consult factory for other available options.

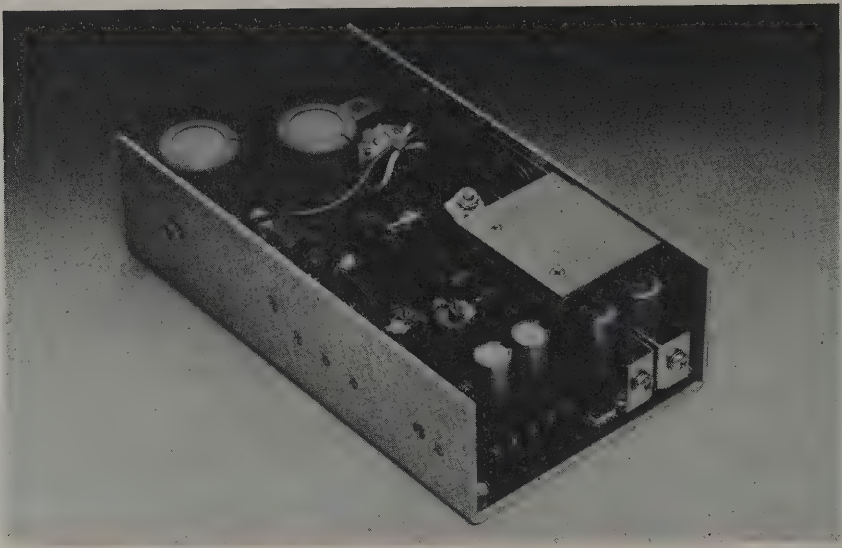
TODD

350 WATT SWITCHING POWER SUPPLY FOR N+1 REDUNDANCY

3V
MAIN OUTPUT AVAILABLE
CONSULT FACTORY FOR DETAILS



The Reliable Switcher for N+1 Redundancy and Parallel Power Sharing

Featuring:

- N+1 redundancy and parallel power sharing
- "Zero wire" power sharing system for optimum reliability
- 9" x 5" x 2.5" open frame package
- 250 watts from 5 Volts main output
- System air or self-cool option
- Overvoltage, overtemperature and overcurrent protection
- Soft start and remote inhibit

Todd's new MPS-350 multiple output switching power supplies are the ideal solutions for critical applications such as communications equipment and industrial controls. These often require parallel power sharing for expandable systems or redundant power supplies for reliability. With Todd's innovative "zero wire" power sharing technique, these switchers will provide a highly reliable, power sharing system.

When used for expandability, typical paralleling systems utilize complicated "third wire" power sharing techniques. Though expandability is achieved, system reliability is compromised in some failure modes, and glitches on the bus are possible.

The MPS Series, on the other hand, utilizes proprietary technology that does not require extra connections to achieve redundancy or to share power. This technology assures that all of the working supplies stay "on" and deliver current to the load allowing no glitches. The load sees consistent regulated voltage before, during, and after a power supply failure. With our MPS series, the user enjoys highly reliable power sharing, glitch-free performance, and minimum complexity.

You can build any number of these switchers into your system to allow paralleling for additional power or N+1 redundancy. The switcher can also be used alone as the basic building block power supply for future system expansion.

Housed in a low profile, open frame configuration measuring only 9"x5"x2.5", the MPS delivers 350 watts of power with a main output of 5 Volts at 50 Amps. The unit is designed to be cooled with system air or through an optional Fan/Cover assembly. Other features include: Overvoltage Protection, Overtemperature Protection, Soft Start, Remote Inhibit, Remote Sense, and Overcurrent Protection. DC Power Good, Auto-Ranging, Covers, and Fan/Covers are also available.

If your design calls for power sharing, redundancy, or expandability, check out the important features and specifications of this Todd switcher for a truly reliable, optimum power sharing system.

SPECIFICATIONS: ALL MODELS.

AC Input: 90-132 Vac/180-264 Vac, 47 to 63 Hz. User selectable. See Option "A" for automatic line selection. Internally fused for 10 A.

Adjustability: All outputs user adjustable ± 5% minimum.

Line & Load Reg: + 5V Output: ±3% over AC input range and 10 to 100% load change. 10% minimum load required.

Line & Load Reg: Other Outputs: ±1% over AC input range and 0 to 100% load change. No minimum load required.

Ripple & Noise: Less than 0.2% rms, 1% p-p or 100 mV, whichever is greater.

Remote Sense (± 5V): Compensates for 250 mV total line drop, in addition to "or-ing" diode drop. Open sense lead protection.

Temperature Coefficient: 0.02% per degree C.

Stability: 0.01% over 8 hours after 30 minutes warm-up.

Transient Response (+ 5V): Output voltage returns to within 1% in less than 500 µsec for a 50% load change. Peak transient does not exceed 5%.

Overload Protection: All outputs are protected against overload and short circuit. Automatic recovery upon removal of fault.

Overvoltage Protection (+ 5V): Protects load against power supply induced overvoltage. Trip point is factory set so that output voltage cannot exceed 6.8V.

Peak Output Current: Dual current ratings define continuous and peak currents. The peak current shown can be delivered for a maximum period of 30 seconds.

Inrush: Cold Start AC current is less than 10 A at 115 Vac, 18 A at 230 Vac. Limited by surgistor.

Brownout Protection: Holds regulation to 85 Vac or 170 Vac.

Thermal Protection: Shuts down power supply if overheated. Automatic recovery.

Holdup Time: 16 ms minimum after removal of power, at nominal line, full load.

Temperature Range: 0 to 50°C full ratings. Derate to half power at 70°C.

Efficiency: 80% typical.

Safety Agencies: Approved UL478, UL1950, CSA22.2 bulletins 1402c and #234, IEC950, VDE 0805/VDE 0806 class 1 SELV and EN 60 950.

Conducted RFI: Meets FCC Part 15, Subpart J, Class A; EN 55022 Level "B"; and German Decree "VFG 243."

Output Isolation: Isolated from ground 50 V.

Reverse Voltage: Protected against reverse voltage up to supply current rating.

Cooling: 30 CFM required to achieve full ratings.

Remote Inhibit: Contact closure to the negative sense line, drops output power to nominal zero.

NOTE: External "or-ring" diode isolation is required for N+1 redundant operation.

OPTIONS:

Option "A", AC Auto-Range: Automatically selects proper AC line voltage range to enable power operation at either 115 or 230 Vac, without user intervention.

Option "C", Cover: Limits contact with power supply interior. Add "C" suffix to model number.

Option "F", Fan/Cover Assembly: Cover with integral ball-bearing fan provides proper cooling to achieve full ratings, at 50°C ambient temperature.

Option "G", DC Power Good: Provides a TTL "1" when output #1 is above 4.6 Vdc nominal. Not available if Option "P" is selected.

Option "V": Low profile, end venting cover with integral ball-bearing fan. See page 8.

Consult factory for other available options.

The 24/28 or 48 V Input DC/DC Powerhouse

Featuring:

- Compact, only 9"L x 5"W x 2.5"H
- High efficiency MAGNA-FLUX Post Regulators
- Fully regulated mag amp outputs
- Over 100,000 hours MTBF per MIL-HDBK-217

Particularly suitable for critical, "can't fail" mobile or transportable systems, both DB and DC series offer fully regulated, high-efficiency mag amp output. All series share the same footprint, and DC, DCT and DCX units can be expanded to include isolation diodes and modified current sharing for redundancy (consult factory for availability). Optional DC power fail is available, as are optional fan and cover assemblies.

SPECIFICATIONS: ALL MODELS.

DC Input: 24 Vdc, nominal, 20 Vdc to 32 Vdc range, internally fused for 20A (DB, DBT and DBX series). 48 Vdc, nominal, 40.8 Vdc to 60 Vdc range, internally fused for 15A (DC, DCT and DCX series).

Adjustability: All outputs user adjustable ± 5% minimum, except where noted.

Line & Load Reg: ±1% over DC input range and 0 to 100% load change. Multiple output units require a minimum load of 10% on the +5V output when drawing full load on the auxiliary outputs.

Ripple & Noise: Less than 0.2% rms, 1% p-p or 100 mV, whichever is greater.

Remote Sense: Compensates for 250 mV total line drop. Multioutput units provide remote sense on main (+5V) output only. Open sense lead protection is standard.

Temperature Coefficient: 0.02% per degree C.

Stability: 0.1% over 8 hours after 30 minutes warm-up.

Transient Response: Output voltage returns to within 1% in less than 500 µsec for a 50% load change. Peak transient does not exceed 5%.

Overload Protection: All outputs are protected against overload and short circuit. Automatic recovery upon removal of fault.

Overvoltage Protection: Protects load against power supply induced overvoltage. Trip point is factory set so that output voltage cannot exceed 6.8V on +5V output of multioutput models. Single output models are set to limit overvoltage to 136% of nominal.

Peak Output Current: Dual current ratings define continuous and peak currents. The peak current shown can be delivered for a maximum period of 30 seconds.

Thermal Protection: Shuts down power supply if overheated. Automatic recovery.

Temperature Range: 0 to 50°C full ratings. Derate to half power at 70°C.

Efficiency: 70-75% typical.

Output Isolation: Isolated from ground 50 V. Single output models rated at 48V nominal have 100V isolation.

Reverse Voltage: Protected against reverse voltage up to supply current rating.

Cooling: 30 CFM required to achieve full ratings.

Reliability: Over 100,000 hours MTBF, when calculated in accordance with MIL-HDBK-217.

Remote Inhibit: Contact closure to the negative sense line, drops output power to nominal zero.

OPTIONS:

Option "C", Cover: Limits contact with power supply interior. Add "C" suffix to model number.

Option "F", Fan/Cover Assembly: Cover with integral ball-bearing fan provides proper cooling to achieve full ratings, at 50°C ambient temperature.

Option "G", DC Power Good: Provides a TTL "1" when output #1 is above 4.6 Vdc nominal.

Option "V": Low profile, end venting cover with integral ball-bearing fan. See page 8.

The Single Choice

Featuring:

- 9″ x 5″ x 2.5″ Package
- Output Voltages from 5V to 48V
- Meets International Safety Agency Requirements
- More than 100,000 hours MTBF
- Remote Sense, Thermal Protection, and OVP
- Units Cannot be Damaged by No-load or Low Line Conditions
- System Air or Self-Cooled Option
- AC Automatic Line Selection Option

Switchers in this series are the single choice for power supplies that must withstand the harsh environments that typify industrial control applications. Yet, they include the sophistication and advance design features that are needed to power computer and telecommunications systems.

Designed around TODD's proprietary VERI-DRIVE PLUS current fed inverter topology and unique monocoque construction, these switching power supplies are up to 31% smaller than competitive products and have efficiencies of up to 85%.

All of these SC Series Models are the single choice for worldwide marketability.

SPECIFICATIONS: ALL MODELS.

AC Input: 90-132 Vac/180-264 Vac, 47 to 63 Hz. User selectable. See Option "A" for automatic line selection. 150 watt units fused for 7 A, 250 watt units fused for 10 A.
Adjustability: ±10% minimum.
Line & Load Reg: ±1% over AC input range and 0 to 100% load change.
Ripple & Noise: Less than 0.2% rms, 1% p-p or 100 mV, whichever is greater.
Remote Sense: Compensates for 250 mV total line drop. Open sense lead protection.
Temperature Coefficient: 0.02% per degree C.
Stability: 0.1% over 8 hours after 30 minutes warm-up.
Transient Response: Output voltage returns to within 1% in less than 500 µsec for a 50% load change. Peak transient does not exceed 5%.
Overload Protection: All outputs are protected against overload and short circuit. Automatic recovery upon removal of fault.
Overvoltage Protection: Protects load against power supply induced overvoltage. Trip point is factory set so that output voltage cannot exceed 136% of nominal.
Inrush: Cold Start AC current is less than 16 A at 115 Vac, 32 A at 230 Vac on 150 watt models, and 10 A at 115 Vac, 18 A at 230 Vac on 250 watt models. Limited by surgistor.
Brownout Protection: Holds regulation to 85 Vac or 170 Vac.
Thermal Protection: Shuts down power supply if overheated. Automatic recovery.
Holdup Time: 16 ms minimum after removal of power, at nominal line, full load.
Temperature Range: 0 to 50°C full ratings. Derate to half power at 70°C.
Efficiency: 80% typical.
Safety Agencies: Approved UL478, UL1950, CSA22.2 bulletins 1402c and #234, IEC950, VDE 0805/VDE 0806 class 1 SELV and EN 60 950.
Conducted RFI: Meets FCC Part 15, Subpart J, Class A; EN 55022 Level "B"; and German Decree "VFG 243."
Output Isolation: Isolated from ground 50 V, except 100 V for 48 Vdc models.
Reverse Voltage: Protected against reverse voltage up to supply current rating.
Cooling: 30 CFM required to achieve full rating.
Reliability: Over 100,000 hours MTBF, when calculated in accordance with MIL-HDBK-217.
Remote Inhibit: Contact closure to the negative sense line, drops output power to nominal zero. Not available in 150 or 180 watt units.

OPTIONS (ALL MODELS):

Option "A", AC Auto-Range: Automatically selects proper AC line voltage range to enable power operation at either 115 or 230 Vac, without user intervention.
Option "P", Power Fail: Provides TTL "0", 5 ms before output voltage goes out of regulation band, upon loss of AC power. VMEbus compatible, provides 48ma sink current capability. Not available if Option "G" is selected.

OPTIONS (250 WATT MODELS ONLY):

Option "C", Cover: Limits contact with power supply interior. Add "C" suffix to model number.
Option "F", Fan/Cover Assembly: Cover with integral ball-bearing fan provides proper cooling to achieve full ratings, at 50°C ambient temperature.
Option "G", DC Power Good: Provides a TTL "1" when output #1 is above 4.6 Vdc nominal. Not available if Option "P" is selected.
Option "V": Low profile, end venting cover with integral ball-bearing fan. See page 8.

The Single Choice

Featuring:

- 11.5″ x 5″ x 2.5″ Package
- Output Voltages from 5V to 48V
- Power Density to 3 watts/in³
- Meets International Safety Agency Requirements
- More than 100,000 hours MTBF
- Remote Sense, Thermal Protection, and OVP
- Units Cannot be Damaged by No-load or Low Line Conditions
- AC Automatic Line Selection Option

Consider this series for your single choice of switching power supplies used in the design of high end OEM products ranging from process controls to sophisticated telecommunications systems.

Incorporating TODD design features such as surface mount components and single PCB construction for high reliability, these switchers are rugged enough to withstand the harsh environments that typify industrial control applications and also incorporate the sophistication and advance design features needed to power computer and telecommunications systems.

Check out the specifications of this series, your single choice for single output switchers.

SPECIFICATIONS: ALL MODELS.

AC Input: 90-132 Vac/180-264 Vac, 47 to 63 Hz. User selectable. See Option "A" for automatic line selection. 350 watt units fused for 10 A, 500 watt units fused for 15 A.
Adjustability: ±10% minimum.
Line & Load Reg: ±1% over AC input range and 0 to 100% load change.
Ripple & Noise: Less than 0.2% rms, 1% p-p or 100 mV, whichever is greater.
Remote Sense: Compensates for 250 mV total line drop. Open sense lead protection.
Temperature Coefficient: 0.02% per degree C.
Stability: 0.1% over 8 hours after 30 minutes warm-up.
Transient Response: Output voltage returns to within 1% in less than 500 µsec for a 50% load change. Peak transient does not exceed 5%.
Overload Protection: All outputs are protected against overload and short circuit. Automatic recovery upon removal of fault.
Overvoltage Protection: Protects load against power supply induced overvoltage. Trip point is factory set so that output voltage cannot exceed 136% of nominal.
Inrush: Cold Start AC current is less than 80 A at 115 Vac, 20 A at 230 Vac. Limited by surgistor.
Brownout Protection: Holds regulation to 85 Vac or 170 Vac.
Thermal Protection: Shuts down power supply if overheated. Automatic recovery.
Holdup Time: 16 ms minimum after removal of power, at nominal line, full load.
Temperature Range: 0 to 50°C full ratings. Derate to half power at 70°C.
Efficiency: 80% typical.
Safety Agencies: Approved UL478, UL1950, CSA22.2 bulletins 1402c and #234, IEC950, VDE 0805/VDE 0806 class 1 SELV and EN 60 950.
Conducted RFI: Meets FCC Part 15, Subpart J, Class A; EN 55022 Level "B"; and German Decree "VFG 243."
Output Isolation: Isolated from ground 50 V, except 100 V for 48Vdc models.
Reverse Voltage: Protected against reverse voltage up to supply current rating.
Cooling: 30 CFM required to achieve full ratings.
Reliability: Over 100,000 hours MTBF, when calculated in accordance with MIL-HDBK-217.
Remote Inhibit: Contact closure to the negative sense line, drops output power to nominal zero. Not available in 150 watt units.

OPTIONS:

Option "A", AC Auto-Range: Automatically selects proper AC line voltage range to enable power operation at either 115 or 230 Vac, without user intervention.
Option "C", Cover: Limits contact with power supply interior. Add "C" suffix to model number.
Option "F", Fan/Cover Assembly: Cover with integral ball-bearing fan provides proper cooling to achieve full ratings, at 50°C ambient temperature.
Option "G", DC Power Good: Provides a TTL "1" when output #1 is above 4.6 Vdc nominal. Not available if Option "P" is selected.
Option "P", Power Fail: Provides TTL "0", 5 ms before output voltage goes out of regulation band, upon loss of AC power. VMEbus compatible, provides 48 ma sink current capability. Not available if Option "G" is selected.
Option "V": Low profile, end venting cover with integral ball-bearing fan. See page 8.

Consult factory for other available options.

TODD

OPTIMUM POWER SOLUTIONS

Quality starts with understanding customers' needs so that we can provide the optimum solution to meet their requirements. By developing close partnerships with our customers, we've been able to provide power solutions for hundreds of applications. With Todd as your power supply engineering partner, you'll have access to the best combination of a broad line of standard products, a low-cost modified or repackaged product, or a fully customized product designed specifically for your application.

MODIFIED STANDARDS

Our standard catalog product line is a comprehensive mix of over 100 units configured for applications in power ranges from 150 watts to 1500 watts. Since all of our standard products within a given series utilize a platform type of design, we are often able to easily modify a standard product to meet a customer's unique application. Each mother board is configurable to many different voltages and will support components and magnetics for a wide range of power. We can also modify performance features, mechanical and electrical characteristics, and options as the customer requires.

FROM BLOOD ANALYZERS TO ATMs

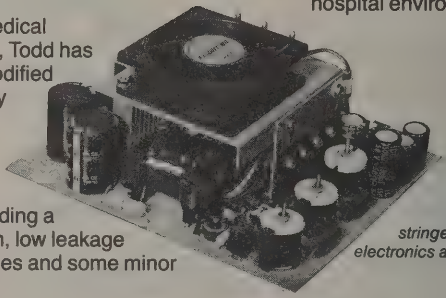
From our standard line to our highly customized designs, we've produced power supplies for hundreds of specialized applications. For example:

- Blood Analyzers
- Blood Processors
- Patient Attached Monitors
- VXIbus Computers
- Work Stations
- Graphics Processors
- Ruggedized Computer Systems
- Automobile Diagnostics
- Automatic Teller Machines
- Lottery Terminals
- High Definition TV Transmitters
- PBX Systems
- Paging Systems

MEDICAL ELECTRONICS

Very demanding requirements are imposed on power supplies used in medical electronics equipment, with reliability being paramount. The requirements of UL544 and IEC601 for patient attachment, for example, impose stringent AC line leakage limits.

Working closely with medical equipment manufacturers, Todd has provided cost-effective modified standards as well as highly customized designs that meet their requirements. For example, Todd engineers were able to modify a standard supply by including a special transformer design, low leakage RFI filters, AC input changes and some minor repackaging with no transformer isolation required. The results were a reliable, field proven unit, meeting the medical leakage requirements, and incorporating the special line transient suppression to survive line voltage transients sometimes found in hospital environments.

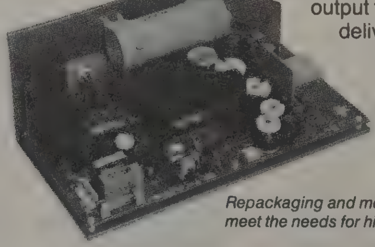


Designed from the ground up, this power supply meets the needs of a stringent medical electronics application.

HIGH PEAK CURRENT PRINTERS

Impact printers used in applications ranging from lottery terminals to ATM machines, place unusual load requirements on the power supply. For example, a system using a 4 output power supply, with an average power demand of 200 watts would require the 24 volt printer output to deliver peak currents of 55 amps, or over 1300 watts. How the power supply handles these peak currents impacts greatly on cost, reliability, and system performance.

Todd engineers were able to identify the critical factors required by the customer for his marketplace, and offer a modified standard to meet his needs. Modifications included incorporating high peak power capability to the inverter, adding an averaging filter, and special control functions to indicate proper DC output. Input and output connectors were added for faster system assembly, and the chassis was custom shaped for easy mounting.



Repackaging and modifications to a standard supply meet the needs for high peak current printers.

OPTIMUM POWER SOLUTIONS

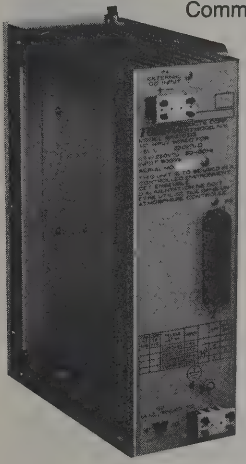
REPACKAGED STANDARDS

Many times we can offer our customers a repackaged standard to meet specific system requirements. For example, we can repackage a standard product to include a special electrical feature, or a "bell or whistle" by revising the pc board artwork. Or we can repackage a standard product for a special mechanical requirement, such as connectivity. We can convert a standard power supply into a very low profile unit to fit into a pre-existing envelope or mounting arrangement. A "repackaged" standard is often the best solution to a customer's special need.

FULL CUSTOM POWER SUPPLIES

Sometimes a customer's requirements are so unique that the power supply must be designed from the ground up. With Todd as your power supply partner, you'll have access to one of the best and most experienced engineering teams in the power supply industry. Since our inception we have been specialists in producing fully captive designs with customized form, fit, and functions. Working closely with our customers' engineering and program management people, our goal is to ensure that each power supply will be the optimum design.

COMMUNICATIONS EQUIPMENT



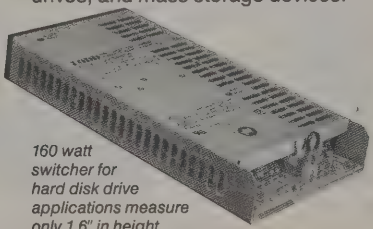
Custom-design plug-in switcher for PBX systems.

Communications equipment manufacturers of PBX, central office equipment and other critical applications, require a high degree of reliability from their power sources.

A unique plug-in switching power supply provided the optimum solution for a leading telecom manufacturer. For this PBX application, Todd engineers designed a 395 watt, plug-in chassis, switching power supply. The unit connects into the backplane to provide DC power to the PBX cards. It features free convection cooling, DC battery back-up and meets the customer's critical reliability requirements.

PERIPHERALS

The Todd standard product line includes an extensive series of power supplies that meet a broad range of computer applications. When a recent customer requirement for a low profile switcher could not be met with a standard product, Todd engineers designed a 160 watt switcher, measuring only 1.6″ in height, that met all of the customer's requirements for use in SCSI drives, removable hard drives, and mass storage devices.



160 watt switcher for hard disk drive applications measure only 1.6″ in height.

CALL THE SWITCHER SPECIALISTS

- 3-Volt Logic Requirements
- Special Mechanical Configurations
- Unique Performance Requirements

Just one phone call will put you in touch with a Todd Products switching power supply specialist. Our highly trained staff is here to help you solve your power supply problems. We can suggest a proven design from our large array of standard-built products, or we may recommend a modification of a stock unit to solve your applications problem. If appropriate, we can engineer and design a custom system that will suit your requirements exactly. With Todd as your power supply partner, you are assured of a timely and cost-effective answer to even your most difficult switching power supply problems.

The solution to your specific problem begins by dialing:

MODEL	O/P1	O/P2	O/P3	O/P4	UL	CSA	TUV	VDE
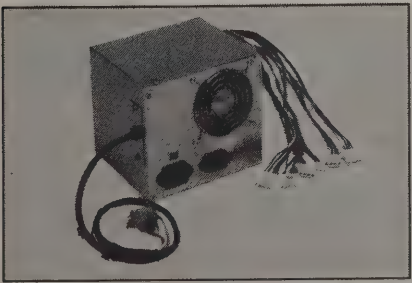
PSA-2020C	5V/22.5A	-5V/0.3A	12V/9A	-12V/0.5A	V	V		V
PSA-300	5V/30A	-5V/0.5A	12V/12A	-12V/0.5A	V	V	V	



POWER SUPPLY FOR PC

DIM: 165mm (6.5") x 150mm (5.91") x 151mm H (5.94")

MODEL	O/P1	O/P2	O/P3	O/P4	UL	CSA	VDE
PSA-2056C	5V/23A	-5V/0.3A	12V/9A	-12V/0.5A	V	V	V

TOTAL POWER

INTERNATIONAL, INC.

418 Bridge Street, Lowell, MA 01850
Telephone (508) 453-7272 • Fax (508) 453-7395

• SWITCHES • LINEARS • DC/DC CONVERTER • WALL & DESKTOP SUPPLIES

LINEAR OPEN FRAME AC-DC POWER SUPPLIES

- Industry Standard Packages
- Over 40 Models Available 6-100 Watts

UNIVERSAL INPUT POWER SUPPLIES

- Universal Input 90-264 VAC
- Compact Size
- 15-1500 Watts
- Over 30 Models Available

INTERNATIONAL SWITCHING POWER SUPPLIES

- Meets International EMI/RFI Standards
- Over 100 Standard Models Available

LOW PROFILE SWITCHING POWER SUPPLIES

- Over 50 Models Available
- 8-150 Watts

EUROCARD/VME SWITCHING POWER SUPPLIES

- Designed for VME-Bus System Rack
- Standard Eurocard Box Construction
- Over 50 Models Available from 45-400 Watts

HIGH POWER SWITCHING POWER SUPPLIES

- 165-1500 Watts, Up to 5 Output Combinations
- UL/CSA/TUV (VDE) Recognition
- Short Circuit and Overload Protected, Remote Sense, Logic Inhibit
- Power Fail Signal and Auto Select Input Available

CUSTOM DESIGN

TPI has successfully built custom designs for point of sale terminals, modems, digital communications, thermal printer, mobile satellite communication and others. Call us with your custom requirements.

DC-DC CONVERTERS

- 1-50 Watts
- Industry Standard Packages
- 7:1 Input Ranges Available
- Over 300 Models Available
- Six-Sided Shielding
- Single, Dual and Triple Output Models

EXTERNAL WALL AND DESKTOP POWER SUPPLIES

PRODUCTS AND FEATURES:

- AC-DC Regulated Switching Power Supplies
  Universal Input, Outputs up to 60 Watts

- AC-DC Regulated Linear Power Supplies
  Single and Multiple Outputs up to 25 Watts

- AC-DC Unregulated Power Supplies
  Single and Multiple Outputs up to 35 Watts

- AC-AC External Transformers
  Single, Center-Tapped and Multiple Output Models

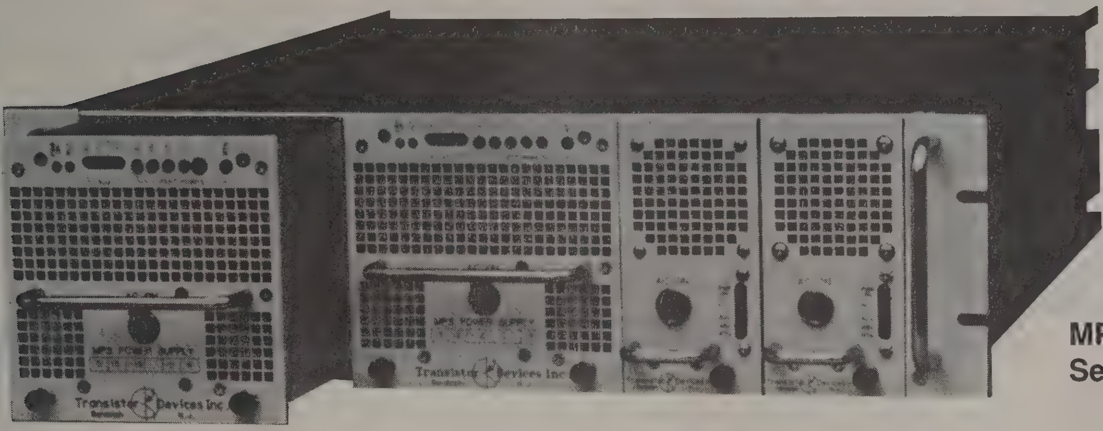
TOTAL POWER is also a distributor of products manufactured by COSEL USA and GOLDEN POWER

All Models Built to Meet or Already Approved by UL/CSA/TUV

CALL OR FAX TODAY FOR A FREE CATALOG AND DATASHEETS

LET US BE YOUR PARTNERS IN POWER

Power Factor Corrected Modular Power Supplies



MPS Series

- WORLD CLASS - Line Current Harmonic Reduction Per IEC 555.2, / FAA 2100E, and DOD-STD-1399/300
- WORLD POWER - Input 88-264V, 47-63 Hz or 40-60V DC
- N+1 PARALLEL REDUNDANCY - With battery backup
- HOT BUS PLUG-IN - For Zero Down Time
- ONE TO FIVE OUTPUTS - For each module as selected by the customer

500W Modules are 1/6 Rack Wide by 4 7/8" High
1000W Modules are 1/3 Rack Wide by 4 7/8" High
3000W Modules are 1/3 Rack Wide by 6 5/8" High

INPUT SPECIFICATIONS

INPUT VOLTAGE: 88-264V AC or 40-60V DC

INPUT FREQUENCY: 47-63 Hz - Single phase

INPUT PROTECTION: Front panel circuit breaker on each module

EFFICIENCY: 72-80% including cooling and redundant diodes

POWER FACTOR: .98 Typical

LINE CURRENT HARMONICS: <5% THD @ full load

PEAK INRUSH CURRENT: 5 times full load operating current

CONDUCTED EMI: FCC-15, Subpart J, Class A and VDE 0871, Class A

SAFETY STANDARDS: UL1950, IEC950, CSA 22.2 #950

OUTPUT SPECIFICATIONS

LINE REGULATION: ±.1% + 10mV

LOAD REGULATION: ±.1% + 10mV

RIPPLE AND NOISE: Less than 50mV P-P or .5% +25mV, whichever is greater.

OVERVOLTAGE AND OVERCURRENT PROTECTION: Factory adjustable

HOLDUP TIME: 20 msec at any input line voltage.

PARALLEL LOAD SHARING - MAIN OUTPUT: Single wire interconnect.

PARALLEL LOAD SHARING - OTHER OUTPUTS: Droop of regulation characteristics 200mV or 1% of the output voltage, which ever is greater.

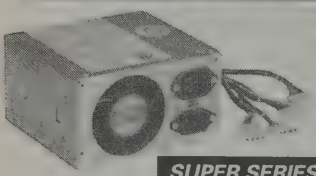
SUPER SERIES SWITCHING POWER SUPPLIES



FEATURES

- Shout Circuit Protection
- Over Voltage Protection
- Over Current Protecton
- UL/CSA/VDE Requirements
- VDE Class B
- 100% Burn-In Test

APPLICATIONS

- Clone Computers
- Industrial Control Computers
- Instrumentation
- General Purpose

SUPER SERIES: 100, 200 WATTS, CASE SIZE - 5.90" LONG X 5.51" WIDE X 3.40" HIGH

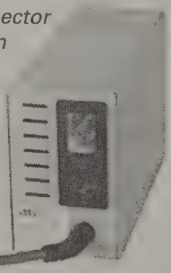
TABLETOP SERIES UNIVERSAL SWITCHING POWER SUPPLIES

FEATURES

- Communications Systems
- 20MS Hold-Up Time
- Lighted On-Off Switch
- Shelded Output Cable
- Military Applications
- IEC fused Connector
- Instrumentation
- High Efficiency
- Class B Filter

APPLICATIONS

- Process control Equipment
- Hard Disk Systems
- External Floppy Systems
- Tape Back-Up Systems
- Modems
- Terminals
- Small Computer Systems



TT SERIES: 30 WATTS, CASE SIZE - 7" LONG X 2.60" WIDE X 4.30" HIGH

NOTE: EACH OUTPUT CAN PROVIDE A PEAK LOAD CURRENT FOR 30 SECONDS, BUT TOTAL CONTINUOUS LOAD CANNOT EXCEED 30 WATTS

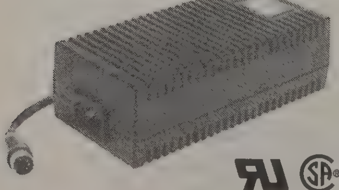
DESKTOP SERIES UNIVERSAL SWITCHING POWER SUPPLIES

FEATURES

- EMI VDE Class B
- No Minimum Load Required
- Single And Multiple Output
- Universal Input 90VAC To 260VAC

APPLICATIONS

- Computer Peripherals
- Hard Disk Drives
- Tape Drives
- Modems
- Test Instrumentation Products



DT330 SERIES: 30 WATTS, CASE SIZE - 6.5" LONG X 3.15" WIDE X 2.25" HIGH

MF SERIES

OPEN FRAME SWITCHING POWER SUPPLIES

FEATURES

- *High Surge Output*
- *115/230V Selectable*
- *Main Output Adjustable*
- *Compact & Low Cost*
- *Overload Protection*
- *Overvoltage Protection*
- *Short Circuit Protection*
- *100% Hi-Pot Tested*
- *100% Cycling Burn-In*
- *High Efficiency*
- *Built-In Line Filter, FCC Level A*

APPLICATIONS

- *Portable Computer Systems*
- *Instrumentation*
- *CRT Terminal*
- *Color Monitor*
- *Plotter*
- *Printer*
- *Robotics*
- *General Purpose*

COMMONLY USED ELECTRICAL/ELECTRONIC ABBREVIATIONS AND ACRONYMS

A
A/D acrylonitrile butadiene-styrene
A/D analog to digital
ADC analog to digital converter
ADP automatic data processing
AFC audio frequency control
AFT automatic filter test
ALGOL algorithmic language
AM a logical operator
AQL acceptable quality level
ASCII American national standard code for information interchange
ASIC application specific IC
ATE automatic test equipment
ATG automatic test generation
AWG American wire gauge

B
BALUN balanced to unbalanced
BASIC beginners' all-purpose symbolic instruction
BCD binary-coded decimal
BNC baby "N" connector
BUS basic utility syste

C
CAD computer-aided design
CAE computer-aided engineering
CAM computer-aided manufacture
CAMAC computer-automated measurement and control
CAPP computer-aided process planning
CAT computer-aided test
CATV cable television or community antenna television
CCC (leaded) ceramic chip carriers
CCD computer-controlled display
CERMET ceramic metal element
CIE computer-integrated engineering
CIM computer-integrated manufacturing
CLCC ceramic leadless chip carriers
CMOS complementary metal-oxide semiconductor
Comm. communications
CPS characters per second
CPU central processing unit

D
D/A digital to analog
DAC digital to analog converter
DBMS data base management system
DC direct current
DFT design for testability
DIAC bidirectional trigger diode
DIL dual in-line
DIN Deutsche Industrie Normenausschuss
DIP dual in-line package
DPM digital panel meter
DRAM dynamic RAM
DTL diode transistor logic

E
EDA electronic design automation
EDP electronic data processing
EBCDIC extended binary coded decimal interchange code
EEPROM electrically erasable PROM
EIA Electronic Industries Association
EMC electromagnetic compatibility
EMI electromagnetic interference
EMP electromagnetic pulse
EPROM erasable programmable ROM
ESR equivalent series resistance

F
FEP fluorinated ethylene propylene Copolymar, 200° Teflon
FET field-effect transistor
FM frequency modulation
FORTRAN formula translator

G
GaAsFET gallium arsenide FET
CMIP commn management information protocol
GPIB general purpose interface bus
GPS global positioning system

H
HF high frequency (3 to 30 MHz)
HIPOT test, measurement, and diagnostic equipment
HLL high level language
HV high voltage
Hz Hertz

I
IAB Internet Activities Board
IC integrated circuit
IDC insulation displacement contact
IF intermediate frequency
IO input/output (devices)
IR insulation resistance (or) infrared
ISDN integrated services digital network
ISO International Standards Organization

J
JEDEC Joint Electronic Device Engineering Council
JFET junction FET
JMOS junction MOS

K
kHz kilohertz (10^3 hertz)
KSR keyboard send /receive

L
LAN local area network
LC (filters) inductance/capacitance
LCC leaded chip carrier
LCD liquid crystal display
LED light-emitting diode
LF low frequency (30 to 300 kHz)
LIF low insertion force
LNA low noise amplifier
LNB low noise band
LSI large scale integration
LVDT linear velocity displacement transformer

M
MASER microwave amplification by stimulated emission of radiation
MATV master antenna television
µF microfarad
MHz megahertz
MIC microwave IC
MIPS million instructions per second
MIB microcomputer interface board
MOS metal oxide semiconductor
MOSFET metal oxide semiconductor FET
MOSIGT metal oxide semiconductor insulated-gate transistor
MOV metal oxide varistor
MPU microprocessor unit
MSI medium scale integration

N
NBS National Bureau of Standards
NEMP nuclear electromagnetic pulse
NIM national instrumentation module
NOR not OR
NTC negative temperature coefficient

O
OCR optical character reader
OEM original equipment manufacturer
OR a logical operator
OSI open systems interconnection

P
PAL programmable array logic
PC printed circuit
PCB printed circuit board
PCM pulse code modulation
PCS plastic clad silica
pF picofarad
PGA pin grid array
PIN positive-intrinsic-negative (transistor)
PLA programmable logic array
PLCC plastic leaded chip carrier
PLL phased lock loop
PPI plan position indicator
PROM programmable ROM
PTC positive temperature coefficient
PUT programmable unijunction transistor

Q
QAM quadrature amplitude modulation
Q (meter) quality-factor meter

R
RAM random access memory
RC resistance-capacitance
RFI radio frequency interference
RMS root mean square
ROM read only memory
RF radio frequency
RFC radio-frequency choke
RFI radio-frequency interference
RTD resistance-temperature detector
RTL resistor transistor logic
RTV room temperature vulcanizing
RW read/write

S
SAS silicon asymmetrical switch
SBC single board (micro) computer
SBS silicon bilateral switch
SCR silicon-controlled rectifier
SCS silicon-controlled switch
SDA source & detector assemblies
SGMP simple gateway monitoring protocol
SIDAC bidirectional voltage-triggered switch
SIMM single in-line memory module
SIP single in-line package
SMD surface mount device
SMT surface mount technology
SNMP simpole network management protocol
SO small outline
SOIC small outline IC
SOT small outline transistor
SSI small scale integration
SSR solid-state relay
STL Schottky transistor logic
SUS silicon unilateral switch

T
TC temperature coefficient
TCE thermal coefficient of expansion
TXCO temperature compensated crystal oscillator
TFE tetrafluoride ethylene propylene Copolymer, 250° Teflon
TRIAC bidirectional AC switch
TTL transistor-transistor logic
TTY teletypewriter

U
UHF ultra high frequency (300 MHz to 3 GHz)
UJT silicon unijunction transistor
UL Underwriters Laboratory
UPS uninterruptible power supply

V
VAC volts (of) alternating current
VAN value-added network
VAR volt-ampere reactive
VCR video cassette recorder
VDC volts (of) direct current
VHF very high frequency (30 kHz to 300 MHz)
VHSIC very high speed integrated circuit
VLF very low frequency (3 to 30 kHz)
VLSI very large scale integration
VME virtual machine environment
VRM voice recognition module
VTVM vacuum tube volt meter
VU volume unit
VSWR voltage standing wave ratio

W
WPS word processing software

Y
YIG yttrium iron garnet

Z
ZIF zero insertion force

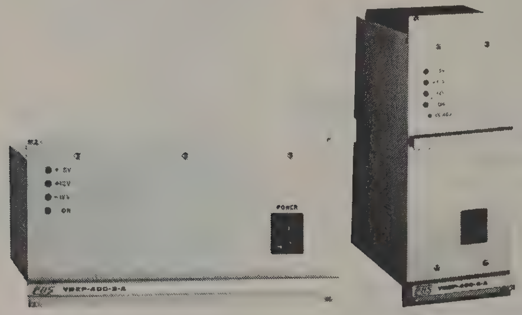
TRI SOURCE INC. Power Supplies

VMEP SERIES VMEbus/Eurocard Modular AC-DC Switching Power Supplies

The Power Pac™ VMEP Series is a group of high-efficiency switching power supplies in 130 models, with capacities ranging from 120 to 800 watts, and a large selection of outputs. The supplies are designed specifically for VMEbus and incorporate VMEbus-compatible signals ACFAIL and SYSRESET.

Power switch and indicator light, and LED indicators for the three outputs are located on the front panel. Input, output, system logic, and sensing connections are made on the back through connectors, or studs for high-current connections.

The units are designed for total environmental compatibility—physical and electrical—with VMEbus systems.



FEATURES

- Dual input 115/230 VAC @ 47-63 Hz
- Wide choice of outputs
- ±0.2% or 10mV max line/load regulation
- EMI filtering
- System logic interface
- Parallel operation/power sharing optional
- SMT construction
- Modular configuration
- Fully isolated outputs
- 50KHz switching frequency
- Floating grounds for choice of output polarity

Notes on Sizes:

Single height (3U)—5.06″ (128.5mm)
Double height (6U)—10.3″ (261.8mm)
Depth of all units—6.73″ (171mm)
Single-height units are about twice the width of double-height units of similar capacity. Widths are given in the tables that follow, at the head of each group.

NOTES ON RATINGS

The output current ratings in the charts indicate the maximum steady-state current that can be drawn from the appropriate output at 50°C. The total wattage drawn from all outputs shall not exceed the unit output wattage rating.

The 120- and 200-Watt unit ratings are for convection cooling. With forced air cooling of 40cfm the total output power rating of these units can be increased by 30%.

Auxiliary outputs have a peak current rating of 115% of ratings shown (20 sec. duration).

***NOTE:** The VMEP200-6 Series is also available with 48VDC input. Please order DC-input series as VMEC200-6-X, where X designates the desired outputs, as in the table above.

SIGNIFICANCE OF MODEL NUMBERS

For convenience in using this brochure, we have devised a system of model numbers as follows:

VMEC	XXX	-	X	-	X
Designates type	Designates total power		Designates height in VMEBus height units (1u=1.75″[44.45mm])		(Suffix) designates outputs as given in table

*** * NOTE:** 48 VDC output available on special order.

TRI SOURCE INC. Power Supplies

VMEC SERIES Modular DC-DC Converters

Designed specifically for VMEbus applications, these switchmode converters draw their DC input from the main supply or other external source, providing additional regulated DC outputs.
DC Input: 10-18VDC or 20-36VDC
Regulation: ±0.2% line/load.

- Floating grounds
- Remote sense
- Remote on/off
- Overvoltage protection
- Overload protection
- Line/load regulation < ±0.2%

KS SERIES Telecommunications AC-DC Power Sources

Regulated/unregulated, optional battery back-up

Power Pac™ KS Series power sources are designed for the key/PBX telephone system OEM and similar applications. Models have single outputs of either 24VDC or 48VDC. Input is 117VAC ±10%, 60 Hz, fuse protected. 230VAC ±10%, 50 Hz, is optional.

The units with the battery back-up circuitry ("B" and "D" models) charge stand-by batteries, not included, monitor line and output voltage, and automatically switch to batteries when needed. Normal operation is resumed when line voltage is restored.

TRI SOURCE INC. Power Supplies

EP SERIES Linear Open Frame Power Supplies

The EP Series of open-frame linear power supplies are conservatively-rated, convection-cooled units that provide low-noise, highly-regulated DC power required by test equipment, machine controls, and other sensitive applications. Available in single (EP), dual (EPD) and triple (EPT) output configurations, many of these models can be shipped from stock in small quantity.

FEATURES

- Rugged, conservative design
- High quality, high reliability
- Custom outputs/configurations welcomed
- Low noise, high regulation
- Overload protection: foldback current limiting on all outputs
- Overvoltage protection: standard on all outputs (can be deleted by request)
- Floating grounds for choice of output polarity
- Safety covers optional
- Five-year warranty
- UL recognized

SPECIFICATIONS

Input voltage: 105/152 or 210/250 VAC, 47/440 Hz.

Output voltage/current: See rating in table. Current ratings are for 57/440 Hz. Derate 10% at 50 Hz.

Output adj. range: ±5% or .5 VDC minimum.

Regulation: ±0.15% Line & Load combined.

Ripple: 1.5 mV RMS, 5 mV pk-pk max.

Stability: ±0.1% for 8 hours after warm-up.

Temperature operating: 0°C to 71°C continuous.

Temperature derating: Derate 2%/°C above 40°C.

Temperature coefficient: Better than 0.03%/°C.

Cooling: Convection cooled.

Overload protection: Built-in foldback type current limit circuit to protect against overload and short circuit condition, with automatic recovery. Set to operate at 120 to 135% of full load current at 40°C.

Overvoltage protection: Built-in SCR crowbar set at 120-130% of nominal output.

Remote sense: Standard on size 2C and larger.

Output polarity: Floating, either side may be grounded.

Shielding: Electrostatic shield between primary and secondary of transformer.

Transient response: 50μsec for a 50% load change to recover within ±10 mV band.

MINIGLOSSARY POWER SUPPLIES

Ambient reference: Refers to the temperature of the still air surrounding the power supply

Case reference: One of the specs that make up the nominal rating. The temperature of the case with the temperature of the surrounding still air at a stated temperature (usually 25°C).

Crowbar circuit: Protects the load. A protective circuit that applies a short circuit across the output immediately upon overload. (See overvoltage).

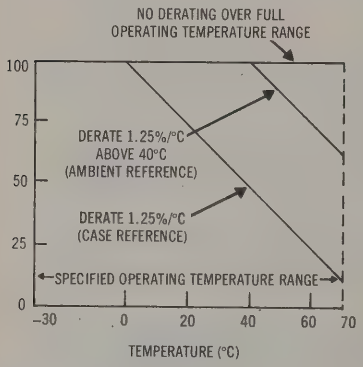

Fig. 1. Power output derating can be referred to ambient or case.

Derating: The degree output is reduced as temperature increases. Usually referenced to ambient case temperature and shown on a graph.

Efficiency: Ratio of the output power to the required input power. Usually expressed as a percentage given nominal environmental temperature.

EMI/RFI: Interference electronic circuitry caused by energy from electromechanical or radio frequency power supplies.

Foldback: Built-in protective circuits that automatically reduce the output voltage and/or current to very low levels in the event of an overload.

Holdover (Holdup): The interval that rated output will continue after input ceases. Usually milliseconds.

Input reflected current: The peak-to-peak alternating current generated by switching transients in DC/DC converters. Should not exceed 1%.

Inrush current limiting: Built-in circuits that monitor high currents through the rectifiers to the capacitors at turn ON. Circuit is usually inhibited as capacitors attain full charge.

Nominal rating: The spec value of the supply at stated conditions of input, output, and temperature.

Overshoot: A transient voltage change occurring during turn ON or OFF or during an abrupt load change.

Overvoltage (Overload) protection: Built-in circuits that protect the load or the supply by shutting it down or providing foldback.

Recovery: The time interval between the termination of an overload and restoration to normal operations.

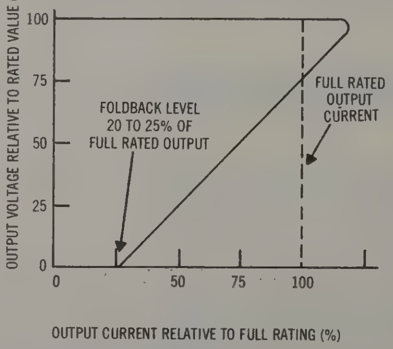

Fig. 2. Current foldback limiting self-resets with removal of fault.

Response: The time interval between a stated step change in input voltage or load current and return of output to normal operating conditions.

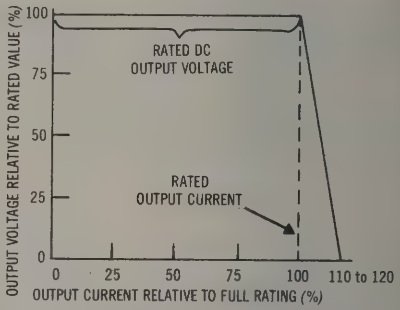

Fig. 3. Current limiting restrictions output current to a valve somewhat greater than full rated output; it resets when fault is removed.

Sensing: Regulation techniques that monitor output voltage and/or current. *Local sensing* refers to the output terminals. *Remote sensing* allows a feedback from the load circuit to the power supply.

Soft start: Allows the supply to start from zero current and/or voltage over a stated period of time during start up to prevent voltage overshoots and current imbalances.

Switchers: Power supplies using switching techniques to achieve high efficiency regulation. These techniques can have attendant EMI/RFI problems.

Tracking: The maintaining of fixed ratios between multiple outlets despite variations in line, load or temperature. Particularly important in supplies with symetrical (+)(−) outputs.

Transient protection: Circuitry designed to protect the supply from high amplitude line transients. Generally expressed in terms of peak voltage and maximum transient time duration.

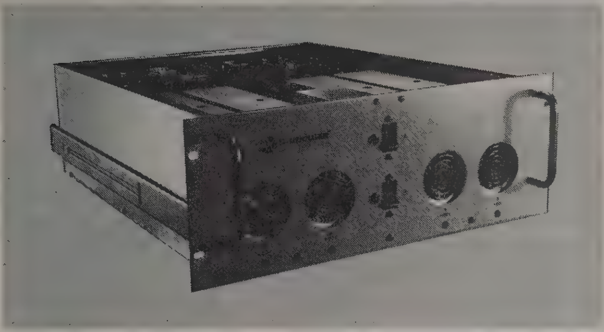
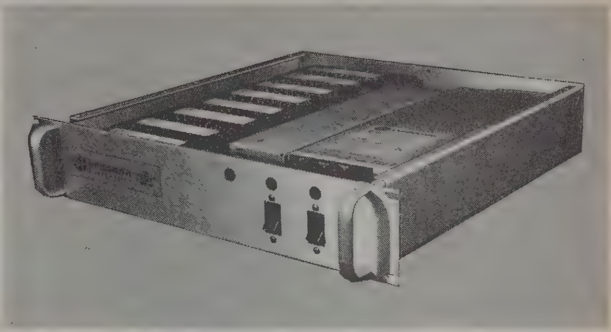
CUSTOMIZED POWER SOLUTIONS



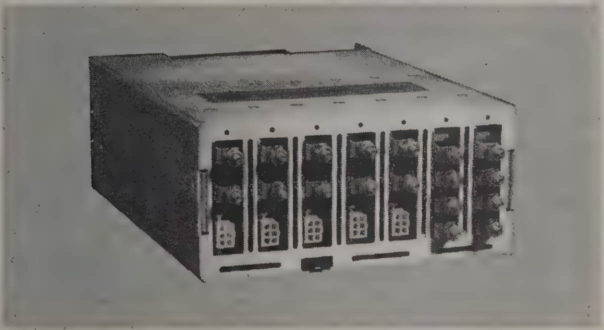
RACK MOUNT POWER SYSTEM

This 19″ rack mount power system was engineered for a remote communications station. Four standard P Series units are connected in a redundant configuration. Circuit breakers, alarm circuits, indicator lights and rear mounted terminal strips complete the package.



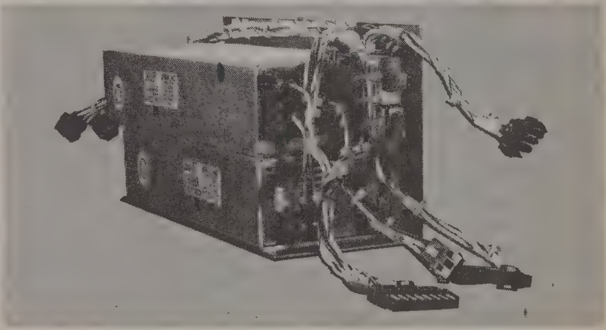
TOTAL UPS CAPABILITY

The B Series Battery Backup Switchers are available in standard 19″ rack packaging. These configurations include sealed lead acid batteries, circuit breakers for AC input and battery input as well as indicator lights to signal battery ready and battery operation.



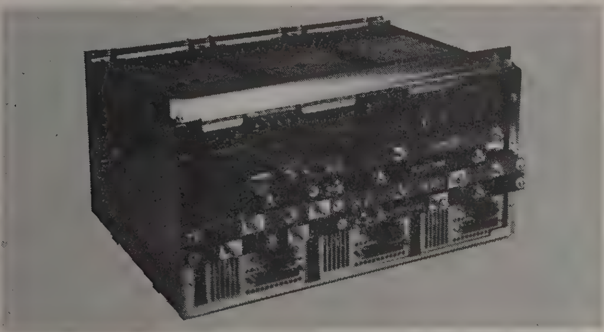
MULTI OUTPUT VME/VXI

This multi output configurable power supply can accommodate up to seven single or dual modules providing up to 14 outputs. With a maximum power of 800 watts it is ideally suited for standard bus applications including VME and VXI.



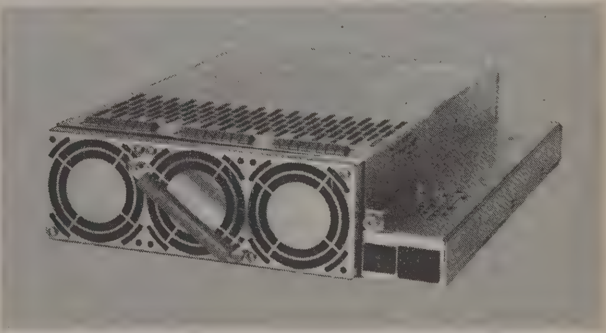
COMPLETE POWER SYSTEM

The customer for this special multi output power system needed a complete package including mounting bracket and cables with connectors. This customized solution "plugs" into the equipment and is securely mounted with built in "L" hooks and two fasteners.



2400W FAULT-TOLERANT POWER SYSTEM

This power system, customized for a large memory peripheral, has three H Series power supplies connected to current share with N + 1 redundancy. It has a triple output at 2400 watts total power, with battery backup.



500W FAULT-TOLERANT POWER SYSTEM

This 500 watt power system is customized for a computer peripheral application. It is N + 1 redundant with built-in isolation diodes and uses UNIMOD® U Series power modules.

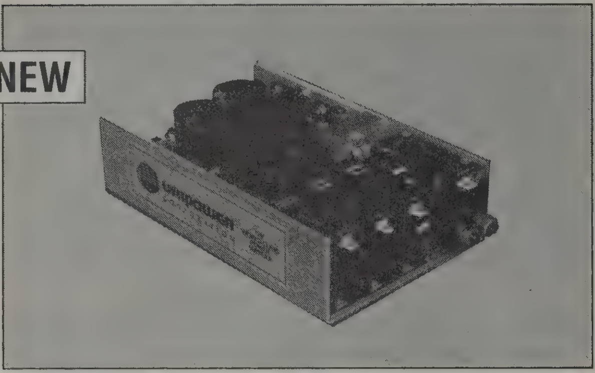
X SERIES: FLEXIBLE/MODULAR

1-4 Outputs, 140-500 Watts

NEW



KEY FEATURES

- Power Density To 6W/Cu. Inch
- UNIFLEX™ Modular Construction
- Ultra-Compact: 2.1 × 5 × 8 Inches
- Wide Range Adjust. Aux. Outputs
- Two Week Prototype Delivery
- Redundant N + 1 Capability
- 12V Main Avail. On Multi Outputs
- Open Frame Or Cased Versions

OPTIONS

- Worldwide Autorange 115/230VAC
- Class B EMI Filter
- Top-Mounted Fan With Cover
- End-Mounted Fan With Case

OTHER FEATURES

- Outputs From 2VDC To 36VDC
- Full Output Power To 50°C
- Fully Isolated Outputs
- Special Output Configurations
- Current Sharing Parallel Operation
- 130 kHz MOSFET Switching
- 70% Efficiency
- Soft Start
- Inrush Current Limiting
- Tight Regulation & Low Noise
- Overload And Overvoltage Protection
- Thermal Protection
- EMI Input Filter
- Remote Sense And Inhibit
- AC Power Fail Signal
- 24 Hour Power-Cycle Burn-In At 50°C
- Full Test Data With Each Unit
- Safety Agency Approvals
- Manufactured In U.S.A.
- Two Year Warranty

SPECIFICATIONS

Typical at Nominal Line, Full Load and 25°C Unless Otherwise Noted.

OUTPUT SPECIFICATIONS

Output Voltage Adjustment Range, All Outputs	2.4 Or 3 To 1
Line Regulation[1]	±0.1%
Load Regulation[2], NL-FL	0.1%
Ripple and Noise[3]	1.0% or 50mV
Hold-Up Time	20 msec.
Dynamic Response[4]	300 usec. max.
Temperature Coefficient	0.02%/°C
Overvoltage Protection, All Outputs	Power Shutdown
Remote Sense[5]	All Outputs

INPUT SPECIFICATIONS

Voltage Range, (Jumper Or Auto Range)	90 to 132 VAC 180 to 264 VAC
Input Frequency	47 to 63 Hz
Inrush Current, Cold Start	68A Peak, max.
Input EMI Filter, Conducted	FCC & VDE Class A or B
Input Protection	Internal Fuse

GENERAL SPECIFICATIONS

Efficiency[6]	70%, min.
Switching Frequency	130 kHz
Output Isolation, To Gnd & Other Outputs	±700VDC

ENVIRONMENTAL SPECIFICATIONS

Operating Temp. Range, Rated Load	0°C to 50°C
Derating 50°C To 70°C	2.5%/°C
Storage Temperature Range	−40°C to +85°C
Cooling Required[7],	400 LFM min.
Vibration	Per MIL-STD 810D, Method 514-3, Cat-I, Proc I
Shock	Per MIL-STD 810D, Method 516-3, Proc II, IV, VI

PHYSICAL SPECIFICATIONS

Case Material	Aluminum
Dimensions	See Case Drawings
Weight, Standard	3.5 lbs. (1.6kg)
Top Fan Cooled	3.7 lbs. (1.7kg)
End Fan With Case	4.2 lbs. (1.9kg)

NOTES:
1. Measured over AC input range.
2. Remote sense must be connected.
3. Whichever is greater. 20MHz bandwidth.
4. 4% maximum deviation with recovery to within 1% for 25% step change at 75% rated load.
5. 0.25V maximum load cable voltage drop on all outputs.
6. For models with 5V or higher output voltages.
7. Two options with fan are available. See "Option" table.

UNIFLEX™ WIDE RANGE FIELD ADJUSTABLE OUTPUTS

AVAILABLE AUXILIARY OUTPUT MODULES		
VOLTAGE RANGE, ADJ.	MAXIMUM CURRENT	MAX. WATTS
2V TO 6V	15A	90W
5V TO 15V	12A	150W
15V TO 36V	7A	150W

	OPTIONS[3]
A	Autorange (115/230VAC)
C	Class B EMI Filter[4]
F	Current Share (All Outputs)
M	Top-Mounted Fan with Cover
N	End-Mounted Fan with Case

NOTES:
1. Maximum continuous total output power must not exceed the maximum power rating.
2. Maximum continuous auxiliary output power must not exceed the maximum power rating shown for each auxiliary output module.
3. Add suffix letters to model for options.
4. Available only with option N.
5. 12V main available (consult factory).

MATING PLUGS
All connectors have standard 25 mil. (0.6mm) square, 0.1 inch (2.5mm) center, pins.

FET SERIES: LOW PROFILE
1-5 Outputs, 250 & 350 Watts

NEW

KEY FEATURES
- Low Profile Cases (2.46 Inches)
- Power Density To 2.5 Watts/Cu. Inch
- Jumper Selectable 115/230 VAC
- Redundant N + 1 Capability
- 150,000 Hours MTBF

OPTIONS
- Worldwide Autorange
- Isolated Output 4
- Remote AC

OTHER FEATURES
- Outputs From 5VDC To 48VDC
- Full Output Power To 40°C
- Special Output Configurations
- Current Sharing Parallel Operation
- 75 kHz Switching
- 70% Min. Efficiency
- Mag. Amp. Regulation
- EMI Input Filter
- DC Ball Bearing Fan (FET 350)
- Soft Start
- Inrush Current Limiting
- Overload and Overvoltage Protection
- Remote Sense On Output 1
- AC Power Fail Signal
- Safety Agency Approvals
- Two Year Warranty

SPECIFICATIONS

Typical at Nominal Line, Full Load and 25°C Unless Otherwise Noted.

OUTPUT SPECIFICATIONS

Output Voltage Adjustment Range	±5%
Line Regulation[1]	±0.5% max.
Load Regulation[2], Outputs 1 & 4	±1.0% max.
Outputs 2 & 3	±2.0% max.
Output 5	±4.0% max.
Cross Regulation[3], Output 5	±6.0% max.
Ripple and Noise[4], All Outputs	2.0% pk to pk
Hold-Up Time	20 msec., min.
Dynamic Response[5]	500 usec. max.
Temperature Coefficient	0.05%/°C, max.
Overvoltage Protection, Main Output	SCR Crowbar
Remote Sense[6]	Output 1

INPUT SPECIFICATIONS

Voltage Range, User Selectable (jumper)	90 to 132 VAC 180 to 264 VAC
Input Frequency	47 to 63 Hz
Inrush Current, Cold Start	50A Peak
Input EMI Filter, Conducted	FCC & VDE Class A
Input Protection	Internal Fuse

GENERAL SPECIFICATIONS

Efficiency	70%, min.
Switching Frequency	75 kHz
MTBF[7]	150,000 hours

ENVIRONMENTAL SPECIFICATIONS

Operating Temperature	0°C to 70°C
Derating 40°C To 70°C	1.67%/°C
Storage Temperature Range	−40°C to +85°C
Cooling[8],	Internal DC Ball Bearing Fan
Vibration	Per MIL-STD 810D, Method 514-3, Cat-I, Proc I
Shock	Per MIL-STD 810D, Method 516-3, Proc II, IV, VI

PHYSICAL SPECIFICATIONS

Case Material	Aluminum & Steel
Dimensions	See Case Drawings
Weight	4 lbs. (1.8kg)

NOTES:
1. 96-132, 192-264 VAC line change.
2. 60% ± 40% load change. Remote sense must be connected on main output.
3. 60% ± 40% output 1 load change.
4. DC-30MHz differential measurement.
5. 4% maximum deviation with recovery to within 1% for 25% step change in load.
6. 0.25V maximum load cable voltage drop.
7. Full load @ 25°C per MIL HDBK 217E.
8. FET250 models do not have fan and require 20 CFM of forced air cooling.

	OPTIONS
A	Auto Range (115/230VAC) (FET350 Series Only)
F	Isolated Output 4
RM	Remote AC

MATING PLUGS AND PINS

1 or 2 × 0.1″ 4-way, accepting Molex 6471 Series-Interface.

Housing: Molex 22-01-2045

Pins: Molex 08-05-0032

NOTES:

1. Maximum peak output power with a duration of 30 seconds in any 5 minutes is 300W for FET250 Series and 400W for FET350 Series.
2. For FET250 Series, requires 20 CFM of forced air cooling. For free air convection, reduce output power to 200W.

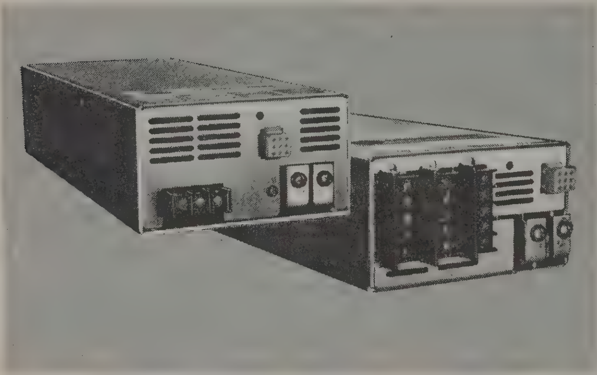
P SERIES: LOW PROFILE

1-7 Outputs, 240-800 Watts



KEY FEATURES

- Low Profile Cases (From 2.75")
- Power Density To 3.6W/Cubic Inch
- Switch Selectable 115/230VAC
- Redundant N + 1 Capability
- 12V Main On Multi For Disc Drives
- No Load Oper. (Single & Aux. Outputs)

OPTIONS

- Worldwide Autorange 115/230VAC
- DC Input (42V To 56V)
- Battery Backup Connector
- DC "OK" Signal
- No Load Operation (Main On Multi)
- Current Share/Monitor (Main Output)
- Current Share (Auxiliary Outputs)
- Reverse Air Flow

OTHER FEATURES

- Outputs From 2VDC To 48VDC
- Full Output Power To 50°C
- Fully Isolated Outputs
- Special Output Configurations
- 100Khz MOSFET Switching
- Efficiency To 85%
- MTBF To 110,000 Hours
- Surface Mount Technology
- Hi-Rel Hybrid Control Circuits
- Current Share On All Outputs
- Modular Auxilliary Outputs
- Mag Amp Regulation
- Rear Mounted DC Ball Bearing Fan
- Soft Start
- Electronic Inrush Current Limiting
- Tight Regulation, Low Noise
- Overload And Overvoltage Protection
- Thermal Warning And Protection
- EMI Input Filter
- Remote Sense, Inhibit, Margin
- AC Power Fail Signal
- 24 Hour Power-Cycle Burn-In At 50°C
- Full Test Data With Each Unit
- Safety Agency Approvals
- Manufactured In U.S.A.
- Two Year Warranty

SPECIFICATIONS

Typical at Nominal Line, Full Load and 25°C Unless Otherwise Noted.

OUTPUT SPECIFICATIONS

Output Voltage Adjustment Range, All Outputs	±5%
Line Regulation[1]	0.2% or 10 mV, max.
Load Regulation[2], NL-50% FL, 50%FL-FL	0.2% or 10 mV, max.
Cross Regulation[2], Multi-Output	0.2% or 10 mV, max.
Ripple and Noise[3]	
Main Output	1.0% or 50 mV, max.
Auxiliary Outputs	1.5% or 75 mV, max.
Hold-Up Time	20 msec., min.
Dynamic Response[4]	500 usec., max.
Temperature Coefficient	0.02%/°C, max.
Overvoltage Protection, All Outputs	Power Shutdown
Remote Sense[5]	All Outputs Except 2A Auxiliaries

INPUT SPECIFICATIONS

AC OPERATION

Voltage Range, User Selectable (Switch)	90 to 132 VAC 180 to 264 VAC
Input Frequency	47 to 63 Hz
Electronic Inrush Current Limiting	40A Peak
Input EMI Filter, Conducted	FCC & VDE Class A
Input Protection	Internal Fuse

DC OPERATION

Input Voltage	42 to 56 VDC
Input Protection	Internal Fuse

GENERAL SPECIFICATIONS

Efficiency	70 to 85%
Switching Frequency	100 kHz
MTBF[6]	Up to 110,000 hrs.
Input To Output Isolation	3000 VAC

ENVIRONMENTAL SPECIFICATIONS

Operating Temperature	0°C to 65°C
Derating 50°C to 65°C	2.4%/°C
Storage Temperature Range	−40°C to +85°C
Cooling	Internal DC Ball Bearing Fan
Vibration	Per MIL-STD 810D, Method 514-3, Cat-I, Proc I
Shock	Per MIL-STD 810D, Method 516-3, Proc II, IV, VI

PHYSICAL SPECIFICATIONS

Case Material	Aluminum
Dimensions	See Case Drawings
Weight:	
250W, 400W, 500W, 600W Single	4.0 lbs. (1.8 kg.)
400W, 500W Multi	6.0 lbs. (2.7 kg.)
650W, 800W Multi	8.5 lbs. (3.9 kg.)

NOTES:
1. Whichever figure is greater. Measured over AC input range.
2. Whichever figure is greater. Remote sense must be connected.
3. Whichever figure is greater. 20 MHz bandwidth.
4. 4% maximum deviation with recovery to within 1% for 25% step change at 75% rated load.
5. 0.25V maximum load cable voltage drop on all outputs.
6. Full load @ 25°C per MIL HDBK 217E.

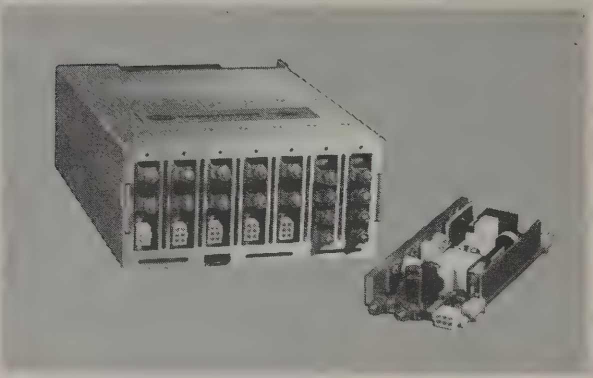
U-SERIES: MODULAR/CONFIGURABLE

3-14 Outputs, 400-800 Watts



KEY FEATURES

- Fully Modular UNIMOD® Construction
- Custom Configuration Of Std Modules
- Worldwide Auto Range (115/230VAC)
- Wide Output Adjust. Range
- Two Week Prototype Delivery
- Redundant N + 1 Capability
- Global Inhibit, Remote On-Off
- No Load Operation
- Ideal For VME/VXI Applications

OPTIONS

- Current Share On Single Modules
- Reverse Air Flow

OTHER FEATURES

- Outputs From 2VDC To 48VDC
- Full Output Power To 50°C
- Fully Isolated Outputs
- Dual And Single Output Modules
- Independent Switching Regulators
- 100Khz MOSFET Switching
- Efficiency To 85%
- MTBF To 100,000 Hours
- Surface Mount Technology
- DC Power Good (Each Module)
- Rear Mounted DC Ball Bearing Fan
- Soft Start
- Electronic Inrush Current Limiting
- Tight Regulation, Low Noise
- Overload And Overvoltage Protection
- Thermal Warning And Protection
- EMI Input Filter
- Remote Sense, Inhibit
- AC Power Fail Signal
- 24 Hour Power-Cycle Burn-In At 50°C
- Full Test Data With Each Unit
- Safety Agency Approvals
- Manufactured In U.S.A.
- Two Year Warranty

SPECIFICATIONS

Typical at Nominal Line, Full Load and 25°C Unless Otherwise Noted.

OUTPUT SPECIFICATIONS

Output Voltage Adjustment Range	See Table Next Page
Line Regulation[1]	0.2% or 10 mV, max.
Load Regulation[2]	
Single Output Modules	0.2% or 10mV, max.
Dual Output Modules	0.5% or 25mV, max.
Cross Regulation[2]	0.2% or 10 mV, max.
Ripple and Noise[3]	1% or 50 mV, max.
Hold-Up Time	20 msec., min.
Dynamic Response[4]	500 usec., max.
Temperature Coefficient	0.02%/°C, max.
Overvoltage Protection, All Outputs	Power Shutdown
Remote Sense[5]	All Single Output Modules

INPUT SPECIFICATIONS

Voltage Range, (Auto Range)	90 to 132 VAC 180 to 264 VAC
Input Frequency	47 to 63 Hz
Inrush Current	80A Peak
Input EMI Filter, Conducted	FCC & VDE Class A
Input Protection	Internal Fuse

GENERAL SPECIFICATIONS

Efficiency	70 to 85%
Switching Frequency	100 kHz
MTBF[6]	Up to 100,000 hrs.
Input To Output Isolation	3000 VAC

ENVIRONMENTAL SPECIFICATIONS

Operating Temperature	0°C to 65°C
Derating 50°C to 65°C	3.3%/°C
Storage Temperature Range	−40°C to +85°C
Cooling	Internal DC Ball Bearing Fan
Vibration	Per MIL-STD 810D, Method 514-3, Cat-I, Proc I
Shock	Per MIL-STD 810D, Method 516-3, Proc II, IV, VI

PHYSICAL SPECIFICATIONS

Case Material	Aluminum
Dimensions	3.75″H × 8″W × 11″L
Weight	8.0-10.0 lbs. (3.6-4.5 kg.)

NOTES:
1. Whichever figure is greater. Measured over AC input range.
2. Whichever figure is greater. Remote sense must be connected.
3. Whichever figure is greater. 20 MHz bandwidth.
4. 4% maximum deviation with recovery to within 1% for 25% step change at 75% rated load.
5. 0.25V maximum load cable voltage drop on all outputs.
6. Full load @ 25°C per MIL HDBK 217E.

LISTED PRODUCTION FACILITY

FAX: (305) 971-1837

HOW TO ORDER

The U Series 800W UNIMOD® power supply allows the user to specify up to seven of the fifteen available output modules in virtually any combination within the 800 watt total output power[1] capability of the supply. Determining the model designation of the desired configurations is as simple as listing the output modules selected.

Example: Six output power supply with current share option:

Qty	Description	Module	Watts
1	2V40A	B	80
2	5V40A	G	400
2	12V10A	H	240
1	24V5A	M	120
		Total	840

		Series	Modules	Option
Model	**=**	**UM**	**— B G G H H M —**	**H**
			See Module Table	See Option Table

Position of modules will be determined by the factory.
Filler panels will be provided as needed for empty slots.

NOTES:
1. The maximum total load for all modules must not exceed 800 watts.
2. The maximum load power and current must not exceed the rated values for each module.

AVAILABLE OUTPUT MODULES[2]			
VOLTAGE/ CURRENT	**WATTS**	**ADJUST RANGE**	**MODULE CODE**
2V40A	80	±10%	B
3.3V40A	132	±10%	C
5V20A 5V40A	100 200	4.5-6.5V 4.5-6.5V	F G
12V10A 12V20A	120 240	10.8-16.5V 10.8-16.5V	H J
15V8A 15V16A	120 240	10.8-16.5V 10.8-16.5V	K L
24V5A 24V10A	120 240	20-30V 20-30V	M N
48V2.5A 48V5A	120 240	±10% ±10%	P Q
5V5A/12V5A	85	±10%	R
12V5A/12V5A	120	±10%	S
15V4A/15V4A	120	±10%	T

For special modules consult factory.

HOW TO ORDER

The H Series 1200W UNIMOD® power supply allows the user to specify up to 6 of the available 27 modules, including a battery backup module, in a wide range of combinations. Maximum continuous total output power of the combination selected must not exceed 1200 watts at 220 VAC input (1000 watts at 120 VAC input). The total number of *slots* occupied by the selected modules must not exceed 6.

Determining the model designation of the desired combination is as simple as listing the code of the modules selected.

Example: Four output supply with Class A EMI filter, battery backup and current share option:

Qty	Description	Module	Slots	Watts
1	5V100A	2G	1.5	500
1	12V20A	3D	1	240
1	24V10A	5D	1	240
1	Battery Backup	UB	2	
		Total	5.5	980

	Series	Modules	Options
Model =	**HPA –**	**2G 3D 5D UB –**	**H**
	Class A Input Filter (A) Class B Input Filter (B)	See Module Table	See Option Table

Note: Position of modules will be determined by the factory.
Filler panels will be provided as needed for emply slots.

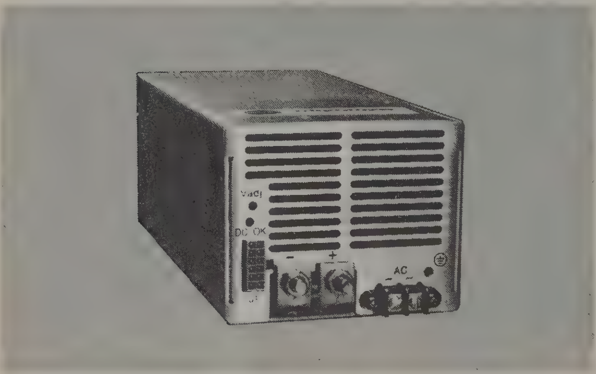
F SERIES: POWER FACTOR CORRECTED

Single Output, 650-1000 Watts



KEY FEATURES

- .98 Power Factor (UNIFACTOR®)
- Patented Circuit (U.S. Pat 4,831,508)
- Low Harmonic Current Distortion
- Designed To Meet IEC 555-2
- Worldwide Auto Range (115/230VAC)
- Compact 4″ & 5″ × 5″ × 12″ Cases
- Power Density To 3.3W/Cubic Inch
- Redundant N + 1 Capability
- No Load Operation
- LED Output Power Indicator

OPTIONS

- DC "OK" Signal With Inverse
- Current Share and Current Monitor
- Reverse Air Flow

OTHER FEATURES

- Outputs From 2VDC To 48VDC
- Full Output Power To 50°C
- 100Khz MOSFET Switching
- Efficiency To 85%
- MTBF To 100,000 Hours
- Surface Mount Technology
- Rear Mounted DC Ball Bearing Fan
- Soft Start
- Electronic Inrush Current Limiting
- Tight Regulation, Low Noise
- Overload And Overvoltage Protection
- Thermal Warning And Protection
- EMI Input Filter

Line Regulation[1]	0.2% or 10 mV, max.
Load Regulation[2]	0.2% or 10 mV, max.
Ripple and Noise[3]	1% or 50 mV, max.
Hold-Up Time	20 msec., min.
Dynamic Response[4]	500 usec., max.
Temperature Coefficient	0.02%/°C, max.
Overvoltage Protection	Power Shutdown
Remote Sense[5]	Standard

INPUT SPECIFICATIONS

Voltage Range, (Auto Range)	90 to 132 VAC 180 to 264 VAC
Input Frequency	47 to 63 Hz
Inrush Current	80A Peak
Input EMI Filter, Conducted	FCC & VDE Class A
Input Protection	Internal Fuse
Power Factor	0.98

GENERAL SPECIFICATIONS

Efficiency	70 to 85%
Switching Frequency	100 kHz
MTBF[6]	Up to 100,000 hrs.
Input To Output Isolation	3000 VAC

ENVIRONMENTAL SPECIFICATIONS

Operating Temperature	0°C to 65°C
Derating 50°C to 65°C	3.3%/°C
Storage Temperature Range	−40°C to +85°C
Cooling	Internal DC Ball Bearing Fan
Vibration	Per MIL-STD 810D, Method 514-3, Cat-I, Proc I
Shock	Per MIL-STD 810D, Method 516-3, Proc II, IV, VI

PHYSICAL SPECIFICATIONS

Case Material	Aluminum
Dimensions	See Case Drawings
Weight:	
650W	13.0 lbs. (5.9 kg.)
800W & 1000W	14.0 lbs. (6.4 kg.)

NOTES:
1. Whichever figure is greater. Measured over AC input range.
2. Whichever figure is greater. Remote sense must be connected.
3. Whichever figure is greater. 20 MHz bandwidth.
4. 4% maximum deviation with recovery to within 1% for 25% step change at 75% rated load.
5. 0.25V maximum load cable voltage drop.
6. Full load @ 25°C per MIL HDBK 217E.
7. 5VDC standard, consult factory for 3.3, 12, or 24VDC

ACTIVE LOW-FREQUENCY POWER FACTOR CORRECTION

Active low-frequency (LF) power factor correction circuits operate at a switching frequency of twice the line frequency, 100 or 120Hz, and in synchronism with it. This method uses an active switch, a LF inductor and a control circuit to provide power factor correction.

One way to implement active LF correction is shown below. This circuit, in simplified form, is the patented UNIFACTOR® technique used by UNIPOWER in its switching power supplies. It was chosen because of its simplicity and the fact that it provides the best overall performance with minimum impact on size, efficiency, reliability, EMI and cost.

J SERIES: INDUSTRY STANDARD
1-4 Outputs, 500-1200 Watts

KEY FEATURES

- Industry Standard 5″ × 8″ Cases
- Power Density To 3.3W/Cubic Inch
- Jumper Selectable 115/230VAC
- Redundant N + 1 Capability
- No Load Operation (Single Output)

OPTIONS

- DC "OK" Signal
- Current Share and Current Monitor (Main Output)
- Reverse Air Flow

OTHER FEATURES

- Outputs From 2VDC To 48VDC
- Full Output Power To 50°C
- Fully Isolated Outputs
- Current Sharing Parallel Operation
- Efficiency To 75%
- MTBF To 85,000 Hours
- Unique Integral Thermal Design
- Synchronous Switching Regulators
- Rear Mounted DC Ball Bearing Fan
- Soft Start
- Electronic Inrush Current Limiting
- Tight Regulation, Low Noise
- Overload And Overvoltage Protection
- Thermal Warning And Protection
- EMI Input Filter
- Remote Sense, Inhibit, Margin
- AC Power Fail Signal
- 24 Hour Power-Cycle Burn-In At 50°C
- Full Test Data With Each Unit
- Safety Agency Approvals
- Manufactured In U.S.A.
- Two Year Warranty

SPECIFICATIONS

Typical at Nominal Line, Full Load and 25°C Unless Otherwise Noted.

BATTERY BACKUP SWITCHERS
1-8 Outputs, 250-1200 Watts

GENERAL FEATURES

- Provides UPS Capability
- Simpler & More Efficient Than UPS
- AC And Battery Inputs
- Uses Sealed Lead-Acid Battery
- Automatic Transfer To Battery
- Transient-Free Battery Transfer
- Integral Battery Charger
- Charger Control & Supv. Circuitry
- Battery Protective Circuits
- Ideal For Fault-Tolerant Systems
- 19 Inch Rack Mount Available
- Safety Agency Approvals

PRINCIPLES OF OPERATION

These units accept 115/230 VAC and 48 VDC input from an externally connected sealed lead-acid battery. Power to the output is normally provided by power flow from the AC input through a conventional off-line switching circuit. The battery is charged by an internal charging circuit. When AC failure is sensed, energy is drawn from the battery through a switching up-converter to keep the main converter operational to supply its rated output. The unit has control and monitor features to assure proper transfer of power between the AC source and the battery without disturbing the load.

P SERIES

KEY FEATURES

- 24V Or 48V Battery Operation
- 24V: Up To 500W Output
- 48V: Up To 600W Output
- Separate Remotable Batt. Backup Unit
- 24V Input Range: 21 To 29 VDC
- 48V Input Range: 40.5 To 56 VDC
- Reverse Voltage Protection
- Switch-Selectable 115/230 VAC
- 7 Different Output Voltages Available
- Low-Profile Cases
- 100 kHz MOSFET Switching
- Uses Surface-Mount Technology
- Thermal Protection & Warning
- FCC & VDE Level A Input Filter
- See P Series For Full Specs.

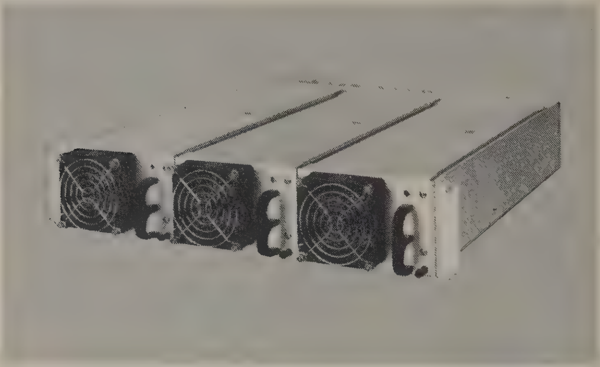
TP SERIES: HOT PLUG N + 1

1-12 Outputs, Up To 3000 Watts



KEY FEATURES

- P Series Units In A Pluggable Case
- 250 To 600 Watts Per Unit
- 1 To 4 Outputs Per Unit
- Outputs From 2VDC To 48VDC
- N + 1 Redundancy
- Current Share On All Outputs
- Integral Isolation Diodes
- True Hot Plug Replacement
- High Reliability Connectors
- Up To 6 Units Per Chassis
- Standard 19″ Rack Mountable
- Standard 3.5″ and 7″ Panel Height
- LED DC Power Good Indicators
- Each Unit Independently Cooled
- User Serviceable DC Ball Bearing Fan
- Pluggable Interface Termination

OTHER FEATURES

- Similar To Low Profile P Series

NOTE: All output, input, general and environmental specifications are similar to the P Series. Consult factory for mating connectors.

COMPACT DISC DATA STORAGE
9660
Includes the complete 1993 IC Master plus the 1993 Directory of IC Data Pages plus the enhanced 1993 Alternate Source Directory plus a powerful inquiry generation and tracking system
© 1993 Hearst Business Communications, Inc. All Rights Reserved
MANUFACTURED IN USA BY NIMBUS

3 reference sources on a single compact disk! **CD-ROM PLUS** is fast, easy to use and very user friendly. It combines all of the Master Selection Guides and all of the Indexes from the printed IC Master with hundreds of additional manufacturers data sheets. **CD-ROM PLUS** also includes the entire Directory of IC Manufacturers' Data Pages plus a powerful Inquiry Generation and Tracking System.

- **You can find the exact IC you need in seconds...**
- **Compare specs on your screen...**
- **Print the search results directly to your computer or printer!**

PLUS...

- **You can access over 1,100 manufacturer's data sheets and send them to your laser printer.**

Published annually in the Spring

CD-ROM PLUS runs on any ISO9660 CD-ROM reader and any IBM AT or better PC (or 100% compatible).

No complex software involved. Start your reader and play CD-ROM PLUS. Once you experience the simplicity and speed of CD-ROM PLUS, you'll never work without it again!

JOIN THE CD-ROM BANDWAGON.

Universal Voltronics

A DIVISION OF THERMO VOLTEK • A THERMO ELECTRON CORP.

Oil-Free Capacitor Charging Power Supplies

Universal Voltronics, a division of Thermo Voltek and Thermo Electron Corp., has been a leader in the High Voltage industry for over 30 years. Our products include: • High Voltage Switching Supplies to 30KW • High Voltage Linear Power Supplies to 400KV and 500KW • Precisely regulated high voltage power supplies to 500KV • High voltage line type and hard tube modulators • Solid state pulse generators to 100KV • Microwave component test sets • High voltage dividers • Isolation Transformers, standard line from 10kV to 250kV • High Voltage DC Power Packs, 2kV to 40kV • Multi-megajoule, megamp capacitor bank systems • Crowbar protection circuits.

Universal Voltronics' new High Frequency Transformer Rectifier eliminates the need for oil/insulating fluid. The result is:

- *Compact, lightweight packaging*
- *30%-40% reduction in peak power drawn from source*
- *Average power which is equal to peak power*
- *The highest safety–reduced risk of fire or accident*
- *Highest efficiency.*

APPLICATIONS INCLUDE:

- Medical/Industrial Lasers
- X-ray Lithography
- E-Beam/Plasma Etching
- EMP/Flash X-Ray Simulators
- Industrial Welding/Heat Treating
- Magnetic Metal Forming

AVAILABLE WITH FULL CONTROLS

- 10 Turn Voltage Control
- 10 Turn Current Control
- 3½ Digit Voltmeter
- HV On/Off Control
- Indicator Lamps
- 3½ Digit Ammeter

TYPE BRI-(KV)-5KJ SPECIFICATIONS

Standard Maximum Output Voltages	Average Current at 100% Voltage	Average Current at 75% Voltage and below
1 kV	10 A	13.3A
2.5 kV	4 A	5.3 A
5 kV	2 A	2.7 A
10 kV	1 A	1.3 A
25 kV	400 mA	533 mA
35 kV	285 mA	380 mA
50 kV	200 mA	267 mA
70 kV	140 mA	190 mA

At voltages between 75% and 100% of maximum, derate current such that kV x mA = 10,000.
Other voltages and currents available, special order.

Charge Rate:	5 kJ/S PK 5 kJ/S AVG @ Frequency < 200Hz 4 kJ/S AVG @ Frequency = 2 kHz derate linearly from 200 Hz to 2kHz
Charge Voltage Regulation:	Plus or minus .5% to 2kHz 100 ppm/°CTC Plus or minus .1% available as an option
Efficiency:	87% at full load
Input Voltage:	190 - 260V 50-400 Hz 3 phase 20A max. standard
Power Factor:	>85%
Inrush Current:	<20A
Protection:	Overvoltage (internally adjustable) also protects against open circuit Prefire detection Auto inhibit with adjustable recharge delay Latched load detection Overcurrent Over temperature Internal & external interlocks
Packaging:	7" High, 19" rack mount panel, 21" Deep, 45-70 lbs depending on voltage.
To Order:	Specify kV and Polarity; Example BRI-5-5kJ-P is a 5kV, positive supply.

UVC's MOSFET and IGBT - Based Switching Power supplies offer the highest level of reliability and quality and are supported by UVC's thirty years of expertise as a High Voltage Industry Leader. Our Switching Power Supplies have Low Stored Energy and are Arc and Short Circuit Protected.

FEATURES:

- Compact and lightweight
- Low stored energy
- Low EMI
- Precision regulation
- Arc and short circuit protection
- Low ripple
- High stability
- 110V input standard up to 1.5kW
- 220V input standard above 1.5kW (380V available upon request)

APPLICATIONS:

- Medical/Industrial Lasers
- Ion Implantation
- Electrostatic Paint/Powder Deposition
- X-ray Lithography
- E-Beam/Plasma Etching
- EMP/Flash X-Ray Simulators
- Industrial Curing/Welding/Heat Treating
- Isotope Separation
- E-Beam Evaporation

BRC 10,000
BRC 4000
KILOVOLTS
MILLIAMPERES
HIGH VOLTAGE
POWER

Features:

Front Panel Controls:

On-Off circuit breaker and Power-On light
HV-On pushbutton and light
HV-Off pushbutton and light
Voltage and Current controlled by locking 10 turn potentiometer, 0.1% resolution
Meters are single range 2% FS analog

Packaging:

Laboratory models are designed for standard 19 in. rack mountng. OEM and Airborne models are designed to the system requirements

Options:

Reversible output, Digital meters, Custom voltage and current ranges.

Remote controls – Consult Factory

Typical Specifications:

Input:	115V 1ø or 208V 3ø (1000W and above)
Output:	Adjustable, 0 to full rating. Rated current may be drawn at any voltage setting
Voltage Regulation:	± 0.01% for line voltage of 105 – 125 volts. ± 0.01% no load to full load
Current Regulation:	Line, ± 0.01% for line voltage Between 100 – 125 volts Load, less than 100 μa over compliance range of 10% to 100%
Ripple:	0.01% of rated V at full load
Stability:	.02%/hour, 0.05%/8 hours after warm up
Polarity:	Fixed, positive or negative Specify at time of order

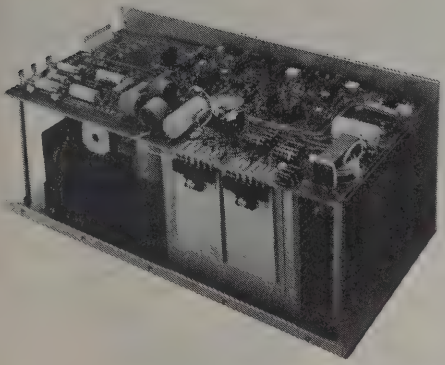
High Voltage Power Supplies Optimized for OEM Applications from Universal Voltronics



Ensure the highest level of reliability and quality in your system with high voltage power supplies from Universal Voltronics. UVC has delivered thousands of high voltage power supplies for laser and other applications which require precision regulation. Our high frequency systems are compact, easy to use, designed to operate without ballast resistors in either the CW or pulse modes in gas discharge applications and provide full power at 75% of maximum kV.

	MODELS		
	500W	**1000W**	**2000W**
Maximum Continuous Output Voltage**	50kv	50kv	50kv
Maximum CW Power Output	500W	1000W	2000W
Voltage regulation from 20 to 50 kV	±5% of FS*	±5% of FS*	±5% of FS*

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with the System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will be mailed to you under separate cover.

Don't waste any more time. Get organized now!

EEM FILE SYSTEM,

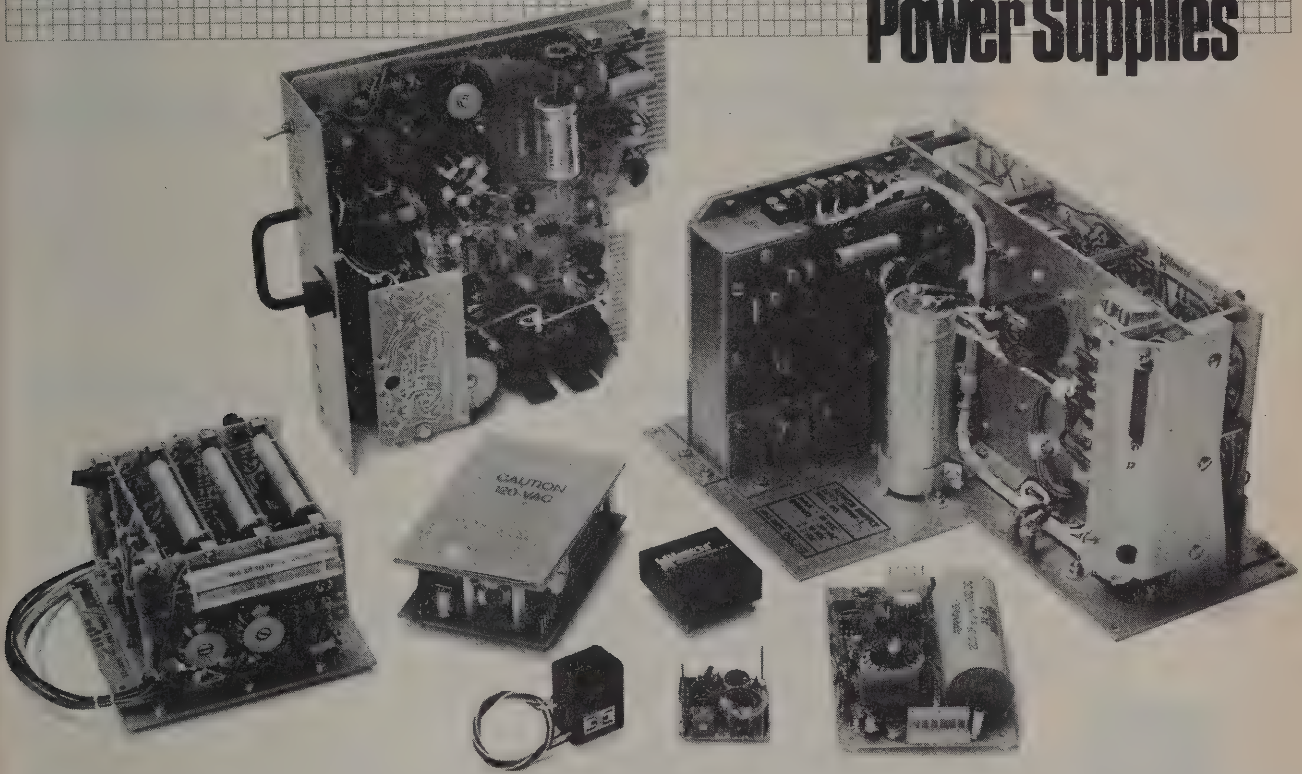
Wilmore

Custom-Designed Power Supplies



- **Multiple Output**
- **High Voltage**
- **Open Frame**
- **Encapsulated**
- **Modular**

The majority of our work is the design and manufacture of custom switching power supplies and dc-to-dc converters.
More than twenty years ago our transistor-switching power supplies began flying on spacecraft. Today we ship thousands of custom-designed industrial power supplies each month to a wide base of original equipment manufacturers. We are familiar with environments as demanding as diesel locomotives and as favorable as air-conditioned equipment bays. Our products operate daily from telecom and utility station batteries, vehicular electrical systems, low-voltage industrial ac circuits, and commercial ac power. We probably have had experience with applications similar to yours.

We combine the ability to deliver prototypes quickly and the production resources to manufacture competitively.
Systems engineers and power supply designers face the difficult task of electrically, mechanically, and thermally integrating a power supply into the system. The task can be further complicated by time constraints. Wilmore excels at this phase of program support, delivering carefully-conceived prototypes often in just a few weeks. Our responsiveness continues through to the production phase. Wilmore's two assembly plants in North Carolina were built from the ground up to produce power supplies in volume. We are a competitive domestic manufacturer with the flexibility to meet difficult production schedules.

Our New Products Group would like to hear from you.
Your inquiry will be answered promptly by the people who will be responsible for the design and prototyping of your power supply. If you need a quotation on your completed specification, or if you just want to discuss your application, please give our New Products Group a call. We would appreciate the opportunity to help solve your power conversion problems.

LCD POWER MODULES

Xentek low profile DC to AC Inverters are designed for driving cold cathode fluorescent lamp (CCFL) backlighting for LCD displays.

In addition, Xentek offers a line of super-compact DC-DC converters custom designed for use in LCD modules.

Xentek LCD CCFL modules and DC-DC converters, designed and manufactured by Taiyo Yuden, Xentek's parent company, are recommended by Sharp, Epson, Optrex, Hitachi, Toshiba, and other LCD manufacturers.

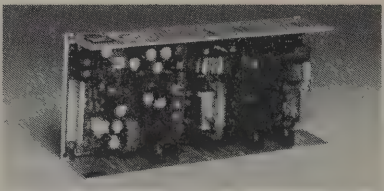
SWITCHMODE POWER SUPPLIES

FEATURES

- NEW Auto-Ranging Models
- Up to 3.0 Watts/in^3
- Four Regulated, Adjustable Outputs
- On-board EMI Filtering
- Low PARD (1% max)
- Overload, Overvoltage, Reverse Voltage & Thermal Protection
- Two-year Warranty

SPECIFICATIONS

AC Input: 90-132/180-264VAC, 47-63Hz, Auto-ranging (AR Models); Jumper selected (SX Models).
Input Protection: Fuse.
Inrush Current: 32A, max.
Input Transient Protection: Meets IEEE 587, Category A.
Efficiency: 75% typical.
Hold-up Time: 20ms.
AC Power Fail Signal: TTL low 5ms before loss of regulation.
MTBF: 100,000 Hrs, minimum.
EMI Filtering: VDE 0871/6.78 and FCC Level A (SX Models), FCC Level B (AR Models).
Adjustability: ±5%, all outputs.
Line & Load Regulation: 1%, max on all outputs.
Cross Regulation: Negligible.
Remote Sense: Compensates for 0.5 volt cable drop on main output.
Remote ON/OFF: TTL low signal, standard on all models rated >300W.
PARD: 1%, max, all outputs.
Output Overshoot: None on turn-on or turn-off.
Overload Protection: Input and output protection, standard.
Reverse Voltage Protection: Full current rating, all outputs.
Transient Response: 2% max for 25% load change; recovery to within 1% in <500µs.
Stability: ±0.1% for 24 Hrs.
Temperature Coefficient: 0.02%/°C.
Operating Temperature: 0-50°C, full rating. Derate to 50% at 70°C.
Storage Temperature: -55°C to +85°C.
Safety: Meets UL 478; UL 1012; CSA 22.2 No. 220, Electrical Bulletin 1402C; VDE 0804; VDE 0806; IEC380; IEC435.



150/175[1] WATTS

Main Output:
+5Vdc/15A, max; 3A, min.

AUXILIARY OUTPUTS

AR175[2]-	Aux 1	Aux 2	Aux 3
81000	+12V/6A (8A)	12V/2A (3A)	5V/1A (1.5A)
81010	+12V/6A (8A)	12V/2A (3A)	12V/1A (1.5A)
81030	+12V/6A (8A)	24V/1A (1.5A)	5V/1A (1.5A)
81040	+12V/6A (8A)	24V/1A (1.5A)	5V/1A (1.5A)
81050	+15V/6A (8A)	15V/2A (3A)	5V/1A (1.5A)
81060	+24V/4A (5A)	12V/2A (3A)	5V/1A (1.5A)
81070	+24V/4A (5A)	12V/2A (3A)	12V/1A (1.5A)

Note: Current shown in parentheses is peak rating.

Dimensions:

Note: Current shown in parentheses is peak rating.

Dimensions:
SX Models: 11.50" x 5.00" x 3.50"
AR Models: 13.50" x 5.00" x 3.50"

Notes

[1] Higher rating achieved when fan cooling (30 CFM airflow) is employed; the lower rating is with convection cooling.

[2] Auto-Ranging models are shown in table; for jumper-selected input, replace "AR" in the model number with "SX". For example:

Model AR300-82000 is auto-ranging version; Model SX300-82000 has jumper-selected input.

[3] Unit equipped with built-in fan.

[4] Fan cooling (30 CFM airflow) required.

Other voltage/current combinations are available in OEM quantities.

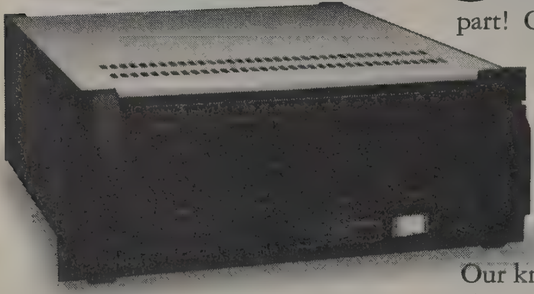
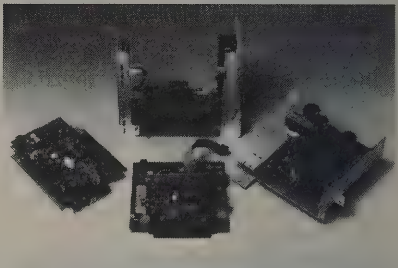
CUSTOM / RACK POWER SUPPLIES



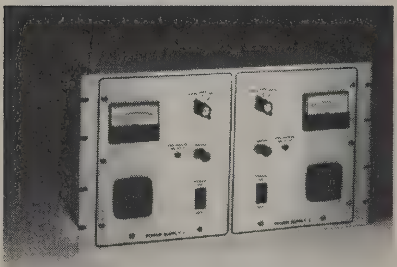


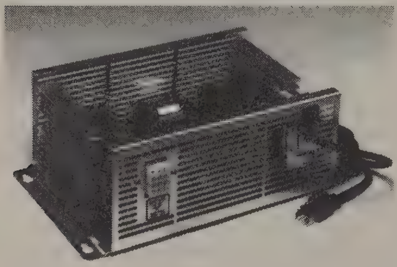
Satisfying your custom and rack power supply requirements is a big part of our business – a very big part! Over two-thirds of our business is in moderate to high volume OEM custom supplies and rack systems– both switchers and linears.

DESIGN EXPERTISE

Our knowledge and experience in power electronics, magnetics and electronic packaging, coupled with our advanced CAD/CAM systems, result in truly innovative solutions to your power supply needs.

Our engineers are skilled in advanced power electronics design techniques that include the use of custom hybrid circuits designed by Xentek and produced by Taiyo Yuden, our parent company. And as many of the products shown here demonstrate, creative packaging plays an essential role in custom and rack system design.





TOTAL MANUFACTURING

Xentek has the skills and the resources it takes to produce your custom power supply or rack system. In our vertically integrated production facilities, we have the equipment and the skilled personnel to produce intricate metalwork, fabricate complex transformers, assemble printed circuits and manufacture cable harnesses. We do our own plating, anodizing, painting and silk-screening.

We have a fully equipped safety compliance testing facility and screen-room facilities for FCC/VDE EMI/RFI testing.

Finally, after burn-in, every power supply we produce is fully tested using our advanced computer-based power supply test equipment.

Vertical Integration–from design to production to final test–the Xentek advantage!

FEATURES

Extended Performance Series (XE)

- 20W to 240W (at 5Vdc)
- Adjustable output voltage ranges from 5Vdc to 25Vdc
- 0 to 55°C without derating
- Electrostatically Shielded Xfmr
- Foldback Current Limiting
- Short Circuit and Reverse Voltage Protection
- 115/230VAC input

OEM Series (XP)

- 20W to 90W (at 5Vdc)
- Adjustable output voltage ranges from 5Vdc to 24Vdc (up to 250Vdc on XP30)
- 0 to 40°C without derating
- Foldback Current Limiting
- Short Circuit and Reverse Voltage Protection

Unregulated Series (XU)

- 15W to 1000W
- Excellent Source of Bulk dc Power for Distributed Power Systems
- Best Cost-per Watt Value

SPECIFICATIONS

XE & XP Series

Input:
115/230 (XE), 115 (XP) VAC±10%, 47-440Hz. (Derate output current 15% at 400Hz.)

Output:
Floating, adjustable with multi-turn cermet pots over range per table.

Line Regulation:
±0.05% for 10% line change. (0.2% for 20% change.)

Load Regulation:
±0.05% for 50% load change. (0.2% for 100%.)

Transient Response:
<50µs for 50% load change.

Noise and Ripple:
0.1% peak-to-peak.

Operating Temperature:
0-55°C (XE), 0-40°C (XP, XE20). Derate 2%/°C to 71°C.

Temperature Coefficient:
±0.01%/°C, max.

Stability:
±0.1% max for 24 hrs, after warmup.

XU Series

Input: 115/230VAC,50/60Hz.

Output:
Floating fixed output at full load rating per model selection chart.

Load Regulation:
15%, 0-50% of rating, typical.
9%, 50-100% rating , typical.

Ripple:
3% rms, max at full load.

Operating Temperature:
0-50°C. (Derate 2%/°C to 71°C.)

Overcurrent Protection: Fuse.

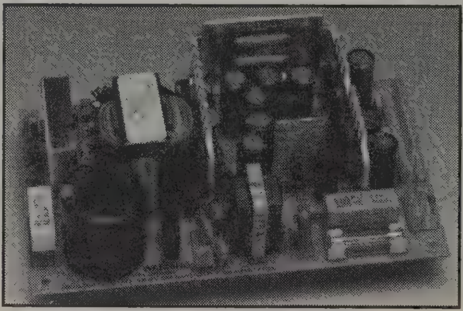
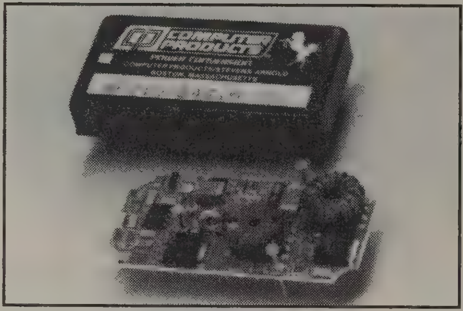
National Accounts Division, 47173 Benicia Street, Fremont, CA 94538
Telephone: (510) 657-6700, Fax: (510) 683-6400



AC/DC Switchers

- General Purpose, Universal Input, 25W to 1500W
  - Medical Approved Versions
  - FCC/VDE B Versions
- External Supplies with Battery Charging Option
- Modular Power Supply, 1-6 Outputs, PFC, 1200W
- Encapsulated & Linear Power Supplies



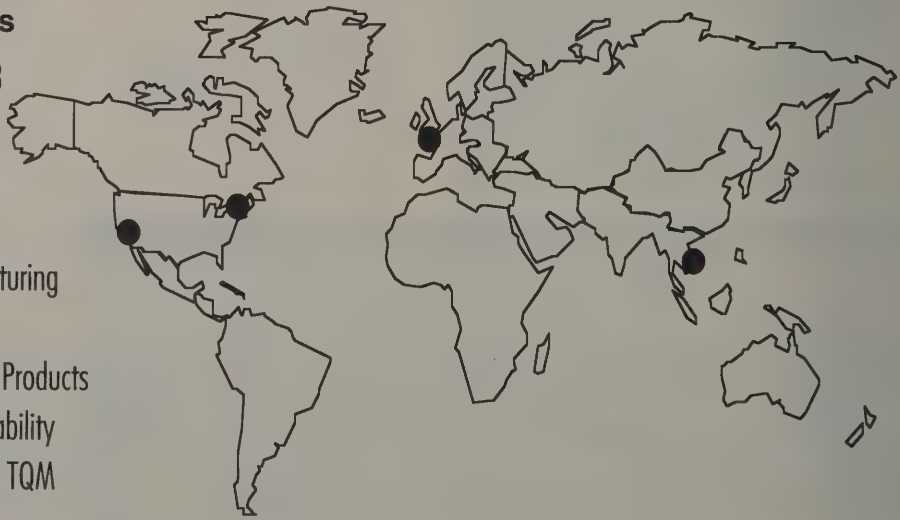
DC/DC Converters

- High Density, 5W to 200W, NFC, AFC5-F, BASiX™ Series
- High Performance, 15W to 30W WR15/WR30 Series
- General Purpose, 0.5W to 100W
- Non-Isolated, 5W to 360W

GLOBAL CAPABILITIES

Computer Products

- Established in 1968
- ISO9000 Certification
- Agency Approvals
- Worldwide Manufacturing Operations
- Over 300 Standard Products
- Custom Design Capability
- Statistical Control & TQM



For **Immediate Technical/Sales Assistance**, use our FAX FORM on the inside front cover of this book.

DC-DC CONVERTERS

Ro Associates, Inc.	D•2202	up to 250	1, 2, 3	up to 300			500			Yes	
Semiconductor Circuits, Inc.	D•2207	1-40	3	5-72	5-48	65mA-8A	500	10-12W	Yes	Yes	Telecommunications, process control, geo survey, mini computers, test equipment
Shindengen America.	D•2210	<1W-150W	3	5V-60V	2V-24V	0.1A-30.0A	500V	25W/in^3	Yes	Yes	Telecom, industrial, cellular, satellite, communications
Tri-Mag Inc.	D•2212	50	6	5VDC-72VDC	3.3VDC-350VDC	15 Amp	500VDC & 2500VDC	6W/In^3	Yes	Yes	Telecommunications, industrial and test, battery-powered, medical, computer and peripheral, distributed power systems, local area network, vacuum fluorescent display
Valor Electronics	D•2215	2W	1	5 or 12	9 or 12	to 250mADC	500 or 2000		No	Both	10BASE2/5 adapter cards, flash memory
Voltex Co.	D•2217	up to 200	1-4							Yes	
Wilmore Electronics	D•2218	2-4000W	1-4	12-250V	5-130V	up to 160A	≥1500V	to 3.0W/in^3	Yes	Yes	Telecommuncations, SCADA systems, mobile communications, cellular communcation sites (powering communications and electronic equipment on locomotives and light-rail vehicles), and other similar applications

MINIGLOSSARY
OPTO SEMICONDUCTORS

Avalanche Photodiode: A photodiode that takes advantage of avalanche multiplication of photocurrent. It is particularly suited to low noise and/or high speed applications.

Contrast: A noticeable difference in color, brightness, or other characteristics in a side-by-side comparison.

Chrominance Contrast: The color contrast between two adjacent surfaces of identical area, shape, texture, and luminance. The human eye is more sensitive to differences in color than it is to differences in brightness.

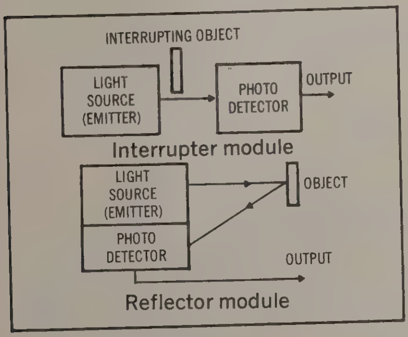
Current Transfer Ratio: The ratio of an optocoupler's output current to input current at a specified bias.

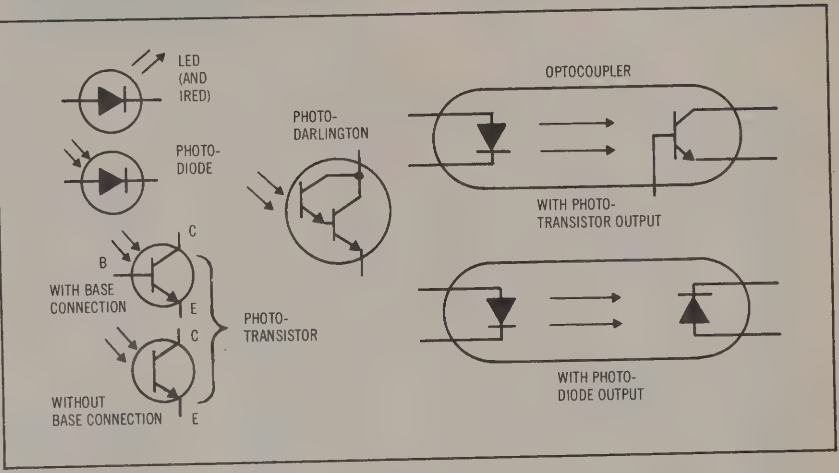
Dark Current: The leakage current of a photodetector with no incident light.

Dominant Wavelength: The wavelength that is a quantitative measure of apparent color of light as perceived by the human eye.

Infrared Radiation: The electromagnetic wavelength region between approximately 0.75 and 100 micrometers longer than the wavelength of visible light.

Interrupter (module): A device that produces an electrical output signal when an object breaks the light (visible or invisible) between a light source and a photodetector.





IRED: An infrared-emitting diode. See light-emitting diode.

Light Current: The current that flows through a photodetector when it is exposed to radiant energy.

Light-Emitting Diode (LED): A semiconductor diode that emits incoherent light at its PN junction when forward biased. The light can be in the visible or invisible (infrared) wavelength region.

Luminance Contrast: The observed brightness of a light-emitting element compared to the brightness of the "surround," an integral part of the device and inseparable from it.

Optocoupler: A device that transmits electrical signals, without electrical connection, between a light source (input) and the receiver (output). The input is generally an LED; the output might be a photodiode, phototransistor, a photo–Darlington, etc. Sometimes referred to as optoisolator.

Peak Wavelength: The wavelength at the peak of the radiated spectrum of an emitter.

Photo–Darlington: A light-sensitive Darlington-connected transistor pair. The photo–Darlington has a very high sensitivity to illumination or radiation.

Photodetector: A device that provides an electrical output signal when subjected to radiation in the visible, infrared, or ultraviolet regions of the electromagnetic spectrum. Photodiodes, phototransistors, and photo–Darlingtons are the most common type of photodetectors.

Photodiode: A junction diode that is responsive to radiant energy. Photodiodes have a high degree of linearity between the input radiation and the output current, and faster switching speeds than phototransistors.

Photothyristor: A thyristor whose switching action is controlled by light applied to the thyristor gate.

Phototransistor: A light-sensitive transister that delivers an electrical output proportional to the light intensity at its input. The low-level photocurrent that is generated is amplified by the current gain of the transistor. The base region (or gate in a FET) may or may not be brought out as an external terminal.

Point Source: A source with a maximum dimension less than one-tenth the distance between sources and detector.

Reflector (module): A device containing a light source and a photodetector that detects any object that reflects light produced by the source back to the detector.

uP MULTI-OUTPUT POWER SUPPLIES

New higher power triple MT series and T series are perfect for uP's process controllers, shift registers, RAM and ROM arrays. The common outputs are floating when complete isolation is required. Both plug-in for PC Board applications and chassis mounts on 7 terminal pin modules are available.

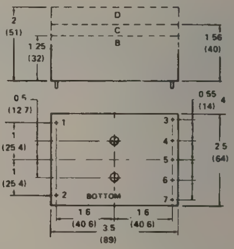
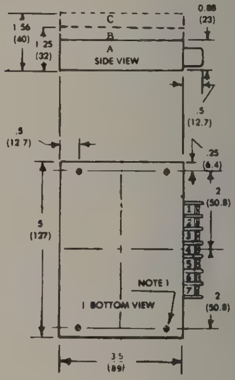
Four mount inserts 4.40×0.1 (2.5) dp. min. Seven pins, 0.040 (1.0) dia.×0.2 (5.1) lg. min. 5V Common A isolated from ±V Common B.

All Dimensions are in inches and (mm).





GENERAL SPECIFICATIONS	
Input Voltage	105 to 132 VAC @47-420Hz
Output Voltage Accuracy	1% Fixed
Operating Temp.	−25°C to 71°C
Temp. Coefficient	0.015% per °C
Storage Temp.	−55°C to 85°C
Input Isolation	50 Megohms

100% current fold-back on all 1 amp or greater single output models current limiting on all dual output models from ±V to common.

MINIATURIZED PC MOUNT POWER SUPPLIES

The mini-sized modules conserve PC board space with a small 2″×2″ area. Pins may be inserted from the side to obtain a smaller 2″×.88″ PC board area at no extra charge. M series are priced below all competitors with equivalent specifications.'

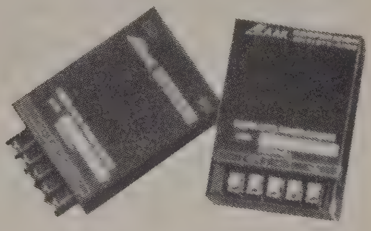
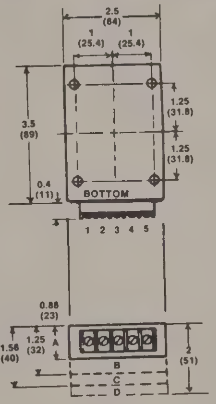
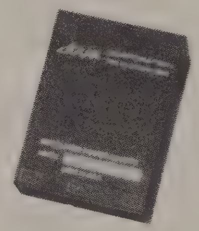
NOTE: Insert the exact voltage required in place of the bracketed voltage ranges in MODEL SERIES column.
For top mounted barrier strip, add suffix—T.
For ±1 Volt Variable, add suffix—V.

The Chassis (C) series uses a low profile front mounted or Top (T suffix) mounted, 5-terminal barrier strip.



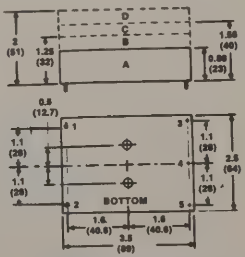


PC BOARD MOUNT POWER SUPPLIES



NOTE: PC Board Mount (S) series identical to Chassis Mount (C) series. To order replace C with S and subtract with $2.00 from C series pricing.

ACOPIAN, COMPUTER PRODUCTS, DATEL, MIL, LAMBDA, WALL, etc. configurations and mounting available at lower pricing.



GENERAL SPECIFICATIONS	
Input Voltage	105 to 132 VAC @ 47-420Hz
Output Voltage Accuracy	1% Fixed
Operating Temp.	−25°C to 71°C
Temp. Coefficient	0.015% per °C
Storage Temp.	−55°C to 85°C
Input Isolation	50 Megohms

100% current fold-back on all 1 amp or greater single output models current limiting on all dual output models from ±V to common.

15V @ 2A	C3
24V @ 2A	C4
48V @ 1A	C5

NOTE: Other voltages and currents available. Contact the factory. Maximum total output power cannot exceed 500 watts, maximum current per output cannot be exceeded.

Specifications

Efficiency: 75% typical
Line Regulation: ±.3%
Load Regulation: ±2%
Ripple: 1% max. peak to peak, not to exceed 100mV
Output Termination: "D" Subminiature connector

Agency Certifications

- Meets FCC Docket 20780, Class A and VDE 0871, Class A
- UL 1950, CSA 22.2-950, CSA 22.2-234 (Pending)

Options

- O Ring diode for Redundancy: Suffix-ORD

Protections

Overload and short circuit protection all outputs
Overvoltage: Recycle input to reset from latch
Fuse: 20A fuse at input
LED Indicators: Input Good
Output Good

Environmental

Operating Temperature: 0-55°C Ambient
(derate to 50% at 70°C)
Storage Temperature: -30°C to +80°C
Cooling: Internal fan

Mechanical Features

Size: 10.00" x 5.5" x 3.0"
Weight: 4.5 lbs. (2kg)

HIGH RELIABILITY STANDARD & CUSTOM POWER SYSTEMS

DC-DC CONVERTERS

COMMERICAL • MILITARIZED • FULL MIL
CUSTOM & STANDARD UNITS 50W TO 4500W

Slim line very compact and powerful unit intended primarily for data processing equip. All outputs are highly regulated and overload protected. The main output is O.V. protected. Operation range 0-50°C.

150W

SIZE: 9.5″ x 5.5″ x 2.2″

MODEL	INPUT	OUTPUTS
TDC150-1	−48V	5V 10A, ±12V 2.5A, ±15V 1A
TDC150-2	−48V	5V 10A, ±12V 2A, ±18V 1A
TDC150-3	+24V	5V 10A, ±12V 2.5A, ±15V 1A
TDC150-4	+24V	5V 10A, ±12V 2A, ±18V 1A

The TDI-517 is a high power DC-DC converter intended for a variety of applications where high capacity outputs are required. Options include meters, circuit breakers and LED indicators. Various input and output voltages are available.

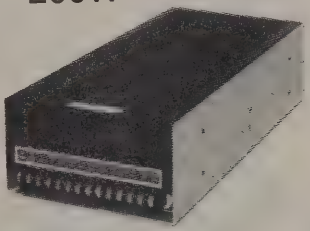
4.5KW

SIZE: 19.00" x 19.00" x 8.75"

MODEL	INPUT	OUTPUTS
TDI-517-1	400-500V	12V 375A
TDI-517-2	400-500V	24VDC 187A
TDI-517-3	400-500V	28VDC 160A

Designed as a universal DC-DC converter capable of providing up to 5 outputs and up to 200W. Specifically capable of withstanding high transients and noise at the input as present in utility stations. The unit is sold with a cover.

200W



SIZE: 10.8″ x 5.5″ x 2.75″

MODEL	INPUT	OUTPUTS	
TDC200-1	12V	12V 8A

ALUMINUM HEATSINK SURFACE

Model # : **K xxx S xx xx**

- K — ACON Series #
- xxx — Output Power
  : 50, 75, 100, 150 and 200 Watts
- S — Single Output
- xx — Input Voltage
  12 : 10 - 20 Vdc
  24 : 18 - 36 Vdc
  48 : 36 - 72 Vdc
- xx — Output Voltage
  : 3.3V, 5V, 12V, 15V, 24V.

Power Density to 38 Watts/in³ . NEW!

Please call Toll Free : 1-800-336-8022

Other Input/Output Combinations are Available, Please Consult Factory.

20-50 W to 5 Outputs DC-DC Converters

MODEL : ES ED ET

*Output Trim • Trim-Up / resistor from –V to Trim; Trim-Down / resistor from +V to Trim.

ALL DIMENSIONS IN INCHES (MM)

INPUT SPECIFICATIONS

Input Voltage Range .... See Table
Input Filter:
  Model C .... Low ESR Capacitor
  Model E .... 10–36 Vin:∏ Filter, 20–75 Vin:LC Filter
Remote On/Off Control (Model E only):
  On Control .... >5Vdc or Open Circuit
  Off Control .... <1.8V or Jumper to –Vin

OUTPUT SPECIFICATIONS

Voltage Accuracy .... ±1%, max.
Output Trim (Model E only) .... ±10%, max.
Line Regulation, LL–HL .... ±0.5%
Load Regulation (Dual Output with Balance Loads), NL/FL .. ±1.0%
Short Circuit Protection .... Indefinite
Transient Response .... <200µSec.
Ripple 35mVp-p
Noise, 20MHz BW .... 1% or 75mVp-p

GENERAL SPECIFICATIONS

Temperature Coefficient .... ±0.02%/°C, max.
Efficiency .... C: 73%, E: 80%
Isolation Voltage, I/O .... 500Vdc, min.
Switching Frequency .... 200KHz, min.
Operating Ambient Temperature Range (Case Temp. +95° max):
  C:Thermal Resistance 20°C/Watt .... –25°C to +71°C
  E:Thermal Resistance 9°C/Watt .... –25°C to +60°C
Cooling .... Free-Air Convection
Storage Temperature Range .... –55°C to +105°C
Humidity .... 20% to 95% R.H. (non-condensing)
Weight .... C:1 oz. (28 grams),E:2 oz. (57 grams)
Case Material
  C: .... Phenolic
  E: .... Six-sided Metal
  (With Non-Conductive Seating Surface)

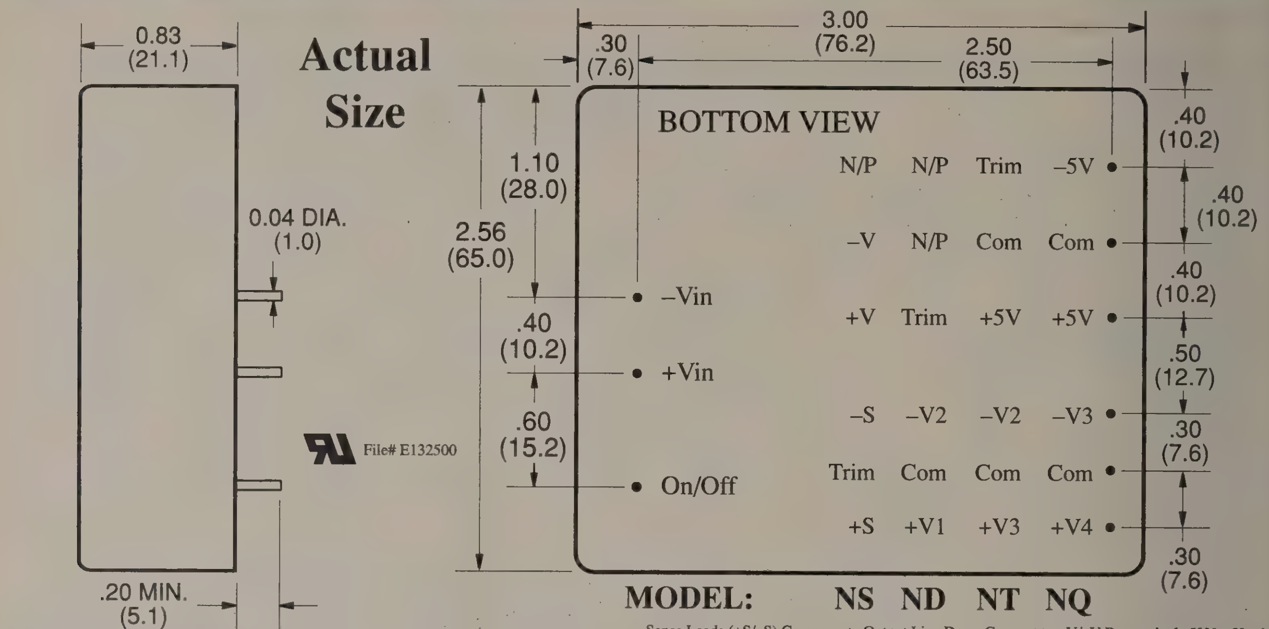
25 - 30 W Single, Dual, Triple & Quad DC-DC Converters

ACON, INC. 22 Bristol Dr., South Easton, MA 02375 • TEL:(508)230-8022 • FAX:(508)230-2371



Sense Leads (+S/–S) Compensate Output Line Drop, Connect to +V/–V Respectively If Not Used.

ALL DIMENSIONS IN INCHES (MM)

*Output Trim • Trim-Up / resistor from –V to Trim; Trim-Down / resistor from +V to Trim.

INPUT SPECIFICATIONS

Input Voltage .... See Table
Input Filter .... Π(PI) Filter
Remote SHUT/DOWN Control
  On Control .... TTL High or Open Circuit
  Off Control .... <1.8V or Jumper to –Vin

OUTPUT SPECIFICATIONS

Voltage Accuracy (Main Output) .... ±1%, max.
Output Trim .... ±10%, max.
Line Regulation, LL–HL .... ±0.2%
Load Regulation, NL/FL .... ±1.0%
Short Circuit Protection .... Indefinite
Transient Response .... <200μSec.
Ripple 50mVp-p
Noise, 20MHz BW 1% or75mVp-p

GENERAL SPECIFICATIONS

Temperature Coefficient .... ±0.02%/°C, max.
Efficiency 80%
Isolation Voltage, I/O .... 500Vdc, min.
Thermal Resistance .... 5°C/Watt
Operating Case Temperature Range .... –25°C to +85°C
Cooling .... Free-Air Convection
Storage Temperature Range .... –55°C to +105°C
Humidity .... 20% to 95% R.H. (non-condensing)
Dimensions .... 2.56" x 3.0" x 0.83"
Weight .... 4 oz. (105 grams)
Case Material .... Black Coated Metal
(With Non-Conductive Seating Surface)

Specifications are typical values, input-to-output isolation @500VDC is 100M minimum.
The 5962 models are DESC standard military drawings that are fully compliant to MIL-STD-883C.
Advanced Analog is the first qualified source for these standard military drawings.
An optical EMI filter will reduce the input ripple current to levels below the limits imposed by Condition CEO3 of MIL-STD-461B.
The AFC461 Series has 4.0 amp max. input current. DESC selected item number 5915-91020.
Advanced Analog is listed on the QML for DC/DC converters EQ (EQC-90-65).
Commercial and Industrial versions are also available.
Radiation Tolerant Converters available in August/1993.

1. Up to 90% of full power is available from either output provided the total output does not exceed 30 watts.

Package

A. Standard - 2.12 x 1.12 x 0.495
B. Flange - 2.89 x 1.12 x 0.495
D. Standard - 1.950 x 1.345 x 0.500
E. Flange - 2.700 x 1.345 x 0.500

HIGH RELIABILITY, ADVANCED HYBRID MANUFACTURING

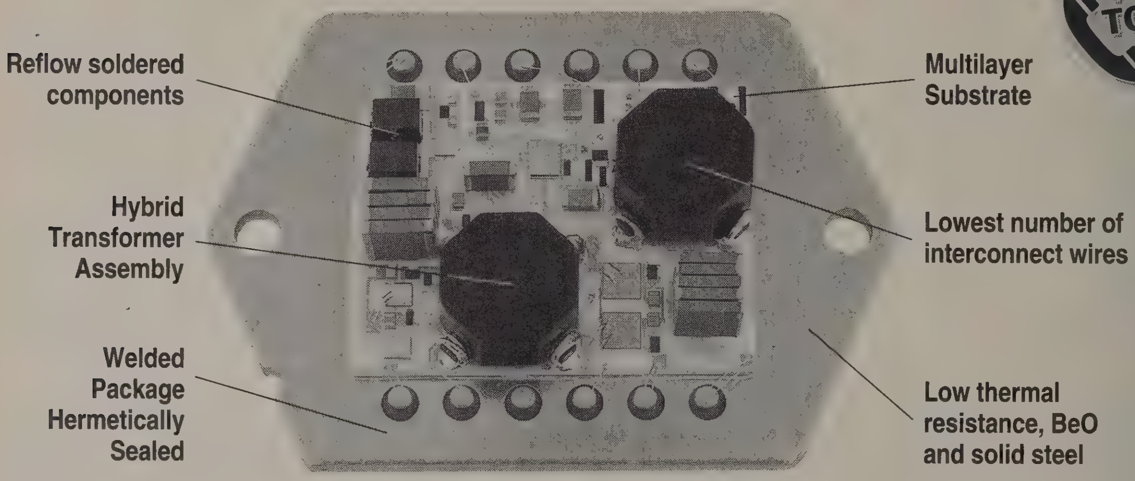
DC/DC CONVERTERS

APEX MICROTECHNOLOGY CORPORATION • TUCSON, ARIZONA • APPLICATIONS HOTLINE (800) 546-APEX

QUALITY PRODUCTS FROM APEX

Apex products are built to provide you with the highest level of quality and reliability in the industry. All Apex products meet their published specifications. Apex team members use statistical process control (SPC) to minimize variations. The use of SPC is part of the Apex Sigma Plus Total Quality Management program to continually improve quality and responsiveness to customer needs.

APEX HYBRID MANUFACTURING PROCESS



Reflow soldered components
Hybrid Transformer Assembly
Welded Package Hermetically Sealed
Multilayer Substrate
Lowest number of interconnect wires
Low thermal resistance, BeO and solid steel

NEW INDUSTRY MANUFACTURING STANDARD—HIGH RELIABILITY

Apex dc/dc converters set a new industry standard with a true hybrid manufacturing process which utilizes a multilayer substrate and a one-step reflow solder process. The resulting absence of magnet wire and low number of components, provides an extremely clean unit with a lower production cost. Customer benefits include enhanced MTBF, increased long-term reliability and per unit price reductions.

1-800-862-1025 CALL APEX TODAY

EXISTING INDUSTRY MANUFACTURING STANDARDS	NEW INDUSTRY MANUFACTURING STANDARDS (APEX)	BENEFITS GAINED
• Narrow form factor • Use of magnet wire for high current conductor routing	• Near square form factor • Multilayer substrate	• Thick film conductor routing in all directions • Improved heat flow to the outside
• Conventional pot cores or toroids	• Surface mounted hybrid magnetics	• Improved reliability • Reduced PIND
• Manual placement of magnet wire, soldered to circuits	• Internal components • 100% surface mounted • One-step, automated reflow soldering	• Reduced labor costs • Clean layout
• Lidded package is soldered • Tub package is welded but costly	• BeO, solid steel, welded package construction	• Lower cost • Hermetically sealed • Low thermal resistance • Extremely rugged
• Inherently high per unit costs	• Potentially lower per unit costs	• Cost savings realized by continuous improvement of manufacturing process lowers per unit costs

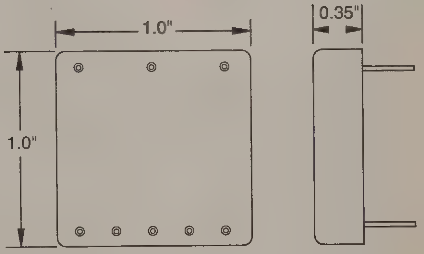
DUALS						
DB2812D	±12	±0.84	22.5	14-50	–55/+125	79
DB2815D	±15	±0.75	22.5	15-50	–55/+125	79

DHC2800 SERIES

- Up to 6 watts output power
- 11 to 50Vdc input voltage range
- 20W/in³ power density
- Full military case temp range, no derating
  $T_{CASE} = -55°$ to $+125°C$

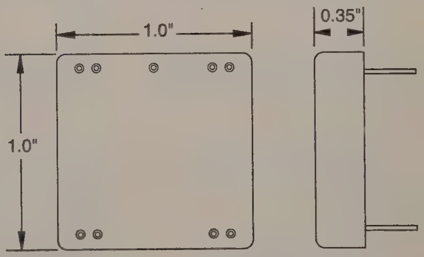


The DHC2800 series is designed for analog and digital systems, including 3 volt systems. The input voltage range exceeds the MIL-740E requirements. Current limiting, remote shutdown and output voltage adjustment are featureed in this series.

Model	Output Voltage	Output Current	Output Power	Input Voltage I_0 = Max	Temp Range	Efficiency
SINGLES						
DHC2803S	3	2	6	11-50	–55/+125	74
DHC2805S	5	1.20	6	11-50	–55/+125	76
DHC2812S	12	0.50	6	11-50	–55/+125	78
DHC2815S	15	0.40	6	11-50	–55/+125	78
DUALS						
DHC2812D	±12	±0.25	6	12-50	–55/+125	76
DHC2815D	±15	±0.200	6	12-50	–55/+125	76

FCD461 FILTERS

- Compliant to MIL-STD-461 CEO3
- 11 to 40Vdc input voltage
- Low DC Resistance 0.25Ω
- Full mil case temp range
  $T_{CASE} = -55°$ to $+125°C$



The FCD461 ripple current filter can drive a single DB2800 series converter operating on input voltages above 19 Vdc, and two DHC2800 series converters over their full input range. Both differential and common mode ripple current is filtered.

Model	Output Current	Ripple Rejection	DC Resistance	Power Dissipation	Temp Range	Clamping Voltage
FCD461	1.2A	13~100dB	0.25Ω	360mW	–55/+125	40

ENVIRONMENTAL SCREENING AVAILABLE

- Pre-cap visual inspection
- Stabilization bake
- Temperature cycle
- Constant acceleration
- Fine leak
- Gross leak
- Burn-in
- Final electrical test, over temperature
- Final external visual inspection

COMMONLY USED ELECTRICAL/ELECTRONIC ABBREVIATIONS AND ACRONYMS

A
A/D acrylonitrile butadiene-styrene
A/D analog to digital
ADC analog to digital converter
ADP automatic data processing
AFC audio frequency control
AFT automatic filter test
ALGOL algorithmic language
AM a logical operator
AQL acceptable quality level
ASCII American national standard code for information interchange
ASIC application specific IC
ATE automatic test equipment
ATG automatic test generation
AWG American wire gauge

B
BALUN balanced to unbalanced
BASIC beginners' all-purpose symbolic instruction
BCD binary-coded decimal
BNC baby "N" connector
BUS basic utility syste

C
CAD computer-aided design
CAE computer-aided engineering
CAM computer-aided manufacture
CAMAC computer-automated measurement and control
CAPP computer-aided process planning
CAT computer-aided test
CATV cable television or community antenna television
CCC (leaded) ceramic chip carriers
CCD computer-controlled display
CERMET ceramic metal element
CIE computer-integrated engineering
CIM computer-integrated manufacturing
CLCC ceramic leadless chip carriers
CMOS complementary metal-oxide semiconductor
Comm. communications
CPS characters per second
CPU central processing unit

D
D/A digital to analog
DAC digital to analog converter
DBMS data base management system
DC direct current
DFT design for testability
DIAC bidirectional trigger diode
DIL dual in-line
DIN Deutsche Industrie Normenausschuss
DIP dual in-line package
DPM digital panel meter
DRAM dynamic RAM
DTL diode transistor logic

E
EDA electronic design automation
EDP electronic data processing
EBCDIC extended binary coded decimal interchange code
EEPROM electrically erasable PROM
EIA Electronic Industries Association
EMC electromagnetic compatibility
EMI electromagnetic interference
EMP electromagnetic pulse
EPROM erasable programmable ROM
ESR equivalent series resistance

F
FEP fluorinated ethylene propylene Copolymar, 200° Teflon
FET field-effect transistor
FM frequency modulation
FORTRAN formula translator

G
GaAsFET gallium arsenide FET
CMIP commn management information protocol
GPIB general purpose interface bus
GPS global positioning system

H
HF high frequency (3 to 30 MHz)
HIPOT test, measurement, and diagnostic equipment
HLL high level language
HV high voltage
Hz Hertz

I
IAB Internet Activities Board
IC integrated circuit
IDC insulation displacement contact
IF intermediate frequency
IO input/output (devices)
IR insulation resistance (or) infrared
ISDN integrated services digital network
ISO International Standards Organization

J
JEDEC Joint Electronic Device Engineering Council
JFET junction FET
JMOS junction MOS

K
kHz kilohertz (10^3 hertz)
KSR keyboard send /receive

L
LAN local area network
LC (filters) inductance/capacitance
LCC leaded chip carrier
LCD liquid crystal display
LED light-emitting diode
LF low frequency (30 to 300 kHz)
LIF low insertion force
LNA low noise amplifier
LNB low noise band
LSI large scale integration
LVDT linear velocity displacement transformer

M
MASER microwave amplification by stimulated emission of radiation
MATV master antenna television
µF microfarad
MHz megahertz
MIC microwave IC
MIPS million instructions per second
MIB microcomputer interface board
MOS metal oxide semiconductor
MOSFET metal oxide semiconductor FET
MOSIGT metal oxide semiconductor insulated-gate transistor
MOV metal oxide varistor
MPU microprocessor unit
MSI medium scale integration

N
NBS National Bureau of Standards
NEMP nuclear electromagnetic pulse
NIM national instrumentation module
NOR not OR
NTC negative temperature coefficient

O
OCR optical character reader
OEM original equipment manufacturer
OR a logical operator
OSI open systems interconnection

P
PAL programmable array logic
PC printed circuit
PCB printed circuit board
PCM pulse code modulation
PCS plastic clad silica
pF picofarad
PGA pin grid array
PIN positive-intrinsic-negative (transistor)
PLA programmable logic array
PLCC plastic leaded chip carrier
PLL phased lock loop
PPI plan position indicator
PROM programmable ROM
PTC positive temperature coefficient
PUT programmable unijunction transistor

Q
QAM quadrature amplitude modulation
Q (meter) quality-factor meter

R
RAM random access memory
RC resistance-capacitance
RFI radio frequency interference
RMS root mean square
ROM read only memory
RF radio frequency
RFC radio-frequency choke
RFI radio-frequency interference
RTD resistance-temperature detector
RTL resistor transistor logic
RTV room temperature vulcanizing
RW read/write

S
SAS silicon asymmetrical switch
SBC single board (micro) computer
SBS silicon bilateral switch
SCR silicon-controlled rectifier
SCS silicon-controlled switch
SDA source & detector assemblies
SGMP simple gateway monitoring protocol
SIDAC bidirectional voltage-triggered switch
SIMM single in-line memory module
SIP single in-line package
SMD surface mount device
SMT surface mount technology
SNMP simpole network management protocol
SO small outline
SOIC small outline IC
SOT small outline transistor
SSI small scale integration
SSR solid-state relay
STL Schottky transistor logic
SUS silicon unilateral switch

T
TC temperature coefficient
TCE thermal coefficient of expansion
TXCO temperature compensated crystal oscillator
TFE tetrafluoride ethylene propylene Copolymar, 250° Teflon
TRIAC bidirectional AC switch
TTL transistor-transistor logic
TTY teletypewriter

U
UHF ultra high frequency (300 MHz to 3 GHz)
UJT silicon unijunction transistor
UL Underwriters Laboratory
UPS uninterruptible power supply

V
VAC volts (of) alternating current
VAN value-added network
VAR volt-ampere reactive
VCR video cassette recorder
VDC volts (of) direct current
VHF very high frequency (30 kHz to 300 MHz)
VHSIC very high speed integrated circuit
VLF very low frequency (3 to 30 kHz)
VLSI very large scale integration
VME virtual machine environment
VRM voice recognition module
VTVM vacuum tube volt meter
VU volume unit
VSWR voltage standing wave ratio

W
WPS word processing software

Y
YIG yttrium iron garnet

Z
ZIF zero insertion force

DC–DC CONVERTERS

ASTEC 2.25 TO 4.5 WATTS
SINGLE/DUAL OUTPUT DC/DC POWER CONVERTERS

ASTEC
MRS·2300·9

Astec Standard Power offers 16 different series of DC/DC power conversion products, ranging from 2.4 to 40 watts in single, dual, or triple output models. They feature MOSFET design, surface mount technology, an ultra-wide input range, overvoltage protection, continuous short circuit protection, high efficiency, 500 Vdc input/output isolation, regulated and unregulated outputs, ultra low noise Pi input filter, and output trim adjustability. These innovative, low-profile DC/DC converters are used in a wide range of applications, including telecommunications, test equipment, distributed power systems, process control, minicomputers, and geosurvey equipment.

FEATURES

MV Series—2.4 Watt Single/Dual output
- Regulated outputs • LC input filter

MB/MH Series—2.4 Watt Single/Dual output
- Unregulated outputs • LC input filter
- Continuous short circuit protection
- MOSFET design
- Efficiency to 80% • MTBF 1,000,000 hours

MQ Series—3 Watts single/dual outputs
- Ultra low noise Pi input filter
- Continuous short circuit
- Regulated output

DC–DC CONVERTERS

ASTEC 5 TO 40 WATTS SINGLE/MULTIPLE OUTPUT DC/DC CONVERTERS

FEATURES

MX Series—3.0 to 3.6 Watt Single/Dual output
- Unregulated outputs • LC input filter
- Continuous short circuit protection
- Efficiency to 80% • MOSFET design
- 500 VDC I/O isolation • MTBF >1,000,000 hours

MK/MW Series—3.5 to 12 Watt Single/Dual output
- Unregulated outputs • Pi input filter
- Continuous short circuit protection
- Efficiency to 80% • MOSFET design
- 500VDC I/O isolation • MTBF 1,000,000 hours
- Alternative pin configuration

MA Series—4.5 Watt Single/Dual output
- Regulated outputs
- SMT-surface mount technology
- Continuous short circuit protection
- MOSFET design • 4:1 Ultra-wide input range

MP/MF Series—5 to 7.5 Watt Single/Dual output
- Regulated outputs • Pi input filter
- Continuous short circuit protection
- MOSFET Design • 500 VDC I/O isolation
- SMT—surface mount technology
- 4:1 Ultra-wide input range

ML Series—6 Watts Single/Dual outputs
- MOSFET Design • Surface Mount Technology
- 4:1 Ultra-wide Input Range • Regulated Outputs
- Continuous Foldback Short Circuit Protection
- 500 Vdc I/O Isolation • Efficiency 80% (typ)

MR Series—15 Watts Single/Dual outputs
- MOSFET Design
- Surface Mount Technology
- 4:1 Wide Input Range
- Continuous Foldback Short Circuit Protection
- Regulated Outputs • 500 V Isolation
- Six-sided Shielding

MS/MT Series—15 Watts Single/Dual/Triple Outputs
- 4:1 ultra-wide input range
  9-36VDC
  20-72VDC
- Remote on/off
- 85% efficiency
- Continuous short circuit protection
- Six-shielded shielding

DC–DC CONVERTERS

ASTEC 5 TO 40 WATTS SINGLE/MULTIPLE OUTPUT DC/DC CONVERTERS

FEATURES

MJ Series—18-25 Watt Single, Dual, & Triple
- MOSFET Design • Surface Mount Technology
- 4:1 Ultra-wide Input Range
- Continuous foldback short circuit protection
- Regulated outputs
- 500 VDC I/O isolation • Efficiency to 85%

AA Series—25-40 Watt Single/Multi output
- Low profile
- 400 KHz switching frequency
- High efficiency
- Parallelable • Adjustable output

DC/DC CONVERTERS 0710-DIP 0730-SIP

TECHNICAL INFORMATION

GENERAL SPECIFICATIONS

Isolation Voltage	500 VDC min.
Operating Temperature Range	−25 to 80°C
Storage Temperature Range	−55 to 110°C
Efficiency at Full Load, 12 and 15 Volt Output Types	75% min.
Efficiency at Full Load, 5 Volt Output Types	70% min.
Isolation Resistance	10^9 Ohm min.

INPUT SPECIFICATIONS

Input Voltage Range	±10%
Input Filter	Capacitor Type

OUTPUT SPECIFICATIONS

Voltage Accuracy	±5%
Load Voltage Regulation (1 mA min. load)	±10%
Line Voltage Regulation	1%/1% of Vin
Ripple and Noise, 20 MHz BW	50 mV p-p max.
Temperature Coefficient	0.03%/°C max.
Short Circuit Protection	1.0 second
Total Output Power (May be drawn from one pin)	750 mW

HPR1XX SERIES

0.75 WATTS UNREGULATED

- Low Cost
- Single-In-Line Package (SIP)
- Internal Input and Output Filtering
- Non-Conductive Case
- High Output Power Density: 10 Watts/Inch³
- Extended Temperature Range: –25°C to +85°C
- High Efficiency: to 80%

PWR13XX SERIES

1.5 WATTS UNREGULATED

- High Isolation - 4000V Rating
- 8000V Isolation Test Voltage
- Barrier 100% Production Tested
- Low Barrier Capacitance - 10pf
- Low Leakage Current - 2µA Max
- 24-Pin DIP Package
- Internal Filtering

WP05R SERIES
5 WATTS REGULATED

- Small Package Size: 1" X 2"
- Industry Standard Pinout
- Surface Mount Devices (SMD)
- Low-Cost Alternate Source
- Continuous Short Circuit Protection
- UL1950 Recognition (Some Models Pending)

MODEL	NOMINAL INPUT VOLTAGE (VDC)	RATED OUTPUT VOLTAGE (VDC)	OUTPUT CURRENT		INPUT CURRENT		EFFICIENCY (%)

HPR7XX SERIES
5 WATTS UNREGULATED

- Efficiency >80%
- SIP Package
- High Power Density: > 16 Watts/Inch³
- Low Cost
- Single and Dual Outputs
- Internal Input and Output Filtering
- Six-Sided Shielding

MODEL	NOMINAL INPUT VOLTAGE (VDC)	RATED OUTPUT VOLTAGE (VDC)	RATED OUTPUT CURRENT (mA)	INPUT CURRENT		REFLECTED RIPPLE CURRENT (mAp-p)	EFFICIENCY (%)

PWR8XX SERIES
5 WATTS UNREGULATED

- Isolation Voltage Test Methods
- Per UL544, VDE750, & CSA C22.2 Dielectric Withstand Requirement
- Barrier Leakage Current 100% Tested at 240VAC
- 5V Single and ±12V or ±15V Dual Outputs
- Wide Oper. Temp Range: –40°C to +100°C • Input and Output Filtering
- Six-Sided Shielding

PWR16XX SERIES
5-6 WATTS UNREGULATED

- Typical Efficiency: 82%
- Low Cost
- Industry-Standard Package
- Single and Dual Outputs
- 100% Non-Conductive Case
- Six-Sided Shielding
- 20mVrms Ripple and Noise with no External Components

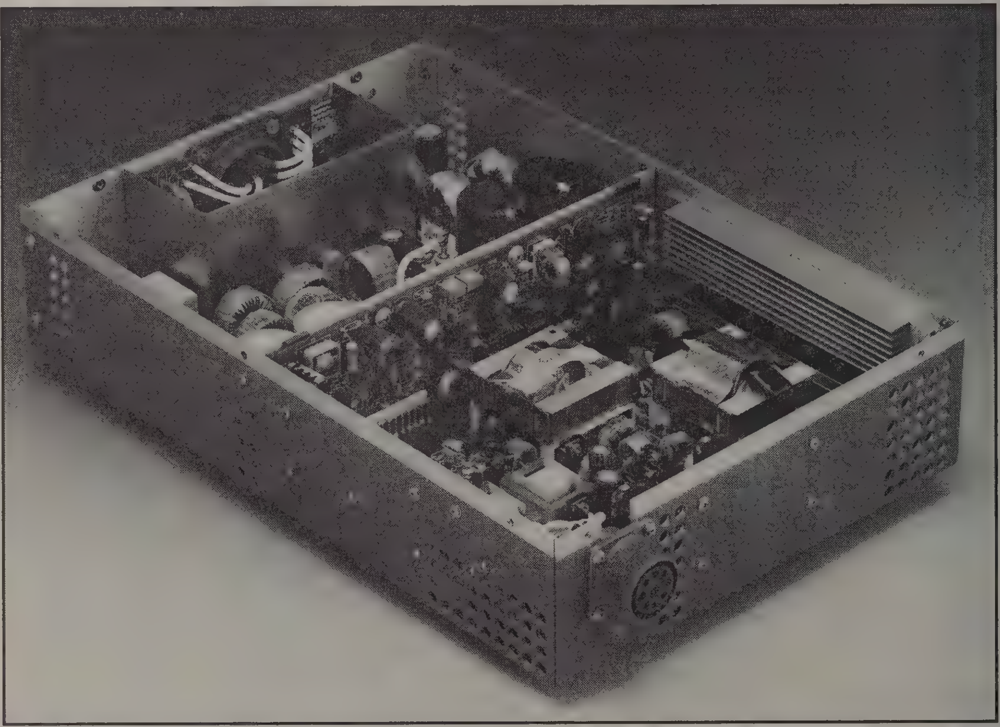
Custom Power Systems

Giving You The Power To Perform.



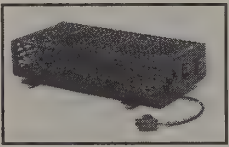
Our Commitment: We are a service oriented company. Our Mission is to be sure that our customer is always satisfied. We recognize that the needs of every customer are unique and we pledge to meet those unique needs.

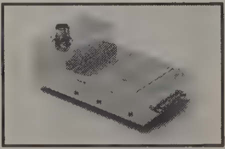
Our Experience: everything from high volume commercial to one-of-a-kind exotic military hardware.

Our Promise: We won't let you fail. If your specifications are extremely difficult to meet, we will not only explain what it will take to meet them, but we will work with you to try to find alternate ways to meet your system requirements.

You'll find us as practical as we are inventive. We work hand in hand with your engineers and purchasing people to keep your costs down and make sure you get the manufactured product in spec and on time. We have the staff, the skills, the technology and the experience to handle your unique demands quickly and efficiently.

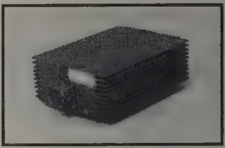
Learn how we can help you, as we have helped scores of fortune 500 manufacturers. A copy of our capabilities brochure and application notes will be sent as soon as you inquire.

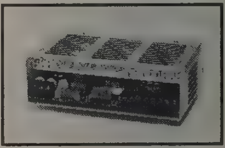




Custom Power Solutions For:

- Off Line Switchers
- DC/DC Converters
- Battery Chargers
- Motor Controls
- Redundant Power Supplies
- Special Linear Supplies
- Uninterruptable Supplies
- Combination AC/DC Inputs
- Multiple Outputs/Inputs
- Special Packaging
- Unusually Tight Regulation
- Tough Environmental Specs
- Low Noise Requirements
- Low Power or High Power





Satisfied customers in the Aerospace, Automotive, Marine, Industrial, Telecommunications and Military markets.

CALEX

- 1.8 to 100 Watts of Output Power
- Low Noise Operation
- Highly Regulated Outputs
- Modular Designs
- Completely Encapsulated
- Shielded Cases
- Deliveries From Stock
- 5 Year Warranty

Applications

- Telecommunication Systems
- Process Control
- Medical Equipment

For more than thirty years, CALEX has provided quality products, excellent customer service and fast and convenient delivery. The tradition continues as we unfold our new line of high power density converters, designed for space sensitive applications. Our product line is growing rapidly, yet we compromise nothing. CALEX converters still deliver low noise and high reliability with features such as overvoltage protection, wide input ranges and excellent efficiency. We also remain the only manufacturer in the industry to provide a 5 Year Warranty on every DC/DC converter we produce. Call us today for a free copy of our Product Guide and to see how CALEX can work for you.

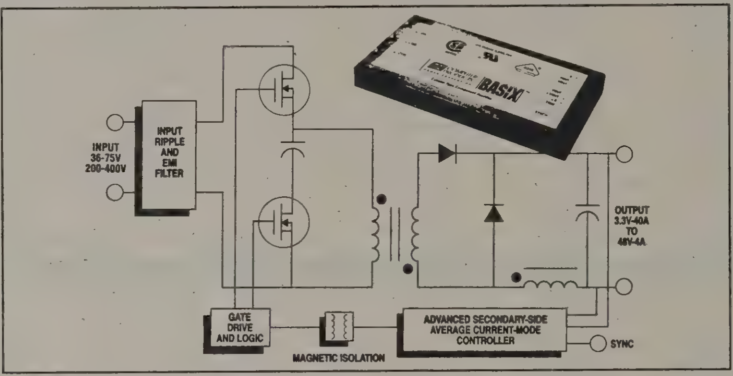
BASiX™

The BASiX High-Performance Series of High-density DC/DC power converters uses Computer Products' patented Resonant Transition Zero Voltage Switching together with advanced packaging to provide high performance with a power density of 36 watt/in^3. BASiX offers internal input and output filtering, protection features, true current sharing, redundancy and 40 amp output capability that are contained within the industry standard 4.6" x 2.4" x 0.5" package.

BASiX incorporates several state-of-the-art technological advances including constant 700 kHz switching frequency for high power density and easier system filtering, advanced average current-mode secondary side control enabling fast transient response, patented power train design providing efficiency that ranks among the highest in the industry, integrated magnetics resulting in improved output noise, constant current limit reducing sensitivity to the load at turn-on and an internal EMI filter limiting conducted emissions to VDE0871 Class A.

BASiX is a member of the Computer Products family of power conversion products which consist of more than 300 standard products to satisfy all your power system requirements both distributed and centralized.



INPUT 36-75V 200-400V
INPUT RIPPLE AND EMI FILTER
OUTPUT 3.3V-40A TO 48V-4A
GATE DRIVE AND LOGIC
MAGNETIC ISOLATION
ADVANCED SECONDARY-SIDE AVERAGE CURRENT-MODE CONTROLLER
SYNC
BASiX

ZERO VOLTAGE SWITCHING (ZVS) CUTS LOSSES TO YIELD HIGHER EFFICIENCY
Resonant Transition ZVS module combines flyback and forward-converter topologies

BASiX Series Features

- Full 200 watts @ 5 Vout
- 40 amps for 1.5 to 5 Vout
- Power Density of 36 W/in^3
- Up to 87% efficiency
- Fixed switching frequency
- Synchronization function
- Integrated magnetics
- VDE0871 Class A input noise
- UL, CSA, VDE safety approved
- Output ripple less than 50 mV
- Transient response less than 100 µsec
- Universal current sharing
- Easy implementation of true N+1 redundancy
- Latching OVP
- MTBF greater than 750,000 hours
- Under-voltage lockout circuitry
- Over-temperature protection
- Industry standard size
- Input voltage range to ETSI requirements

BASiX HIGH PERFORMANCE SERIES SPECIFICATIONS

INPUT	300 VOLT SERIES	48 VOLT SERIES	UNITS
Voltage range	200-400	36-75	VDC
Surge Voltage (1 second)	425	90	VDC
Conducted EMI[1]	100	100	dBµV
Conducted EMI with optional filter[1]	VDE0871A	VDE0871A	
On/off control current sink	1	1	mA
Current, shutdown	5	5	mA
Turn-on time (Vout settled to 1%)	50	10	msec
Control turn-on time	15	10	msec
Total input capacitance	0.6	10	µF

Specifications subject to change without notice **1.** EMI measured on either line into a 50Ω Line Impedance Stabilization Network with 120µF of the rated output voltage **2.** Overvoltage protection is tested with an external source which is not to exceed 150% of the rated output voltage. **3.** -40° to 85°C range available.

BASiX™

BASiX HIGH PERFORMANCE SERIES SPECIFICATIONS

OUTPUT		UNITS
Set point accuracy	±1	%Vout
Load regulation	±0.1	%Vout ± 10mV
Line regulation	±0.1	%Vout ,±10mV
Temperature drift	±0.02	%Vout/°C
Ripple, (0-20MHz) with optional filter	greater of 50 mV or 1/2% Vout P-P, 0.2% Vout rms	
Ripple, (0-20MHz	greater of 150 mV or 1/2% Vout P-P, 0.6% Vout rms	
OVP (latching)[2]	130 ±5	%Vout
Remote sense compensation	0.5	VDC
Trim range	±10%	%Vout
Current limit (auto recovery)	115 ±5	% full load
Current share accuracy	±10	% full load
Transient response (25-75% full load current) recovery to 1% of Vout	100	µsec

ISOLATION	300V SERIES	48V SERIES
Input-output test voltage	3000 VAC	2000 VAC
Input-baseplate test voltage	1500 VAC	1000 VAC
Output-baseplate test voltage	500 VAC	500 VDC
Input-output capacitance	1000 pF	1000 pF

GENERAL	
Frequency synchronization range	±7% of switching frequency (see application information)
Operating baseplate temperature[3]	-20 to 85°C
Thermal protection	95°C minimum
Storage temperature	-20 to 125°C
Flammability	UL94-VO
Agency approval	UL, VDE, CSA (per IEC-950)
Weight	220g.

Specifications subject to change without notice **1.** EMI measured on either line into a 50Ω Line Impedance Stabilization Network with 120µF of the rated output voltage. **2.** Overvoltage protection is tested with an external source which is not to exceed 150% of the rated output voltage. **3.** -40° to 85°C range available.

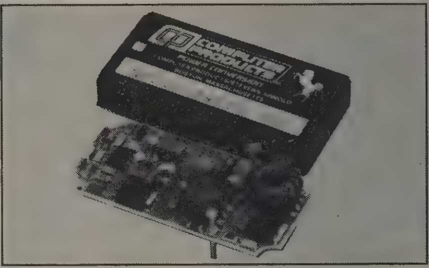
Isolated DC/DC Power Supplies

NFC FAMILY — Wide Input, Regulated, Single, Dual, & Triple Output, 10-100 Watt Converters

The NFC standard product line consists of seven series of DC/DC converters with output power ranging from 10 - 100 watts. All products will operate from wide range input voltages while providing isolated, tightly regulated single, dual and triple output voltages. Useable power densities as high as 25 W/in^3 and operation up to 71°C make the NFC family the ideal solution to a host of DC/DC converter requirements.



NFC FAMILY SPECIFICATIONS

Output Power (Watts)	Input Voltage		Output #1	Output #2	Output #3	Efficiency (%)	Regulation		Output Noise (P-P)	Size (L" x W" x H")	Model Number	Notes
	Nominal (VDC)	Range (VDC)					Line	Load

150 to 360		10 - 60	+4.5 to +15V@20A			75	±0.5%	±1%	150 mV	5.25 x 5.0 x 1.55	3T20AP-6115
150 to 360		10 - 60	+4.5 to +30V@12A			75	±0.5%	±1%	150 mV	5.25 x 5.0 x 1.55	3T12AP-6130

Notes:
1. Load regulation from 10% to 100% full load (NFC10), 25% to 100% full load (NFC20). C Series line & load regulation; 1% main output, 0.1% auxiliary outputs. **2.** UL1950, CSA C22.2-234/950, EN60950, IEC950, EN41003, & VDE0805 approved or approvals pending. **3.** UL1459, 2nd Edition, Telecom approved. **4.** UL1950, IEC950, CSA C22.2-234/950 approved. **5.** Load regulation: singles - 25% to 100% full load; duals - 50% to 100% full load. **6.** VDE0871 Level B conducted noise. **7.** NFC25 Line Regulation: 0.2% for 5V Output, 1.5% for Auxiliary Outputs. NFC25 Load Regulation: 1% for 5V Output, Auxiliary Output regulation depends on 5V output loading. NFC25 Output Ripple: 80mV P-P for 5V Output, 150mV P-P for Auxiliary Outputs. Call CPI for more information. **8.** NFC40 Total Error Band: 3% for 5V Output, 5% for Auxiliary Outputs. Total Error Band includes initial set point and line & load regulation @ 25°C within stated limits. NFC40 output ripple measured with 0.1 µf ceramic cap at output pins Call CPI for more information. **9.** NFC75/NFC100 Output Ripple measured with 10µF tantalum capacitor across output. **10.** An optional input filter is available which allows the converter to meet VDE0871 Level A, VDE0878 Level A, and EN55022 Level A. Add the suffix "-F" to the model number. **11.** For extended operating temperature to +85°C, add the heatsink option suffix, "-1", to the model number. Maximum heatsink height is 0.5". **12.** Conducted noise to VDE0871 Level B and EN55022 Level B may be achieved by putting a capacitor across the input pins. Recommended capacitor: Sprague 120µF, 100V, 672D Series. **13.** Reverse voltage protection can be implemented by putting a fast blow fuse on the positive input rail. Rate the fuse for 48VDC @ 2A, 24VDC @ 4A, 12VDC @ 8A. **14.** Meets IEC801-4, IEC801-2. **15.** Input transient protection: 200VDC for 100ms. **16.** Load regulation from 25% to 100% F.L.

CONVERSION DEVICES, INC.

EXCELLENCE IN POWER CONVERSION TECHNOLOGY

A large selection of regulated DC/DC Power Converter models with standard input voltage ranges from 0.5 to 48VDC, ±10 % to ±15 % tolerance. Also, wide 2:1 and 4:1 input ranges are available from 3W to 60W with very-low profile and dense package configurations. This new generation of DC/DC Converters utilizes surface mount technology for ruggedness, long-term reliability and performance. Maintaining conservative design rules throughout, complemented by quality manufacturing, test, and reliability standards, CDI accomplishes excellent component stress levels and high MTBFs.

APPLICATIONS:

- Telecommunications Equipment
- Data Communications Equipment
- Distributed Power Networks
- Data Acquisition Instrumentation
- Mobile/Battery Driven Equipment
- Local Area Networks
- Railroad/Transportation Equipment
- Process/Machine Control Equipment
- Automatic Test Instrumentation
- Robotics
- Aircraft

CONVERSION DEVICES, INC.

EXCELLENCE IN POWER CONVERSION TECHNOLOGY

DC/DC Converters for all applications

KEY FEATURES:

- Very Low Profile Packages (0.300")
- Very High Power Density
- 4:1 Ultra-Wide Input Ranges
- Internal Input Filtering (π)
- High Switching Frequencies (>100KHz)
- Up to 4000VDC Voltage Isolation
- Remote ON/OFF Control
- 2 Year Warranty
- Efficiencies Up to 83% @ FL
- Line/Load Regulation up to ± 0.03%
- Very-Low Output Ripple & Noise
- Short Circuit Protection
- UL 1950 and CSA 22.2 Approvals
- Six-Sided EMI Shielded Cases
- 100% Burn-In @ Full Load
- Industry Standard Pin Outs

FROM 0.5W TO 60W SINGLE, DUAL OR TRIPLE OUTPUT, CHOOSE THE RIGHT DC/DC CONVERTER FOR YOUR APPLICATION:

DATEL
INNOVATION and EXCELLENCE

DC/DC POWER CONVERTERS

Features

- ☐ *Single, Dual, Triple Outputs*
- ☐ *Wide Range Inputs:*
  - *18 to 72 Volts*
  - *9 to 36 Volts*
  - *4.6 to 13.2 Volts*
- ☐ *2.1 to 15V Outputs*
- ☐ *Superb Regulation (±0.2% Line, ±0.5% Load)*
- ☐ *Fully Isolated (500V)*
- ☐ *High Efficiency (>80%)*
- ☐ *Wide Temperature Range (-40°C to +105°C)*
- ☐ *Small:*
  - *3 Watts 1.25" x 0.8"*
  - *5 Watts 1" x 1"*
  - *10 Watts 2" x 1"*
  - *20 Watts 2" x 2"*
- ☐ *5 or 6-Sided Shielding*

Custom Designs:

DATEL invites inquiries for virtually any large-volume, non-standard product. We fully appreciate that common systems designs often require uncommon power supplies. DATEL has developed a large library of custom and modified-standard designs. We may already have what you need. If we don't, we'll do our best to accomodate your requirements, in your time frame, and at your price.

SINGLE OUTPUT

Wide Input Range DC/DC Converters

3, 10, 20 Watt

Features:

MADE IN USA

- Wide input range (2:1, 3:1, 4:1)
- Wide operating temperature (–25°C to +105°C)
- Efficiencies to 84%
- Compact size
- Fully isolated (500Vdc minimum)
- Superb line/load regulation
- Overcurrent and short circuit protection
- Reverse polarity input protection
- Synchronization and output voltage adjustment (20W models only)
- Outputs of 3.3V, 5V, 5.2V, 12V or 15V
- Shielded case (10W and 20W models only)

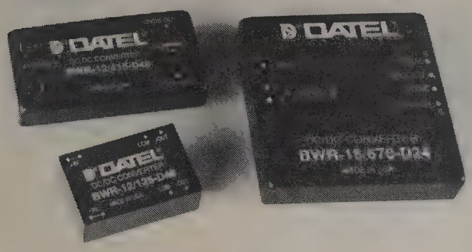
DUAL OUTPUT

Wide Input Range DC/DC Converters
3, 10, 20 Watt



Features

MADE IN USA

- Wide input range (2:1, 3:1, 4:1)
- Wide operating temperature (–25°C to +105°C)
- Efficiencies to 83%
- Fully isolated (500Vdc minimum)
- Excellent line/load regulation
- Overcurrent and short circuit protection
- Reverse polarity input protection
- Synchronization and output voltage adjustment (20W models only)
- Small size
- Outputs of ±5V, ±9V, ±12V and ±15V
- Shielded case (10 and 20 Watt models only)

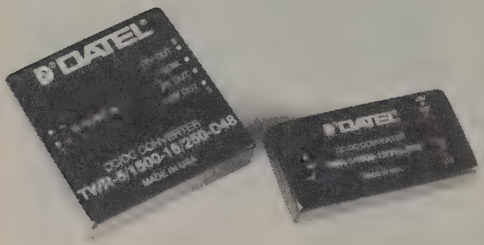
TRIPLE OUTPUT
Wide Input Range DC/DC Converters
10 and 15 Watt



Features

MADE IN USA

- Wide input range (2:1, 4:1)
- Wide operating temperature (–25°C to +105°C)
- Efficiencies to 82%
- Fully isolated (500Vdc minimum)
- Small size
- Shielded case
- Short circuit protection
- Outputs of +5V, ±12V or +5, ±15V
- "R" versions for enhanced regulation
- All parameters fully-tested by ATE
- Reverse polarity input protection
- Insulated case bottom (will not short PC etch)

* Refer to the last page of DATEL's DC/DC Converter section for connections and detailed mechanical dimensions.

Load Regulation:

+5V	±2% (0-100%L)
±12 or ±15V	±5% (50-100%L), ±8% (20-100%L)
"R" Version	±1% (0-100%L)

Line Regulation:

+5V	±1%
±12 or ±15V	±5%

Notes:

1. ±12V/±15V outputs with external 10µF, 25V capacitor for -D5 and -D12 models.
2. "R" versions (-D48 models only) are available for enhanced load regulation. Simply add an "R" at the end of the part number when ordering.
3. All -D48 models are designed with factory-adjustable linear regulators.

Contact DATEL for special requirements.

Special Features of the SMQ Series

- More Watts Per Cubic Inch (29W/Cu. Inch for 5V/40 A unit)
- Proven Forward Converter Topology To Reduce Voltage and Current Stresses in Power MOSFET
- Fixed Frequency (250 KHz) For Reduced EMI, Better Stability and Greater Ease of Synchronization
- Short Circuit Current Limited to Negligible Level to Protect Load Circuit to Much Greater Degree Than Conventional Foldback Circuits
- Fast Response Overvoltage Protection Circuit Limits Voltage Excursions During Fault or Transient Condition
- Proprietary Planar Magnetics Design For Exceptional Repeatibility and Control of Leakage Inductance
- Excellent *Guaranteed* Transient Response

There are numerous approaches to designing a high-power-density DC converter. With some approaches, as with high frequency resonant topologies, the required component restrictions and circuit nuances can result in subtle but serious performance tradeoffs. For example, the high primary-side peak current, high-line voltage stresses and reduced transient response are often a problem. Operation under short circuit or overvoltage conditions can result in additional undesirable performance characteristics.

The advanced SMQ series has been designed to meet the high density power objectives without giving in to the above tradeoffs. It represents a blend of proven engineering with a careful application of advanced concepts in semiconductor technology, magnetics design, thermal management, fault protection and packaging. It represents performance without risk.

1. Voltage at which unit will support 75% of full load and still maintain load regulation.
2. Unit will withstand this input voltage for up to 10 seconds (maximum duty cycle of 1%)

Operational Ratings and Characteristics

INPUT	
Input Voltage	**(See above)**
Input Reflected Ripple	5% of Nominal Input Current
Turn-on Time	100 mS Typical

OUTPUT	
Voltage Accuracy	1%
Isolation (Input/Output), 24–48 V Input	1500 VDC Min.
Isolation (Input/Output), 300 V Input	4300 VDC Min.
Efficiency (Nominal Line/Full Load)	80% Typical–All Output Voltages
Switching Frequency	250 KHz Typical
Line Regulation	0.2%
Load Regulation	0.5%
Peak-to-Peak Output Ripple and Noise	3% (20 MHz Bandwidth)
Transient Response, 50–100% Full Load	500 μS Max.
Current Limit	110–125% of Full Load Rating
Overvoltage Protection (OVP)	115–135% of Nom. Output Voltage (Latches off until power is recycled)
Thermal Shutdown (Baseplate Temp.)	90–105°C (Auto Recovery)
Short Circuit Current Limit (Current at which shutdown occurs)	135% of Load Rating (Auto Recovery)
Maximum RMS Short Circuit Current	10% of Rated Output Current

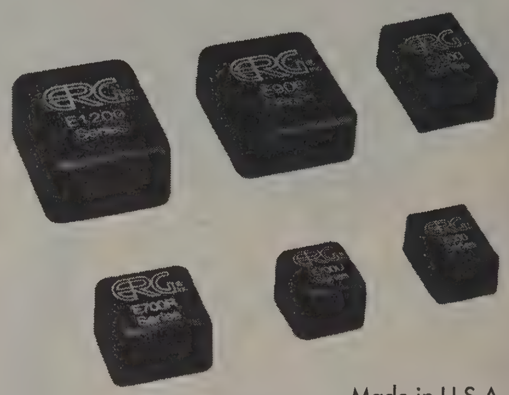
The U.S. Power Supply Source for Information Displays

DC-DC CONVERTERS

DC-DC Converters for Gas Discharge Displays up to 25W

Convert low DC line voltage to the higher voltage levels required to activate multi-segment plasma gas dicharge displays (including bar graphs). ERG Converters eliminate the need for 200-250 vdc line.



Made in U.S.A.

Contact Factory for Voltage Requirements:

- Custom Design Variations for multi-segment, bar graph and dot matrix gas discharge and vacuum flourescent diplays
- Inputs from 5 vdc to 28 vdc
- Outputs from 5 vdc to 1,500 DC
- Single and dual outputs (up to 25W total)
- Regulated and unregulated
- Center Tap (voltages)

General Specifications

Converter Series	Input	Output	Size	Weight	Package
E700U	5, 9, 12, 15 vdc	Up to 3W unregulated (i.e. 200 vdc @ 15 ma)	1.1" (27.94 mm)X 1.2" (30.48 mm)X .91" (23.11 mm) max. high	30 gms.	Plastic
E700R (Regulated)	5, 9, 12, 15 vdc	Up to 3W unregulated (i.e. 200 vdc @ 15 ma)	1.43" (36.32 mm)X 1.5" (38.10 mm)X 1.03" (26.16 mm) max. high	40 gms.	Plastic
E500*	5, 9, 12, 15 vdc	Up to 3W unregulated (i.e. 200 vdc @ 15 ma)	1.00" (25.40 mm)X 1.38" (35.05 mm)X 0.70" (17.78 mm) high	20 gms.	Plastic
E1600	5, 9, 12, 15 vdc	Up to 6W unregulated (i.e. 200 vdc @ 24 ma)	1.30" (33.02 mm)X 1.88" (63.50 mm)X 0.82" (24.9 mm) high	44 gms.	Plastic
E900	5, 9, 12, 15 vdc	Up to 12W total, with single or dual outputs, unregulated; (i.e. Single: 250 vdc @ 30 ma Dual: 250 vdc @ 30 ma and - 16 vdc @ up to 200 ma to power the drive electronics in many applications using the Burroughs SELF-SCAN* or IEE* ARGUS displays)	2" (50.80 mm)X 2.5" (63.50 mm)X .98" (24.9 mm) high	122 gms.	Aluminum
E1200	12, 15 vdc standard (others to your spec)	Up to 25W unregulated (i.e. 250 vdc @ 100 ma)	2" (50.80 mm)X 2.5" (63.50 mm)X 1.19" (30.23 mm) high	185 gms.	Aluminum

* For high-volume requirements, E500 delivers same performance as E700 at significantly lower unit cost!

Mounting: P.C. board standard
Encapsulation: All ERG converters are fully encapsulated
Isolation (in/out): 600V RMS (60 Hz. breakdown for 1 min.) standard
Temperature: 0-70°C standard. Wider ranges available.

The U.S. Power Supply Source for Information Displays

DC-DC/AC CONVERTERS FOR VF DISPLAYS

DC-DC/AC Converters for Vacuum Flourescent Displays up to 12W

E900 VF Series
E900 VF Series
E800 VF Series
E700 VF Series

Made in U.S.A.

No need for "special" multiple output power supplies. ERG converters produce both anode and filament voltages for VF displays up to 12W. Compatible with all major VF display makes.

Mount on your PC board as needed, where needed. ERG can tailor a "VF" Series Power Supply to match the voltage requirements of any Vacuum Flourescent Display or input voltage (DC) requirement.

Contact the factory for more information.

General Specifications

Converter Series	Input	Output	Size	Weight	Package
E700 VF up to 3W	5, 12 vdc (other inputs available.)	DC Anode voltage and Center tap (AC) filament voltage.	1.1" (27.94 mm)X 1.2" (30.48 mm)X .91" (23.11 mm) max. high	30 gms.	Plastic
E800 VF up to 6W	5, 12 vdc (other inputs available.)	Up to 6W max.	1.43" (36.32 mm)X 1.50" (38.10 mm)X 1.03" (26.16 mm) high	40 gms.	Plastic
E900 VF up to 12W	5, 12 vdc (other inputs available.)	Up to 12W max. (to 7.5W max. with 5V DC input)	2" (50.80 mm)X 2.5" (63.50 mm)X .98" (24.9 mm) high	122 gms.	Aluminum

Mounting:	P.C. board standard
Encapsulation:	All ERG converters are fully encapsulated
Isolation (in/out):	300V RMS (60 Hz. breakdown for 1 min.) standard
Temperature:	0-70°C standard. Wider ranges available. 85°C case max.

NOMOGRAPH VOLTAGE DROP

NOMOGRAPH OF VOLTAGE DROP ACROSS LOAD SUPPLY LEADS
(as a function of wire size and load current)

THIS NOMOGRAPH CAN BE USED TO FIND:

Maximum current carrying capacity recommended for any standard wire size.*

1) With a straight edge, connect from the wire size on Scale 2 to the point "A" on Scale 3.
2) Read I_{max} on Scale 1.

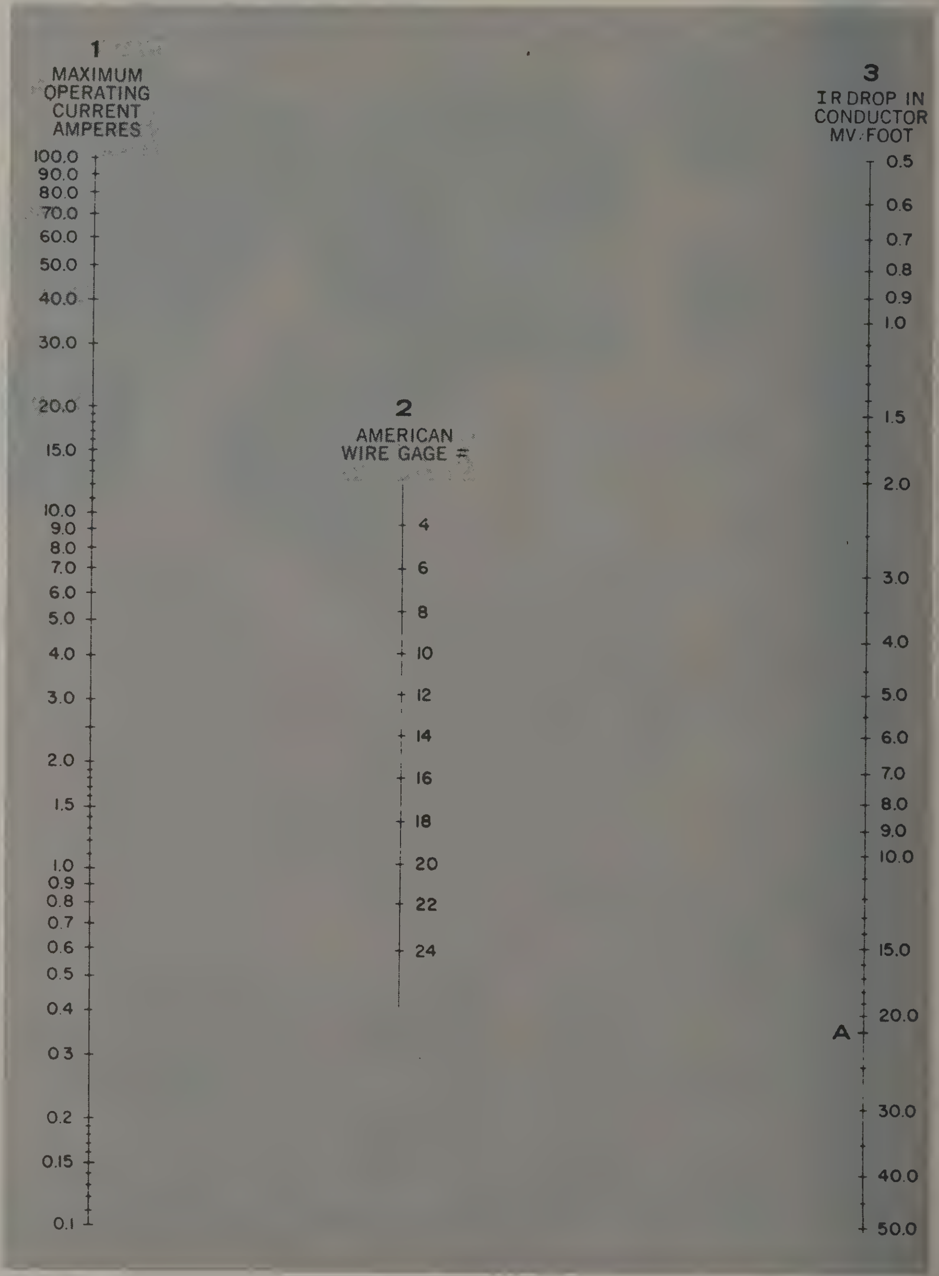
Voltage drop in millivolts per foot for known wire size and operating current.

1) With a straight edge, connect the known current on Scale 1 and the wire size on Scale 2.
2) Read voltage drop on Scale 3.

Wire size required for known operating current and known maximum tolerable voltage drop across supply leads.

1) Determine maximum tolerable drop in millivolts **per foot** of lead (sum of positive and negative leads).
2) Connect the value on Scale 3 (as determined in step 1) to the known current on Scale 1.
3) Read wire size on Scale 2.

** Based on an arbitrary minimum 500 circular mils per ampere. High-temperature class insulation will safely allow higher currents.*



NOTE: A voltage stabilized Power Supply controls the voltage across its output terminals. Hence, the wire conductors used to connect the load must be considered as part of the load. At high load currents, the voltage drop across the supply leads may appreciably degrade stablization at the load. Kepco models equipped with the *remote error sensing* feature can automatically compensate for voltage drops of up to 500 mV across each load supply lead.

90Z Family for 802.2 Compliant On-Board Discrete DC/DC Converter

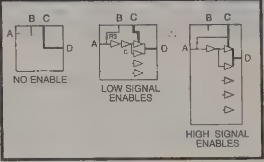
FEE Fil-Mag®

DC/DC Converter Magnetics

Key Features

- The cost of magnetic suppliers' overheads are eliminated
- The board can be laid out in a quick and efficient manner
- No guess work as to how to implement your own on-board converter
- Optimum space utilization
- Reduce EMI due to open construction
- No high cost failure items
- Pick-and-place magnetics in conjunction with OEM's selection of all SMD components
- Critical layout issue identified
- Output inductor is a common mode choke for further EMI reduction

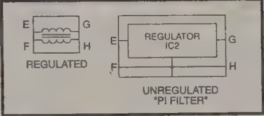
Enable Options



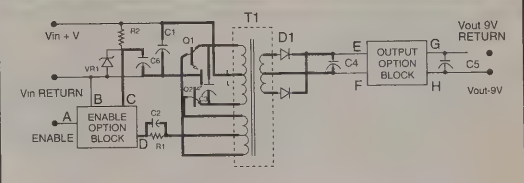
T1	VOLTAGE	
90Z021SM	5V to -9V	Unregulated
90Z022SM	5V to -9V	Regulated
90Z023SM	12V to -9V	Unregulated
90Z024SM	12V to -9V	Regulated

Note:
Refer to Bill of Material Matrix for building your own on-board DC/DC converter

Output Options

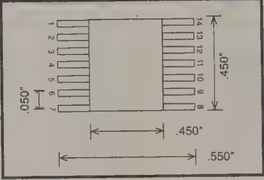


Schematic



NOTE: THE HEAVY LINES IN THE SCHEMATIC IDENTIFY CRITICAL LAYOUT AREAS. LINES BETWEEN THESE PARTS SHOULD BE KEPT AS SHORT AS POSSIBLE.

Mechanical



Ratings:
Operating Temperature: 0 to 70°C

±15VDC	±65mA	NMH0515	NMH1215

Add suffix "S" for single-in-line package, suffix "D" for dual-in-line package, suffix "M" for SMT

NEW!! NMF Regulated Series

- Fully regulated 1 watt output
- 5, 12, 24 and 48VDC inputs
- 0.18 in² of board space
- 1000 VDC isolation
- Ideal for flash memory

NEW!! NMV 3000 VDC Isolation Series

- 3000 VDC Isolation
- 1 Watt outputs
- 5, 12, 24 and 48VDC inputs
- 0.18 in² of board space
- 80% efficiency

1.5–6.0 Watt DC/DC Converters

- 5, 12, 24, 28 and 48 VDC Inputs
- Industry Standard Pinouts
- 500 VDC Isolation
- Input π Filters
- Fully Regulated Outputs
- Low Cost

RELIABILITY

interpoint

The World-Wide Reliability Standard

Founded in 1969, as Integrated Circuits Incorporated (ICI), Interpoint is the premier world-wide supplier of high reliability dc-dc converters. Its components supply power on virtually every commercial airliner in the West, the space shuttle, the most advanced U.S. and European fighters, and in a wide variety of missile systems, ground vehicles, industrial applications and medical electronics.

Leading Edge Technology

Interpoint is a specialist in producing power supplies to military quality levels. It is listed on DESC's QML and offers SMD versions of qualified dc-dc converters.

Additionally, Interpoints's production facilities offer full MIL-STD-883 qualification, Statistical Process Controls, and audited verification of sources, processes, and procedures. High precision automated assembly and test equipment means the highest quality levels for both large and small production runs.

With over 500 team members worldwide, Interpoint offers a choice between U.S. manufacturing and wholly owned international production. Interpoint dc-dc converters– even those intended for industrial applications– are produced on the same lines as our military/aerospace models. They are all designed to provide the very highest levels of quality and reliability.

MILITARY/AEROSPACE Converters

These sealed, metal encased converters offer power solutions from 1 to 285 watts with the highest reliability, best performance, and smallest size in the industry. Environmental screening is available either to Interpoint procedures or MIL-STD-883.

Filter and Protection Modules

Matched to our military/aerospace converters, these modules bring Interpoint converters within MIL-STD-461's CEO3 noise limits and protect them against surges and spikes. Sealed, metal packages are standard. Optional environmental screening is also available.

HI-REL Industrial Converters

These metal or potted epoxy designs are intended for industrial applications that need higher reliability and smaller size than standard commercial grade parts.

Low Cost Minor Modifications

Interpoint can modify a standard part or design a completely new converter to your specifications. Just ask one of our application support engineers about custom services.

Call 1-800-822-8782

DC-DC CONVERTERS
MIL-STD-883
SMDs AVAILABLE

Interpoint is fully qualified for the processes necessary to build dc-dc converters to MIL-H-38534 and offers models compliant to MIL-STD-883. Interpoint is listed on DESC's Qualified Manufacturer's List (QML) and offers a wide variety of Standard Military Drawing (SMD) models. Call your Interpoint representative for status on our expanding list of qualified products.

MFLHP SERIES

- **Up to 70 W/in³**
- **Up to 100 watts output power**
- **Paralleled current sharing**
- **-55° to +85°C case temp range**

The MFLHP Series converters use Interpoint's Asymmetrical Power Transfer™ technology to provide up to 100 watts output power in a welded metal case measuring only 1.5 x 3.0 x 0.38 inches. Multiple units may be paralleled to provide current sharing or N+1 redundancy. Constant current or constant voltage output is offered along with standard features that include undervoltage lockout, remote sense and sync. Mounting options include side-leaded cage mount or though hole styles. Operating temperature is -55 to +85° C. Environmental screening available.

- **Up to 70 watts– 1, 2, or 3 outputs**
- **19 to 40 Vdc input range**
- **Up to 84% typical efficiency**
- **-55°to +85°C case temp range**

The MFW converters provide up to 70 watts of power at up to 84% efficiency with single, dual or triple outputs. Outputs are regulated and isolated. On dual output models, up to 95% of rated power is available from either output. On triple output models, up to 83%, of rated power is available from each output. Packages are sealed plated steel with heat dissipating flange mounting. Environmental screening available.

MFL SERIES

- **28 or 270 Vdc input models**
- **Up to 65 watts output power**
- **Paralleled current sharing**
- **-55 to +125° C case temp range**

The MFL Series converters offer up to 65 watts output power in a sealed metal case measuring only 1.5 x 3.0 x 0.38 inches. Up to three units may be paralleled to provide a shared output of up to 185 watts. Standard features include undervoltage lockout, remote sense, and sync. Mounting options include side-leaded mount or through-hole styles. Operating temperature is -55 to +125° C. Environmental screening available.

MTW SERIES

- **Up to 30 watts output power**
- **19 to 40 Vdc input range**
- **Up to 83% typical efficiency**
- **-55° to +85°C case temp range**

The MTW Series offers 30 watt converters with regulated and isolated single or dual outputs at up to 86% efficiency. For dual outputs, up to 90% of full power is available from either output. Packages are sealed, plated steel. Environmental screening available.

MTR SERIES

- **Up to 30 watts output power**
- **16 to 40 Vdc input range**
- **Up to 84% typical efficiency**
- **-55 to +125°C case temp range**

The high frequency MTR Series converters offer up to 30 watts output power in a hermetically sealed package only 1.12 x 2.12 x 0.4 inches – the same outline as our 15-watt MHE/MLP series. The parts offer full power operation from 16 to 40 Vdc input and over the full -55 to +125° C temperature range. Features for the isolated, regulated units include low-voltage lockout, remote sense, voltage trim, and sync. Single, dual, and triple outputs available. Environmental screening available.

- **Up to 20 watts output power**
- **9 to 16 and 16 to 40 Vdc input range**
- **Up to 86% typical efficiency**
- **-55° to +85°C case temp range**

High efficiency MHE/MLP converters feature single or dual isolated, regulated output voltages, wide input voltage range, and sealed, plated steel packages for military/ aerospace applications. MLP models offer low profile cases. Flange mount optional. Environmental screening available.

MHD SERIES

- **Up to 20 watts output power**
- **1,2, or 3, outputs**
- **-55 to +125° C case temp range**
- **Case pinout and outline match MHE and MTO converters**

The MHD Series converters provide state-of-the-art dc-dc conversion with case outlines and pinouts that match our industry standard 28 V input MHE and MTO series products. The MHD series offers excellent audio rejection (up to 50dB), improved transient response, current limiting overload protection, 16 to 40 Vdc input, and -55 to +125° C full power operation. Height of the metal hermetic case is only 0.400 inch. Environmental screening optional.

MTO SERIES

- **Up to 15 watts – triple output**
- **16 to 36 Vdc input range**
- **Up to 79% typical efficiency**
- **-55° to +85° C case temp range**

MTO converters have three regulated output voltages with a common ground. All outputs are isolated from the input. Full rated output power can be drawn from the 5 Vdc output, or the dual outputs can be loaded as shown. Total power is up to 15 watts. Package is sealed, plated steel with optional flange. Environmental screening .

MILITARY/AEROSPACE DC - DC CONVERTERS

MRH SERIES

- **Radiation Hardened converter**
- **Up to 15 watts – 1, 2, or 3 outputs**
- **16 to 36 VDC input range**
- **-55° to +85°C case temp range**

MRH converters are radiation hardened to operate through 10^{13} neutrons/sq cm neutron fluence, 10^{11} rads(Si)/sec dose rates and 10^{5} rads(Si) total dose. Single, dual, or triple outputs are regulated and isolated. Up to 15 watts of power. Environmental screening available.

MQO SERIES

- **Up to 16.5 watts output power**
- **4 outputs (including -5 Vdc)**
- **Meets CE03, CS01, CS02, CS06, DO160B standards**
- **-55 to +125°C case temp range**

The new MQO Series dc-dc converters supply up to 16.5 watts in a four-output configuration. Outputs include +5 Vdc and -5 Vdc (often used for ECL applications) and either ±12 Vdc or ±15 Vdc. A built-in EMI filter and transient suppressor allows the unit to meet MIL-STD-461C's CE03 reflected ripple standard and CS01, CS02, CS06, and DO160B conducted susceptibility standards without any external components. An output holdup feature provides a low power flag and full output power holdup through transient dropout conditions. Metal hermetic case. Environmental screening optional.

MHF+ SERIES

- **Up to 15 watts output power**
- **16 to 40 Vdc input range**
- **Up to 82% typical efficiency**
- **-55 to +125° C case temp range**

An upgrade to our industry standard MHF Series, MHF+ Series converters provide up to 15 watts output power over the full -55 to +125° C temperature range. The sealed metal parts are available in welded hermetic packages that take up only 1.7 sq in. of board area and are only 0.325 inch high. Up to 82% efficiency. Single and dual outputs. Environmental screening optional.

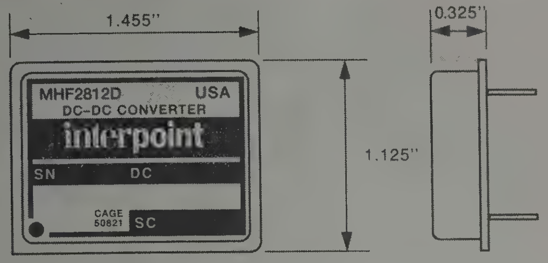
MILITARY/ AEROSPACE DC - DC CONVERTERS

MHF SERIES

- **12 watts – low profile**
- **16 to 40 Vdc input range**
- **84% efficiency**
- **-55° to +125° C case temp range**

MHF Series converters provide 30 watts/in^3 power density in a low profile (.325 inch max) part. Regulated and isolated single or dual outputs provide up to 12 watts at up to 84% efficiency. Full power operation from -55° to +125°C. Environmental screening available.



MODEL	VDC INPUT	OUTPUT @ FULL LOAD			MAX. WATTS

MSA SERIES

- **Up to 5 watts output power**
- **0.27 inch profile**
- **Up to 76% typical efficiency**
- **-55° to +125° C case temp range**

The MSA Series converters offer up to 5 watts output power in our lowest profile case – just 0.27 inch high. These regulated, isolated converters offer 600 kHz switching and full power operation over the full military temperature range. Audio rejection is up to 50 dB. No external capacitors are required. Metal sealed cases. Single and dual outputs. Environmental screening available.

MSR SERIES

- **Up to 4 watts output power**
- **16 to 32 Vdc input range**
- **Up to 75% typical efficiency**
- **-55° to +85°C case temp range**

MSR models offer up to 4 watts output power in single, dual, or triple outputs. Outputs are regulated and isolated from the input. The low-profile packages are sealed plated steel and less than 1.2 square inches. Environmental screening available.

Note: External output capacitors are required.

MILITARY/ AEROSPACE DC - DC CONVERTERS

MDR SERIES

- **Up to 3 watts output power**
- **12, 24 and 28 Vdc input voltages**
- **Regulated, isolated outputs**
- **-55 to +85° C case temp range**

The MDR Series converters are fully isolated and offer the excellent regulation and low output ripple provided by a series output regulator. Sealed, plated steel package. Environmental screening available.

DCH SERIES

- **Up to 3 watts output power**
- **5, 12 and 28 Vdc input voltages**
- **Unregulated**
- **-55° to +100°C case temp range**

DCH models deliver up to 3 watts output power in single or dual isolated, unregulated outputs. The converters may be used in applications not requiring regulation or with external series regulators. Packages are sealed plated steel. Enivonmental screening is available.

FM-461 SERIES

- **MIL-STD-461 accessories for high frequency dc-dc converters**
- **MIL-STD-704B through D transient protection**
- **40 dB min reflected ripple current reduction**
- **-55° to +85°C case temp range**

The FM-461, FMA-461, and FMB-461 filters bring MHE, MLP, MTW, MTO, MHL or MFW converters into compliance with MIL-STD-461B's CE03 limits for reflected input ripple current. The sealed, plated steel case has an optional flange. Environmental screening available.

FMH-461

- **Low profile MIL-STD-461 accessory**
- **MIL-STD-704B through D transient protection**
- **40dB min reflected ripple current reduction**
- **-55 to +125°C case temp range**

The lightweight (26 grams), low profile FMH-461 filter brings both high and low frequency converters into MIL-STD-461B's CE03 noise limits for reflected ripple. Up to 15 watt throughput over -55° to +125°C case temperature. Environmental screening available.

FMC-461

- **High temperature MIL-STD-461 accessory**
- **MIL-STD-704B through D transient protection**
- **40 dB min reflected ripple current reduction**
- **-55° to +125° C case temp range**

The FMC-461 will bring any Interpoint converter into compliance with MIL-STD-461B's CE03 reflected input ripple current limits up to its rated current. Welded bathtub case, -55 to 125°C case temperature operation, and environmental screening available.

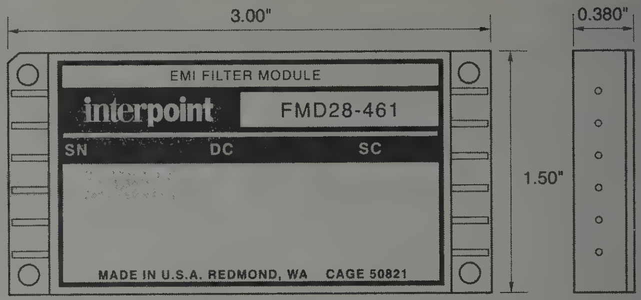
CALL (800) 822-8782 TO ORDER DATA SHEETS

FILTERS & PROTECTION MODULES

FMD/FME-461 SERIES

- **MIL-STD-461 accessories for high frequency dc-dc converters**
- **28 or 270 Vdc input**
- **33 dB min. reflected ripple current reduction**
- **-55° to +125°C case temp range**

The FMD/FME-461 filters will bring Interpoint high frequency power supplies into compliance with MIL-STD-461C's CEO3 limits for reflected ripple current. All models are available in the side-leaded package illustrated. The FMD28 model is available in a flanged down leaded package measuring 1.346 x 2.7 x 0.430 inches. Operating temperature is -55 to +125°C. Environmental screening available.



MODEL	VDC INPUT	MAX CURRENT	MIN ATTENUATION	COMPATIBLE CONVERTERS

FM-704A

- **Combined EMI filter and protection module**
- **Protects against surges and spikes**
- **40 watts throughput power**
- **-55° to +125°C case temp range**

The FM-704A protection module protects any high frequency converter against MIL-STD-1275A and MIL-STD-704A surges and MIL-STD-461C CS06 spikes. Its filter element brings MHF+, MSA, MHE, MLP, MTO, MTW, MTR, MHD and MHL converters within MIL-STD-461B's CE03 noise limits. Up to 40 watts throughput from -55 to +125° C. Environmental screening available.

HR150 SERIES

- **Up to 20 watts output power**
- **Metal, sealed package**
- **1, 2, or 3 outputs**
- **2 input voltage ranges**

The HR150 Series converters provide military program levels of reliability in a Hi-Rel Industrial class part. They provide up to 20 watts of power at up to 83% efficiency. Outputs are tightly regulated and are isolated from the input. Operating temperature range is from -20° to +70°C. Like our military/aerospace converters, the packages are sealed plated steel.

HI-REL INDUSTRIAL DC-DC CONVERTERS

DC SERIES

- **Up to 6.4 watts of output power**
- **Isolated, unregulated outputs**
- **Rugged encapsulated construction**
- **4 input voltage ranges**

The DC Series of unregulated dc-dc converters consists of single and dual output models in four input voltage ranges. They can be used with external regulators or in applications that do not require regulated voltages. Operating ambient temperature range for these plastic encapsulated devices is -20° to +70°C.

*Full load = 80% max load

DDC SERIES

- **Up to 5 watts of output power**
- **Isolated, unregulated outputs**
- **24 pin DIP compatible package**
- **4 input voltage ranges**

The DDC models are unregulated and are designed to be used in applications where regulated voltages are not needed, or with external regulators. The outputs are isolated from the input. They can be operated over an ambient temperature range of -20 to +70°C, and they are encapsulated in plastic packages.

DDR SERIES

- **Up to 3 watts output power**
- **Isolated, regulated outputs**
- **24 pin DIP compatible package**
- **5 input voltage ranges.**

The DDR Series dc-dc converters are isolated and regulated. They are built with a nonsaturating core design to minimize reflected ripple and radiated noise. The rugged plastic 24-pin DIP packages are rated for operation from -20 to +70°C ambient.

DIP SERIES

- **Up to 1.5 watts output power**
- **Up to 82% typical efficiency**
- **Wide input voltage ranges**
- **14 pin DIP compatible package**

The DIP switching regulator series consists of units that operate over a wide input voltage range, over a wide range of loads, with high efficiency. They are ideal for battery applications or wherever high efficiency and small size are important. The output common is connected internally to the input common. They are encapsulated in plastic packages and will operate over an ambient temperature range of -20°to +70°C.

NETCON SERIES

- **Cheapernet/Ethernet compatible**
- **Up to 1.25 watts output power**
- **24 pin DIP package**
- **-9 Vdc output**

Built to IEEE 803.2 CSMA/CD specifications, the NETCONs are intended for use with the AM7990 chip family offered by AMD for LAN applications. The rugged plastic 24-pin DIP package is rated for operation from -20° to +70°C ambient.

DIP_DT SERIES

- **Up to 1 watt output power**
- **Isolated, regulated outputs**
- **14 pin DIP compatible package**
- **5 input voltage ranges**

DIP_DT Series converters can provide up to one watt of regulated, isolated output power. The ±12 Vdc and ±15 Vdc outputs are regulated by monolithic dual-tracking series regulators which provide good regulation and ripple characteristics. The plastic encapsulated packages are rated for operation from -20° to +70°C ambient.

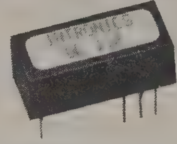
DC-DC CONVERTERS

DC 100 SERIES—0.5 WATT SINGLE OUTPUT

NEW



CASE DIMENSIONS: .89" X .39" X .33"

FEATURES

- Ultra-Miniature Package
- Fully Regulated
- Low Output Ripple and Noise
- High Reliability
- Input/Output Isolation
- Input Voltage: 5, 12, 24V
- Output Voltage: 5, 12, 15

	MODEL NUMBER	INPUT VOLTAGE	OUTPUT VOLTAGE	OUTPUT CURRENT
SINGLE	DC-101	5V	5V	100mA
	DC-102	5V	12V	75mA

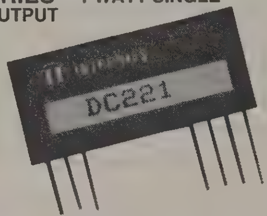
	DC-112	12V	12V	75mA
	DC-113	12V	15V	60mA
	DC-121	24V	5V	100mA
	DC-122	24V	12V	75mA
	DC-123	24V	15V	60mA

DC 200 SERIES—1 WATT SINGLE AND DUAL OUTPUT

NEW



CASE DIMENSIONS: 1.25" X .34" X .57"

FEATURES

- 7 Pin SIP Package
- Fully Regulated (Except 9 Volt Output)
- Low Output Ripple and Noise
- High Reliability
- Input/Output Isolation
- Input Voltage: 5, 12, 24V
- Output Voltage: 5, 9, 12, 15, ±12, ±15

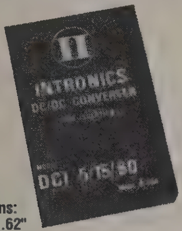
DC-DC CONVERTERS

DCI/DUAL OUTPUT—HIGH ISOLATION



Case Dimensions:
3.02" x 2.02" x .62"

FEATURES
INPUT: 5, 12, 24, 28VDC
OUTPUT: ±12, ±15VDC
- Meets UL544 Leakage
- High Input/Output Isolation
- Short Circuit Current Limit
- No Heat Sink Required
- Excellent Regulation: 0.05% Line/Load

MODEL	INPUT RANGE (VDC)	OUTPUT VOLTAGE (VDC)	OUTPUT CURRENT (mA)
5/12/60	5 ±10%	±12	60
5/15/60	5 ±10%	±15	60
12/12/60	12 ±10%	±12	60

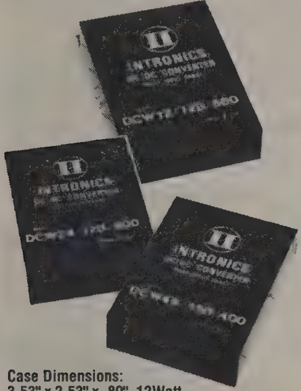
28/12/60	28 ±10%	±12	60
28/15/60	28 ±10%	±15	60

DCW SERIES 12—22 Watt Wide Input Range, Isolated



Case Dimensions:
3.53" x 2.53" x .89" 12Watt
3.53" x 2.53" x 1.27 15 Watt + 22 Watt
3.53" x 2.53" x 1.56 20 Watt

FEATURES
INPUT: 12, 24, 48VDC
OUTPUT: 5, 12, 15, ±12, ±15VDC
- Wide: 2:1 Input Range
- High Input/Output Isolation
- Short Circuit Protection
- No Heat Sink Required
- Direct PC Board Mounting
- Low Output Ripple
- Continuous Short Circuit Protection

DC 700 SERIES 15-75 WATT

Case Dimensions:
2.50" x 3.00" x .81"

FEATURES
- Up to 12 watts/cubic inch
- Efficiency to 90%
- Ultra Wide Input Voltage Range
- Thermal Overload Protection
- Six-Sided Shielding, Low Thermal Gradient Copper Case
- Reverse Polarity Protection

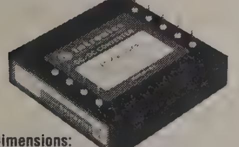
KZ 200 SERIES 25 WATT



Case Dimensions:
3.00" x 3.00" x .70"

FEATURES
- Current Mode Control
- 200 KHz Switching Frequency
- Remote Control Shutoff
- Adjustable Output Voltage
- Low Voltage Shutdown
- Available in two pin configurations

*Power limited to 25 watts.

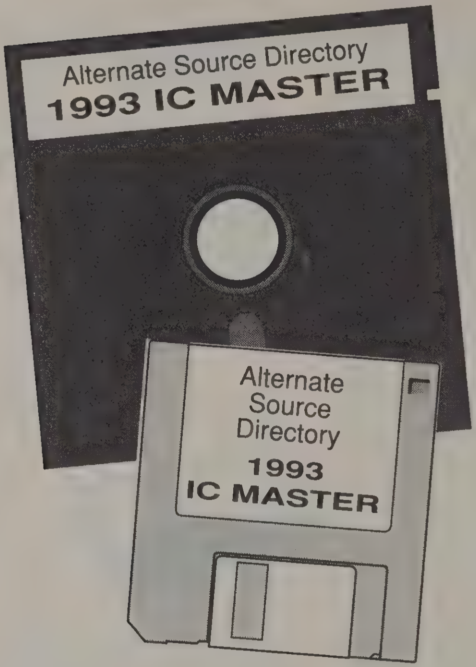
Hearst Engineering Software

ICMASD

Alternate Source Directory



The all new 1993 ICMASD-IC Alternate Source Directory on Disk is identical to the Alternate Source Directory Section contained in Volume Two of the printed version of the 1993 IC Master. All you need is an IBM XT/AT or 100% compatible personal computer with hard drive.

ICMASD is the most comprehensive and reliable guide available to all ICs known to have a realistic replacement or alternative. The 1993 version contains over 106,000 listings to help you find the functional equivalents for both current and discontinued parts.

The electronic ICMASD is fast, convenient...and can be customized for your specific needs!

ENHANCED FLEXIBILITY

ICMASD is organized in a similar fashion to the printed version in the IC MASTER. The database is arranged by manufacturer, showing the manufacturer's original basic part number. All known replacements for that part are listed in alphanumeric order.

The enhanced flexibility of the electronic ICMASD allows you to add comments, up to 19 digits long, to any device listing in the system. These comments can be part numbers, project notes, prices, or any information unique to your application.

USER FRIENDLY

ICMASD is very user friendly. There are no tricky commands to learn. The software is completely menu driven. ICMASD comes complete with documentation that is brief and to the point. It can be ordered on five 51/4" double-sided, double-density disks OR on one 51/4" high-density disk OR on one 31/2" high-density disk.

Published annually in March

FAST AND CONVENIENT

ICMASD includes a complete Manufacturers & Distributors Directory listing the addresses and phone numbers of every manufacturer in the IC industry. With this complete directory any manufacturer or distributor is just a phone call away.

To order your 1993 ICMASD,
contact your local IC MASTER distributor or, send your purchase order and check for $179.50 plus tax* to:

Marie Botta
Hearst Business Publishing
645 Stewart Avenue
Garden City, NY 11530
(516) 227-1300 • FAX (516) 227-1901

*Please add sales tax in NY,MA,IL, CA, or GST tax in Canada
For delivery outside the USA, please add $20 per ICMASD.

For faster service, have your VISA or MasterCard handy, and call our CREDIT CARD HOTLINE: 1-800-833-7138

jbm DC-DC Converters

TYPE DC-01/DC-02

1 to 2 Watts

GENERAL FEATURES:

- Low profile PCB mount
- Input/Output isolated
- Low output ripple noise - 50 mVp-p
- Short circuit protection
- Input and output filtering
- High efficiency and reliability
- Low cost

D1 PACKAGE ELECTRICAL SPECIFICATIONS (ISOLATION VOLTAGE: 500VRMS)

KAPPA® TECHNOLOGIES INC.

DC-DC Converters for Networking Applications

Features

- All units burned-in at maximum input voltage and temperature under full load
- Continuous short-circuit protection (reg'd units only)
- DIP and SMD package options
- Low output noise (50mV p-p regulated)
- Input ∏ filter available

Typical Application

Cheapernet (10Base2) Transceiver or MAU

Ratings

General Specifications

Switching Efficient at full load	
Regulated units	≥50%
Unregulated units	≥70%
Switching frequency (minimum)	
Regulated units	25KHz to 75KHz
Unregulated units	25KHz to 140KHz
Isolation, Input-to-Output (minimum)	>1000 Megohms @ 500Vrms or 2000Vrms

Input Specifications

Input Voltage	±5% (regulated); ±10% (unregulated)
Input Filtering	Capacitor-type (∏ network available)

Output Specifications

Output Power at full load	2.25 Watts max.
Output Voltage Accuracy	±3% (regulated); ±5% (unregulated)
Line Regulation	±0.2% max (regulated); ±5% max (unregulated)
Load Regulation	±1% max (regulated); ±5% max (unregulated)
Ripple and Noise (20Hz to 20MHz), p-p max	50mV (regulated); 100mV (unregulated)

KAPPA® TECHNOLOGIES INC.

DC-DC Converters for Networking Applications

Environmental Specifications

Temperature Range .... -25°C to +70°C (oper); -40°C to +100°C (non-op)
Temperature Coefficient .... ±0.02%/°C maximum over Operating Range
Voltage Stability (24 hours) .... ±0.05% maximum
Humidity, non-condensing .... 20-95% RH
Cooling .... Free-air Convection
Electrical Derating .... None
Marking Permanency .... per Method 215 of MIL-STD-202
Lead Solderability .... per Method 208 of MIL-STD-202

Electrical Specifications at nominal line, full load, +25°C (See "Ratings")

Notes to Package Outlines:

1. Dimensions are expressed in inches (mm).
2. Lead spacing shall be measured within this zone.
   a. Shoulder and lead tip dimensions are to centerline of leads.
3. Tolerance non-cumulative.
4. Lead Material: Alloy 42 (Nickel/Iron per ASTM F-30) or equiv., electrotin-plated per MIL-T-10727.
5. Body Material: Plastic (epoxy or Diallyl Phthalate).
6. Round recessed hole in bottom-left corner, or notch on left end, denote lead no. 1
7. Body dimensions do not include molding flash which shall not exceed 0.006 (0.15).
8. Each lead is within ±0.010 (±0.25) radius of its true position at maximum material dimension.
9. Unit marking shall include manufacturer's name, part number, date code and index mark.

Ω mega Plus
Power Supplies

MIL-SPEC POWER SUPPLIES

AC/DC Supplies

DC/DC Converters

General

The Omega Plus Series is a family of high density, compact, MIL-Spec switch mode power supplies. These advanced design power supplies accept a wide range of inputs, and are available in multiple output configurations. The Omega Plus Series is ideally suitable for airborne, shipboard, ground mobile, and C^3 applications. The Omega Plus Series of power supplies have been designed and qualified to the most stringent performance and environmental requirements.

Features

Ω MIL-SPEC
Ω UNIVERSAL AC/DC INPUT
Ω SINGLE AND MULTIPLE OUTPUTS
Ω HIGH DENSITY - LOW PROFILE
Ω OUTPUTS: 3.3V, 5V, 12V, 15V, 24V, 28V, 48V
Ω 3 YEAR WARRANTY
Ω ALTERNATE TEMPERATURE RANGE AVAILABLE

AC/DC Inputs

100 - 126 Vac, 47Hz - 460Hz 1 phase
200 - 252 Vac, 47Hz - 460Hz 1 phase
100 - 126 Vac, 47Hz - 460Hz 3 phase Delta
200 - 252 Vac, 47Hz - 460Hz 3 phase Delta
100 - 126 Vac, 47Hz - 460Hz 3 phase 4 wire Wye
100 - 126 Vac, 47Hz - 460Hz 3 phase 3 wire Wye
120 - 320 Vdc

MODEL	SIZE	VOLUME (CU./IN.)	WATTS (CU./IN.)
25S	2.50 x 3.00 x .80	6.0	3.4
50S	3.00 x 3.50 x .80	8.4	6.0
75S	3.25 x 4.25 x .80	11.0	6.8
75T	3.50 x 4.50 x .80	12.6	6.0
150S	4.50 x 5.75 x .80	20.7	7.3
150T	4.75x 6.00x .80	22.8	6.6
300S	6.00 x 6.50 x .80	31.2	10.0
300T	6.00 x 6.50 x .80	31.2	10.0

DC Inputs

14 - 36 Vdc; 18 - 36 Vdc

MODEL	SIZE	VOLUME (CU./IN.)	WATTS (CU./IN.)
25W	2.20 x 2.80 x .80	4.9	5.0
50W	2.50 x 3.50 x .80	7.0	7.2
75W	3.00 x 3.85 x .80	9.2	8.1
150W	3.50 x 4.50 x .80	12.6	12.0
300W	4.25 x 5.50 x .80	18.7	16.0

Typical Configuration Specifications

EFFICIENCY: 75% minimum (single and dual output models) and 70% minimum (multiple output models), measured at nominal input line and full load.

LINE REGULATION: Within 0.1% for input change from low line to high line, at constant load. For single, dual and main outputs 100 mV maximum for auxiliary outputs.

LOAD REGULATION: 0.1% for 0-100% of rated load at nominal input line for single, dual and main outputs. 150 mV for auxiliary outputs with 20% minimum main load.

AUXILIARY OUTPUT CROSS REGULATION: 1.0% maximum deviation when main output load changes from half load to full load.

PARD (Noise and Ripple): 25 mV RMS, 100 mV P-P at 25 MHz bandwidth for single, dual and main outputs. 200 mV for auxiliary outputs.

ISOLATION VOLTAGE: 1000 Vdc input to output, input to case. 200 Vdc output to case.

INSULATION RESISTANCE: 50 Megohm at 50 Vdc.

TEMPERATURE RANGE: Operating: -55°C to +100°C at 100% load. Temperature measured at base plate, conduction cooled via base plate only. Storage: -55°C to +125°C.

SHORT CIRCUIT PROTECTION: Under any short circuit condition, output voltage drops to less than one volt, with automatic recovery.

INRUSH CURRENT: Limited to 500% of nominal input current.

REMOTE ERROR SENSING: Sensing pins compensates for up to 0.5 volt drop on output leads.

OUTPUT TRACKING: Within 2%.

CURRENT LIMITING: Constant current, limited to 130% of rated output.

OVERVOLTAGE PROTECTION (Single Output): Automatic electronic shut down if voltage exceeds 30% of the nominal output.

INTERFACE: Hook-up via a D-subminiature connector.

QUALITY: We use only MIL qualified components, an inspection system which structly adheres to MIL-I-45208, and a quality control system which has been surveyed and approved in accordance with MIL-Q-9858A. Also, Logitek's facility is now qualified to MIL-STD-2000.

EMI/RFI CHARACTERISTICS: Meets MIL-STD-461C using test methods of MIL-STD-462.

ENVIRONMENTAL SPECIFICATIONS: Are to MIL-STD-810C for Shock; Acceleration; Humidity; Altitude;Salt Fog; Sand , Dust and Fungus.

HAMMER SHOCK: Per MIL-STD-901C.

CUSTOM & SPECIAL APPLICATIONS: Logitek's Engineering Departments is available to discuss your applications of our power supplies or to custom design to meet your system's requirements.

M - Family Mk II
A...LM 1000 Mk II
A...LM 2000 Mk II
A...LM 3000 Mk II

Dynamic behavior

• Input voltage range up to 1:10	many uses
• High efficiency up to 95%	low thermal stress and high reliability
• Constant efficiency over the whole input voltage range	stable operational conditions
• Continuously open/short circuit proof	self protected
• No derating within full temperature range	full load handling capability
• Excellent static and dynamic response	reliable and precise regulation
• Input undervoltage control and lock-out	no malfunction at low voltage levels

Mechanical design

• Compact design	high power at low volume
• Solid and robust construction	ideal for mobile application
• Aluminum case serving as heat sink and reducing RFI emissions	good heat flow inside the module and low RFI emissions

Environmental durability

• Ambient temperature range	−25°C...71°C
optional	−40°C...85°C
• Rel. humidity: IEC 68-2-3, MIL-810D/507.2	93% at 40°C during 56 days
• Shock: IEC 68-2-27, MIL-810D/516.3	100g, 9 shocks
• Bump; IEC 68-2-29, MIL-810D/516.3	40g, 6000 shocks
• Vibration: IEC 68-2-6, MIL-810D/514.3	5g/10g, 60...2000 Hz and 0.35mm/0.70mm (0.014"/0.028"), 10...60Hz
• Input transient and surge protection: IEC 801, IEC 571, RIA 12, VDE 0435, IEC 255.4	4kV/5kV
• High frequency disturbance resistance as per VDE 0435, IEC 255.4	1.0kV/2.5kV

Security approvals, RFI levels

• SEV	1061.1981, 1085.1983
• VDE	VDE 0805/EN 60950, IEC 960
• UL, CSA	UL 1950, C22.2 No.950-M89
• High isolation test voltage up to 4kV	VDE 0804, VDE 0806, IEC 380
• Low RFI: class B	VDE 0871, VDE 0878, EN 55011, EN 55022, FCC Part 15
• Low leakage currents: B,BF, CF	VDE 0750, IEC 601

Quality and reliability features

- Derated components
- Precision screening of high quality components
- Extensive research and development for design optimization
- 100% burn-in.. 24 h duration at = 70°C
- 100% function test and parameter test
- Calculated MTBF figures as per.................... MIL-HDBK 217-E
- ISO 9001 certification

Data sheets

- Comprehensive data sheets and application notes provide full information on each product family and individual type

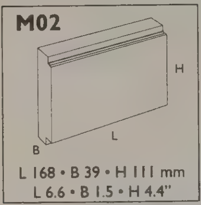
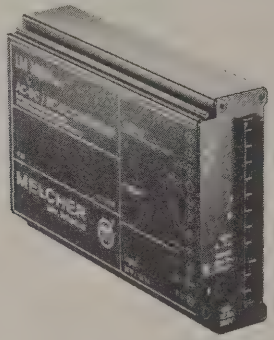
DC-DC CONVERTERS AND AC-DC CONVERTERS

50 WATTS 1-3 OUTPUTS





Approved by:

Programmable Output Voltage

All single output models can be programmed to any voltage between 0 and 110% of nominal. A control voltage (Vr) applied across two dedicated control pins program the output voltage (Vout) according to the following:

$$Vr = (Vo/Vo\ nom) \cdot 2.5V$$

In this way, dynamic control over the full voltage range can be programmed. The control pins can also be used for fixed voltage programming with a control resistor.

*Power Allocation in Multiple Output Modules

In addition to the standard types listed the output may vary according to customer requests. The maximum output power to 50 W in total can be allocated to the different outputs as per the following table. Indicated values as a sum exceed 100% but the maximum total output power must remain below 50W (40W when V_{01} =5.1V)

Output voltage $V_{o\,nom}$ (V)	Output 1 I_{onom} (A)	Output 2 $I_{o\,nom}$ (A)	Output 3 I_{onom} (A)
5.1	8.0	4.0	2.7
12.0	4.0	2.0	1.3
15.0	3.4	1.7	1.1
24.0	2.0	1.0	0.7
48.0	1.0		
maximum power	50%	50%	≈33%

AM - Through LM - Series

- Extremely wide input voltage range
- High efficiency and low thermal stress
- Isolation voltage: Input/output 4 kV_{rms} and output/output $200V_{rms}$
- Input transient suppression circuitry and effective input filter
- Approvals: UL1950, VDE 0805/IEC 950/EN 60950, IEC 801-1...4, IEC 571, RIA-12, 13 and VDE 0871 (VDE 0878): RFI suppression class A or B resp., depending on type
- Continuously open- and short-circuit proof
- Series connection of any outputs possible
- Parallel connection of main outputs possible
- Input under- / overvoltage lock-out
- Thermal protection circuit
- Inhibit input for switching the output voltage on and off (standard)
- Output voltages available between 2...52 VDC
- Output voltage control input (R)
- Inrush current limiting in certain models (standard built-in)
- Case M02: 19" rack-mount VME, DIN 41494, or chassis-mount

- All features of the PSR series in addition to the following:
- Input inrush current limiting circuit
- Integrated input filter
- Programmable output voltage control input (standard)
- Automatic current sharing in parallel operation
- Coincident triggering of crowbar in parallel operation
- Sense lines at the output
- Built-in fuse
- Complementary to PSR series
- Built-in test socket (standard)
- Inhibit input (standard)
- Case K01: 19" rack-mount VME, DIN 41494 or chassis mount

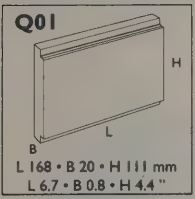
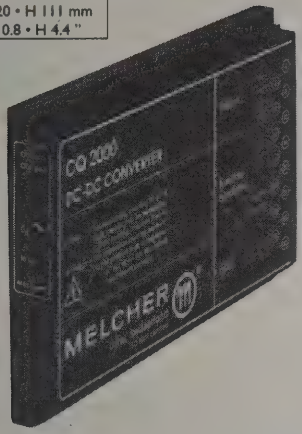
DC-DC CONVERTERS 100W SINGLE AND DUAL OUTPUTS





CQ 1000...CQ 2000

- Output power up to 100W
- Input voltage range for 48/60 V batteries
- High efficiency and low thermal stress
- Input/output isolation voltage 2kV$_{rms}$
- Efficient input filter: the complete solution
- Very low and short lasting inrush current
- Safety according to IEC 950 and EN 41003
- RFI as per VDE 0871/6.78, EN 55011 and EN 55022: level B
- Input under-/overvoltage lock-out
- Continuously open-and short-circuit proof
- Inhibit input for output on/off control
- Series-or parallel-connection of outputs
- True n+1 redundancy (hot plug-in)
- Thermal protection circuitry built-in
- Output voltage sensing (sense lines)
- Output voltage programming (R-input)
- Test sockets for V_{ol}
- 19" cassette (case Q01, fully enclosed) VME 41494, or chassis-mount

Output 1		Output 2		Input	Eff.	Case	Type	Options

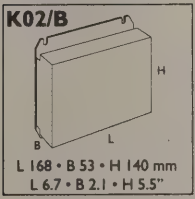
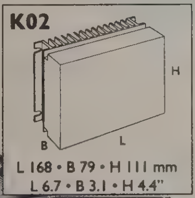
DC-DC CONVERTERS & AC-DC CONVERTERS

125-150W SINGLE AND DUAL OUTPUTS





CK through LK

- Output power up to 150W
- Extremely wide input voltage range
- High efficiency and low thermal stress
- Input/output isolation voltage 4kV$_{rms}$
- Input transient suppression circuitry and effective input filter
- Inrush current limiting in CK...LK modules
- Safety according to VDE0805, IEC950, EN60950, UL1950 and EN41003
- RFI according to VDE0878, EN55011 and EN55022, level B
- Input under-/overvoltage lock-out
- Continuously open-and short-circuit proof
- Series-or parallel-connection of outputs
- Thermal protection circuitry built-in
- Inhibit input for output on/off control
- Output voltages from 2 to 52 VDC
- Sense lines for output voltage sensing
- R-input for external output voltage adjustment (0...110% of $V_{o\ nom}$)
- 19" cassette (case K02, fully enclosed) VME 41494, or chassis mount

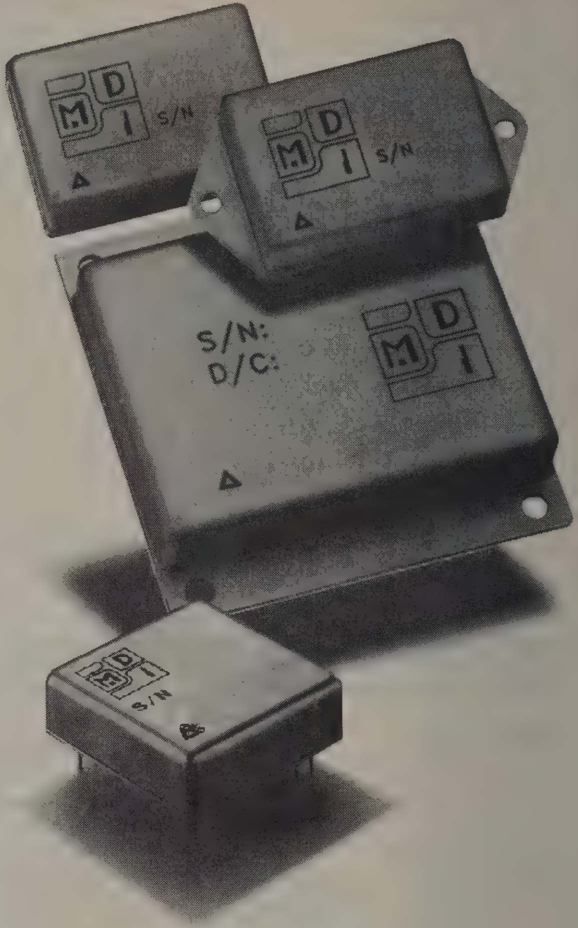
CUSTOM HYBRID
DC-DC CONVERTERS

Your best choice for choice...



- *Custom versions quickly and efficiently derived from 1068 standard models*
- *Reasonable NRE and deliveries on custom derivatives*
- *Many input voltage ranges including 12, 28, 60, 120 and 270 with wide range, up to 8:1 (e.g. 10~80, 30~240, 50~450)*
- *Output voltages from 2 VDC~3000 VDC*
- *Output power up to 120 Watts*
- *Ultra low power with high efficiency*
- *Multiple outputs, up to 10*
- *Sequenced outputs*
- *EMI and Tempest filtering*
- *Radiation hardened available*
- *Space, Military and Avionics*
- *Many packaging configurations available*
- *Tolerates severe surges and spikes (e.g. MIL-STD-704, 1275)*

Also available: Hybrid battery chargers, DC/AC inverters & Lighting controls

SERIES A

3.3 Volts Output Now Standard
for PICO Part Numbers: 5A3.3S, 12A3.3S, 24A3.3S, 28A3.3S, 48A3.3S

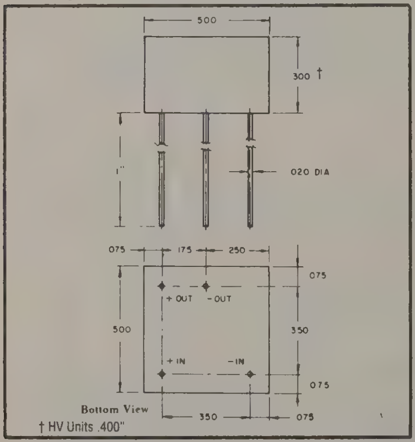
OPTIONS AVAILABLE
- *Expanded operating temp (−55°C to +85°C)*
- *Stabilization Bake (125°C ambient)*
- *Temperature Cycle (−55°C to +125°C)*
- *Hi Temp, full power burn in (100% power, 125°C case temp)*

Hi Reliability Ultra-Miniature DC-DC Converters

FEATURES
- Up to 1.25 watt output at 70°C ambient
- Encapsulated semiconductors, conservatively rated for maximum reliability
- Ultra-miniature size (0.3″ Height)
- 5 input voltage ranges 5, 12, 24, 28 and 48V DC
- 100 megohm @ 500V DC isolation
- Input/output isolation
- Single and dual output
- No heat sink required
- Up to 250V Output

New Series AT/DT
.200 height-
up to .75 Watts
see pages D•2146 &
D•2147

This series of unregulated DC-DC converters are produced in an ultra-miniature encapsulated package. 84 different models are available. The units feature single and dual outputs. They will operate over the temperature range of −25°C to +70°C. No heat sink is required.



Typical Weight: 3.5 Grams

48A28S	48	28	45	1.25	76	34	0.25	9	±0.5	60.70

*For units with output voltages up to 48 volts, ripple is measured with 10μF, 75 volt high quality tantalum capacitor which is required across the output.
For units with output voltage of 100-250 volts use A 0.1μF, 300 volt capacitor which is required across output, and maintain at least 10% of rated load to prevent a voltage surge.

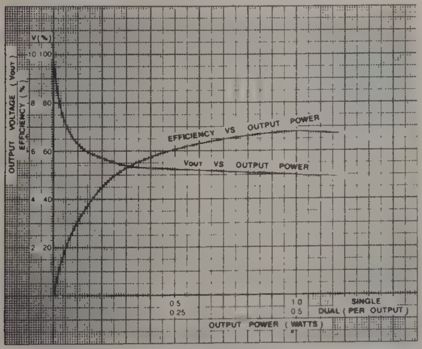
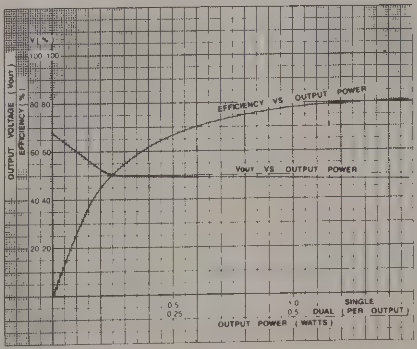
SERIES A SINGLE & DUAL 5V-5V



SERIES A SINGLE & DUAL 12V-48V



TYPICAL CHARACTERISTICS:

Test conditions: 25°C ambient and input voltage at nominal value unless otherwise specified.

LINE REGULATION: OUTPUT IS DIRECTLY PROPORTIONAL TO THE INPUT

Input voltage range:
5V models 4 to 6.5V DC
12V models 9 to 15V DC
24V models 17 to 28V DC
28V models 21 to 32V DC
48V models 25 to 50V DC

Output voltage tolerance at full load:
5V models ± 0.25V
9V models ± 0.3V
12V & 15V models ± 0.4V
24V & 28V models ± 0.5V
48V models ± 0.7V
100V, 150V, 200V & 250V models ± 3.0V

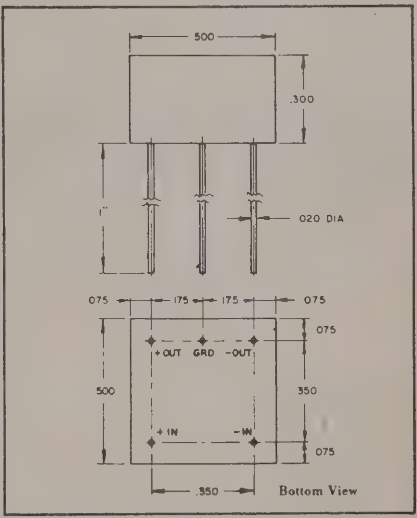
Converter frequency: 20 – 40 KHz

Output temperature coefficient:
0.05%/°C for 5V output.
0.04%/°C for 12 & 15V output.
0.02%/°C for 24, 28, 48, 100, 150, 200 and 250 volt outputs

Operating temperature: –25°C to +70°C ambient. No heat sink is required.

Storage temperature: –55°C to +125°C

Isolation: 100 megohms min. @ 500V DC



Typical Weight: 3.5 Grams

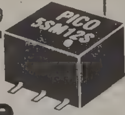
NEW SURFACE MOUNT DESIGN

SERIES SM SINGLE OUTPUT

3.3 Volts Output Now Standard
for Part Numbers: 5SM3.3S, 12SM3.3S, 24SM3.3S, 28SM3.3S, 48SM3.3S

OPTIONS AVAILABLE

- *Expanded operating temp (−55°C to +85°C)*
- *Stabilization Bake (125°C ambient)*
- *Temperature Cycle (−55°C to +125°C)*
- *Hi Temp, full power burn in (100% power, 125°C case temp)*



Hi Reliability Ultra-Miniature DC-DC Converters

FEATURES:

- New surface mount construction
- Up to 1.25 watt output at 70°C ambient
- Encapsulated semiconductors, conservatively rated for maximum reliability
- Ultra-miniature size (.340″ Height)
- 5 input voltage ranges 5, 12, 24, 28 and 48V DC
- 100 megohm @ 500V DC isolation
- Input/output isolation
- Single and dual output
- No heat sink required
- Up to 250V Output

This series of unregulated DC-DC converters are produced in an ultra-miniature encapsulated package, now compatible with your surface mount assembly. 84 different models are available. The units feature single and dual outputs. They will operate over the temperature range of −25°C to + 70°C. No heat sink is required.

*For units with output voltages up to 48 volts, ripple is measured with 10μF, 75 volt high quality tantalum capacitor which is required across the output.
For units with output voltage of 100-250 volts use A 0.1μF, 300 volt capacitor which is required across output, and maintain at least 10% of rated load to prevent a voltage surge.

†HV Units .440″

TYPICAL CHARACTERISTICS:

Test conditions: 25°C ambient and input voltage at nominal value unless otherwise specified.

LINE REGULATION: *OUTPUT IS DIRECTLY PROPORTIONAL TO THE INPUT*

Input voltage range: 5V models 4 to 6.5V DC
12V models 9 to 15V DC
24V models 17 to 28V DC
28V models 21 to 32V DC
48V models 25 to 50V DC

Output voltage tolerance at full load: 5V models ± 0.25V
9V models ± 0.3V
12V & 15V models ± 0.4V
24V & 28V models ± 0.5V
48V models ± 0.7V
100V, 150V, 200V & 250V models ± 3.0V

Converter frequency: 20 – 40 KHz

Output temperature coefficient: 0.05%/°C for 5V output
0.04%/°C for 12 & 15V output
0.02%/°C for 24, 28, 48, 100, 150, 200 and 250 volt outputs

Operating temperature: 25°C to +70°C ambient
No heat sink is required

Storage temperature: 55°C to +125°C

Isolation: 100 megohms min. @ 500V DC

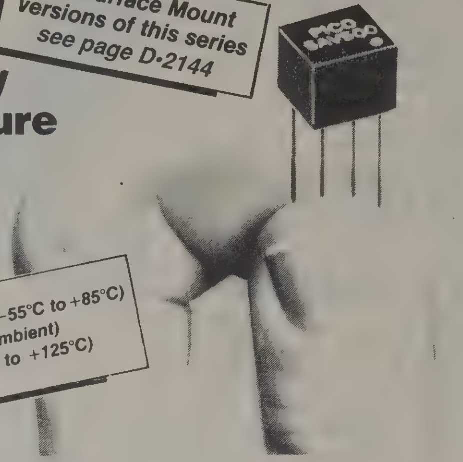
SERIES AV .400 ht. up to 500 VDC output

Hi Voltage Hi Reliability Ultra-Miniature Isolated DC-DC Converters

For Surface Mount versions of this series see page D•2144



OPTIONS AVAILABLE
- Expanded operating temp (−55°C to +85°C)
- Stabilization Bake (125°C ambient)
- Temperature Cycle (−55°C to +125°C)
- Hi Temp, burn in

- 1.25 watt output at 70° ambient
- Ultra-miniature size 0.400″ height, 4.0 grams weight, 0.1 cubic inches volume
- 4 input voltage ranges 5, 12, 24 and 28 VDC
- 100 megohm @ 1000 VDC input/output isolation
- MIL-STD 883 options available
- No heat sink or electrical derating required

This series of unregulated high voltage DC-DC converters are produced in an ultra-miniature encapsulated package. 36 different models are available. These single output isolated units will operate over the temperature range of −25° to +70°C with no heat sink or electrical derating. For military applications an operating temperature range −55°C to +85°C is available. An optional environmental screening package per MIL-STD-883 is also available.

TYPICAL CHARACTERISTICS:

Test conditions: 25°C ambient and input voltage at nominal value unless otherwise specified.

LINE REGULATION: OUTPUT IS DIRECTLY PROPORTIONAL TO THE INPUT

Input voltage range: ±10% all models

Output voltage tolerance at full load–nom. input: ±3%
Please keep loaded to minimum of 10% at all times.
Note: For tighter output voltage tolerances, please consult factory.

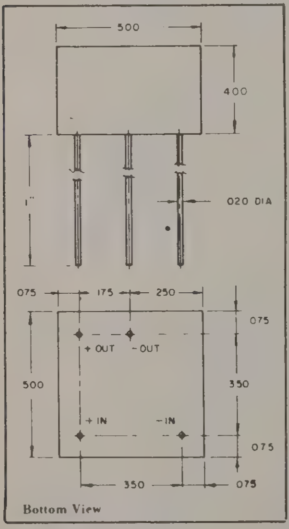
Converter frequency: 20 – 40 KHz

Output temperature coefficient: 0.02%/°C for all models

Operating temperature: −25°C to + 70°C ambient. No heat sink.

Storage temperature: −55°C to +125°C

Isolation: 100 megohms min. @ 1000V DC



Typical Weight: 4 Grams

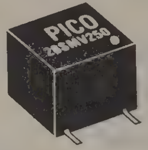
SERIES SMV

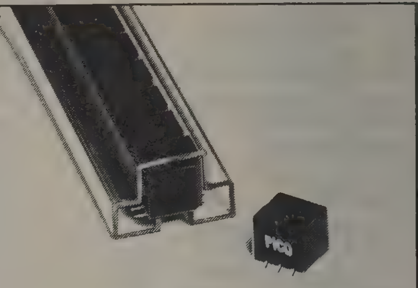
NEW SURFACE MOUNT DESIGN

Hi Voltage
Hi Reliability
Ultra-Miniature
Isolated
DC-DC Converters

.440″ ht. up to 500V DC output

OPTIONS AVAILABLE
- *Expanded operating temp (−55°C to +85°C)*
- *Stabilization Bake (125°C ambient)*
- *Temperature Cycle (−55°C to +125°C)*
- *Hi Temp, full power burn in (100% power, 125°C case temp)*





SURFACE MOUNT

PICO surface mount units utilize materials and methods to withstand extreme temperature (220°C) of vapor phase, I.R., and other reflow procedures without degradation of electrical or mechanical characteristics.

TYPICAL CHARACTERISTICS:

Test conditions: 25°C ambient and input voltage at nominal value unless otherwise specified.

LINE REGULATION: OUTPUT IS DIRECTLY PROPORTIONAL TO THE INPUT

Input voltage range: ±10% all models

Output voltage tolerance at full load-nom. input: ±3%
Please keep loaded to minimum of 10% at all times.
Note: For tighter output voltage tolerances, please consult factory.

Converter frequency: 20 – 40 KHz

Output temperature coefficient: 0.02%/°C for all models

Operating temperature: −25°C to + 70°C ambient. No heat sink.

Storage temperature: −55°C to +125°C

Isolation: 100 megohms min. @ 1000V DC

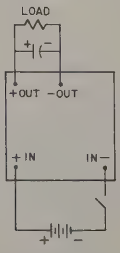
Ordering Instructions: No minimum. Net 30 days F.O.B. Mt. Vernon, New York.



FEATURES:

- New surface mount construction
- 1.25 watt output at 70° ambient
- Ultra-miniature size .440″ height, 5.0 grams weight, 0.1 cubic inches volume
- 4 input voltage ranges 5, 12, 24 and 28 VDC
- 100 megohm @ 1000 VDC input/output isolation
- MIL-STD 883 options available
- No heat sink or electrical derating required

This series of unregulated high voltage DC-DC converters are produced in an ultra-miniature encapsulated package, now compatible with your surface mount assembly. 36 different models are available. These single output isolated units will operate over the temperature range of −25° to +70°C with no heat sink or electrical derating. For military applications an operating temperature range −55°C to +85°C is available. An optional environmental screening package per MIL-STD-883 is also available.

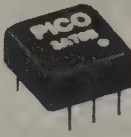
SERIES AT/DT

High Reliability Ultra-Miniature, 0.2″ ht. Isolated DC-DC Converters



No Heat Sink or Electrical Derating Required

Low No Load Current for Battery Applications

3.3 Volts Output Now Standard
for PICO Part Numbers: 3AT3.3S, 5AT3.3S, 9AT3.3S, 12AT3.3S 3DT3.3S, 5DT3.3S, 9DT3.3S, 12DT3.3S

No External Components Required

New DIP Package

0.2″ Height Low Profile

OPTIONS AVAILABLE
- *Expanded operating temp. (−55°C to +85°C)*
- *Stabilization Bake (125°C ambient)*
- *Temperature Cycle (−55°C to +125°C)*
- *Hi Temp, full power burn in (100% power, 125°C case temp)*

FEATURES

- Ultra-miniature, 0.200″ height
- New DIP package available
- Low current consumption
- No external components required
- 4 convenient input voltages, 3-5-9-12V DC
- Up to 0.75 watt output
- Encapsulated semiconductors, conservatively rated for maximum reliability
- Single and dual outputs
- Isolated: 100 megohms at 500V DC
- No heat sink required

This series of unregulated DC-DC converters offer you a 0.200″ tall, package. 64 different models are available and all offer very low current consumption to operate in battery driven circuits. Isolated, single and dual outputs will operate from −25°C to +70°C with no heat sink or derating required. Built-in output capacitors and 4 convenient input voltages also help in simplifying your design, and with the addition of our new DIP package, board layout and assembly is simplified.

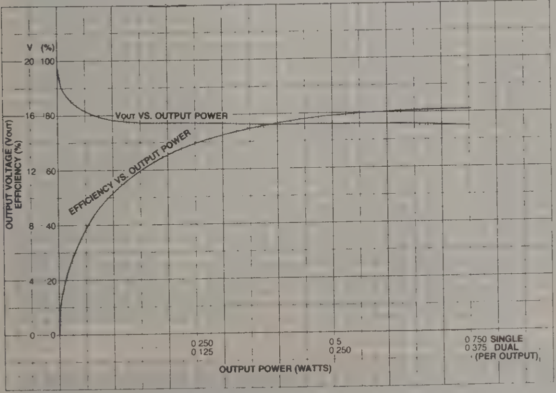
SERIES AT/DT SINGLE & DUAL 9V-15V



Ordering Instructions:
No minimum. Net 30 days
F.O.B. Mt. Vernon, New York.

Delivery— stock to one week

TYPICAL CHARACTERISTICS:

Test conditions: 25°C ambient and input voltage at nominal value unless otherwise specified.

LINE REGULATION: OUTPUT VOLTAGE IS DIRECTLY PROPORTIONAL TO THE INPUT VOLTAGE.

Input voltage range:
3V models 2.5 to 3.5V DC
5V models 4 to 6V DC
9V models 7 to 11V DC
12V models 9 to 14V DC

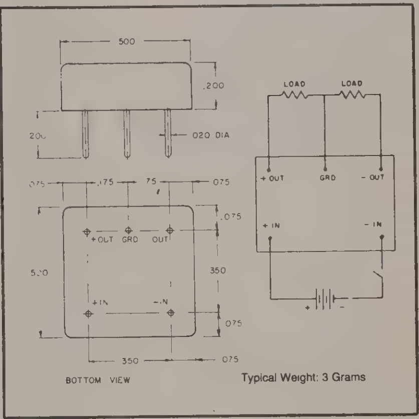
Converter frequency: 40 to 60 KHz

Output temperature coefficient: 0.05% per °C all models

Operating temperature: −25°C to +70°C ambient. No heat sink or derating required.

Storage temperature: −55°C to +125°C

Isolation: 100 megohms min. @ 500V DC



Typical Weight: 3 Grams

SERIES B

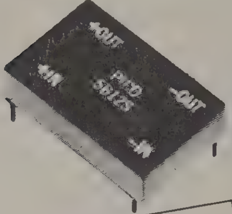
Hi Reliability Ultra-Miniature Isolated DC-DC Converters Up to 2.5 Watts

This series of unregulated DC-DC converters comes in a miniaturized encapsulated package. 68 different models are available. The units feature single and isolated dual outputs. They will operate over the temperature range of −25°C to +70°C. No heat sink is required.

FEATURES

- Up to 2.5 watt output at 70°C ambient
- Encapsulated semiconductors, conservatively rated for maximum reliability
- Ultra-miniature size (0.3″ Height)
- 5 input voltage ranges 5, 12, 24, 28 and 48V DC
- 100 megohm @ 500V DC isolation
- Single and dual isolated output
- No heat sink required

3.3 Volts Output Now Standard
for PICO Part Numbers: 5B3.3S, 12B3.3S, 24B3.3S, 28B3.3S, 48B3.3S



No Heat Sink or Electrical Derating Required

OPTIONS AVAILABLE

- Expanded operating temp. (−55°C to +85°C)
- Stabilization Bake (125°C ambient)
- Temperature Cycle (−55°C to +125°C)
- Hi Temp, full power burn in (100% power, 125°C case temp)

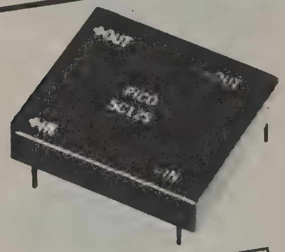
SERIES C Hi Reliability Miniature Isolated DC-DC Converters Up to 4 Watts

FEATURES

- Up to 4 watts output at 70°C ambient
- Encapsulated semiconductors, conservatively rated for maximum reliability
- Miniature-size (0.3″ Height)
- 5 input voltage ranges 5, 12, 24, 28 and 48V DC
- 100 megohm @ 500V DC
- Single and dual isolated outputs
- No heat sink required

This series of unregulated DC-DC converters are produced in an miniaturized encapsulated package. 68 different models are available. The units feature single and isolated dual outputs. They will operate over the temperature range of −25°C to +70°C. No heat sink is required.

3.3 Volts Output Now Standard
for PICO Part Numbers: 5C3.3S, 12C3.3S, 24C3.3S, 28C3.3S, 48C3.3S



OPTIONS AVAILABLE

- Expanded operating temp. (−55°C to +85°C)
- Stabilization Bake (125°C ambient)
- Temperature Cycle (−55°C to +125°C)
- Hi Temp, full power burn in (100% power, 125°C case temp)

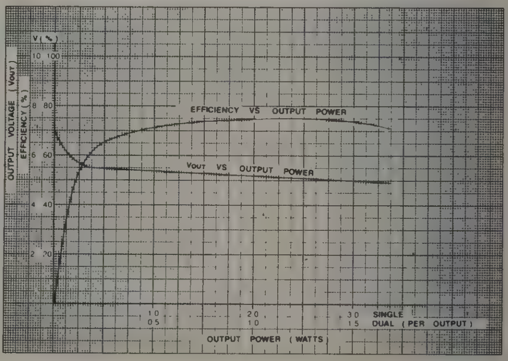
SERIES C SINGLE & DUAL 48V-5V



Delivery— stock to one week

*For immediate engineering assistance or to place an order— **Call Toll Free 800-228-9747***

TYPICAL CHARACTERISTICS: **Test conditions:** 25°C ambient and input voltage at nominal value unless otherwise specified.

LINE REGULATION: OUTPUT IS DIRECTLY PROPORTIONAL TO THE INPUT.

Input voltage range:
5V models 4 to 6.5V DC
12V models 9 to 15V DC
24V models 17 to 28V DC
28V models 21 to 31V DC
48V models 25 to 50V DC

Output voltage tolerance at full load:
5V models ± 0.25V
9V models ± 0.3V
12V & 15V models ± 0.4V
24V & 28V models ± 0.5V
48V models ± 0.7V

Converter frequency: 20 to 40 KHz

Output temperature coefficient: 0.02%/°C

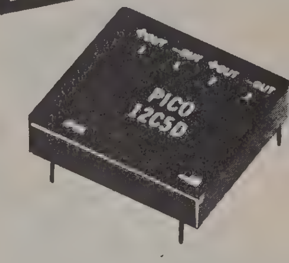
Operating temperature: −25°C to +70°C ambient. No heat sink is required.

Storage temperature: −55°C to +125°C

Isolation: 100 megohms min. @ 500V DC

Short circuit protection: Temporary

Low Profile 0.3″ Height! Up to 4 Watts



No Heat Sink or Electrical Derating Required

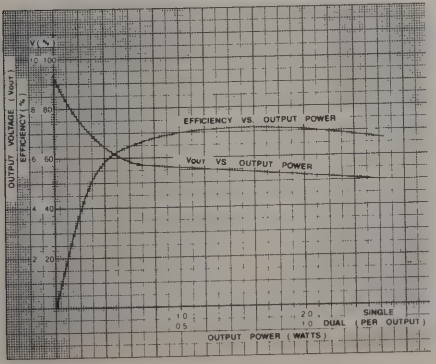
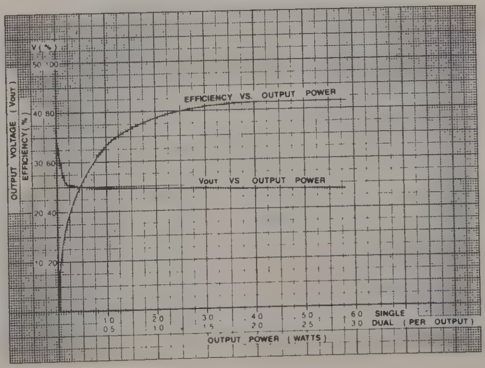
SERIES C SINGLE & DUAL 5V-5V

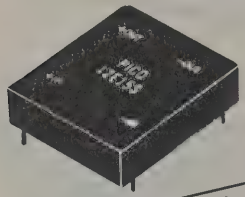


SERIES C SINGLE & DUAL 24V-24V



PICO Electronics, Inc. 453 N. MacQuesten Pkwy., Mt. Vernon, N.Y. 10552 • • FAX 914-699-5565

SERIES E Hi Reliability Miniature Isolated DC-DC Converters Up to 7 Watts



3.3 Volts Output Now Standard
for PICO Part Numbers: 5E3.3S, 12E3.3S, 24E3.3S, 28E3.3S, 48E3.3S

OPTIONS AVAILABLE
- Expanded operating temp. (−55°C to +85°C)
- Stabilization Bake (125°C ambient)
- Temperature Cycle (−55°C to +125°C)
- Hi Temp, burn in

FEATURES
- Up to 7 watt output at 70°C ambient
- Encapsulated semiconductors, conservatively rated for maximum reliability
- 5 input voltage ranges 5, 12, 24, 28 and 48V DC
- 100 megohm @ 500V DC isolation
- Single and dual isolated outputs
- No heat sink required
- Output filter included (No external capacitors required)

This series of unregulated DC-DC converters are produced in an ultra-miniature encapsulated package. 68 different models are available. The units feature single and isolated dual outputs. They will operate over the temperature range of −25°C to +70°C. No heat sink is required.

TYPICAL CHARACTERISTICS:

Test conditions: 25°C ambient and input voltage at nominal value unless otherwise specified.

LINE REGULATION: OUTPUT IS DIRECTLY PROPORTIONAL TO THE INPUT.

Input voltage range:
5V models 4 to 6.5V DC
12V models 9 to 15V DC
24V models 17 to 28V DC
28V models 21 to 32V DC
48V models 25 to 50V DC

Output voltage tolerance at full load:
5V models ± 0.25V
9V models ± 0.3V
12V & 15V models ± 0.4V
24V & 28V models ± 0.5V
48V models ± 0.7V

Converter frequency: 20 to 40 KHz

Output temperature coefficient: 0.02%/°C

Operating temperature: −25°C to +70°C ambient. No heat sink is required.

Storage temperature: −55°C to +125°C

Isolation: 100 megohms min. @ 500V DC

Short circuit protection: Temporary

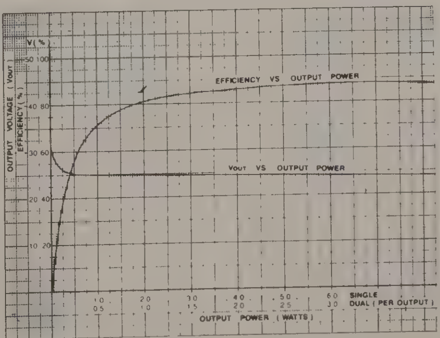
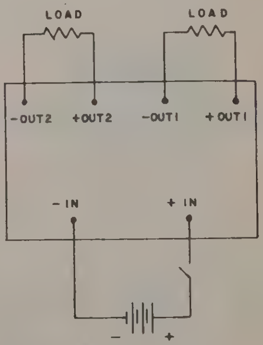
SERIES E SINGLE & DUAL 24V-24V

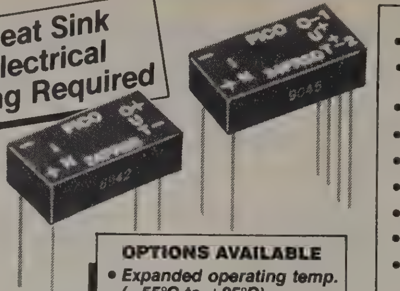




PICO Electronics, Inc. 453 N. MacQuesten Pkwy., Mt. Vernon, N.Y. 10552 • FAX 914-699-5565

SERIES FR Hi Reliability Isolated Regulated DC-DC Converters

No Heat Sink or Electrical Derating Required



TYPICAL CHARACTERISTICS FOR ALL MODELS:

Test conditions: 25°C ambient
Output voltage tolerance: ±1% on all single/±2% dual
Line regulations: ±0.1% single/±0.2% dual
(for the input voltage range of ±10%)
Load regulation: 0.2% single/0.4% dual
Converter frequency: 20-40K Hz.
Operating temperature: −25°C to +70°C ambient
Output voltage temperature coefficient: 0.01%/°C
Storage temperature: −55°C to +125°C
Isolation: 100 megohms minimum at 500 volts DC
Short circuit protection: Temporary

OPTIONS AVAILABLE

- *Expanded operating temp. (−55°C to +85°C)*
- *Stabilization Bake (125°C ambient)*
- *Temperature Cycle (−55°C to +125°C)*
- *Hi Temp, full power burn in (100% power, 125°C case temp)*

FEATURES:

- Excellent voltage regulations ±0.1% single/±0.2% dual
- Encapsulated semiconductors, conservatively rated for maximum reliability.
- Excellent load regulations 0.2% single/0.4% dual
- Up to 1.0 watts output power at 70°C ambient
- Low output ripple
- 100 megohm 500V DC isolation
- Single and dual isolated outputs
- Low profile, ultra-miniature size
- No output capacitor required
- No heat sink required

Low Profile .5"×1"×.3" ht. up to 1 Watt

This series of encapsulated converters come in 24 different models. The highly regulated output is isolated from the input. The units will operate over the temperature range of −25°C to +70°C. No heat sink is required. These units are excellent for applications where the input voltage varies ±10% and the output must be held to ±0.1% single/and ±0.2% dual. The output voltage is maintained to within 0.2% from no load to full load for single and 0.4% for dual.

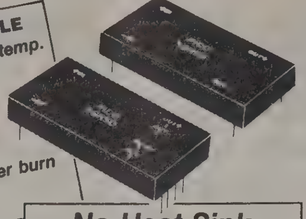
SERIES GR Hi Reliability Isolated Regulated DC-DC Converters

OPTIONS AVAILABLE
- Expanded operating temp. (−55°C to +85°C)
- Stabilization Bake (125°C ambient)
- Temperature Cycle (−55°C to +125°C)
- Hi Temp, full power burn in (100% power, 125°C case temp)



No Heat Sink or Electrical Derating Required

Low Profile 0.35″ Height! Up to 3.5 Watts

TYPICAL CHARACTERISTICS FOR ALL MODELS:

Test conditions: 25°C ambient
Output voltage tolerance: ±1% on all units
Line regulation: ±0.1% (for the input voltage range of ±10%)
Load regulation: 0.2% (from full load to no load)
Converter frequency: 20-40K Hz.
Operating temperature: −25°C to +70°C ambient
Output voltage temperature coefficient: 0.005%/°C
Storage temperature: −55°C to +125°C
Isolation: 100 megohms minimum at 500 volts DC
Short circuit protection: Temporary

FEATURES:
- Excellent voltage regulation ±0.1%
- Encapsulated semiconductors, conservatively rated for maximum reliability.
- Excellent load regulation 0.2%
- Up to 3.5 watts output power at 70°C ambient
- Low output ripple
- 100 meghom 500V DC isolation
- Single and dual isolated outputs
- No heat sink required
- Miniature size
- No output capacitor required

This series of encapsulated converters come in 24 different models. The units feature single and isolated dual outputs. They will operate over a temperature range of −25°C to +70°C. No heat sink is required. These units are excellent for applications where the input voltage varies ±10% and the output must be held to ±0.1%. The output voltage is maintained to within 0.2% from no load to full load.

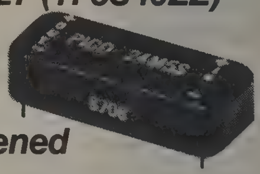
SERIES M PICO MILITARY DC-DC CONVERTERS

Hi Reliability Ultra-Miniature Isolated DC-DC Converters -55°C + 85°C

- *Diodes JAN TX*
- *Transformers manufactured to MIL-T-27 (TF5S40ZZ)*
- *Capacitors MIL-C-39003, S Level*
  MIL-C-55681, S Level
- *Resistors MIL-R-39008, S Level*
- *Transistors Hermetically Sealed, Screened per MIL-S-19500, Table II, JAN TXV*



Up to 500V DC Output Now Available

- *All MIL components*
- *−55°C to +85°C ambient operating temp.*
- *Selected MIL-STD-883 environmental screening available*

3.3 Volts Output Now Standard *for PICO Part Numbers: 5M3.3S, 12M3.3S, 24M3.3S, 28M3.3S*

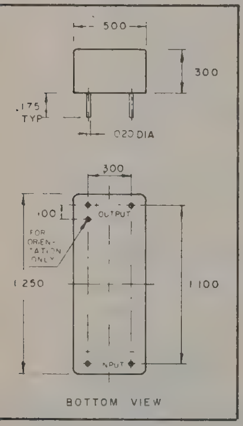
*Ripple is measured with 10µF, 75 volt high quality tantalum capacitor which is required across the output.

Ordering Instructions: No minimum. Net 30 days F.O.B. Mt. Vernon, New York.

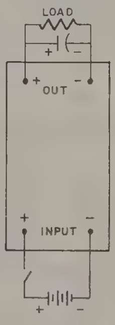
FEATURES

- Up to 1.25 watt output at 85°C ambient
- Ultra-miniature size (0.3″ Height)
- 4 input voltage ranges 5, 12, 24 and 28 V DC
- 100 megohm @ 500V DC isolation
- Input/output isolation
- Single and dual output
- No heat sink required
- Shielded
- 24 Pin Dip compatible

This series of unregulated DC-DC converters are encapsulated in an ultra-miniature 5 sided shielding package. 54 different models are available. The units feature single and dual outputs. They will operate over the temperature range of −55°C to +85°C. No heat sink is required.



Typical Weight: 9.0 Grams



OPTIONS AVAILABLE PER MIL-STD-883

- ***Stabilization Bake***
- ***Temperature Cycle***
- ***Hi Temperature Burn In 160 Hours at Full Power***

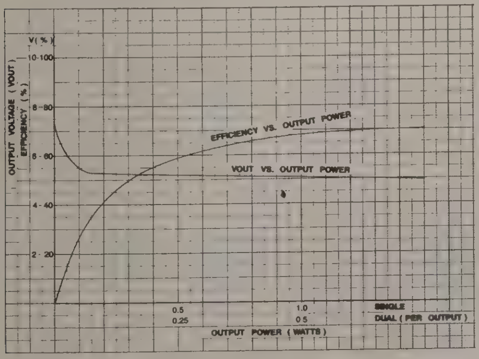
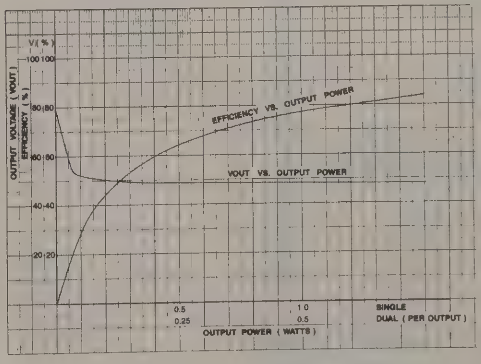
SERIES M SINGLE & DUAL 24V-5V



SERIES M SINGLE & DUAL 28V-48V



TYPICAL CHARACTERISTICS:

Test conditions: 25°C ambient and input voltage at nominal value unless otherwise specified

LINE REGULATION: OUTPUT IS DIRECTLY PROPORTIONAL TO THE INPUT

Input voltage range:

5V models	4 to 6.5V DC
12V models	9 to 15V DC
24V models	17 to 28V DC
28V models	21 to 32V DC

Output voltage tolerance at full load:

5V models	± 0.25V
9V models	± 0.3V
12V & 15V models	± 0.4V
24V & 28V models	± 0.5V
48V models	± 0.7V

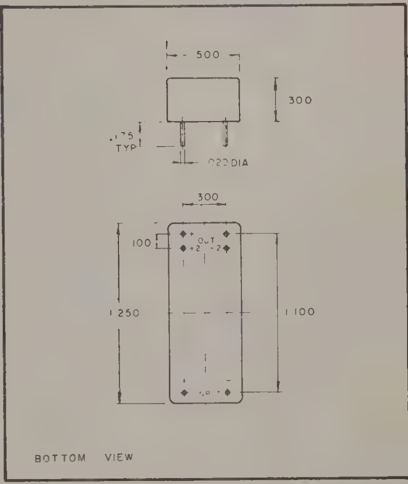
Converter frequency: 20 – 40 KHz

Output temperature coefficient:
0.05%/°C for 5V and 9V outputs.
0.02%/°C for 12, 15, 24, 28, 48V outputs.

Operating temperature: –55°C to +85°C ambient.
No heat sink is required.
No electrical derating required.

Storage temperature: –55°C to +125°C

Isolation: 100 megohms min. @ 500V DC



Typical Weight: 9.0 Grams

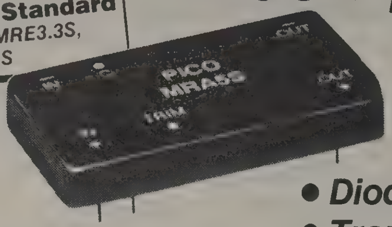
SERIES MR

3.3 Volts Output Now Standard
for PICO Part Numbers: MRE3.3S, MRF3.3S, MRA3.3S



Wide Input–Low Profile .300″
MILITARY
DC-DC CONVERTERS

Hi Reliability
Ultra-Miniature
Fully Regulated 2.5 Watts
Isolated DC-DC Converters
−55°C to +85°C
Wide Input Range
All Units Shielded

- *Diodes JAN TX*
- *Transformers Manufactured to MIL-T-27 (TF5S03ZZ)*
- *Capacitors MIL-C 55365/4 MIL-C 39003/03 MIL-C 20/27E MIL-C 39014/05*
- *Resistors MIL-R-39017 MIL-R-22097*
- *IC Hermetically Sealed (MIL-STD-883 Screened)*

FEATURES:

- Voltage regulation over input of

	LOW	HI
MRE	5V	15V
MRF	8V	24V
MRA	18V	36V

- Load regulation (see table for typical variation at different loads
- Line regulation = Typical values
  - 5-15V DC = ±1.0%
  - 8-24V DC = ±1.0%
  - 18-36V DC = ±2.0%
- High efficiency—up to 78%
- Will operate over a temperature range of −55°C to +85°C with no heat sink or electrical derating
- 6 sided shielding
- Isolation—100 megohms at 500 Volts DC
- External output trimming pin standard, +5%
- Single and dual isolated outputs
- Each unit is supplied with an external control pin. This "C" pin, when connected to the negative (−) input, will disable the unit, allowing for remote shutdown.

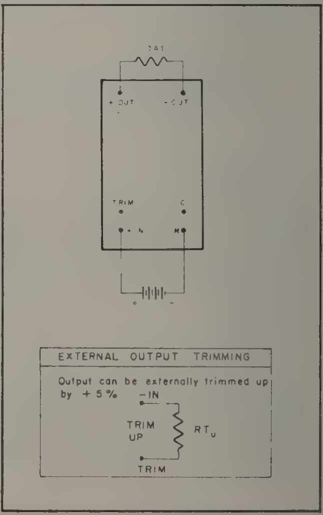
TYPICAL. WEIGHT. 26 Grams



Each unit is supplied with an external control pin. This "C" pin, when connected to the negative (–) input, will disable the unit, allowing for remote shutdown

Wide Input Range Isolated – Regulated

MILITARY

DC-DC CONVERTERS

Low Profile .300" up to 2.5 Watts

This series of high efficiency wide input range, encapsulated regulators come in 36 different models. Manufactured using high grade military components, this unit will operate from −55°C to +85°C with no heat sink or electrical derating required. The 6 sided shielding and 32 pin DIP compatability combined with input/output isolation and the wide input range capabilities will meet your most stringent military requirements.

No Heat Sink or Electrical Derating Required

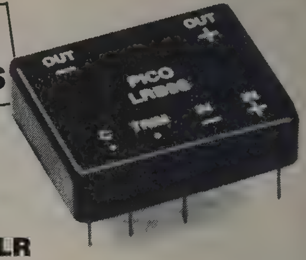
SERIES LR
Isolated Regulated up to 5 Watt DC-DC Converters
Wide Input Range/up to 3.33:1
Fully Regulated
All Units Shielded

New 100 VDC Output Models



3.3 Volts Output Now Standard
for PICO Part Numbers: LRE3.3S, LRF3.3S, LRA3.3S, LRB3.3S, LRC3.3S

FEATURES:

- Voltage regulation over input of

	LOW	HI
LRE	5V	15V
LRF	8V	24V
LRA	18V	36V
LRB	36V	60V
LRC	18V	60V

- Encapsulated semiconductors, conservatively rated for maximum reliability.
- Load regulation (see table for typical variation at different loads)
- Line regulation = Typical values
  5-15 V DC = ± 1.5%
  8-24 V DC = ± 1.5%
  18-36 V DC = ± 1.0%
  36-60 V DC = ± 1.0%
  18-60 V DC = ± 1.5%
- High efficiency—up to 80%
- Will operate over a temperature range of −25°C to +70°C with no heat sink or electrical derating
- 6 sided shielding
- Isolation—100 megohms at 500 volts DC
- External output trimming pin standard, +5%
- Single and dual isolated outputs
- Each unit is supplied with an external control pin. This "C" pin, when connected to the negative (−) input, will disable the unit, allowing for remote shutdown.

OPTIONS AVAILABLE
- Expanded operating temp. (−55°C to +85°C)
- Stabilization Bake (125°C ambient)
- Temperature Cycle (−55°C to +125°C)
- Hi Temp, full power burn in (100% power, 125°C case temp)

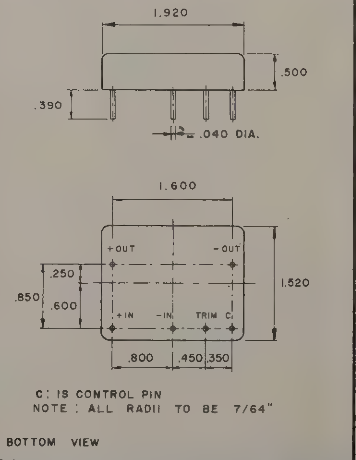
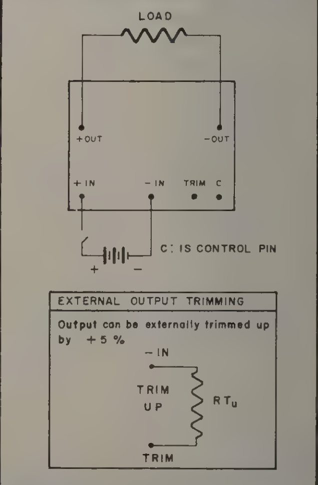
Series LR-Single Output





Typical Weight: 65 Grams

This series of high efficiency, wide input range, encapsulated regulators come in 75 different models. These units feature a 500 VOLT DC input to output isolation in both single and dual output models. The LR Series will operate over a temperature range of −25°C TO +70°C with no heat sink or electrical derating. These units are excellent for applications where input voltage varies dramatically, yet a high efficiency and output voltage regulation must be maintained.

TYPICAL CHARACTERISTICS:

Test conditions: 25°C ambient
Operating temperature: −25° C to +70° C ambient
Output voltage tolerance: ± 1% at typical input voltage
Output voltage temperature coefficient: 0.02%°C
Storage temperature: −55°C to 125°C
Short circuit protection: Temporary
Operating frequency: 40 Khtz, typ.

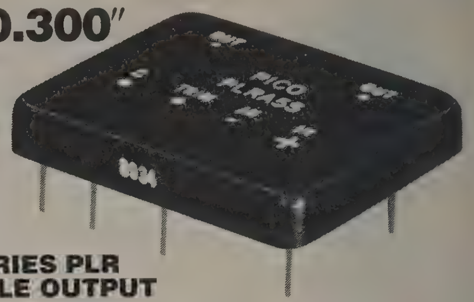
Isolated Regulated up to 5 Watt DC-DC Converters

Wide Input Range/up to 3.33:1

Fully Regulated

All Units Shielded



New 100 VDC Output Models

3.3 Volts Output Now Standard
for Part Numbers: PLRE3.3S, PLRF3.3S, PLRA3.3S, PLRB3.3S, PLRC3.3S

FEATURES:

- Voltage regulation over input of

	LOW	HI
PLRE	5V	15V
PLRF	8V	24V
PLRA	18V	36V
PLRB	36V	60V
PLRC	18V	60V

- .300" Height
- Encapsulated semiconductors, conservatively rated for maximum reliability.
- Load regulation (see table for typical variation at different loads)
- Line regulation = Typical values
  5–15 V DC = ± 1.5%
  8–24 V DC = ± 1.5%
  18–36 V DC = ± 1.0%
  36–60 V DC = ± 1.0%
  18–60 V DC = ± 1.5%
- High efficiency—up to 80%
- Will operate over a temperature range of –25˚C to +70˚C with no heat sink or electrical derating
- 6 sided shielding
- Isolation—100 megohms at 500 volts DC
- External output trimming pin standard, +5%
- Single and dual isolated outputs
- Each unit is supplied with an external control pin. This "C" pin, when connected to the negative (–) input, will disable the unit, allowing for remote shutdown.

OPTIONS AVAILABLE

- *Expanded operating temp (–55°C to +85°C)*
- *Stabilization Bake (125°C ambient)*
- *Temperature Cycle (–55°C to +125°C)*
- *Hi Temp, full power burn in (100% power, 125°C case temp)*

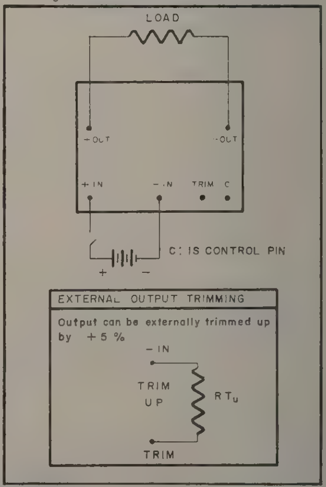
Series PLR-Single Output

Each unit is supplied with an external control pin. This "C" pin when connected to the negative (–) input, will disable the unit, allowing for remote shutdown.



Typical Weight: 40 Grams

This series of Low Profile 0.300, high efficiency, wide input range, encapsulated regulators come in 75 different models. These units feature a 500 VOLT DC input to output isolation in both single and dual output models. The PLR Series will operate over a temperature range of -25˚C TO +70˚C with no heat sink or electrical derating. These units are excellent for applications where input voltage varies dramatically, yet a high efficiency and output voltage regulation must be maintained.

TYPICAL CHARACTERISTICS:

Test conditions: 25°C ambient
Operating temperature: −25°C to +70°C ambient
Output voltage tolerance: ±1% at typical input voltage
Output voltage temperature coefficient: 0.02%/°C
Storage temperature: −55°C to +125°C
Short circuit protection: Temporary
Operating frequency: 40 Khtz, typ.

Lowest Profile Series 0.300″

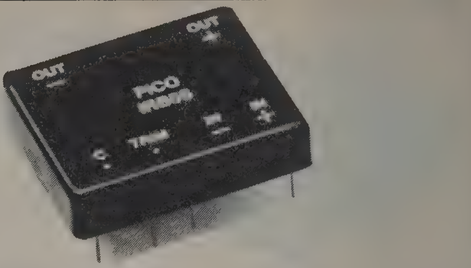
SERIES IR

Isolated Regulated up to 10 Watt
DC-DC Converters
Wide Input Range/up to 3.33:1
Fully Regulated
All Units Shielded



New 100 VDC Output Models

3.3 Volts Output Now Standard
for PICO Part Numbers: IRE3.3S, IRF3.3S, IRA3.3S, IRB3.3S, IRC3.3S

FEATURES:

- Voltage regulation over input of

	LOW	HI
IRE	5V	15V
IRF	8V	24V
IRA	18V	36V
IRB	36V	60V
IRC	18V	60V

- Encapsulated semiconductors, conservatively rated for maximum reliability.
- Load regulation (see table for typical variation at different loads)
- Line regulatioin = Typical values
  - 5-15 V DC = ± 1.5%
  - 8-24 V DC = ± 1.5%
  - 18-36 V DC = ± 1.0%
  - 36-60 V DC = ± 1.0%
  - 18-60 V DC = ± 1.5%
- High efficiency—up to 84%
- Will operate over a temperature range of −25°C to +70°C with no heat sink or electrical derating
- 6 sided shielding
- Isolation—100 megohms at 500 volts DC
- External output trimming pin standard, +5%
- Single and dual isolated outputs.
- Each unit is supplied with an external control pin. This "C" pin, when connected to the negative (–) input, will disable the unit, allowing for remote shutdown.

OPTIONS AVAILABLE

- *Expanded operating temp (−55°C to +85°C)*
- *Stabilization Bake (125°C ambient)*
- *Temperature Cycle (−55°C to +125°C)*

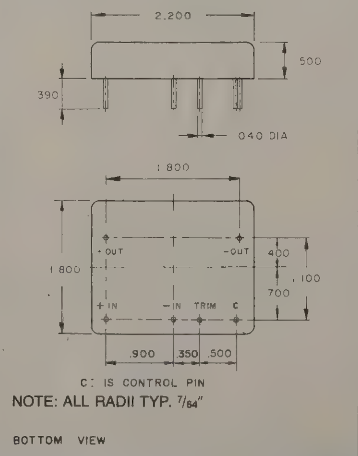
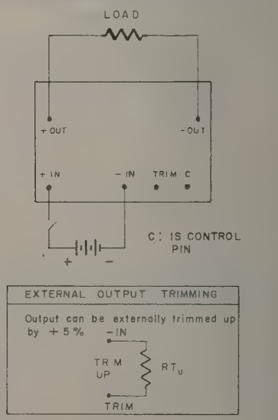
Series IR-Single Output



NOTE: ALL RADII TYP. 7/64"

BOTTOM VIEW

Each unit is supplied with an external control pin. This "C" pin, when connected to the negative (–) input, will disable the unit, allowing for remote shutdown.



Output can be externally trimmed up by + 5%

Typical Weight: 95 Grams

This series of high efficiency, wide input range, encapsulated regulators come in 75 different models. These units feature a 500 VOLT DC input to output isolation in both single and dual output models. The IR Series will operate over a temperature range of −25°C TO +70°C with no heat sink or electrical derating. These units are excellent for applications where input voltage varies dramatically, yet a high efficiency and output voltage regulation must be maintained.

TYPICAL CHARACTERISTICS:

Test conditions: 25°C ambient
Operating temperature: −25° C to +70° C ambient
Output voltage tolerance: ± 1% at typical input voltage
Output voltage temperature coefficient: 0.02%°C
Storage temperature: −55°C to 125°C
Short circuit protection: Temporary
Operating frequency: 40 Khtz, typ.

FEATURES:

- Voltage regulation over input of

	LOW	HI
JRA	18V	36V
JRB	36V	60V
JRC	18V	60V

- Encapsulated semi-conductors, conservatively rated for maximum reliability.
- Load regulation (see table for typical variation at different loads
- Line regulation = Typical values
  18–36V DC = ±1.0%
  36–60V DC = ±1.0%
  18–60V DC = ±2.0%
- High efficiency—up to 84%
- Will operate over a temperature range of −25°C to +70°C with no heat sink or electrical derating
- 6 sided shielding
- Isolation—100 megohms at 500 Volts DC
- External output trimming pin standard, +5%
- Single and dual isolated outputs
- Each unit is supplied with an external control pin. This "C" pin, when connected to the negative (−) input, will disable the unit, allowing for remote shutdown.

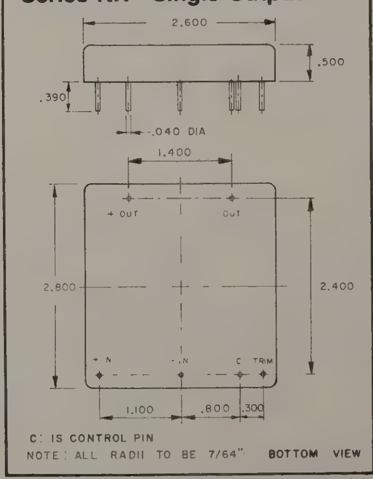
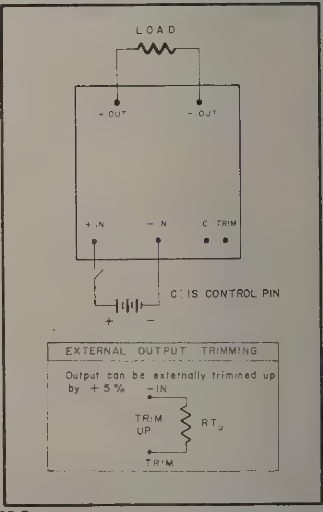
Series KR - Single Output



Each unit is supplied with an external control pin. This "C" pin, when connected to the negative (–) input, will disable the unit, allowing for remote shutdown.



Typical Weight: 165 Grams

This series of high efficiency, wide input range, encapsulated regulators come in 45 different models. These units feature a 500 Volt DC input to output isolation in both single and dual output models. The KR Series will operate over a temperature range of −25°C to +70°C with no heat sink or electrical derating. These units are excellent for applications where input voltage varies dramatically, yet a high efficiency and output voltage regulation must be maintained.

TYPICAL CHARACTERISTICS:

Test conditions: 25°C ambient
Operating temperature: −25°C to +70°C ambient
Output voltage tolerance: ±3% at typical input voltage
Output voltage temperature coefficient: 0.02%/°C
Storage temperature: −55°C to +125°C
Short circuit protection: Temporary
Operating frequency: 40 Khtz, typ.

OPTIONS AVAILABLE
- Expanded operating temp (−55°C to +85°C)
- Stabilization Bake (125°C ambient)
- Temperature Cycle (−55°C to +125°C)
- Hi Temp, full power burn in (100% power, 125°C case temp)

No Heat Sink or Electrical Derating Required

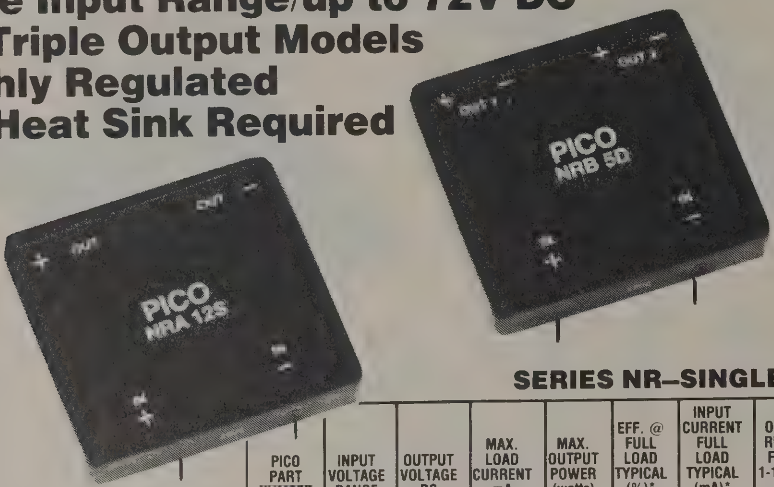
SERIES NR

Isolated Regulated up to 30 Watt DC-DC Converters
Wide Input Range/up to 72V DC
30 Triple Output Models
Highly Regulated
No Heat Sink Required

No Heat Sink or Electrical Derating Required

Low Profile Less Than 0.5" Height

- **30 Triple Output Models**
- **72 V Input Voltage**
- **0.2% Line Regulation**
- **Continuous Short Circuit Protection**



PICO NRA 12S
PICO NRB 5D
OUT
+
-
IN

FEATURES:

- 30 triple output models
- Voltage regulation over input of

	LOW	HI
NRA	18V	36V
NRB	36V	72V

- Encapsulated semiconductors, conservatively rated for maximum reliability.
- Load regulation (see table for typical variation at different loads
- Line regulation = Typical values
  18 – 36V DC = 0.2%
  36 – 72V DC = 0.2%
- High efficiency—up to 87
- Will operate over a ambient temperature range of –25°C to +70°C with no heat sink or electrical derating required.
- Short circuit protection
- Current limited
- 6 sided shielding
- Isolation–100 megohms at 500 Volts DC
- Screw inserts for mounting

Series LV-Dual Output-DC-DC Converters

.5″ Height

FEATURES:

- Excellent line regulation ±1% (36–80 VDC)
- Excellent load regulation, from 25% to 100%, ±2%
- Continuous short circuit protection
- Encapsulated semiconductors, conservatively rated for maximum reliability
- Isolation: 100 megohms at 1000 VDC
- Wide input 36 VDC to 80 VDC

PICO's LV Series with wide input voltages are available in 36 different models. As switchers they accommodate a 36 to 80 VDC input, and offer both single and dual, regulated outputs. These isolated units will operate over a temperature range of −25°C to 70°C with no heat sink or electrical derating required. They are excellent for applications where the input voltage is highly variable such as in telecommunication systems.

TLV Standard Terminal Strip Models Available****

TYPICAL CHARACTERISTICS:

Test conditions: 25°C ambient
Input voltage: 36–80 VDC
Converter frequency: 200 KHz to 1 MHz
Operating temperature: −20°C to +70°C ambient
Storage temperature: −55°C to +105°C
Output voltage temperature coefficient: 0.02%/°C
Isolation: 1000 VDC

Series HV-Dual Output-DC-DC Converters

.5" Height

FEATURES:

- Excellent line regulation ±1% (70 VDC–170 VDC)
- Excellent load regulation, from 25% to 100%, ±2%
- Continuous short circuit protection
- Encapsulated semiconductors, conservatively rated for maximum reliability
- Isolation: 100 megohms at 1000 VDC
- Wide input 70 VDC to 170 VDC

PICO's HV Series with wide input voltages are available in 32 different models. As switchers they accommodate a 70 to 170 VDC input, and offer both single and dual, regulated outputs. These isolated units will operate over a temperature range of −25°C to +70°C with no heat sink or electrical derating required. They are excellent for applications where a rectified output from a 110 VAC source is available.

THV Standard Terminal Strip Models Available***

SERIES PA

Isolated Regulated 100 Watts DC-DC Converters
Wide Input Range/18-36 VDC
Fully Regulated
Short Circuit Protected
‡Parallel Operation

Dual Isolated Outputs
Special Voltage Combinations Available

17 Standard Models

100 VDC Output Models

Fixed Frequency

Hi Density 100 Watts
2.4″×4.6″×0.5″ Ht.

The new PICO PA Series of high power DC-DC Converters, allow a wide input voltage of 18-36 VDC, while maintaining a regulated output. They are fully safeguarded for over voltage, over temperature and continuous short circuit protection.

The availability of Dual Isolated Outputs, small size, and the capability of parallel operations as standard features should reduce your design and component costs, while the fixed frequency operation helps parallel connections for higher power requirements.

This high density unit is assembled *in the USA* with PICO quality and component selection, allowing it to meet the most stringent commercial requirements.

10% minimum load required at all times
* Using proper thermal management, maximum temp. of +85°C (case)
** Reading taken at nominal 28 VDC input
*** Balance Load

FEATURES:
- Dual isolated outputs
- Short circuit protection
- Input voltage protection
- Thermal, over temp. shutdown
- Line regulation
- Load regulation
- No external components required
- Hi density, hi efficiency design
- Remote shutdown
- Trim capabilities
- Fixed frequency-100 Khtz

SERIES PB

Isolated Regulated 100 Watts
DC-DC Converters
Wide Input Range/36–72 VDC
Fully Regulated
Short Circuit Protected
‡Parallel Operation

The new PICO PB Series of high power DC-DC Converters allow a wide input voltage of 36–72 VDC while maintaining a regulated output. They are fully safeguarded for over voltage, over temperature and continuous short circuit protection.

The availability of Dual Isolated Outputs, small size, and the capability of parallel operations as standard features should reduce your design and component costs, while the fixed frequency operation helps parallel connections for higher power requirements.

This high density unit is assembled *in the USA* with PICO quality and component selection, allowing it to meet the most stringent commercial requirements.

THERMAL CONSIDERATIONS

To use PICO'S P Series at full power one has to get rid of dissipated losses in the modules. Although the high efficiency of these units minimizes the heat loss; The exposed area, depending on the ambient temperature, may not be enough to keep the case temperature at an acceptable value if natural convection is used. The additional heat may be removed by a heat sink, forced air, or both. Internal losses produce heat which is moved toward the case and must be removed. Depending on the thickness and the material used, there is always a temperature gradient from inside to the case which may be calculated by:

[1] $T_{ric} = \frac{T_i - T_c}{Q}$ where,

Tric = Thermal Resistance from inside to case
Ti = Inside Termperature in Degrees C
Tc = Case Temperature in Degrees C
Q = Dissipated Power in the module in watts

The specification given in the data sheet of these units are such that at 85°C case the T_i; (inside temperature of components) is acceptable for proper operation. The user of these modules then has the task to keep the case temperature at or below 85°C. The temperature rise of the case depends on how efficiently the heat is removed; If the process is very efficient the thermal resistance is low and the case to ambient temperature gradient is low. The thermal resistance from the case to the air is given by:

$$T_{rca} = \frac{T_c - T_a}{Q} \quad \text{and}$$

$$Q = P_{in} - P_{out} = P_{out} \left(\frac{1}{\eta} - 1\right)$$

[2] $T_c - T_a = \Delta T = T_{rca} \quad P_{out}\left(\frac{1}{\eta} - 1\right)$ where,

T_{rca} = Thermal Resistance of case to air
P_{out} = Output Power in watts
η = Efficiency
T_c = Case temperature in Degrees C
T_a = Ambient Temperature in Degrees C

The following table shows the thermal resistance in free air as well as with forced cooling with or without heat sinks.

Table I: Thermal resistance case to air (°C/W)

	Base Plate	Heatsink CV	Heatsink CH
Free Air	5.1	3.5	3.0
200 LFM	2.8	1.8	1.0
400 LFM	1.8	1.1	0.7
600 LFM	1.4	0.8	0.55
800 LFM	1.2	0.65	0.45
1000 LFM	1.0	0.55	0.4

NOTE: The values in Table I include the thermal resistance from heatsink to baseplate. Provided a proper contact exists between the plate and the sink.

TYPICAL EXAMPLES

Example 1: What would be the maximum output power allowed at an ambient temperature of 50°C with an efficiency of 85%

A) If the module is used in free air?

From Table I: $T_{rca} = 5.1$

Using Relation (2)

$$85 - 50 = 5.1\ P_{out}\left[\frac{1}{0.85} - 1\right]$$

$$P_{out} = \frac{35}{5.1\ [0.176]} = 39 \text{ WATTS}$$

B) If the module with heat sink (CV) is used in free air?

$$T_{rca} = 3.5$$

$$P_{out} = \frac{35}{3.5\ [0.176]} = 57 \text{ WATTS}$$

C) If the module is used in an area with forced air at 200 LFM with no heatsink?

$$T_{rca} = 2.8$$

$$P_{out} = \frac{35}{2.8\ [0.176]} = 71 \text{ WATTS}$$

Example 2: A module has an efficiency of 87%. What is the maximum ambient temperature if 100 watts of power is needed?

A) In free air?

From Table I: $T_{rca} = 5.1$

Using Relation (2)

$$\Delta T = 5.1\ (100)\left[\frac{1}{0.87} - 1\right] = 76°C$$

$$TA = 85 - 76 = 9°C$$

B) In free air with heatsink (CV)?

$$T_{rac} = 3.5$$

$$\Delta T = 3.5\ (100)\left[\frac{1}{0.87} - 1\right] = 52°C$$

$$Ta = 85 - 52 = 33°C$$

C) Forced air with 400 LFM?

$$T_{rac} = 1.8$$

$$\Delta T = 1.8\ (100)\left[\frac{1}{0.87} - 1\right] = 27°C$$

$$Ta = 85 - 27 = 58°C$$

Example 3: From relation (2), the set of curves on page 122, PA single, were generated for module PA12 with an input voltage of 28 volts DC and an efficiency of 84%. In all cases, the baseplate temperature is maintained at 85°C or less. For instance, the curves show that with the (CH) heat sink at free air a maximum ambient temperature of 28°C is allowed at full power: However, with the same heat sink and an air flow of 400 LFM an ambient of 71°C is possible.

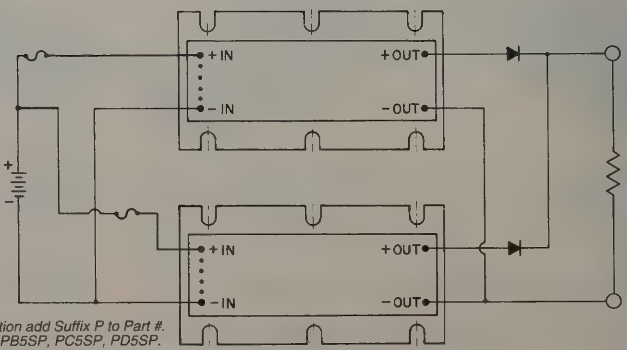
‡PARALLEL OPERATION

Special care must be exercised when operating these units in parallel, since these modules deliver comparatively high currents (especially the low voltage outputs of 3.3, 5.0, 5.2, and 12 volts.)

For parallel operation, the corresponding pins of the units must be connected together. The paths of these connections should be as direct as possible. The path to the load also should have the lowest possible resistance; otherwise unacceptable losses and load regulation will occur.

For instance, a 1 milli-ohm resistance and a 100 ampere load will cause 10 watts of line losses as well as additional load regulation.

If the parallel configuration is for redundant operation, schottky diodes should be used at the output of each module as shown in figure **.



‡ For Parallel Operation add Suffix P to Part #. Example: PA5SP, PB5SP, PC5SP, PD5SP.

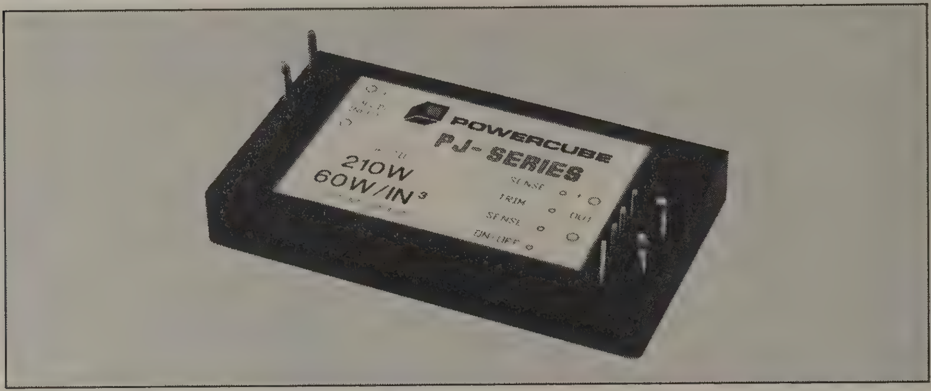
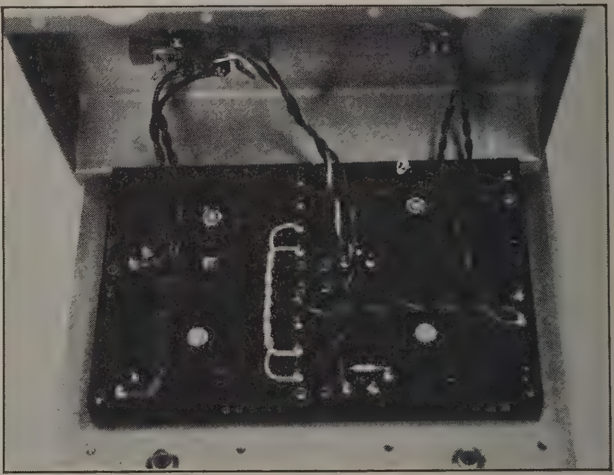
POWERCUBE
A SUBSIDIARY OF UNITRODE CORPORATION

Standard, Modified Standard, and High Power Density DC to DC Converters



Custom Assemblies and Multiple Output Power Systems



Powercube is respected throughout the world for its high reliability Military and Industrial AC to DC and DC to DC converters. Powercube, founded in 1967, was one of the pioneers of encapsulated power supplies. Currently, modules provide up to 350 Watts and assemblies up to 2500 Watts of power.

Many modules may be paralleled and offer current sharing providing N + 1 redundancy if required.

Powercube power supplies have found their way into products as diverse as commercial airlines and ruggedized computers. Many of Powercube's newer products are designed and priced for industrial market applications.

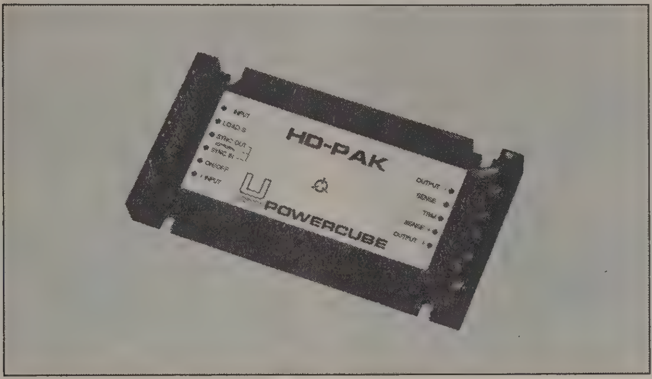
NEW! *Industrial High Density* DC To DC Converters

HD-PAK™ SERIES



The following four pages outline Powercube's new high density 300Watt DC to DC converters.

Designed for four specific groups of applications and utilizing the industry standard package, they offer more power over the operating temperature range, –40°C to +100°C, than any competing model.

The HD-PAK is available with input voltages of 24VDC, 48VDC, 150VDC, and 300VDC. Output voltages are 2.6VDC, 3.3VDC, 5.0VDC, 12VDC, 15VDC, 24VDC, 28VDC, and 48VDC, and the 5VDC output model is available with the standard output of 40AMP and a new Turbo model achieving 60AMPS.

Another new feature is the ability to synchronize over the range of 300 to 400KHz. I.E. 50KHz above and 50KHz below the nominal frequency of 350KHz.

Other features include low output ripple, remote sense, remote shutdown, overtemperature shutdown, and overvoltage protection.

- Maximum Efficiency 90%
- Remote Sense
- Remote Shutdown-primary side referenced
- External Trim (factory trim available)
- Current Limit Protection
- UL 1950, VDE0805, CSA-C22.2N°234
- Overvoltage Protection (auto recovery)
- Sync Pins – in and out
- Industry Standard Package
- 350KHz Fixed Operating Frequency
- Outputs 2.6, 3.3, 5, 12, 15, 24, 28 & 48VDC
- Parallel Operation
- Overtemp Shutdown (auto recovery)
- -40°C to +100°C Operation
- New 5VDC @ 60 Amps (Consult Factory)

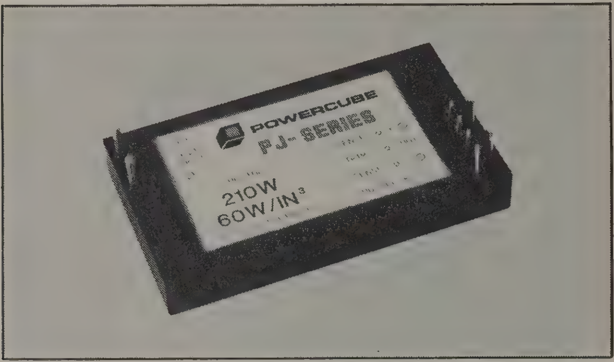
PJ Series DC-DC Converters

60W/IN³ 210 Watts 28VDC Input

PJ SERIES 28VDC INPUT



POWERCUBE
PJ- SERIES
210W
60W/IN³

Features

- 60 Watts/in³
- Efficiency up to 88%
- Output Voltage Trim
- Parallelable
- MTBF > 1,000,000 Hours
- -55°C to + 100°C Operation
- Accepts 50VDC Input Transients
- MIL-S-19500 JANTX & 883C (Available)
- Remote Shut Down
- MIL-STD-202 and MIL-STD-810

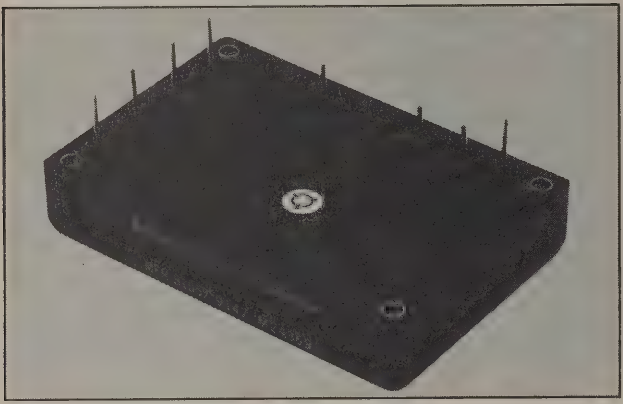
16 to 36 VDC Input *Micro-Series* Modules

15 Watts Output

CMDF, DCMDF SERIES



Features

- Single and Dual Output Versions
- Output Voltage Trim ±10%
- Input/Output Isolation 500 VDC
- -55°C to +100°C Operation
- Series/Parallel Connectable Outputs
- Overload and Short Circuit Protection
- Remote On/Off Control
- Overvoltage Protection by Zener Diode
- MIL-STD-810 and MIL-STD-202
- >4 Million Hours MTBF per MIL-HDBK-217E
- Temperature Stability ±0.015%/°C
- Custom Output Voltage Modules Easily Obtainable

COMMONLY USED ELECTRICAL/ELECTRONIC ABBREVIATIONS AND ACRONYMS

A

A/D acrylonitrile butadiene-styrene
A/D analog to digital
ADC analog to digital converter
ADP automatic data processing
AFC audio frequency control
AFT automatic filter test
ALGOL algorithmic language
AM a logical operator
AQL acceptable quality level
ASCII American national standard code for information interchange
ASIC application specific IC
ATE automatic test equipment
ATG automatic test generation
AWG American wire gauge

B

BALUN balanced to unbalanced
BASIC beginners' all-purpose symbolic instruction
BCD binary-coded decimal
BNC baby "N" connector
BUS basic utility syste

C

CAD computer-aided design
CAE computer-aided engineering
CAM computer-aided manufacture
CAMAC computer-automated measurement and control
CAPP computer-aided process planning
CAT computer-aided test
CATV cable television or community antenna television
CCC (leaded) ceramic chip carriers
CCD computer-controlled display
CERMET ceramic metal element
CIE computer-integrated engineering
CIM computer-integrated manufacturing
CLCC ceramic leadless chip carriers
CMOS complementary metal-oxide semiconductor
Comm. communications
CPS characters per second
CPU central processing unit

D

D/A digital to analog
DAC digital to analog converter
DBMS data base management system
DC direct current
DFT design for testability
DIAC bidirectional trigger diode
DIL dual in-line
DIN Deutsche Industrie Normenausschuss
DIP dual in-line package
DPM digital panel meter
DRAM dynamic RAM
DTL diode transistor logic

E

EDA electronic design automation
EDP electronic data processing
EBCDIC extended binary coded decimal interchange code
EEPROM electrically erasable PROM
EIA Electronic Industries Association
EMC electromagnetic compatibility
EMI electromagnetic interference
EMP electromagnetic pulse
EPROM erasable programmable ROM
ESR equivalent series resistance

F

FEP fluorinated ethylene propylene Copolymar, 200° Teflon
FET field-effect transistor
FM frequency modulation
FORTRAN formula translator

G

GaAsFET gallium arsenide FET
CMIP commn management information protocol
GPIB general purpose interface bus
GPS global positioning system

H

HF high frequency (3 to 30 MHz)
HIPOT test, measurement, and diagnostic equipment
HLL high level language
HV high voltage
Hz Hertz

I

IAB Internet Activities Board
IC integrated circuit
IDC insulation displacement contact
IF intermediate frequency
IO input/output (devices)
IR insulation resistance (or) infrared
ISDN integrated services digital network
ISO International Standards Organization

J

JEDEC Joint Electronic Device Engineering Council
JFET junction FET
JMOS junction MOS

K

kHz kilohertz (10^3 hertz)
KSR keyboard send /receive

L

LAN local area network
LC (filters) inductance/capacitance
LCC leaded chip carrier
LCD liquid crystal display
LED light-emitting diode
LF low frequency (30 to 300 kHz)
LIF low insertion force
LNA low noise amplifier
LNB low noise band
LSI large scale integration
LVDT linear velocity displacement transformer

M

MASER microwave amplification by stimulated emission of radiation
MATV master antenna television
µF microfarad
MHz megahertz
MIC microwave IC
MIPS million instructions per second
MIB microcomputer interface board
MOS metal oxide semiconductor
MOSFET metal oxide semiconductor FET
MOSIGT metal oxide semiconductor insulated-gate transistor
MOV metal oxide varistor
MPU microprocessor unit
MSI medium scale integration

N

NBS National Bureau of Standards
NEMP nuclear electromagnetic pulse
NIM national instrumentation module
NOR not OR
NTC negative temperature coefficient

O

OCR optical character reader
OEM original equipment manufacturer
OR a logical operator
OSI open systems interconnection

P

PAL programmable array logic
PC printed circuit
PCB printed circuit board
PCM pulse code modulation
PCS plastic clad silica
pF picofarad
PGA pin grid array
PIN positive-intrinsic-negative (transistor)
PLA programmable logic array
PLCC plastic leaded chip carrier
PLL phased lock loop
PPI plan position indicator
PROM programmable ROM
PTC positive temperature coefficient
PUT programmable unijunction transistor

Q

QAM quadrature amplitude modulation
Q (meter) quality-factor meter

R

RAM random access memory
RC resistance-capacitance
RFI radio frequency interference
RMS root mean square
ROM read only memory
RF radio frequency
RFC radio-frequency choke
RFI radio-frequency interference
RTD resistance-temperature detector
RTL resistor transistor logic
RTV room temperature vulcanizing
RW read/write

S

SAS silicon asymmetrical switch
SBC single board (micro) computer
SBS silicon bilateral switch
SCR silicon-controlled rectifier
SCS silicon-controlled switch
SDA source & detector assemblies
SGMP simple gateway monitoring protocol
SIDAC bidirectional voltage-triggered switch
SIMM single in-line memory module
SIP single in-line package
SMD surface mount device
SMT surface mount technology
SNMP simpole network management protocol
SO small outline
SOIC small outline IC
SOT small outline transistor
SSI small scale integration
SSR solid-state relay
STL Schottky transistor logic
SUS silicon unilateral switch

T

TC temperature coefficient
TCE thermal coefficient of expansion
TXCO temperature compensated crystal oscillator
TFE tetrafluoride ethylene propylene Copolymer, 250° Teflon
TRIAC bidirectional AC switch
TTL transistor-transistor logic
TTY teletypewriter

U

UHF ultra high frequency (300 MHz to 3 GHz)
UJT silicon unijunction transistor
UL Underwriters Laboratory
UPS uninterruptible power supply

V

VAC volts (of) alternating current
VAN value-added network
VAR volt-ampere reactive
VCR video cassette recorder
VDC volts (of) direct current
VHF very high frequency (30 kHz to 300 MHz)
VHSIC very high speed integrated circuit
VLF very low frequency (3 to 30 kHz)
VLSI very large scale integration
VME virtual machine environment
VRM voice recognition module
VTVM vacuum tube volt meter
VU volume unit
VSWR voltage standing wave ratio

W

WPS word processing software

Y

YIG yttrium iron garnet

Z

ZIF zero insertion force

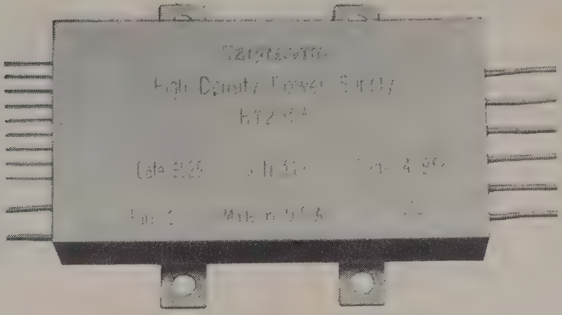
Hybrid DC/DC Converters RY2805-75 Series

Features

- 28Vdc input, 5Vdc @ 15A output
- 45W/in³ power density with low profile (fits in standard SEM-E single span format)
- Low weight: 91 grams typ.
- Full power operation from -55°C to +95°C (baseplate)
- Meets MIL-STD-461C, CS02, CS06 and narrowband emissions of CEO3 with 3 small external parts.
- NAVMAT derated with minor exceptions
- Protection features include:
  - — short circuit output current limit
  - — output overvoltage protection
  - — thermal shutdown
  - — input overvoltage shutdown
  - — input transient protection
- Other features include:
  - — synchronization for multiple units
  - — current sharing for parallel operation
  - — logic shutdown
  - — output status signal
  - — soft start
  - — fast transient response
  - — adjustable compensation
  - — junction temperature inducator

Applications

- Missile power
- Aircraft power
- Distributed power architecture for phased array radars
- Portable communications equipment
- Space-based vehicles
- Battery operated equipment



Description

The RY2805-75 hybrid military dc/dc converter offers the highest power density of any military power converter in its power range available today. A 1 MHz switching frequency reduces the size of the magnetics and capacitors to enable their placement inside the hybrid package. Constant frequency PWM, rather than variable frequency resonant conversion, eliminates system beat-frequency problems. The use of X7R ceramic capacitors for filtering eliminates the reliability problems associated with tantalum or electrolytic capacitors and permits full power operation up to 95°C (baseplate).

The series includes two models with different input voltage ranges: 22-36Vdc and 16-50Vdc. All outputs are 5Vdc @ 15A. Additionally, custom versions with non-standard input voltage ranges or output voltages are easily produced with minor modifications. All products in the series are 100% screened to the specific tests and conditions as listed on the last page of this data sheet.

Absolute Max. Ratings

Operating Case Temperature:	125°C
±Remote Sense Voltage	±30Vdc

DC-DC CONVERTERS

RO ASSOCIATES

- 25 years experience
- High efficiency

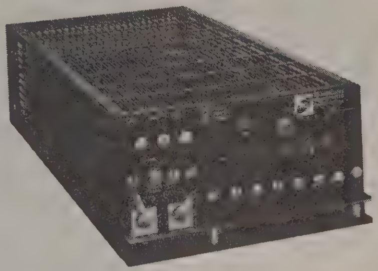
INFORMATION HOTLINE

(800) 443-1450 (408) 744-1450

200 WATTS 24VDC/48VDC INPUT

FEATURES

- High efficiency secondaries
- Low profile (2.7″ high)
- Up to 5 outputs in one package
- Output surge capability for disk drives
- Wide input range
- 4 outputs in one package
- No minimum load



SINGLE OUTPUT – 24VDC INPUT

**Note: Total current for negative outputs cannot exceed 2 amps for −12V operation (1.5 amps for −15V)

***MINIMUM 4A load on +5V is required for auxiliary outputs to regulate

SPECIFICATIONS

Input
24 VDC nominal (19-32 VDC)
48 VDC nominal (40-70 VDC)

Operating temperature
0°C to 50°C

Protection
All outputs current limited, continuous overload and short circuit proof. 5V, 12V, 15V, 5V and ±12/15V outputs have self-recovering overvoltage protection. Thermal protection is provided.

Remote sensing
Remote sensing only on +5V

Operating temperature
0°C to 50°C

Storage temperature
−55°C to +85°C

Isolation
1000 VDC input to case
1000 VDC input to output

Efficiency
72% typical at full load

Weight
5.5 lbs. (2.5 kilograms)

Size
2.7″ × 5.25″ × 11″ max
(6.9 cm × 13.4 cm × 28 cm max)

Safety
Designed to meet UL 478 and UL 1012 and CSA 22.2. Model 1110 UL certification pending.

Temperature stability
Better than .02%/C°

See Our Pages in Section 4000

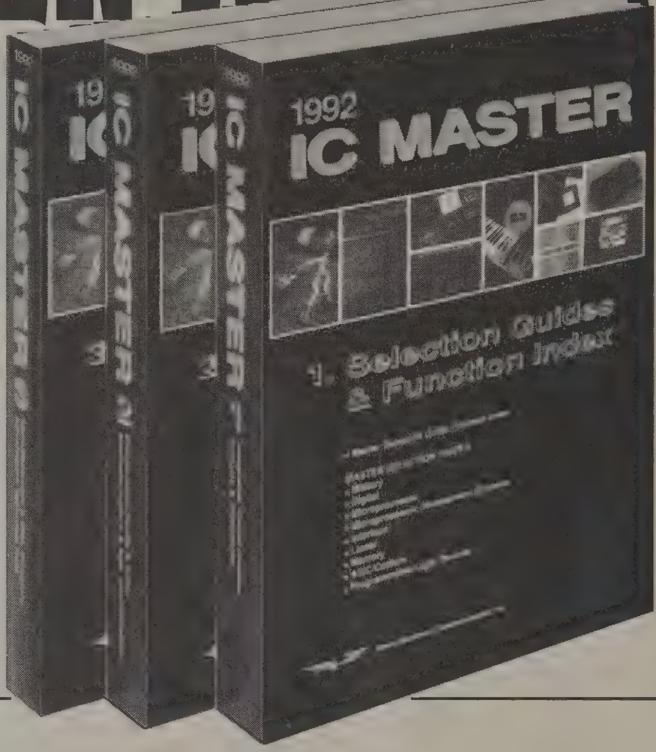
SUPER TIME SAVER!



Do you work with ICs? Do you have trouble finding the IC you need? Are you sick and tired of sifting through dozens of manufacturers' data books? Do you have trouble comparing one set of specs to another? Are you sick and tired of wasting time?

Do we have good news for you! Get your hands on the latest annual copy of the IC Master. The Master will save you both time and money. Here's how.

The Master lists every single IC you can buy. Better yet, the Master lists ICs by function. You know what you want to do. The Master tells you who makes what for what you want to do.

There's more! The Master lists every known alternate source to every integrated circuit. If somebody makes a substitute for an IC, the Master tells you. And fast!

Want to find a custom or semicustom IC? The Master tells you who the manufacturers are, what their capabilities are, and what design tools you need.

Looking for a distributor or a local sales office? The Master tells you where they are. Got a technical problem? The Master tells you who to call. Can't figure out a part number? The Master tells you how the part number systems work.

There's more! The Master has a section on microprocessor development tools with complete performance parameters. There's another section on programmable logic devices giving you everything from output configuration to PLD development systems.

Want to know if there's an application note available on a given part? The Master tells you!

If your question has anything to do with integrated circuits, you need the IC Master. Subscribe now by calling (516)227-1314. Ask for Marie Botta. Tell Marie you need the Master now.

If you prefer, write to Marie, Hearst Business Communications, 645 Stewart Ave., Garden City, NY 11530. She'll mail you the IC Master subscription form right away.

And, if you tell her you saw it in the 1992/93 EEM, she'll take $10 off the subscription price!

Check out SCI for DC/DC Converters!

- Major DC/DC Manufacturer — Subsidiary of ASTEC AMERICA, INC.
- 26 Years of Manufacturing and Applications Experience.
- We're focused: Modular Power Supplies are our only product.
- Wide range of Standard and Custom Configurations.
- Availability of Products and Direct Customer Support.

DC/DC Converters Quick Selection Table

Single Output

GA Series
15 Watt Single and Dual Output

- Ultrawide input range
- Efficiency to 85%
- Six-sided continuous shielding
- Regulated outputs
- Overvoltage protection
- Overcurrent protection • Remote on-off

Input Voltage Range	Output Voltage	Output Current	Case Size	Ripple, P-P Max	Model Number
20 - 72 VDC	5 VDC	3000 mA	1.6 x 2.0 x 0.4	75 mV	GA11-300-48
20 - 72 VDC	12 VDC	1250 mA		75 mV	GA12-125-48
20 - 72 VDC	15 VDC	1000 mA		75 mV	GA13-100-48
20 - 72 VDC	±12 VDC	±625 mA		75 mV	GA22-125-48
20 - 72 VDC	±15 VDC	±500 mA		75 mV	GA23-100-48

Note: Requires an external capacitor across input. Semiconductor Circuits, Inc. recommends a 33mF @ 100V capacitor (Sprague Type 672D or equivalent).

J Series
15 Watt Single, Dual and Triple Output

- Regulated outputs
- Continuous short circuit protection
- MOSFET design
- 500 VDC I/O isolation

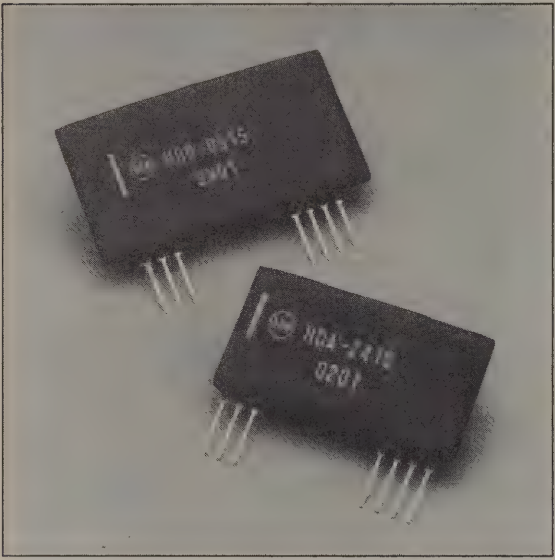
Shindengen America, Inc.

PERFORMANCE, RELIABILITY AND VALUE FOR YOUR DC-DC CONVERTER NEEDS

DC-DC CONVERTERS

Isolated

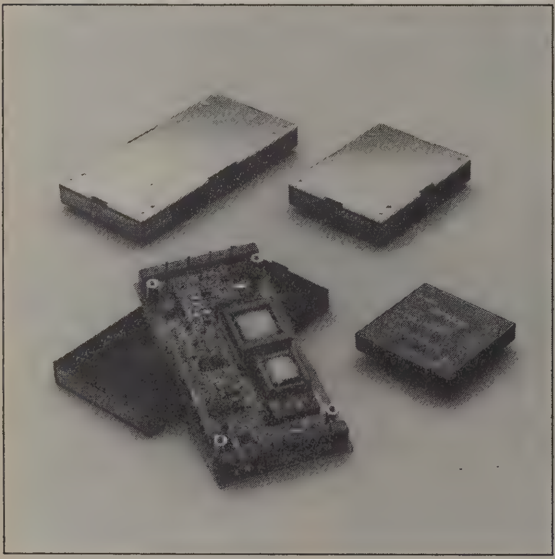


FEATURES

- Compact Footprint, Low Profile
- No Load Operation
- Light Weight Packaging
- High Reliability
- Low Cost

DESCRIPTION

- 1 Watt through 150 Watt Ratings
- 5, 12, 24 and 48 VDC Inputs
- SIP and Standard Board-Mounted Packaging
- Single, Dual and Triple Outputs
- Input/Output Isolation
- Input/Output Filters



Shindengen

Shindengen America, Inc.

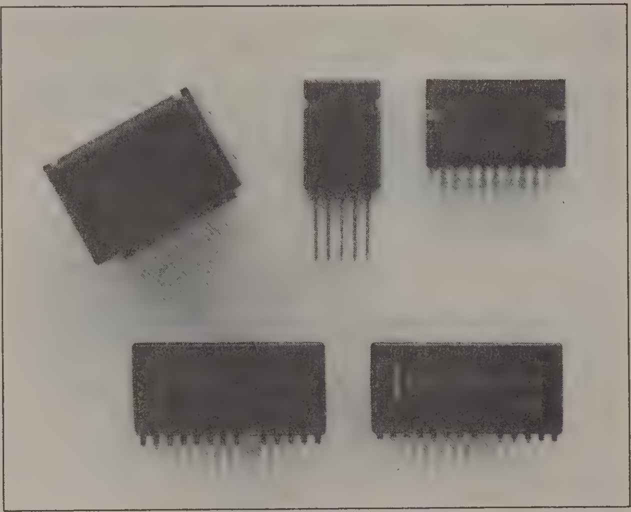
PERFORMANCE, RELIABILITY AND VALUE FOR YOUR POWER SUPPLY NEEDS

DC-DC CONVERTERS

Non-Isolated



FEATURES

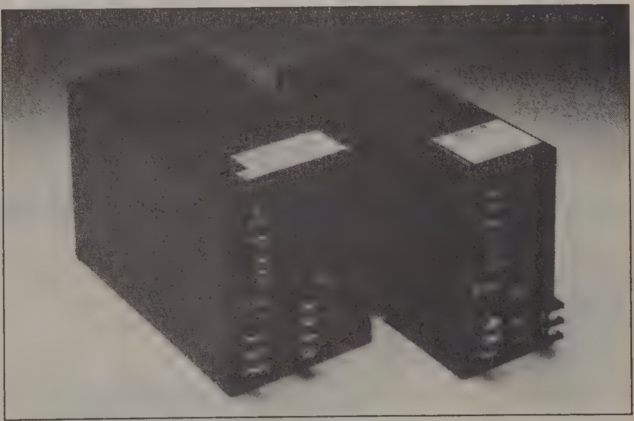
- Ultra Low Cost
- Compact, Light Weight Packaging
- High Reliability (>1 Million Hours)

DESCRIPTION

- 0.6A through 6.0A Models
- Built-In Inductor (0.6A, 1.2A Models)
- Overload and Thermal Protection
- Fixed Frequency
- 5V and 12V Standard Output Voltage (Adjustable with External Potentiometer)

AC-DC BUS REGULATORS

Power Supplies – Single Output



FEATURES

- High Reliability with MTBF of 300,000+ Hours
- Wide Range Input
- UL, CSA, IEC Safety Approvals
- Small Size
- Fully Enclosed with Built-In Fan

DESCRIPTION

- 24 or 48VDC Outputs Available
- 250 Watt and 500 Watt Models
- 0.99 Power Factor Meets IEC 55-2
- AC Power Fail and Power Alarm Signal
- 83% Efficiency

DC/DC CONVERTERS

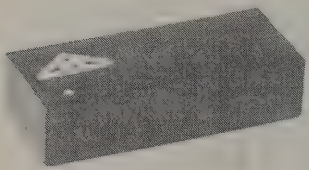
FEATURES

- *Compact Design*
- *PC Board Mounted*
- *Operating Temp: 0°C To +70°C*
- *Option For Output Shutdown*
- *Option For Output Voltage Adjustment*

APPLICATIONS

- *Distributed Power Systems*
- *Electroluminescent Display*
- *Computer Equipment*
- *Vacuum Fluorescent Display*
- *Industrial And Process Control*
- *Telecommunications Equipment*
- *Local Area Network*
- *POS Terminals*

These converters operate over a wide range of input voltages while maintaining excellent output regulation. These power supplies are capable of withstanding simultaneous and continuous short circuits across their outputs.

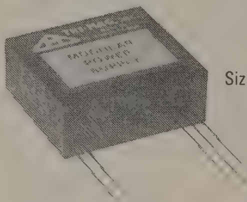


Size: 0.89 (L) x 0.39 (W) x 0.33 (H)

TDB1 SERIES

1 Watt, 2:1 Wide Range Input

OUTPUT POWER	INPUT VOLTAGE	OUTPUT VOLTAGE(S)	ISOLATED VOLTAGE
1 WATT	5	5V, 9V, 12V, 15V, 24V	500V
	12	5V, 9V, 12V, 15V	500V
	24	5V, 12V, 15V	500V

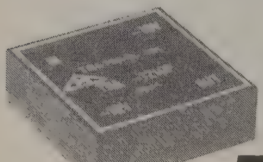


Size: 1.10 (L) x 0.34 (W) x 0.57 (H)

TSP2 SERIES

1-2 Watt, Sip Type

OUTPUT POWER	INPUT VOLTAGE	OUTPUT VOLTAGE(S)	ISOLATED VOLTAGE
1-2 WATT	5	5V, 9V, 12V, 15V, ±12V, ±15V	500V
	12	5V, 9V, 12V, ±12V, ±15V	500V
	24	5V, 12V, 15V, ±12V, ±15V	500V

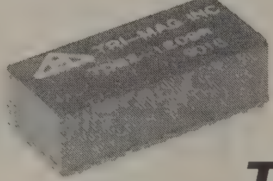


Size: 1.03 (L) x 1.30 (W) x 0.4 (H)

TDA2 SERIES

2-3 Watt, 2:1 Wide Range Input

OUTPUT POWER	INPUT VOLTAGE	OUTPUT VOLTAGE(S)	ISOLATED VOLTAGE
2-3 WATT	4.5–6.0 (5)	5V, 12V, 15V, ±12V, ±15V	2500V
	9–18 (12)	5V, 9V, 12V, 15V, ±12V, ±15V	2500V
	18–36 (24)	5V, 12V, 15V, ±12V, ±15V	2500V
	36–72 (48)	5V, 12V, 15V, ±12V, ±15V	2500V

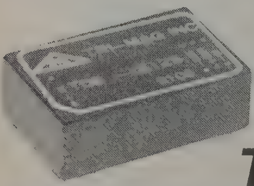


Size: 1.27 (L) x 0.6 (W) x 0.4 (H)

TDB2 SERIES

2 Watt, 24 Pin DIL Single & Dual Output

OUTPUT POWER	INPUT VOLTAGE	OUTPUT VOLTAGE(S)	ISOLATED VOLTAGE
2 WATT	5	5V, 9V, 12V, 15V, ±5V, ±12V, ±15V	500V
	12	5V, 9V, 12V, ±12V, ±15V	500V
	24	5V, 12V, 15V, ±12V, ±15V	500V

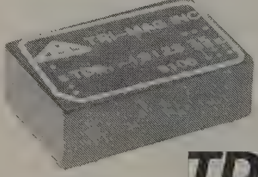


Size: 1.25 (L) x 0.80 (W) x 0.4 (H)

TDB3 SERIES

2 Watt, 24 Pin DIL Single & Dual Output

OUTPUT POWER	INPUT VOLTAGE	OUTPUT VOLTAGE(S)	ISOLATED VOLTAGE
2 WATT	5	5V, 9V, 12V, 15V, ±5V, ±12V, ±15V	500V
	12	5V, 9V, 12V, ±12V, ±15V	500V
	24	5V, 12V, 15V, ±12V, ±15V	500V
	48	5V, 12V, 15V, ±12V, ±15V	500V



Size: 1.25 (L) x 0.80 (W) x 0.4 (H)

TDB4W SERIES

3 Watt, DIP 2:1 Wide Range Input

OUTPUT POWER	INPUT VOLTAGE	OUTPUT VOLTAGE(S)	ISOLATED VOLTAGE
3 WATT	4.5–6.0 (5)	5V, 12V, 15V	500V
	9–18 (12)	5V, 12V, 15V	500V
	18–36 (24)	5V, 12V, 15V	500V
	36–72 (48)	5V, 12V, 15V	500V

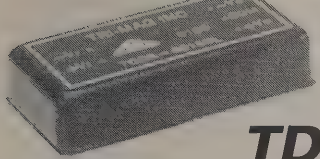
DC/DC CONVERTERS

Continued

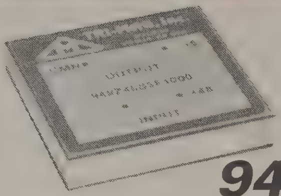


Size: 2.0 (L) x 1.0 (W) x 0.4 (H)

TDC3 SERIES

3 Watt, 2:1 Wide Range Input

OUTPUT POWER	INPUT VOLTAGE	OUTPUT VOLTAGE(S)	ISOLATED VOLTAGE
3 WATT	4.5–6.0 (5)	5V, 12V, 15V, ±12V, ±15V	500V
	9–18 (12)	5V, 9V, 12V, ±12V, ±15V	500V
	18–36 (24)	5V, 12V, 15V, ±12V, ±15V	500V
	36–72 (48)	5V, 12V, 15V, ±12V, ±15V	500V

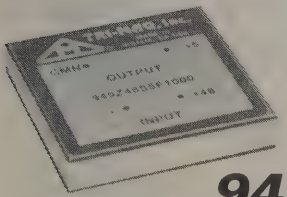


Size: 2.0 (L) x 2.0 (W) x 0.4 (H)

949ZW SERIES

5 Watt, 2:1 Wide Range Input

OUTPUT POWER	INPUT VOLTAGE	OUTPUT VOLTAGE(S)	ISOLATED VOLTAGE
5 WATT	4.5–6.0 (5)	5V, 12V, 15V, ±12V, ±15V	500V
	9–18 (12)	5V, 9V, 12V, ±12V, ±15V	500V
	18–36 (24)	5V, 12V, 15V, ±12V, ±15V	500V
	36–72 (48)	5V, 12V, 15V, ±12V, ±15V	500V

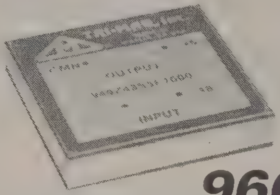


Size: 2.0 (L) x 2.0 (W) x 0.4 (H)

949ZX SERIES

5 Watt, 3:1 Wide Range Input

OUTPUT POWER	INPUT VOLTAGE	OUTPUT VOLTAGE(S)	ISOLATED VOLTAGE
5 WATT	4.5–15 (5)	5V, 12V, 15V, ±12V, ±15V	500V
	9–27(12)	5V, 12V, 15V, ±12V, ±15V	500V
	22–72 (48)	5V, 12V, 15V, ±12V, ±15V	500V

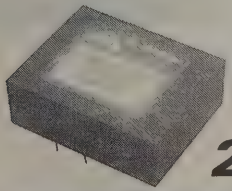


Size: 2.0 (L) x 2.0 (W) x 0.88 (H)

960ZW SERIES

10 Watt, Wide Range Input

OUTPUT POWER	INPUT VOLTAGE	OUTPUT VOLTAGE(S)	ISOLATED VOLTAGE
10 WATT	4.5–6.0 (5)	5V, 12V, 15V, ±12V, ±15V	500V
	9–18 (12)	5V, 9V, 12V, ±12V, ±15V	500V
	18–36 (24)	5V, 12V, 15V, ±12V, ±15V	500V
	36–72 (48)	5V, 12V, 15V, ±12V, ±15V	500V



Size: Standard; 2.5 (L) x 2.0 (W) x 0.9 (H)
Low Profile; 3.0 (L) x 2.0 (W) x 0.610 (H)

200Z SERIES

5-12 Watt, For Display & High Voltage

OUTPUT POWER	INPUT VOLTAGE	OUTPUT VOLTAGE(S)	ISOLATED VOLTAGE
5-12 WATT SINGLE OUTPUT	+5 +12 +24 +28	+55V, +180V, +200V, +250V +55V, +120V, +130V, +180V, +190V, +200V, +350V +55V, +130V, +350V +180V, +200V	NONE
5-12 WATT DUAL OUTPUT	12 15 28	(+55V, +20V), (70V, -120V), (100V, -90V), (110V, -110V), (55V, 120V), (180V, +90V), (190V, -160V), (32V, +20V), (90V, 100V), (50V, +20), (110V, -110V) (200V, -200V) (100V, -100)	NONE
5-12 WATT FIXED OUTPUT SINGLE AND DUAL	5 12 15 20 24 28	(12V), (24V), (5V, -5V), (12V, -12V), (15V, -15V) (12V, -12V), (15V, -15V,) (18V, -18V), (100V, -100), (200V), (250V) (200V, -200V) (45V) (250V), (185V), (80V, -80V) (100V, -100)	NONE

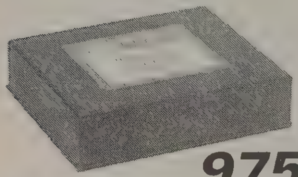
- *Distributed Power Systems*
- *Electroluminescent Display*
- *Computer Equipment*
- *Vacuum Fluorescent Display*
- *Industrial And Process Control*
- *Telecommunications Equipment*
- *Battery-powered Equipment*

These converters operate over a wide range of input voltages while maintaining excellent output regulation. These power supplies are capable of withstanding simultaneous and continuous short circuits across their outputs.



Size: 3.0 (L) x 2.56 (W) x 0.83 (H)

975ZW SERIES

15 Watt, 2:1 Wide Range Input, Single Output

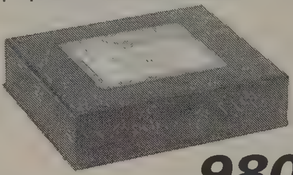
OUTPUT POWER	INPUT VOLTAGE	OUTPUT VOLTAGE(S)	ISOLATED VOLTAGE
15 WATT	9–18 (12)	5V, 12V, 15V	500V
	18–36 (24)	5V, 12V, 15V	500V
	36–72 (48)	5V, 12V, 15V	500V

15 Watt, 2:1 Wide Range Input, Dual Output

OUTPUT POWER	INPUT VOLTAGE	OUTPUT VOLTAGE(S)	ISOLATED VOLTAGE
15 WATT	9–18 (12)	±12V, ±15V	500V
	18–36 (24)	±12V, ±15V	500V
	36–72 (48)	±12V, ±15V	500V

15 Watt, 2:1 Wide Range Input, Triple Output

OUTPUT POWER	INPUT VOLTAGE	OUTPUT VOLTAGE(S)	ISOLATED VOLTAGE
15 WATT	9–18 (12)	+5V, +12V, -12V	500V
	18–36 (24)	+5V, +15V, -15V	500V
	36–72 (48)	+5V, +12V, -5V	500V

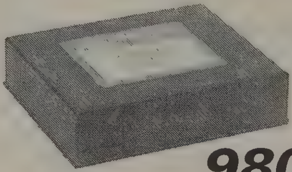


Size: 3.0 (L) x 2.56 (W) x 0.83 (H)

980ZW SERIES

30 Watt, 2:1 Wide Range Input

OUTPUT POWER	INPUT VOLTAGE	OUTPUT VOLTAGE(S)	ISOLATED VOLTAGE
30 WATT	18–36 (24)	5V, 12V, 15V	500V
	36–72 (48)	5V, 12V, 15V	500V

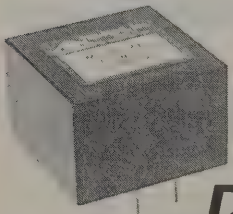


Size: 3.0 (L) x 2.56 (W) x 0.83 (H)

980ZX SERIES

30 Watt, 2:1 Wide Range Input

OUTPUT POWER	INPUT VOLTAGE	OUTPUT VOLTAGE(S)	ISOLATED VOLTAGE
30 WATT	9–36 (24)	5V, 12V, 15V	500V
	20–72 (48)	5V, 12V, 15V	500V

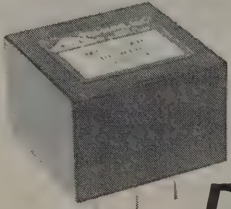


Size: Package A 1.25 (L) x 0.85 (W) x 0.95 (H)
Package B 1.01 (L) x 0.82 (W) x 0.70 (H)

DA SERIES

2 Watt, For EL Lamps

OUTPUT POWER	INPUT VOLTAGE	OUTPUT VOLTAGE(S)	ISOLATED VOLTAGE
2 WATT	5	15V, 18V, 20V, 30V	500V
	12	15V, 18V, 20V, 30V	500V
	24	15V, 18V, 20V, 30V	500V
	48	15V, 18V, 20V, 30V	500V



Size: Package A 1.20 (L) x 1.10 (W) x 0.91 (H)
Package B 1.05 (L) x 1.43 (W) x 1.03 (H)
Package C 2.56 (L) x 2.0 (W) x 0.98 (H)

DDA SERIES

3, 6 & 12 Watt, Vacuum-Fluorescent Display

OUTPUT POWER	INPUT VOLTAGE	OUTPUT VOLTAGE(S)	ISOLATED VOLTAGE
3 WATT	5, 9, 12, 15, 24, 48 Vdc	BASED ON VOLTAGE REQUIRMENT	500V
6 WATT	5, 9, 12, 15, 24, 48 Vdc		500V
12 WATT	5, 9, 12, 15, 24, 48 Vdc		500V
12 WATT	5, 9Vdc to 7.5 Watts 12, 15, 24, 48Vdc to 12 Watts		500V

For more Tri-Mag products see Volume A•2700 & D•4000

DC/DC Converters

DC/DC Converters for LAN and Flash Memory applications.

Single Output LAN DC/DC Converters

Part Number	V_{IN} (Vdc)	V_{OUT} (Vdc)	I_{OUT} (mAdc)	REG	Remote ON/OFF	Isolation (Vac)	Package

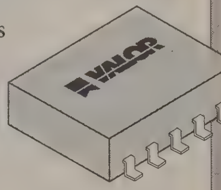
PM6502	12E	9	225	SWR	YES	2000	E

Units with input voltages of "12E" operate over the full Ethernet range of 10.2-15.75Vdc.
Above models are fully isolated and may be applied as either + or - outputs.

Features

- The industry's first 2W surface-mountable DC/DC Converter
- Up to 2W switching-regulated, linearly-regulated, and unregulated
- Isolation voltages of 500, 2000, and 2500 Vac
- DC/DC Converters for LAN products and flash memory
- Remote ON/OFF versions for *"jumperless"* solutions
- MTBFs to 2.1 million hours



Specifications

- Efficiency
  70% switching regulated (SWR)
  65% unregulated (UN)
  50% linearly regulated (LIN)
- 50-150 mVp-p output ripple (20 MHz bandwidth)
- 5% regulation (SWR, LIN)
- Three types of Remote ON/OFF logic levels available

Flash Memory DC/DC Converters

Part Number	V_{IN} (Vdc)	Output V_{OUT} (Vdc)	Output I_{OUT} (mAdc)	REG	Isolation (Vac)	Package
PM6064	+5	+12	60	SWR	NON	F
PM9006	5	12	165	LIN	500	D

Outputs with no polarity indicated are fully isolated and may be applied as either + or - outputs.
Outputs with polarity signs are dedicated in their output polarity.
Both include Remote ON/OFF.

NOMOGRAPH VOLTAGE DROP

NOMOGRAPH OF VOLTAGE DROP ACROSS LOAD SUPPLY LEADS
(as a function of wire size and load current)

THIS NOMOGRAPH CAN BE USED TO FIND:

Maximum current carrying capacity recommended for any standard wire size.*

1) With a straight edge, connect from the wire size on Scale 2 to the point "A" on Scale 3.
2) Read I_{max} on Scale 1.

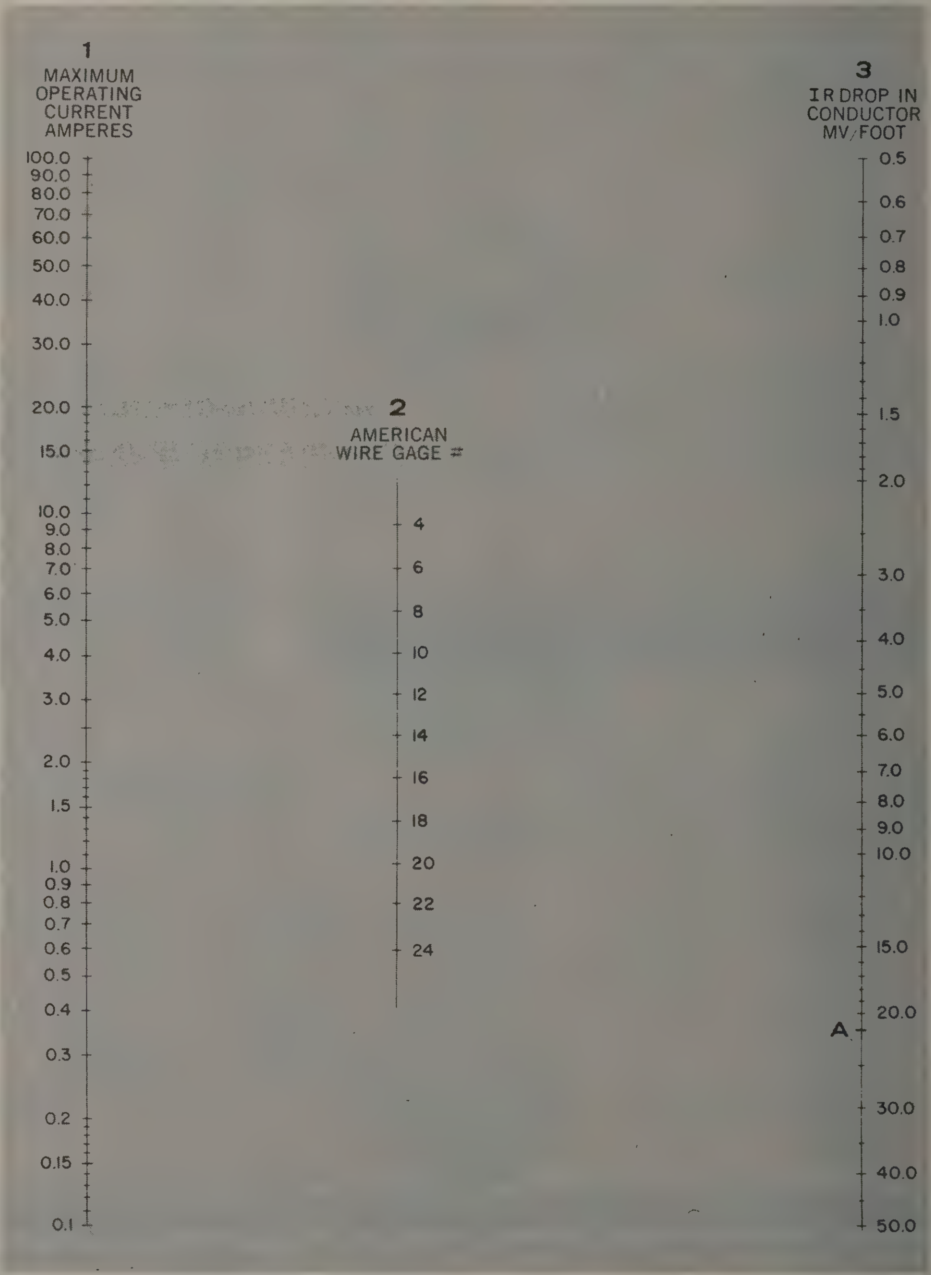
Voltage drop in millivolts per foot for known wire size and operating current.

1) With a straight edge, connect the known current on Scale 1 and the wire size on Scale 2.
2) Read voltage drop on Scale 3.

Wire size required for known operating current and known maximum tolerable voltage drop across supply leads.

1) Determine maximum tolerable drop in millivolts **per foot** of lead (sum of positive and negative leads).
2) Connect the value on Scale 3 (as determined in step 1) to the known current on Scale 1.
3) Read wire size on Scale 2.

* *Based on an arbitrary minimum 500 circular mils per ampere. High-temperature class insulation will safely allow higher currents.*



NOTE: A voltage stabilized Power Supply controls the voltage across its output terminals. Hence, the wire conductors used to connect the load must be considered as part of the load. At high load currents, the voltage drop across the supply leads may appreciably degrade stablization at the load. Kepco models equipped with the *remote error sensing* feature can automatically compensate for voltage drops of up to 500 mV across each load supply lead.

100 WATT

DC-DC CONVERTERS

SINGLE, DUAL, TRIPLE, AND QUAD OUTPUT FOR TELECOMMUNICATIONS, INSTRUMENTATION AND INDUSTRIAL APPLICATIONS.

Reliability

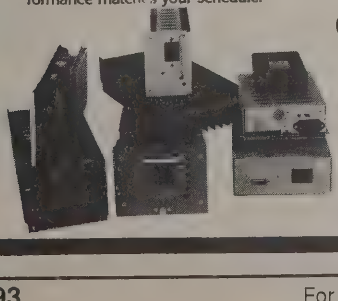
Reliability is designed into any power supply delivered by Voltex. Long, trouble free operation is assured by paying attention to all details.

Dependability

From prototype through production we endeavor to meet your requirements. A close liaison is established to make sure that our performance matches your schedule.

Capability

The entire power system is designed by Voltex. Magnetics, sheet metal, etc. are designed and fabricated in our plant. This assures you of consistent, high quality power systems. Instrumentation, such as power failed detect systems, sequencing systems, in fact all systems associated with power systems can be designed. Power related control systems, such as motor speed controls, have also been designed.



Custom Designed Power Supplies for OEM applications

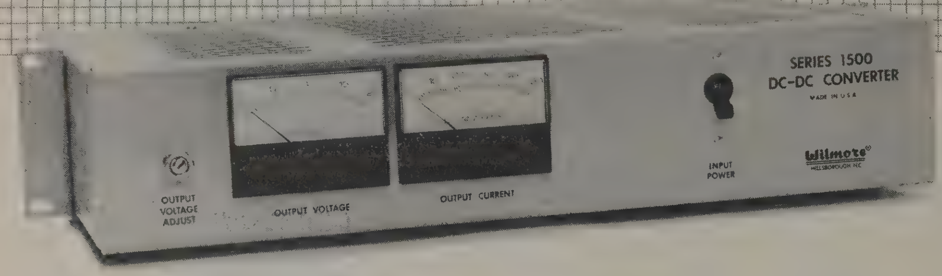
Wilmore

DC-To-DC Power Converters



- **80% To 90% Efficient**
- **200, 400 Or 800 Watts**
- **Height 3.45″ (2 Rack Spaces)**
- **Input/Output Isolation**

The Series 1500 converters provide an isolated, regulated, adjustable dc output from station batteries or other widely fluctuating dc sources to reliably power telecommunications equipment, supervisory control systems, and other sensitive electronic equipment. Conservatively rated and very efficient, these converters will operate at any load within their rating over a wide ambient temperature range with simple convection cooling. Their minimal no-load input power (about 5 watts) and correspondingly high light-load efficiencies make them uniquely suited for applications in which extended periods of "standby" service are encountered.

Front-Panel Controls And Indicators

A combination circuit breaker and ON/OFF switch is provided for the input power. A voltmeter and ammeter display the dc output. A screwdriver-slotted potentiometer shaft with locking nut is provided to adjust the output voltage level.

Size And Weight

All converters measure 3.45″ high by 17.0″ wide. The 200-watt and 400-watt units are 13.2″ deep, and the 800-watt units measure 13.4″ deep. All units weigh less than 18 pounds.

Optional Features

Standard options for Series 1500 converters include paralleling diodes for multiple-unit redundancy applications and auxiliary Form C contacts for remote indication of improper converter output. In addition, many other input/output voltage combinations not listed in the adjacent table are available. Contact our sales department for details.

Other Rack Mounted DC-To-DC Converters

In addition to the Series 1500, Wilmore manufactures many other standard and custom, single and multiple-output rack-mounted DC-to-DC converters. Each series is isolated, regulated and highly efficient. Each is designed and manufactured in accordance with Wilmore's emphasis on conservative electrical ratings and long product life. Contact our sales department for more information.

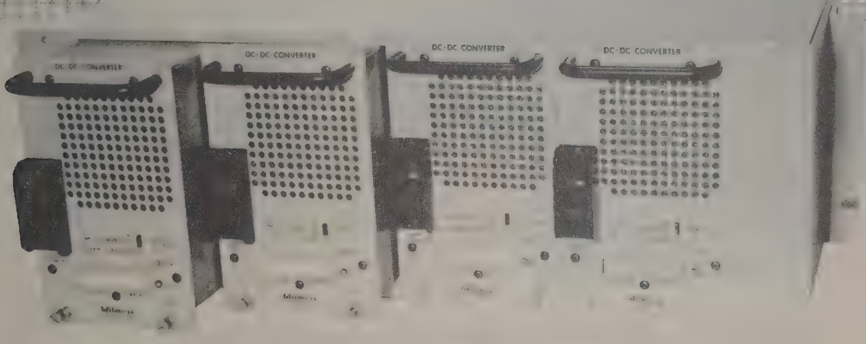
Wilmore

Modular DC-DC Converters



- **Up To 4000 Watts In Only Seven Inches Of Vertical Rack Space**
- **Front-Access Design**
- **Input-Output Isolation**
- **N + 1 Redundancy**
- **Front-Panel Ammeter And Status Indicators**

General Description

Designed for cell-site, central office, fiber-in-the-loop (FITL), power installations and other telecommunications power applications needing more power in less space, this new converter module/shelf system features two to three times greater power density than previous converters. The Series 1625 front-access converter shelf occupies only 7″ of vertical rack space and can be equipped with up to four 1000-watt plug-in converter modules, providing a maximum current capacity of 160 Amperes at 24 Volts (or 80A @ 48V or 30A @ 130V). Each converter module features an isolated, regulated, adjustable output, LED bar-graph ammeter, output-voltage test points, LED status indicators and Form C alarm contacts. Converter modules can be installed or removed without system shutdown, allowing for easy site expansion and service.

INPUT/OUTPUT

Input Voltage Range (VDC)	Adjustable Output Voltage Range (VDC)	Output Current Per Module (ADC)	Model Number
21 to 29	45.5 to 50.5	0 to 20	1625-24-48-20
42 to 58	22.7 to 25.2	0 to 40	1625-48-24-40
42 to 58	123.5 to 136.5	0 to 7.5	1625-48-130-7.5

OTHER ELECTRICAL SPECIFICATIONS

INPUT PROTECTION	Circuit breaker, reverse-polarity protection
OUTPUT REGULATION	± 3% versus line and load
OUTPUT PROTECTION	Overload, short-circuit, and overvoltage protection

ENVIRONMENTAL/MECHANICAL

OPERATING TEMPERATURE	0°C to +50°C
STORAGE TEMPERATURE	−40°C to +95°C
EFFICIENCY	80% to 85%
MODULE SIZE	4.1″ wide by 6.2″ high by 13.9″ deep
MODULE WEIGHT	11 pounds
SHELF SIZE	21.0″ wide by 6.95″ high by 15.3″ deep
SHELF WEIGHT	28 pounds

MODULE INDICATORS AND ALARMS

INPUT POWER	Green LED
ALARM CONDITION	Red LED
OUTPUT VOLTAGE	Front-panel test points
OUTPUT CURRENT	20-segment LED bar-graph ammeter
ALARM CONTACTS	One Form C

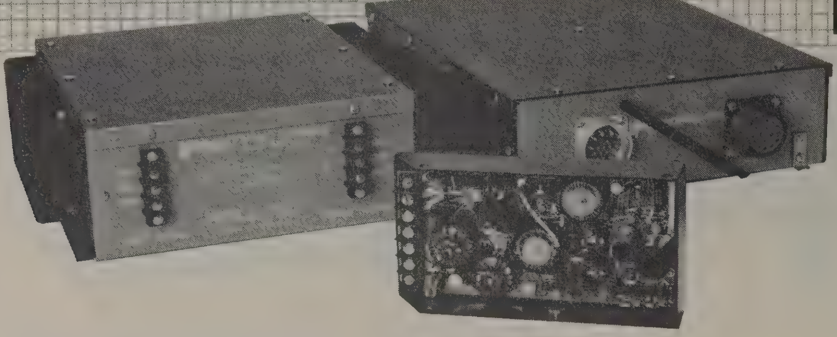
Wilmore

Mobile And Railroad/Transit DC-To-DC Converters



DC-to-DC Converters for Mobile Communications

These converters are designed primarily to power standard 12-volt and 24-volt mobile communications equipment from any vehicular electrical system that may be encountered. Units are mechanically and electrically rugged, inexpensive, and shipped from stock.

DC/DC Converters for Railroad/Transit Applications

The Railroad/Transit (RT) Series of dc-to-dc converters are especially designed to power radio transceivers, fuel management systems, ATCS equipment and other sensitive electronic equipment aboard locomotives and electric rail vehicles.

Transient Withstand Capability

High-voltage, high-energy transients on locomotive power busses will damage inadequately protected electronic equipment. Wilmore's RT Series of converters protect sensitive loads while operating through input transients commonly found on rail vehicles. These converters do not rely on gas discharge tubes, varistors, power zeners or other limited-life transient suppression devices to achieve this capability.

Custom-Designed RT Series Converters

As the use of sensitive electronic equipment on rail vehicles continues to grow and diversify, user's needs for reliable power conversion are becoming highly individualized. The majority of Wilmore's work for the rail transportation industry is the design and manufacture of custom power products. Our field-proven circuitry can be readily scaled to provide different input/output voltage combinations, output power levels, and package sizes for use on diesel-electric locomotives and electrically-powered rail transit cars. Our engineering charges for custom units are modest, and our turnaround times are short. If you have some special requirements regarding any performance criteria, our New Products Group would like to hear from you.

DC/DC Converters for Mobile Communications

Input Voltage Range (Vdc)	Nominal Output Voltage[1] (Vdc)	Output Current[2] (Adc)	Isolated/ Polarity-Reversing	Dimensions (h" x w" x d")	Efficiency[3] (Typical)	Model Number

20-56	13.0	0-6	Isolated	2.5 x 7.5 x 10.4	75%	**1475**

[1] Models 1380, 1360, 1395, 1365, 1442, and 1424 provide voltages directly proportional to input voltage. All other models provide regulated output voltages.

[2] Maximum current ratings assume an intermittent demand on a 20% duty cycle except for the Series 1340 converters. The rating given for the Series 1340 is a continuous duty rating.

[3] These are typical minimum efficiencies for one-half to full load.

UNINTERRUPTIBLE POWER SUPPLIES SINGLE PHASE 50Hz/60Hz 330VA-10KVA RACKMOUNT AND FREE STANDING SYSTEMS

- **Innovative Bi-Mode UPS**
- **Eliminates Half of Power Parts**
- **High MTBF**
- **Cost Effective Power Protection**
- **Free Standing & Rack Style**

The Bi Mode family of UPS products introduced by Abacus Controls offers the reliability and simplicity of a standby UPS while fully protecting the critical load against all forms of power problems.

The Bi Mode UPS uses the same isolation transformer and power components for inverting when the utility is not present and for rectifier-battery charging when the utility is present.

Unlike other on-line products there is no switch, either electromechanical or static device between the dual mode bridge circuit and the load. This permits synchronized transfers from the utility to the bridge instantaneously in either direction.

The advantages of this technology include cost, reliability, size, weight & audible noise.

RELIABILITY ANALYSIS FOR FOUR MODEL 933-4 UPS
Mean Time Between Failures

BI-MODE SPECIFICATIONS

Input Voltage: 120/208/240 VAC ± 10%
Input Frequency: 50Hz or 60Hz
Output Voltage: 120/208/240 VAC
Voltage Regulation: ± 2%
Wave Form: Sinewave 2% THD
Efficiency: 90%
Temperature Range: 0–40°C
Humidity: 95% Non-condensing
Circuit Protection: CKT BKR: Fuse; By Pass Switch
Overload Capability: 150% PEAK

Model 913-4RS

FREQUENCY CONVERTERS
50-60-400 Hz

Input Voltage: 115V AC, ±10%, single-phase for units 2000VA and below. 208V AC, ±10%, three-phase for units above 2000VA. 220V AC, ±10%, 50Hz is a no charge option. Other inputs available on a custom basis.

Input Frequency: 47 to 65Hz. 380 to 420Hz input is a no charge option.

Output Voltage: Adjustable 100 to 130 volts. Voltage adjust is internal for fixed frequency models, on the front panel for adjustable frequency models. (Other ranges available, consult factory.)

Voltage Regulation: Less than ±2% for combined no load to full load change and rated input voltage change.

Load Power Factor: 0.7 lead to 0.7 lag. Continuous zero lead to zero lag at full rated output without damage.

Output Waveshape: Sinewave less than 4% THD, 3% max any single frequency.

Protective Circuits: All models are equipped with automatic overload protection, including short circuit. Automatic reset upon overload removal. Circuit breaker on the input and fuse on the output. Automatic shutdown for input overvoltage, undervoltage.

Meters: Output voltmeter ammeter, and frequency meter offered as options.

Output Frequency: Rated output frequency for each model is shown on chart. For adjustable frequency models, adjustment is on the front panel. Internal frequency adjust is a no charge option.

Frequency Stability: Oscillator included in the unit base price. Fixed frequency oscillators are crystal controlled with a stability of ±0.05%. Adjustable oscillators are RC controlled and have a stability of ±0.25%.

Efficiency: Between 70 to 80 percent (typical 75%). At least 70% from 40% of full load to full load.

Peak Output Current: 150% of full rated current is available for three-cycles. Unit is set to current limit at 120% after three cycles.

STATIC INVERTERS
DC TO 50-60-400 Hz

- **85% Efficiency**
- **Low Cost**
- **Light Weight**
- **Proven Reliability**

Input Voltage: 100 to 140V DC. Other input voltage ranges, 28V DC, 48V DC, 60V DC and 200V DC Sunverter.

Output Voltage: Set for 117V. Internal adjustment from 110V to 120V. 220V AC for 50Hz models.

Voltage Regulation: Less than 2% for single phase units, less than 5% for three phase units, for combined load and input voltage changes.

Output Waveshape: Sinewave less than 4% THD, 3% max any single frequency.

Protective Circuits: All models are equipped with automatic overload protection, including short circuit. Automatic reset upon overload removal. Circuit breaker on the input and fuse on the output. Automatic shutdown for input overvoltage, undervoltage.

MILITARY POWER SUPPLIES

28 VDC to AC Sine Wave

MODEL S

SPECIFICATIONS

Input Voltage Range: 24 to 30 volts DC. Other input ranges are available.
Load Regulation: ±1.0% from ½ to full load.
Frequency Stability: ±1.0%
Voltage Adjustment Range: 12% by screwdriver adjustment.
Reliability: Up to 340,600 Hrs. MTBF per MIL-HDBK-217C.
Input Transient Protection: In accordance with MIL-STD-704A, Limit 1, Fig. 9 (80 volts for 0.1 seconds).
Environment: +212°F max. at mtg. base using adequate heat sink. −65°F min. at mounting base. Encapsulated to meet the environmental requirements of MIL-STD 810C and MIL-E 5400P, Class 2, including: altitude (to a vacuum), vibration, shock, acceleration, sand, dust, humidity, saltspray, fungus, explosion, etc.

MILITARY POWER SUPPLIES

28 VDC to AC Sine Wave

SN

SPECIFICATIONS:

Input: 24 to 30 V dc. Other inputs available. (See Option H.)

Efficiency: 55% minimum at 27 V dc input and full load.

Line Regulation: Within 0.5% for full input change 24 V dc to 30 V dc with load constant.

Load Regulation: Within 1.0% for load change of one half to full load with line constant.

Wave Form: Sinusoidal with a maximum harmonic distortion into a resistive load of 4%.

Frequency Stability: ±1% drift with time (within 8 hours after 30 seconds warm-up).

Frequency Accuracy: ±0.5% is initial setting tolerance.

Load Power Factor: Derate linearly from 100% rated power at unity to 70% rated power at 0.7 power factor lagging or leading.

Isolation Voltage: 200 V dc input to case, 750 V dc output to case and input to output.

Insulation Resistance: 50 megohms minimum between input and output, input and case, output and case when measured at 50 V dc.

Temperature Range: Operating −55°C to +100°C baseplate temperature; storage temepratute −65°C to +125°C ambient.

Temperature Coefficient: 0.06% / °C from −55°C to +100°C, voltage change, frequency change, 1% maximum.

Input Transient Protection: In accordance with MIL-STD-704A, Figure 9, Limit 1 (80 V dc for 0.1 second).

Load Transient Response: Output voltage returns to regulation limits within 5 cycles for a load change of no load to full load.

Load Transient Overshoot: 10% maximum from nominal voltage set point.

Short Circuit Protection: Completely protected against short circuit of any duration. Unit must be recycled to restore output to normal.

Reliability: The MTBF calculated per MIL HDBK-217D, under operating conditions of 50°C baseplate temperature, maximum operating input voltage and full rated output power is 156,366 hours for ground benign and 15,722 hours for air inhabited transport environments. With Enhanced Reliability Option (-ER) ground benign is 907,070 hours; air inhabited transport is 93,030 hours.

Environment: Hermetically sealed and encapsulated to meet the environmental requirements of MIL-STD-810C.

Maintainability: Units are repairable at depot level.

OPTIONAL FEATURES

The following standard options are available on the SN Series inverters. Please refer to option section of this catalog for detailed information.

Special Connectors: A military-type hermetically sealed connector is provided as **Option A** in place of our standard header to extend out the top surface. (To order, replace "D" in model number with "A", i.e., SN180A-27A-400.)

Severe Shock, Acceleration and Vibration: Special encapsulation, **Option E**, enables all units to withstand 60 g's shock, 50 g's acceleration and 30 g's vibration. (To order, add "E" after "D" in model number, i.e., SN180DE-27A-400).

Wide Input Voltage: Option H recenters the input voltage to provide alternate inputs from 18 V dc to 32 V dc. Call an Abbott Sales Office for output current derating. (To order, add "H" after the "D" in model number and specify input voltage range in parentheses after the entire model number, i.e., SN180DH-27A-400 (18-30).)

Remote Turn On/Off: Option L provides isolated terminals to turn outputs on/off with TTL logic signal. (To order, add "L" to character preceding first dash in model number, i.e. SN180DL-27A-400.)

Remote Output Adjustment: With **Option R**, an adjustment potentiometer can be remotely located to adjust the output voltage. (To order, add "R" after "D" in model number, i.e., SN180DR-27A-400.)

Frequency Adjustment: Option -4 enables output frequency to be adjusted ±5% by means of an external potentiometer. (To order, add "-4" at the end of the entire model number, i.e., SN180D-27A-400-4.)

Enhanced Reliability: -ER Option provides increased reliability by using higher levels of military-grade components. (To order, add "-ER" at the end of the entire model number, i.e., SN180D-27A-400-ER.)

6 Standard Models

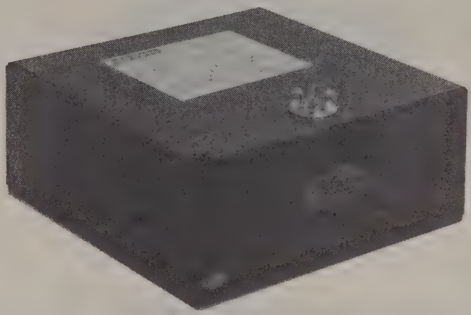
	108-122	1.565	4.0	14H	5.5	2.5	SN180D-115A-400
800	25.4-28.6	6.667	4.0	14H	5.5	2.5	SN180D-27A-800
	108-122	1.565	4.0	14H	5.5	2.5	SN180D-115A-800
1600	25.4-28.6	6.667	4.0	14H	5.5	2.5	SN180D-27A-1600
	108-122	1.565	4.0	14H	5.5	2.5	SN180D-115A-1600

1. Output voltage is continuously adjustable between the limits shown by means of an externally accessible screwdriver adjustment potentiometer.
2. Weights are ±5%.

Model Numbering System

Product Line Series	Output Power Watts	Header Type	Options	Dash	Output Voltage AC	A	Dash	Frequency Hz
SN	180	D		—	27	A	—	400



Sine Wave - 1ϕ 400 to 1600 Hz

- High Density 2 w/in^3 180-Watt Inverter
- Operating temperature range: −55°C to +100°C.
- High reliability. Up to 907,070 hrs. MTBF per MIL-HDBK-217D.
- Encapsulated and hermetically sealed per MIL-STD-810C and MIL-E-5400P.

11 to 54 VDC Input
30 to 320 VA Output

- A wide range of standard models.
- 50 Hz or 60 Hz output.
- Surge current capabilities up to 3 times rated output power.
- Exceptional reliability. Typical MTBF: 90,586 hours for model LN8.
- High efficiency provided by sine wave. Conserves power.
- Saves motors by reducing overheating.
- Low distortion. 2% typical.
- Salt spray package.
- Compact. Lightweight.
- Switchable 115 VAC 60 Hz/230 VAC 50 Hz.
- Wide temperature range: −20°C to +55°C ambient operation.
- Special models available.
- 2-year warranty.

Abbott's sine wave inverters convert dc battery power to regulated clean ac. They are used to provide uninterrupted power to operate computers, motors, lamps, digital processors, TV broadcast equipment and telecommunication electronics.

Our inverters have become the industry standard by providing dependable performance in such rugged applications as marine radar, railway signal and communications, security electronics, and mobile test equipment.

Sine Wave Inverters

MODELS
KN-PN
LN-TN

SPECIFICATIONS

INPUT VOLTAGE RANGE:
KN, KS: 11 to 15 VDC
PN, PS: 22 to 30 VDC
LN, LS: 29 to 38 VDC
TN. TS: 42 to 54 VDC

OUTPUT VOLTAGE: 115 or 220 VAC ±2% at full load and nominal input voltage.

OUTPUT FREQUENCY: 50 Hz or 60 Hz.

LINE REGULATION: 3% for specified input voltage range with load constant.

LOAD REGULATION: 3% for load change of half load to full load with line constant; 6% for change of no load to full load.

WAVE FORM: Sine wave with 2% typical, 5% maximum distortion.

POWER FACTOR: Fully rated output VA, from unity to 0.7 power factor lagging or leading.

EFFICIENCY: At full load with nominal input voltage
40% minimum on KN, KS
50% minimum on PN, PS
58% minimum on LN, LS
60% minimum on TN, TS

OPERATING TEMPERATURE RANGE: (KN, PN, LN and TN): −4°F to +131°F (−20°C to +55°C) ambient air temperature. Humidity 0 to 90% (non condensing) at 25°C.

OPERATING TEMPERATURE RANGE: (KS, PS, LS and TS): −4°F to +131°F (−20°C to +55°C) ambient air temperature. G2 case is submersible (10 feet, 2 minutes).

INPUT TRANSIENT PROTECTION: 45 VDC for 0.1 second transient deviation and recovery (for change of 50%) of rated (load).

ALTITUDE: 10,000 feet above sea level (KN, PN, LN, TN) 50,000 feet above sea level (KS, PS, LS, TS).

PROTECTIVE FEATURES

OVERLOAD PROTECTION: Magnetic type circuit breaker. Reverse polarity protection.

HIGH RELIABILITY

Model LN8T-115-60: MTBF 90,586 hours at 25°C ambient, ground benign environment per MIL-HDBK-217. Model TN8T-115-60: MTBF 74,733 hours at 50° ambient.

2-YEAR WARRANTY/ALL MODELS.

ACDCo Power WHERE you need it!

Inverters-Uninterruptible Power Systems -Battery Chargers-Frequency Changers-Power Supplies

ACDCo Power Equipment is designed to meet high reliability and performance standards providing maximum life with minimum maintenance to protect all system circuits that require dependable, high quality power.

PRODUCT

Inverters, Power – DC to AC Output: Fixed-base, portable, mobile and marine.

Uninterruptible AC Power Systems: 36 VA to 5 KVA.

Frequency Converters – AC to DC: 50/60 Hz, 60/50 Hz, 50/400 Hz and 60/400 Hz.

TYPICAL SPECIFICATIONS

Input: ±15% from nominal.

Output: Sine wave, 120 Volts RMS, 60 Hz.

Voltage Regulation: 2% over full input and load range.

Frequency Regulation: 1% over full input and load range.

Power Factor: .9 Lead to .8 Lag.

Efficiency: Over 80% at nominal input.

Distortion: Less than 5%.

Overload: Within specifications for ONE MINUTE at 140% load.

Overload Protection: No damage from short to open circuit, reversal of input, or input voltage to 140% nominal.

DESIGN FEATURES

Ruggedized construction, no moving parts, completely solid state, easy servicing – sides fold down, plug-in transistors and I/C's on Printed Circuit Boards, all P/C boards plug-in removable.

Three Phase Models Available up to 15KVA

ACDCo. inverters are used in one of the roughest of Marine Environments on the U.S. Coast Guard's Rescue Life Boats to power their Navigation and Communication equipment.
ACDCo. has versions of power equipment available to meet military specifications.
ACDCo. static inverters are used by major Public Utility companies throughout the United States.

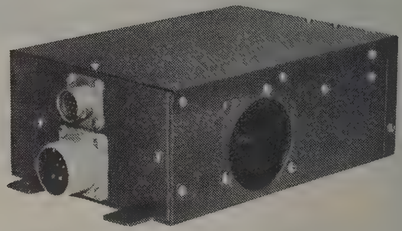
GSA LISTED!



Lightweight 50, 60, 400 Hz Static Inverters/Frequency Converters for Aerospace, Military, Commercial

- *50 VA-42 KVA*
- *Less than 10 lbs/KVA*
- *Parallelable*
- *Single phase or three phase*
- *50-60-400 Hz configurations*
- *Custom design capability*
- *High efficiency 80% typical*
- *300 microsecond dynamic load response*
- *No spikes—no surges*
- *Sinewave distortion 0.75% typical*
- *Meets military standards for severe hostile environments*

AVIONIC INSTRUMENTS INC. (AI^2) Power Conversion products feature an advanced power processing technique that virtually eliminates the limitations inherent in traditional power conversion designs.

These advanced designs include a high frequency DC to DC converter/regulator and a three-state (bridge) inverter regulator. The sinusoidal output voltage is achieved from the bridge section through use of a spectrum controlled modulation system utilizing advanced switching circuitry. Heavy baseband magnetic components are eliminated resulting in an extremely lightweight, efficient, and high reliable inverter design.

Each section of this advanced design utilizes a patented, current controlled, closed loop system which is inherently stable, providing excellent steady state and dynamic response characteristics evidenced by no output voltage excursions outside the regulation band under any conditions of load application and removal. This includes non-linear loads such as half wave recitifiers. Protection circuitry includes input over/under voltage, overtemperature, output overvoltage and over/under frequency shutdown as well as 200 percent of rated current under short circuit conditions.

Avionic's modular design allows interconnection of units for increased power output and for multi-phase systems. Reliable custom designed units for non-standard frequencies and voltages are made easy by Avionic's two-stage design.

General Performance Specifications

(Consult factory for exact data on specific models)

Input Voltage
Static Inverters:
28VDC ±10V.
48 VDC Option Available
Frequency Converters:
115/200 VAC ±10%, 400 Hz.

Output Power
50VA to 42kVA.

Output Voltage
115 or 230 VAC RMS ±1%, 1Ø.
26VAC optional secondary output.
115/200VAC wye RMS ±1%, 30.

Output Frequency
50/60/400Hz ±1.0% for all conditions of line, load, and temperature.

Waveshape
Sinewave 0.75% THD, typical.
Less than 0.1VDC component per MIL STD 704C.

Efficiency
80% typical at full rated output.

Overload
110% rated output for 2 hours.
150% load current for 5 minutes, nominal conditions per TSO-C73.

Short Circuit Current
200% for five minutes minimum.

Power Factor
0.7 lead to 0.7 lag.
Not damaged by any power factor.

Protection
Cannot be damaged by any short circuit.
Input under/over voltage.
Output overvoltage.
Output under/over frequency.
Thermal overheat.
Reverse polarity.
Fault indicator.

Qualifications
FAA TSO-C73.
RTCA DO-160A
Cat.F2B/RTY/EXXXFXXZAZZ.
MIL-STD-810

Environmental
RTCA DO-160A for severe, hostile environments.

Altitude
55,000 feet, operating.

EMI
RTCA DO-160A Cat. Z for conducted, radiated and susceptibility.

Temperature Range
–55°C to +71°C, operating.
–65°C to +85°C, storage and shipment.

Vibration
10g's; 5Hz-2000Hz.

Shock
15g's; each axis.

Humidity
95%, 10 days; 71°C.

Explosion
DO-160A Cat. E.

Salt Spray
DO-160A Cat. S.

Sand and Dust
DO-160A Cat. D.

Fungus
DO-160A Cat. F.

Quality Assurance
MIL-I-45208A
MILQ-9858A upgrade in process
ISO-9000 (Pending)

Static Inverter
1C 1000-(   )
21.5 lbs.
12.60"L x 7.52"W x 7.65"H

Specifications

Input Voltage
28VDC ± 10VDC.

Output Voltage
115VAC ± 5VAC.

Output Frequency
400Hz ± 5Hz.
50, 60 Hz available.

Output Power
1000VA.

Overload
1500VA linear load, 5 minutes.

Distortion
5% THD maximum.
1.5% THD typical.

Efficiency
82% minimum at full load.

Power Factor
0.8 lag to 0.9 lead.
Not damaged by any power factor.

Temperature Range
–55°C to +71°C.

Short Circuit Current
25 Amps minimum.

Qualified for use on the following Boeing Aircraft:

737	757
747-400	767

Consult AI2 for details on retrofit program

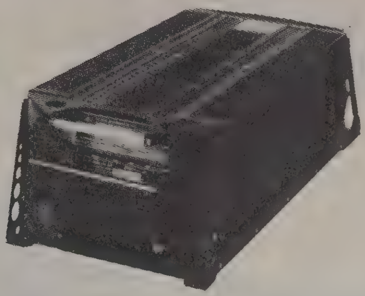
Static Inverter
1C 2500-(   )
32 lbs.
20.4"L x 9.0"W x 6.0"H



***Qualified for use on Army Shelter Applications requiring 7500VA Three phase or single phase.**

Features

- Military Components
- Overvoltage Protection
- Fault Bit
- 25ms Turn On
- Lightning Protection

Specifications

Input Voltage
28VDC ± 10VDC.

Output Voltage
115VAC ± 2.3VAC.
Single phase.

Output Power
2400VA continuous (MD-11).
2500VA continuous (Std Product).

Overload
3000VA for 5 minutes.

Output Frequency
400Hz ± 4Hz.
50, 60 Hz available.

Distortion
3% THD. maximum at full load.

Efficiency
75% minimum at full load
and input voltage > 21VDC.

Power Factor
0.8 lag to 0.9 lead.
Not damaged by any power factor.

Temperature Range
–55°C to +71°C.

Short Circuit Current
44 Amps minimum.

AI2 developed the model 4B3500-1A frequency converter for the USAF C-17A airlifter (NSN pending). The converter provides 60Hz power for critical medical emergency equipment. At 43 lbs., the converter is the lightest in its class. Mechanical and electrical interfaces were optimized in order to achieve a direct replacement for existing government stock equipment (NSN 6130-00-421-5314).

Direct NSN Replacement:

Model 4B2000-1A is a direct replacement for NSN 6130-01-035-9254.
Model 4B3500-1A is a direct replacement for NSN 6130-00-421-5314.

Protection

- Input under/overvoltage
- Output overvoltage
- Output over/under frequency
- Loss of phase
- Thermal overheat
- Input circuit breaker

Features

- Current mode control
- Low input harmonics
- Internal fan cooling
- 300 µS response
- ARINC or baseplate mounting
- Three phase, parallel capability.

Data shown below represents typical performance. Consult the factory for exact data.

Model No.	Output Voltage (RMS)	Output Current (Amps)	Output Frequency (Hz)	Input Current (Amps/phase)		Short Circuit Current (Amps)	Efficiency (%) @ Full Load	Weight (lbs.)	Multiple Unit Capability		
				No Load	Full Load				Parallel*	Three Phase**	Phase Synch. ***

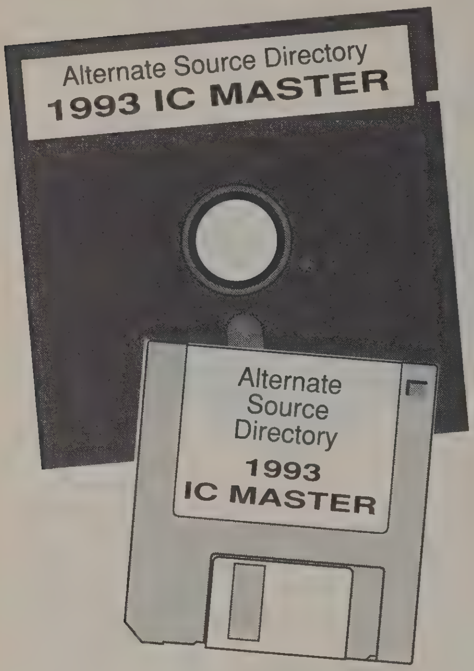
Hearst Engineering Software

ICMASD

Alternate Source Directory



The all new 1993 ICMASD-IC Alternate Source Directory on Disk is identical to the Alternate Source Directory Section contained in Volume Two of the printed version of the 1993 IC Master. All you need is an IBM XT/AT or 100% compatible personal computer with hard drive.

ICMASD is the most comprehensive and reliable guide available to all ICs known to have a realistic replacement or alternative. The 1993 version contains over 106,000 listings to help you find the functional equivalents for both current and discontinued parts.

The electronic ICMASD is fast, convenient...and can be customized for your specific needs!

ENHANCED FLEXIBILITY

ICMASD is organized in a similar fashion to the printed version in the IC MASTER. The database is arranged by manufacturer, showing the manufacturer's original basic part number. All known replacements for that part are listed in alphanumeric order.

The enhanced flexibility of the electronic ICMASD allows you to add comments, up to 19 digits long, to any device listing in the system. These comments can be part numbers, project notes, prices, or any information unique to your application.

USER FRIENDLY

ICMASD is very user friendly. There are no tricky commands to learn. The software is completely menu driven. ICMASD comes complete with documentation that is brief and to the point. It can be ordered on five 51/4" double-sided, double-density disks OR on one 51/4" high-density disk OR on one 31/2" high-density disk.

Published annually in March

FAST AND CONVENIENT

ICMASD includes a complete Manufacturers & Distributors Directory listing the addresses and phone numbers of every manufacturer in the IC industry. With this complete directory any manufacturer or distributor is just a phone call away.

To order your 1993 ICMASD, contact your local IC MASTER distributor or, send your purchase order and check for $179.50 plus tax* to:

Marie Botta
Hearst Business Publishing

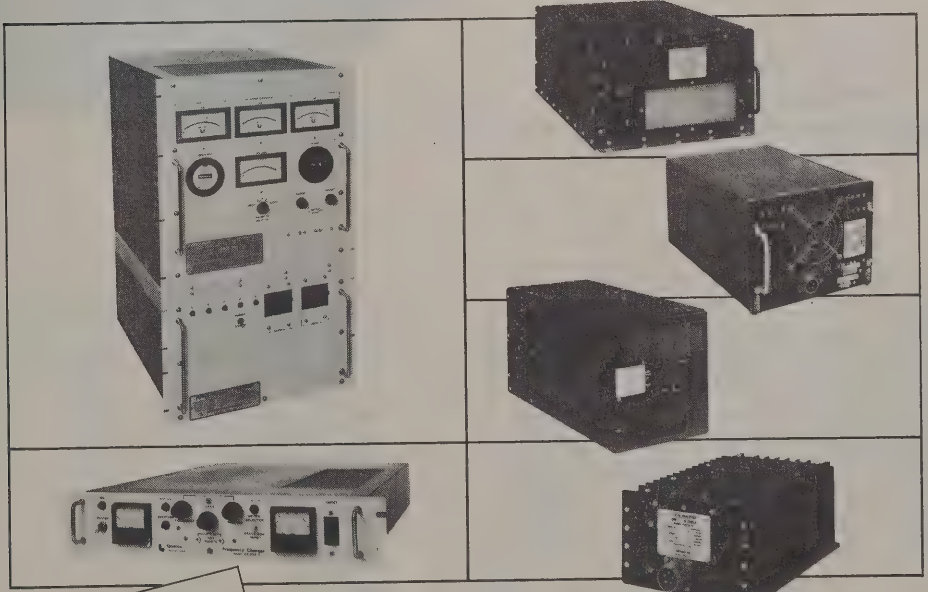
Frequency Converters

Beginning in 1960, Unitron, Incorporated has concentrated on the design and development of solid-state frequency conversion equipment. This single point concentration has resulted in Unitron becoming the supplier of one of the largest variety of 50/60 Hz to 400 Hz and 400 Hz to 50/60 Hz converters to both the defense aerospace and industrial markets. We invite your inquiries.

PS Series	400 Hz to 50/60 Hz	1.25 kVA to 15.0 kVA
CR Series	50/60 Hz to 400 Hz	7.5 kVA to 15 kVA
GFC Series	50/60 Hz to 400 Hz	15 kVA to 360 kVA



NOW AVAILABLE!
Ultra-lightweight highly efficient mobile power carts for support of aircraft in maintenance hangars and on ramps.

AVTEL

FREQUENCY CONVERTERS
1.25 TO 15.0 KVA SINE WAVE
400 Hz to 50/60* Hz

Unitron

Unitron, the leader in ac power supplies for the medical evacuation industry, now offers new, lightweight 400 Hz to 50/60 Hz frequency converters for airborne, shipboard, shelter & ground power environments.

Unitron, with over 18,000,000 hours of field proven experience now provides its new **PS–92 SERIES** converters. This new series incorporates the latest state–of–the–art technology to meet the low input current distortion demands of Boeing and McDonnell Douglas aircraft in a small, lightweight package.

General Specifications :

Input

Voltage : 115/200V RMS ± 10%
Frequency : 400 Hz ± 10%
Current Distortion : < 5%
Power Factor : > .98

Output

Voltage : 115V ± 1%
Frequency : 60 Hz ± 0.01%
Harmonic Distortion : 1% typical; 5% max for non–linear loads
Power Factor : 0.5 lag to 0.5 lead

Other

Efficiency : 85% minimum
Temperature : –55° C TO +70° C
Vibration : RTCA/DO–160C, Section 8
Shock : RTCA/DO–160C, Section 7
RFI : RTCA/DO–160C, Section 20

BL SERIES

AC POWER SOURCE

- 1350 VA in a 3½" chassis under 40 pounds

6.00
BEHLMAN

FEATURES

- Stackable for additional power and/or 3 phase output.
- Unique overload protection prevents output distortion.
- Remote DC programming for voltage and frequency.
- True RMS readout of voltage and current.
- Low cost without compromising features or performance.

APPLICATIONS

- Aerospace
- Motor Generator Replacements
- Power Supply Testing
- General Laboratory Support
- Motor Testing
- Transformer Testing
- Magnetics Testing
- Military System Diagnostics
- Missile Testing
- Electromechanical Testing
- Ground Support
- QC/QA, Reliability Testing

ORDERING INFORMATION

MODEL #	INPUT VOLTAGE	OUTPUT VOLTAGE	POWER
BL1350A-1	115V	0-135V	1350VA
BL1350B-1	115V	0-135V 0-270V	1350VA
BL1350B-2	115V	0-135V 0-34V	1350VA
BL1350C-1	115/230V	0-135V	1350VA
BL1350C-2	115/230V	0-135V 0-270V	1350VA
BL1350C-3	115/230V	0-135V 0-34V	1350VA

NOTES:
1. All models have isolated outputs except BL1350A, BL1350B.

OPTIONS

A Safety Sockets
I IEEE 488 Interface
S Slides

SPECIFICATIONS

INPUT

Voltage: 115V or 115/230V, ±10%, single phase.
Frequency: 47-440Hz.

OUTPUT

Voltage: See ordering information.
Maximum Power: 1350 VA
Current Crest Factor: 3:1.
Distortion: 0.5% Maximum THD Typical.
Efficiency: 80% Typical.
Frequency: 45-500Hz (Optional 45-1000Hz).
Maximum Current: 30 Amps 0-34V Range; 10 Amps 0-135V Range; 5 Amps 0-270V Range.
Line Regulation: ±0.1% for ±10% Line change.
Load Regulation: ±0.7% No Load to Full Load.
Power Factor: 100% of rated output into any power factor load.

PROTECTIVE CIRCUITS

Input Protection: Fast acting main circuit breaker.
Constant Current Mode: Overload causes voltage foldback to provide maximum current without distorting output waveform.
Thermal Protection: Internal temperature sensor.
Short Circuit Protection: Electronically latches output open.

CONTROL INPUTS

Voltage/Frequency: 0-10 volts DC programming—voltage/frequency.
External Sync: Synchronizes AC output with external input.

FRONT PANEL DISPLAY

Digital readout (3½ digits)–True RMS voltage/ currents, frequency.

MECHANICAL SPECIFICATIONS

Dimensions: High strength 19" rack mounted chassis, 3.5" high by 22" deep.
Weight: BL1350A-1–40 lbs. Other BL1350 models under 55 lbs.
Operating Temperature: 0 to 55°C.

MOTOR TESTER BL1350 MT

Motor friendly design offers the ability to drive motors with pure sinewaves, even during startup. Running currents are 14 Amps (the foldback current limit is set at 15 Amps) at a 50% duty cycle. Capable of starting motors which normally require 140 Amp locked rotor starting currents.

The BL1350 MT offers a "Soft Start" by folding back voltage and slowly increasing it as the motor starts to accelerate. "Soft Start" eliminates the need for high input current service, as well as the need to restrain the motor during production testing.

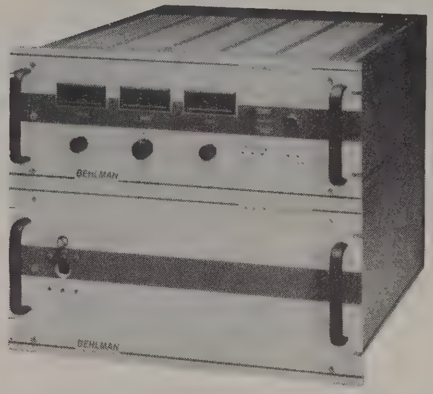
BL SERIES 10000/20000
AC POWER SOURCE



FEATURES

- Compact and rack mountable, 67% smaller than competitive units.
- Low cost per VA.
- Configurable in either single or three phases.
- Computer controlled waveform switching delivers smooth, efficient power.
- Multi pulse input transformer offers low harmonic distortion.
- Available with an IEEE488/RS232 interface.
- Lab Windows compatible.

APPLICATIONS

- Aerospace
- Motor Generator Replacements
- Power Supply Testing
- General Laboratory Support
- Motor Testing
- Transformer Testing
- Magnetics Testing
- Military System Diagnostics
- Missile Testing
- Electromechanical Testing
- Ground Support

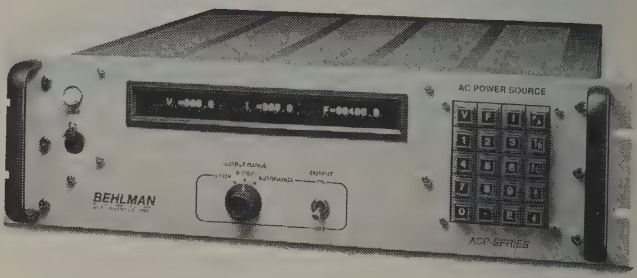
ACP SERIES 250VA to 9kVA
AC POWER SOURCE



FEATURES
- Extended frequency and low voltage ranges.
- 200% peak short-term current capability.
- Computer interface reduces ATE system complexity.
- Microcomputer-based crystal referenced, synthesized sinewave.
- Built-in measurement system reduces support equipment.
- Very low EMI/RFI Linear Power Amplifier.
- Smaller, lighter–saves rack space.
- Complete input and output transformer isolation.

APPLICATIONS
- MIL-STD-704 testing
- Military systems
- EMI/RFI test systems
- Aerospace systems testing
- Power supply testing
- Acceptance testing
- Motor testing

PROGRAMMABILITY
- IEEE-488
- Output voltage and frequency
- Output phase angle on three-phase models
- Current limit
- Transient and MIL-STD-704 Testing

OUTPUT MEASUREMENTS
- Voltage, Average responding (TRMS optional)
- Current, Average responding (TRMS optional)
- True power, Watts (optional)
- Power factor (optional)
- Frequency

GPIB PROGRAMMABLE SINGLE AND THREE PHASE

Behlman's ACP Series precision AC power source is designed for wide usage in ATE systems, laboratories, production lines, test facilities, and many other applications. They are small in size and weight, increasing ease of handling and minimizing valuable rack space required.

Used in various computer controlled applications, Behlman's ACP Series AC power source provides truly independent and simultaneous output measurements while tests are in progress. This makes testing easier and faster because expensive voltmeters, ammeters, frequency counters or power meters are eliminated.

Built in MIL-STD-704D tests and a new Front Panel Controlled Transient Generator make the ACP the right choice for all types of product testing.

Programming is accomplished by the front panel keyboard or the IEEE-488 host interface computer, allowing for incrementing and decrementing of the output values with user definable resolution. On command, measurements are reported over the computer interface and the front panel, easy-to-read, display.

ACP SERIES TECHNICAL SPECIFICATIONS

GENERAL: Specifications subject to change without notice. Below are standard models. Optional models are available to 50 kVA.

MODEL NO.	TOTAL POWER (VA) OUTPUT[2]	CURRENT OUTPUT[3]		WEIGHT (LBS)	DIMENSIONS	NO. OF RACK MNT. CHASSIS

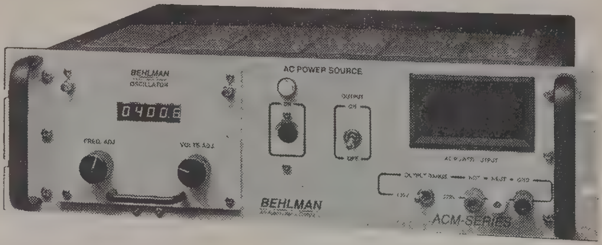
ACM SERIES 100VA to 9kVA
AC POWER SOURCE



FEATURES

- Very low EMI/RFI Linear Power Amplifier.
- Smaller, lighter–saves rack space.
- Tight regulation, low distortion.
- Overload protection with instantaneous recovery.
- Complete input/output transformer isolation.
- 0.01% frequency accuracy.
- 200% peak short-term current capability.
- Extended frequency ranges.

APPLICATIONS

- Motor generator replacements
- Power supply testing
- Relay testing
- Avionics and missile test systems
- General laboratory support
- Motor testing
- Transformer testing
- Military test systems
- Automatic test equipment
- Acceptance testing
- Airborne, marine, ground support

MANUAL CONTROL
SINGLE AND THREE PHASE

Behlman's ACM Series AC power source is a uniquely efficient linear power amplifier driven by plug-in oscillators, or an external synchronization source. These units are used in a wide variety of applications such as calibration facilities, laboratories, production lines and other test requirements where manually controlled AC power is required.

Incorporating an entirely unique design concept in linear power amplifiers, Behlman's units greatly increase stability into low power factor loads while reducing circuit complexity. This design is combined with advanced magnetics reducing size and weight, saving in valuable rack space and easing equipment handling.

The ACM Series is unparalleled, generating virtually no EMI/RFI emission, either conducted or radiated. To further decrease electronic noise and increase flexibility, both the input and output are coupled by isolation transformers. The output can be left floating or one side grounded. Complete overload, short circuit protection is provided by a combination of instantaneous automatic recovery circuitry and fast acting circuit breaker.

The ACM Series front panel is well organized with easily accessible control and digital readout on variable frequency models.

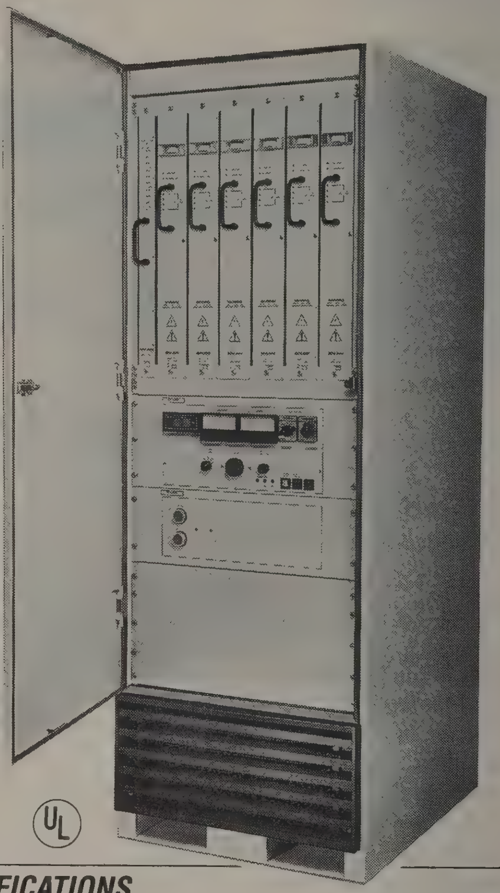
PA SERIES UP to 120kVA FREQUENCY CONVERTER



FEATURES

- Lowers operational cost. High efficiency of 88-90%.
- Small footprint saves up to 50% over the space of competitive units.
- Soft-start ramp-up eliminates input power line surges and the need for oversized utility service.
- Low input distortion using 36-phase rectification per MIL-STD-1399, Section 300.
- Self-diagnostics and module level replacement of electronics allow rapid and easy servicing.
- Redundant power circuits allow system operation in case of individual power device failure.
- Easy installation, no special connections.
- Workplace compatible with low audible noise.
- Expandable models using plug-in modules eliminate obsolescence.
- Precision output provides precisely controlled power into extremely complex loads.
- Very cost effective at all VA levels.
- Input isolation provided by power transformers.
- Versatile voltage ratings offer wide range of input and output combinations in Wye or Delta configurations.
- Optional IEEE-488 interface allows user control and monitoring for remote applications.

APPLICATIONS

- Automatic test equipment.
- Computer programmable power.
- Facilities power.
- Avionics support testing.
- Motor generator replacements.
- 50Hz power requirements.
- 400Hz military power.
- Variable frequency testing, 45 to 500 Hz.
- Flightline power.
- Electronic product burn-in and testing.
- Dock-side marine power.
- International power requirements.

ORDERING INFORMATION

MODEL #	INPUT	OUTPUT
PA3111	20 kVA	1Ø Expandable to 40 kVA
PA3131	20 kVA	1Ø Expandable to 60 kVA 3Ø
PA3311	60 kVA	3Ø
PA6331	60 kVA	3Ø Expandable to 120 kVA 3Ø
PA6631	100 kVA	3Ø

SPECIFICATIONS

INPUT	
Voltage:	All models are provided with a multi-tapped input transformer which accommodates most forms of 3-phase power (Specify when ordering).
Frequency:	47-440 Hz.
Current Distortion:	per MIL-STD-1399, Section 300.
Power Factor:	0.98 Typical.
Soft-Start	Limits input surge currents on start-up.
Efficiency:	Typically 88-90%.
OUTPUT	
Power:	Single and Three-Phase through 120kVA.
Voltage:	Adjustable from 0 to140VAC L-N. Configurable in Wye or Delta outputs. Higher voltages are also standard.
Load Regulation Adjustment:	0 to +10%.
Frequency:	Fixed or variable frequencies from 45 to 2500Hz.
Repetitive Peak: Rating:	250% of nominal at 60Hz. 200% of nominal at 400Hz.
Distortion:	2% THD at 60Hz. 4% THD at 400Hz.
Phase Separation:	120 degrees ±1 degree.
Load Imbalance:	100% load imbalance acceptable.
MECHANICAL	
Dimensions:	77"H x 26.5"W x 33.5"D. Incorporates fork lift base.
Weight:	1600 to 1800 lbs., depending on model.

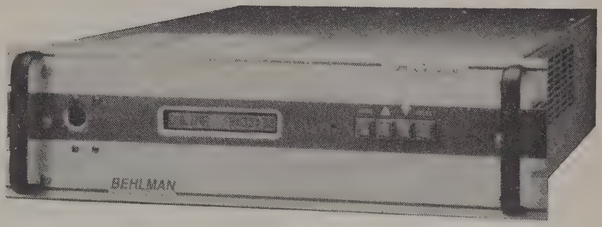
HBL SERIES
1.5kVA to 5kVA UPS
UNINTERRUPTABLE POWER SUPPLY



FEATURES

- Rugged, instrument quality, rack mountable.
- True on-line UPS.
- Delivers high quality sine wave with very low distortion.
- Multiparameter display provides power status.
- High peak current to drive switching power supplies.
- Event recording via optional IEEE488/RS232 interface.
- Windows, Lab Windows and Novell compatible.

FRONT PANEL DISPLAY

Any of the following parameters can be selected for front panel display by the control buttons.

- Time-of-day
- Date
- Status indications
- Time-of-failure
- Voltage
- Current
- Battery Status
- Duration-of-failure

APPLICATIONS

- Mobile communications
- Transportable shelters
- Process control
- ATE consoles
- Laboratory instrumentation
- Factory automation
- Remote facility/site
- Telecommunications
- Militarized versions available

DIMENSIONS

MODEL #	OUTPUT VA	INCHES		
		HEIGHT	DEPTH	WIDTH
HBL1500	1500	5¼	24	19
HBL 3000	3000	8¾	24	19
HBL 5000	5000	8¾	24	19

RUGGED, INSTRUMENT QUALITY UPS PROTECTS SENSITIVE EQUIPMENT.

Behlman's new HBL Series is a true on-line UPS that continuously conditions incoming power, providing a high quality sine wave with very low distortion. In the event of a power loss, batteries provide up to 20 minutes of power for an orderly shutdown.

This rugged UPS continuously monitors and stores power data, including: time-of-day and date, status indications, time-of-failure, duration-of-failure, battery status, voltage and current. Events can be front panel display or communicated to a computer via a built IEEE488/RS232 interface. The HBL is also Windows, LAB Windows and Novell software compatible.

This rugged, compact, rack mounted unit is ideal for process control, ATE, industrial computers, scientific instrumentation, telecommunications equipment and other power sensitive devices.

SPECIFICATIONS

INPUT

Input: 120 Vac ± 10%, 50 or 60 Hz 1Ø.
230 Vac ±10%, 50 or 60 Hz 1Ø.
Power Factor: 0.75 Nominal.
In-rush Current: Limited to nominal input current.

OUTPUT

System Output: True on-line sinewave output.
Load Regulation ±1% no load to full rated load.
Distortion: 2-4% THD.
Frequency: Locked to input line or free running.
Line Synchronization: ±3 Hz.
Lock Range: ±5 Hz with 1% increase in output distortion.
Frequency Regulation: ±0.1 Hz during line loss or free running.
Load Power Factor: 100% of rated output into any power factor load.
Current Crest Factor: 3:1.
Overload Capacity: 110% of nominal rating.
Efficiency (AC to AC): 85% at full rated resistive load with fully charged batteries.

BATTERY CHARACTERISTICS

Type: Sealed, maintenance free lead-acid.

COMMUNICATION/CONTROL

IEEE/RS232 two way communication, status of power parameters (see Front Panel Display).
Novell Compatible (software available)

California Instruments

L SERIES – A NEW GENERATION OF AC POWER PRODUCTS

The L Series is the most compact and versatile series of AC Power Sources in the testing industry.

California Instruments offers:

- Model 751L; 850VA, 1Ø
- Model 1501L; 1650VA, 1Ø, 5 1/4 In. Ht.
- Model 1503L; 550VA/Ø, 3Ø, 5 1/4 In. Ht.
- Model 4500L; 1650VA/Ø, 3Ø or 5000VA 1Ø, 10 1/2 In. Ht.
- Parallel capability up to 27,000VA, 1Ø or 3Ø

The built-in Manual Controller has Frequency and Amplitude adjustment plus range and single or three-phase switch control.

The built-in Programmable Controller has programming and measurement capability of voltage, current, power, phase angle, frequency and current limit. It also has the added feature of being able to ramp the programmable functions. (See controller information below)

Exclusive Features:

Full Output Volts-Amps, Zero to Unity Power Factor

Simple Calibration
- Cover on, via GPIB or Keypad

Smallest front panel height per power level
- Save up to 50% Rack Space

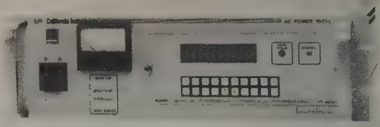
Greater than 80% efficient
- Much less heat dissipated

Versatility for Your Applications
- 5000VA Models can be programmed for 1Ø or 3Ø outputs

Crest Factor of 2.5
- Drive off-line switchers

Programmable dropout feature
- Test for ride-through

16 Linking Memory Registers for *any* Test Sequence
- User designed test sequences in non-volatile memory



Additional Features:

- Automatic firmware calibration
- Complete self test with module status (programmable controller).
- Display/Bus reporting of load parameters:
  - Volts RMS
  - Frequency
  - VA
  - Amps RMS
  - Phase Angles
  - Power Factor
  - Watts
- 26V regulated, 5V unregulated output option (not all models)
- MIL-STD-704D AC test option
- Output Relay standard all units (except 751L)
- Output voltage 135V/270V standard. Optional ranges available from 67.5V to 400V.

CONTROL RELATED SYSTEM SPECIFICATIONS

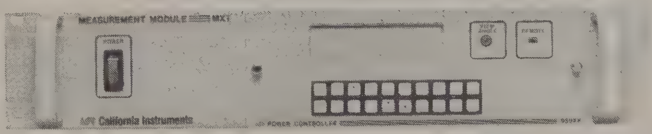
LDS SERIES

LINE DISTURBANCE SIMULATION

Programmable AC Power to simulate power line dropouts, spikes, sags and distortion.

LDS Series will consist of:
- Model 959XPT Controller
  Model MXT10 Interface Module
  Any California Instruments Model T Series
  AC Power Amplifier
- Self-contained in L Series Models

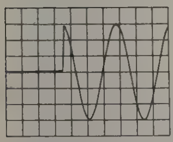
Features:
- Full IEEE-488 Listener/Talker
- 16 Linking Memory Registers
- Variable Speed Up/Dn Keys
- Bus or Keypad calibration



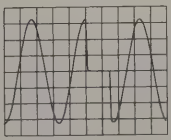
The MXT10 provides California Instruments T & XP Series AC Power Amplifiers and many competitive model AC power amplifiers with the capability to program and measure output parameters, including current limit.

Program to control, display and report RMS Volts and Amps, Watts, VA, Pf, Phase Angles and Frequency. Can be used from 100VA to 36kVA in single and multiple phase configurations.

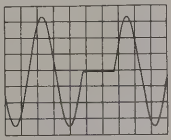
IEEE-488 or Front Panel Keyboard control to program Line Distortion Simulations like those shown below...or specify your particular line distortion.



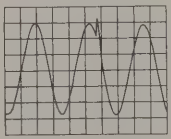
Programmable start



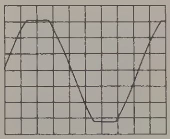
½ cycle dropouts



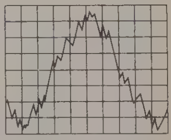
10 ms dropout at 0° (or any angle)



2 ms surge (at any angle)



Programmed distortion (0-20%)



Custom waveshape to customer requirement

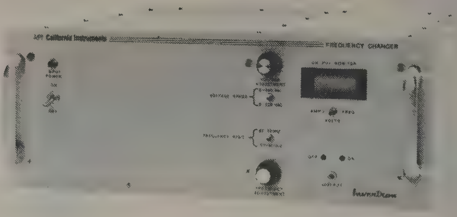
AC POWER SYSTEMS
Model 1201WP
WORLD AC POWER AT YOUR FINGERTIPS



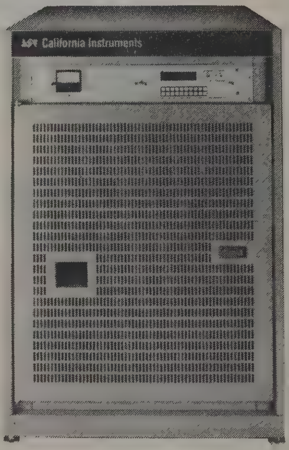
Features:
- Test for Worldwide Power Requirements
- Simple to Operate
- Fault Protected
- Portable
- Eliminate Exhibition Power Conflicts

Provides a low cost, convenient source of international power for testing products which are exported to countries with different voltage and frequency requirements than those at the manufacturing site.

Output voltage is adjustable from 5 to 260 volts at frequencies of 47Hz to 500Hz.

Specifications:
- **Output Voltage**
  5 to 130VAC
  5 to 260VAC
  (Switch selected)
- **Output Frequency**
  47Hz to 150Hz
  150Hz to 500Hz
  (Switch selected)
- **Output Current (RMS)**
  1200VA/Output Voltage
  9.2A RMS max. 130V Range
  4.6A RMS max. 260V Range
- **Peak Repetitive Output Current**
  23A, 130V Range
- **Power Factor**
  0 to 1 Pf at full output voltage and current
- **Input Voltage:**
  115 or 230VAC (±10%)
- **Input Frequency**
  45Hz to 440Hz
- **Efficiency**
  75%
- **Monitor Accuracy**
  0.25%
- **EMI**
  Meets FCC Part 15, Class A
- **Weight**
  55 lbs. (22.8Kg)
- **Dimensions**
  7"H x 19"W x 17"D
  (17.8cm) x (48.3cm) x (43.2cm)

PRECISION MODULAR AC POWER SYSTEMS FCS SERIES
18KVA to 54KVA; 45Hz to 1KHz



Features:
- 1-Phase, 3-Phase Operation, Switchable
- Remote Sense for High Voltage Accuracy
- Parallel Capability for Higher Power
- Automatic Shutdown Protection
- 135V Full Scale Range, Optional to 312V
- Measurement Functions with Programmable Controller
- 16 Storage Registers, Calibration and Sync Output with Programmable Controller
- Analog Input available with Manual Controller

The new FCS Series modular design for high-power systems range from 18kVA to 54kVA. This series is specifically engineered to provide precision power where rotary and frequency converters cannot maintain accuracies suitable for testing precision equipment. Individual 6kVA modules are front panel loaded and can be taken off-line in case of failure. The system can continue to operate with reduced output power.

The FCS Series is available in two configurations; 1) a fully computer-controlled system with complete measurement capability, and 2) a lower-cost unit which is manually controlled, designed primarily where fixed 50Hz, 60Hz or 400Hz power is required.

With -704D Option, the FCS Series AC Power System can perform all the MIL-STD-704D AC power tests on command for full production line testing capability.

All Programmable Controllers include automatic remote calibration. Calibration is via firmware control from the front panel.

Cabinet is fitted with casters for mobility and includes forklift high-strength pads.

Size: 30"W x 36"D x 45"H
(6.2 cm) x (91.4cm) x (114.3cm)
Weight: 750 lb. (341.7Kg)

UNINTERRUPTIBLE POWER SYSTEMS LT SERIES - MD SERIES - HV SERIES

Uninterruptible Power Systems by Controlled Power Company provide 100% power protection for mission critical computer applications. These applications are LAN systems, massive WAN systems, midrange and mainframe computers, all of which have become a focal point of operations. Each of these systems require hardware protection from power line disturbances. Managers of these systems must protect valuable data from utility power loss.

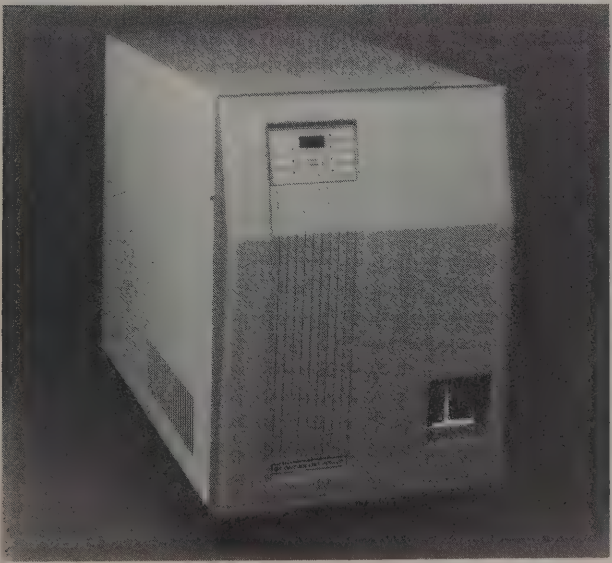
Controlled Power company offers a wide range of power expandable sizes. Each product size has been designed for compatibility and ease of installation with today's computer systems and their environments. Future computer system growth is accommodated through easily installed hardware and software option upgrades.

Controlled Power Company ... Solutions for electrical power problems since 1968.

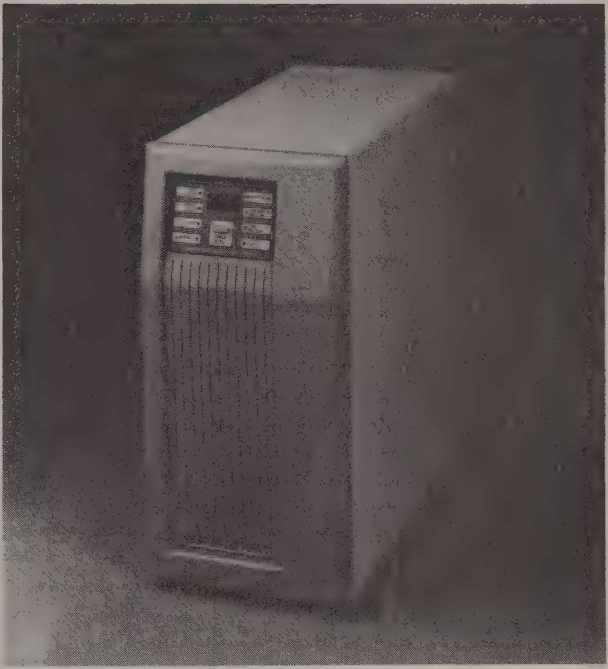
SPECIFICATIONS

- **Power Output**
  Rated for computer type loads with switch mode power supplies that represent power factor of 0.7

  LT Series - 700 VA to 2.1 KVA,
  MD Series - 3.1 KVA to 7.5 KVA
  HV Series - 7.5 KVA to 25 KVA
- **Line voltage regulation**
  Output voltage ±3% with input voltage from 0% to +110% of nominal. Uses "Fuzzy Ranging" to optimize usable input line voltage without use of battery power. Range without battery consumption to 61% of nominal input voltage. Fuzzy Ranging saves valuable battery back-up and improves battery life.
- **Load regulation**
  Output voltage ±3% when output is taken from no load to full load
- **Combined line and load regulation**
  Meets Computer Business Equipment Manufacturer's Association (CBEMA) standards under any line or load condition
- **Response to Non-linear loading**
  K factor rated - K 30 or better



POWER SALES NETWORK
1-800-521-4792
POWER INFORMATION CENTER
1-800-642-9624 FAX 1-800-642-9625



- **Lightning and surge protection**
  Exceeds lightning and surge protection tests established by ANSI/IEEE C62.42-45 with more than 3000:1 attenuation
- **Common-mode noise attention:** 120 dB
- **Transverse-mode noise attenuation:** 70 dB
- **Power factor**
  Self correcting to > .95 (approaching unity), meets FAA-G-201e power factor specifications
- **Harmonic attenuation**
  Load generated harmonics are attenuated 400% at the input
- **Communications Interface**
  Status and alarm RS/232 port used for data protection and automatic unattended shutdown. Full duplex ASCII, RS/232 serial port available for remote system status monitoring and customer programming of system operating conditions.
- **Input/Output Voltage**
  LT & MD Series - Input Voltage 120/208/240 VAC at 60 HZ, 220 VAC at 50 HZ. Output voltage 120 or 120/208 or 120/240 VAC at 60 HZ. 220 or 110/220 at 50 HZ

  HV Series - Input Voltage 208/240 VAC at 60 HZ, 220 VAC at 50 HZ. Output Voltage 120/208 and 120/240 at 60 HZ. 220/110 at 50 HZ.
- **Reliability MTBF**
  Total system - 100,000 hours MIL Spec standard 217E
  Transformer - 200,000 hours
  Battery - 5 year projected life, 10 year available
- **Operating temperature**
  0 to 40 degrees celsius
- **Safety**
  UL listed 1778 standard for UPS equipment, CSA certified

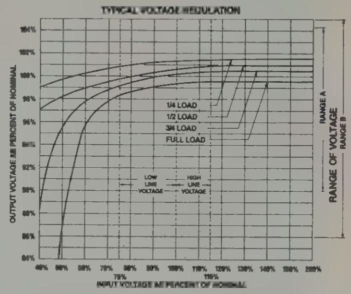
SERIES 800 POWER PURIFICATION SYSTEMS

Series 800 Power Purification Systems protect sensitive electronic equipment loads from extremely unstable, highly distorted electrical power. This enhanced ferroresonant transformer design automatically regulates and conditions raw utility power, even in the harshest industrial environments where heavy equipment loads constantly interfere with your building's electrical system. This highly reliable product line is ideal for applications where computerized control systems are integrated into the industrial environment.

SPECIFICATIONS



- **Line voltage regulation**
  Series 800 regulation performance is superior to any other ferroresonant product available in today's market. The voltage regulation graph illustrates typical operating characteristics of our design.
- **Protection against extreme voltage fluctuations**
  The Series 800 will protect equipment when voltage drops to 50% of nominal or rises to 200% of nominal. Over this range, with the system loaded approximately 75%, the output voltage will be regulated to within usable limits.
- **Unique ride through capability**
  The output of the Series 800 does not go to zero with the loss of input power for a 1/4 cycle (4msec), a 1/2 cycle (8.3msec) or even for a complete cycle (16.6msec), depending on the percentage of load.
- **Immunity to distortion of input sinewave**
  With input voltage harmonic distortion content of 0% to 40% (THD), the output voltage contains a maximum harmonic content of 4%.
- **Load regulation**
  -2.5% maximum from no load to full load.
- **Electrical isolation**
  Primary windings are fully isolated from secondary windings, newly derived neutral on secondary is grounded to enclosure chassis and grounding terminal.
- **Common-mode noise attenuation:** 140db
- **Transverse-mode noise attenuation:** 120db
- **Reliability**
  All passive component electronic construction, MTBF- 200,000 Hrs.
- **Efficiency**
  90% at full load, decreasing slightly as load decreases.
- **Operating temperature**
  -20 degrees C to +40 degrees C
- **Enclosure**
  NEMA type 1, industrial
- **Safety**
  UL 1012 listed standard for power supplies

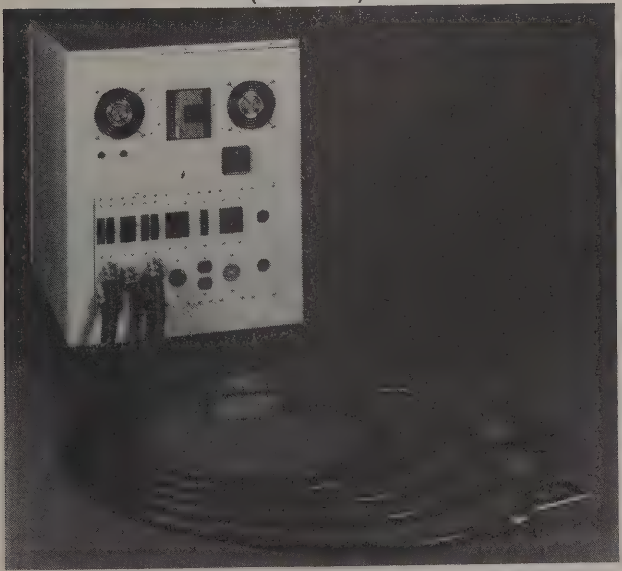
SERIES 700A POWER LINE CONDITIONER
Now available with K factor rating

Series 700A Power Line Conditioners protect sensitive electronic equipment loads from electrical utility AC power line disturbances. These compact, highly efficient models correct for power surges and sags by automatically regulating output voltage to within ±5.5% quickly and completely within one AC cycle... even when the raw utility sinewave fluctuates +10% to -40%. For protection against transient noise impulses, units include a multi-shielded Max-E-Isolation Transformer with primary transient voltage suppression and secondary mounted electronic noise filter circuits. The 700A is available in single and three phase sizes. Units can be configured with output branch circuit distribution and other value added options that increase overall cost effectiveness to install and operate.

kVa	Phase	Output Distribution	Cabinet Dimensions
5, 8 10,15,20 25	Single	Patch Panels	21.5"W x 29"D x 30"H
6,10,15	Three	Patch Panels	21.5"W x 29"D x 30"H
25, 30	Three	Patch Panels	21.5"W x 29"D x 44"H
45, 50 75, 100 125, 150	Three	Hard Wired	45"W x 29"d x 44"H
225, 300, 500	Three	Hard Wired	56"W x 41.5"D x 77"H

Input voltages available are: 208, 240, 480, 600
Output voltage for single phase units: 120/240
Output voltage for three phase units: 208/120 wye



Commercial Style Enclosure

SPECIFICATIONS:

Standard Regulation:

Input Line	Typical Output Line	Maximum Output Line
+10%, -20%	±2.5%	±3%

Optional Extended Regulation Range:

Input Line	Typical Output Line	Maximum Output Line
+10%, -40%	±5.5%	±6%

- **Load Regulation:** -2% maximum from no load to full load
- **Response Time:** 1/4 cycle
- **Correction Time:** 1 cycle for 100% correction
- **Efficiency:** 95% to 97% typical
- **Operating Frequency:** 60 Hertz ±3 Hz, or 50 hertz ± 3 Hz
- **Operating Temperature:** 0° to 40°C
- **Transverse Mode Noise attenuation**
  3 db down to 1000 Hertz, 40 dB per decade to well below 50 dB with resistive load.
- **Common Mode Noise attenuation:** 140 dB
- **Audible Noise:** 40 dB to 50 dB depending on size
- **Technology**
  Microprocessor based, zero current switching, seven tap system
- **Overload Rating**
  500% for one cycle, 200% for 10 seconds
- **Load power factor range**
  0.6 leading to 0.6 lagging
- **Enclosure**
  NEMA Type 1, (industrial or commercial)
- **Safety**
  UL listed 1012 standard for power supplies, CSA certified

OPTIONAL EQUIPMENT

- Regulator bypass switch
- Branch circuit cables with receptacle termination
- Flush mounted output receptacles
- Branch circuit cables with field wired termination
- Over/Under voltage detector with auto or manual restart
- Others

HIGH PEAK CURRENT UNITS AVAILABLE NOW!

NEW TECHNOLOGY—HERE TODAY!

GENERAL:

- Ideal for operating or testing avionics, synchros, gyros, triac and SCR phase controllers, motors, fans, transducers, shaker tables, transformers, power supplies, relays, AC line-operated equipment for either foreign or domestic use; or any other system requiring a precision AC power source.
- Conveniently designed and small enough for easy use on either bench-top or fixed rack-mount installations.
- 70%-82% efficiency *across the full output voltage range* means low power consumption and cool operation at *any* output level.
- Comprehensive "soft-start" circuitry removes all supply-line and power supply output current and voltage surges.
- Whisper quiet operation.
- High power to weight ratio, results in excellent portability and decreased freight costs.
- Lightest and most efficient AC power source on the market today.
- Latest amplifier technology using "Pulse Width Modulation" (PWM) and patented, thick-film, power hybrid circuitry.

INTERFACE:

- Full digital metering of frequency, voltage, and current.
- Use internal sinewave oscillator or external input source.
- Convenient, front panel mounted 130V/260V voltage range switch, three-way binding posts and standard NEMA AC receptacles.
- Inputs and outputs both completely isolated and floating with respect to ground.

OUTPUT CAPABILITY:

- 165 VA, 500 VA, 1 KVA, 2 KVA, 3 KVA, 4 KVA, 5 KVA, and 6 KVA systems available.
- Use multiple 1 KVA mainframes with single master oscillator for power up to 6 KVA.
- Bandwidth: usable 45 Hz-20 KHz, full output 45 Hz-15 KHz.
- Stable, full output voltage and current without derating into *any* reactive load with power factor from unity to zero, leading or lagging.
- Full-current output at *any* output voltage with *no* confusing derating curves.
- Low sinewave distortion, excellent load and line regulation.
- High peak current rated units available.

PROTECTION:

- Output is completely overload and short-circuit-proof, with automatic and smooth recovery.
- Unit can operate safely and continuously into *any* type of symetrical AC load without derating, overheating, or shutdown.
- In the event of an internal fault, a self-diagnostic fault-isolation system will completely shut the unit down and prevent any catastrophic failures.
- Thermal protection will shut down unit if ventillation is choked off.

SERVICE:

- Totally modular design allows for easy service, if required.
- Immediate Availability.
- One year warranty.

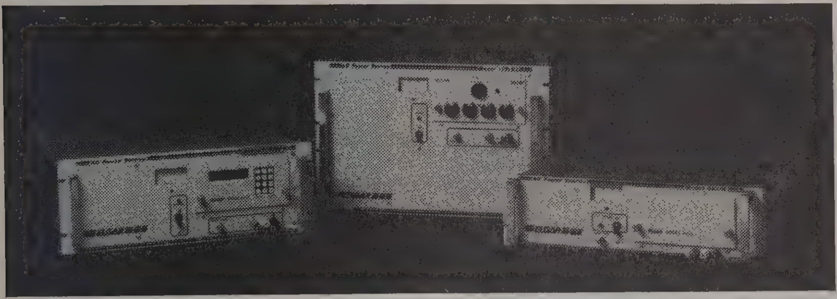
SL/SX Series AC Power Sources



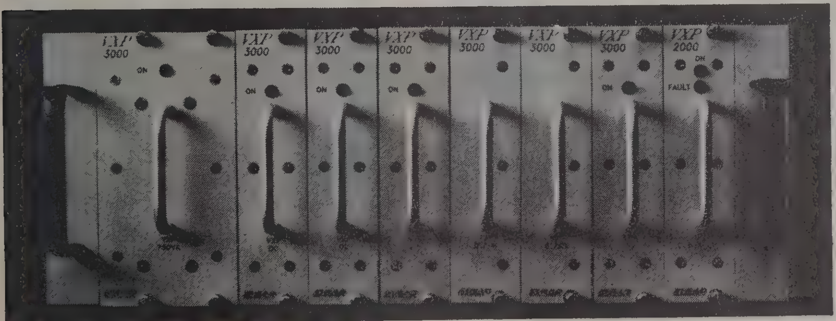
Elgar's SL Series solid-state frequency changers are small and lightweight in design. These linear power sources save critical panel space and money because they can provide up to 50% more power density and weigh nearly one-third less than most competitive models.

The SL Series is ideal for general purpose test applications, as well as ATE systems and avionics testing.

Elgar's SX Series AC linear power sources are designed to drive non-linear, rectifier loads. They meet all the electrical power requirements for the testing of modern switch-mode DC power supplies.

The 4:1 (or greater) crest factor capability which provides repetitive peak current up to 70A, makes the SX Series ideal for testing any equipment that causes a peak load on the AC power line.

VXP3000 Programmable Power System



Elgar's VXP3000 Programmable Power System is the state-of-the-art solution for test systems where high power density, small size and flexibility are the key priorities.

The unique chassis design employs 1.8 inch wide slots which accept one controller module and up to eight power modules or three 750VA AC modules. The ability to provide both AC and DC power in one chassis and at one GPIB address is further enhanced by an Auxiliary Drive Module (ADM). This module allows the VXP controller to program external bulk or high power DC power supplies as if they were standard VXP power modules.

CONTROLLERS
IEEE-488 controller With ABLE or CIIL (MATE) syntax
Slave controller For use with expansion chassis or as an interface to a VXP1000 power programmer located in a VXI chassis

DC POWER MODULES
Output voltage range 0-7, 10, 14, 20, 32, 40, 60, 100 and 200 VDC 1.8" standard width (up to 8 modules per chassis)
Full rated output power 200 W for 10, 14, 20, 32, 40, 60, 100 and 200 VDC modules; 140 W for 7 VDC module. 1.5 KW, 4-side module available at 100 VDC
Parallelable For load sharing (available for 140W and 200W modules)
Series connectable Up to 400 VDC

AC POWER MODULES
Full rated output power 750 VA
Output voltage range 0-135 VAC, 3.6" double-wide size
Frequency range 350-999.9 Hz (45-350Hz with reduced specifications)
Configurable For up to 2250 VAC single-phase or up to 6750 VA three-phase
Parallelable For higher power requirements by using the special plug-in VXP-LSM module
Auxiliary output A 0-26 VAC/2 A output proportional to the main output voltages provided. An optional 5 VAC/5A auxiliary output is available.
Fast current limit protection Against short circuits
Efficiency Over 80%

Digitally Modulated AC Power Systems

Elgar/Ling Digitally Modulated AC (DMAC) power systems with"linear" specifications offer unmatched efficiency and flexibility in a wide range of switching AC applications. They can be used for upgrading or replacing motor generators and their quiet operation means they can be located next to test stands or in control rooms without disturbing operators.

With optional Elgar Plug-In Programmers (PIP), DMAC's can serve as powerful Automatic Test Equipment (ATE) tools. A PIP can be installed in a DMAC to furnish full IEEE listener/talker capabilities and allow complete control of voltage on any phase, frequency or phase angle.

Modular construction produces a low MTTR and an extremely wide range of single and three-phase systems in 6 KVA steps from 18 to 260 KVA. DMAC's have the output purity standard normally found in a linear supply of 0.5% Total Harmonic Distortion (THD).

DMAC Series AC power sources drive any load from zero to unity power factor and can provide uninterruptible power for UPS applications when ordered with optional battery backup. With higher efficiency at all load levels, DMAC's use less commercial power and generate less heat, resulting in significant operating cost savings.

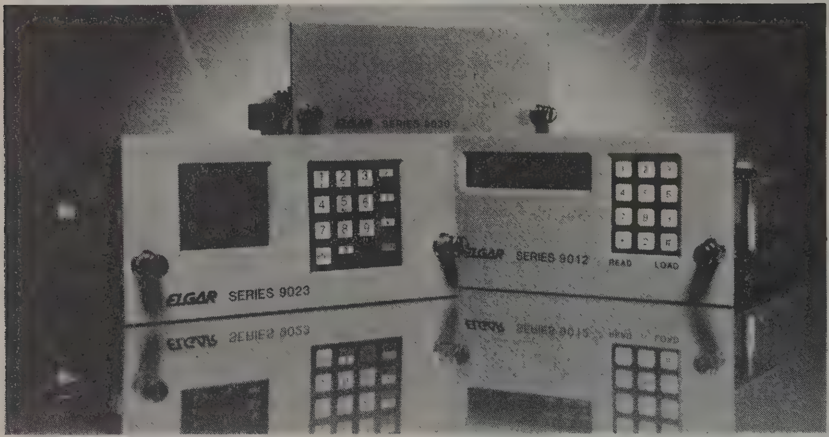
VXP1000

Elgar's VXP1000 Power Programmer allows the user full integration of Elgar AC & DC Power Systems and loads into the VXIbus environment. The VXP1000 is an interface card which co-resides in any VXI instrument chassis, slot 1-11. The PowerProgrammer operates with slightly modified versions of Elgar's standard AC Programmable SL/SX, DC Programmable AT8000 and VXP3000 PowerSystems.

Size: C Module
Interface Capability of three AC or DC power systems
from one card

In addition to the standard AC & DC Programmable features, the VXP1000 provides the user exceptional capability for automatic calibration, timed-based event programming and continuous power source monitoring.

Plug in Programmers



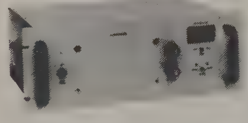
Programmable Oscillators
Plug-in Programmable oscillators (PIP's) which provide the interface between a computer and any Elgar AC Power Source System, are available for programming frequency, voltage amplitude, and phase angle in multi-phase systems. Elgar's PIP's are microprocessor controlled and offer more power options than ever before. Our latest PIP provides programmable current limiting and is CIIL compatible to meet Air Force MATE/TMA specifications.

Elgar's Atlas Based Language Extension (ABLE) makes programming simple via IEEE-488 (GPIB). Most PIP models provide keypad and LED read-out for convenient local control. And with Elgar's PIP, rack space is cut to a bare minimum since it is designed as a plug-in component for AC Power Sources.

PIP704 Transient Generator
The PIP704 Plug-In Programmable Transient Generator is designed to meet the MIL-STD-704 (revisions A through D) "Aircraft Electrical Power Characteristics" test requirements for 400Hz power. It's also an effective tool for Bu-Ships 1399 testing and for general purpose testing that requires AC transient generation.

The PIP704 can be programmed and monitored locally or remotely for simultaneous or independent transients including 704D ramps, voltage surges/sags, frequency deviation, voltage phase differentiation and waveform distortion in any single-phase or in all three phases. Standard frequency range is 45Hz to 1 KHz with voltage dropouts from 1 millisecond to 222.2 seconds.

The EL Series AC Frequency Changers



Now You Can Meet Smaller Power Conversion Applications That Do Not Require Critical Test and Measurement Standards

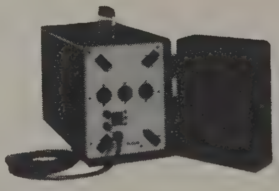
The Elgar El Series utilizes switching technology. These frequency changers are specially designed to power electronic equipment, motors and other high current-consuming loads.

We offer a wide selection of fixed and variable frequencies with a full or narrow range voltage control.

The output of all models is transformer isolated. The frequency is either fixed or continuously variable. On fixed frequency models, the output voltage is fixed at 115VAC or 230VAC. On variable frequency models, the output is adjustable from 0-130VAC or 0-260VAC.

Features:
- 1.2-15KVA
- Peak current to 3.0 X RMS
- Zero to unity power factor
- 200 microseconds response time for 100% load changes
- Soft start circuit prevents power line disruptions
- Available in 6 models - single and three phase

Convert Any Voltage/Frequency to 117VAC/60Hz



Elgar's 1.0 KVA portable AC power source converts unstable, "dirty" AC power anywhere, worldwide into regulated 117VAC, 60 Hz sinewave power without range switching or other adjustments.

The GPS 1000 can accept 45-450Hz with voltage ranging from 85VAC to 140VAC and 170VAC to 280VAC.

Three convenient outlets are included. Optional input adapter cables are available for plug-in power anywhere in the world. The GPS1000 weighs only 44 pounds. Efficiency is 80%; operation is quiet and cool.

Applications include powering of:
- Data processing, communications or other sensitive electronic equipment.
- Unstable generator outputs at construction sites.
- Other remote sites anywhere in the world.

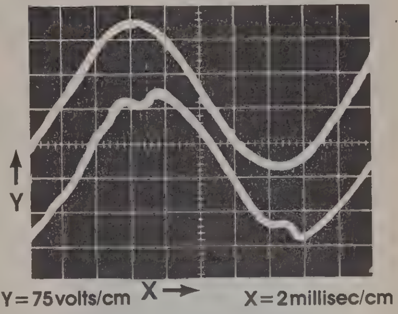
Ultra Precision Line Contitioners

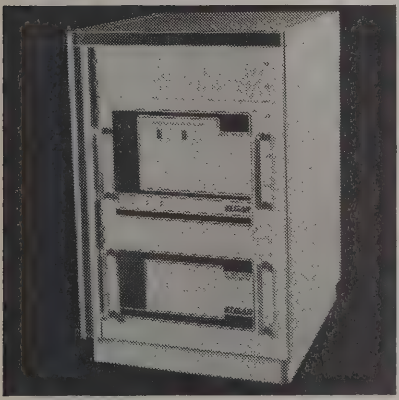
Elgar's Ultra Precision AC Line Conditioners provide precise, clean AC power to critical loads by eliminating high-speed AC line and load transients and distortion as well as providing precise regulation. These versatile instruments have response times 5,000 times faster than the fastest conventional AC line regulators and line isolation of 70 to 100dB, far superior to mere isolation transformers. All Elgar AC line conditioners are designed for continuous operation and are contained in rack-mount enclosures. Front panel controls include meters to monitor input and output voltages and output load current, an overload indicator and an input circuit breaker.

WAVEFORM COMPARISION CHART



The lower trace shows a very distorted input AC line waveform with a 75 volt peak spike riding on it. The upper trace shows the output of the Elgar AC Line Conditioner which shows no trace of the AC input anomalies.

On-line Uninterruptible Power Systems



1 and 3 KVA Cabinet System

Elgar solid-state, non-ferroresonant Uninterruptible Power Systems (UPS) combine a battery charger, battery bank, solid-state inverter and bypass switch to provide clean, continuous power to critical loads. Elgar UPS's are on-line systems so that power is continuously supplied through an inverter. Upon power failure, the battery automatically supplies the load with no switching.

In case of overload, or in the unlikely event of a component failure within the Uninterruptible Power System, the bypass switch is activated. The critical load automatically transfers to the input AC line or bypass input AC. All Elgar solidstate UPS's are available with a static bypass switch (SBS) that can make the transfer with less than 1ms interruption.

Elgar's 102-1B and 302-1B UPS's are rugged, reliable rack-mount units with excellent dynamic characteristics and an extremely wide (+10% /-20%) AC input voltage range.

The UPS 102-1B is a 1 KW, 1 KVA, 60Hz system, while the UPS 302-1B is a 3 KW, 3 KVA, 60 Hz system. All other specifications are the same.

NEW Global Uninterruptible Power Systems

Elgar's Global Uninterruptible Power System (GUPS) product line is the ideal international power conversion system for computers, communication systems, and a broad range of other electronic equipment that must be able to operate from standard US power anywhere in the world under diverse conditions.

- **Universal input.** Automatically selects input range without operator intervention.
- **Universal output.** Switchable 115 VAC/60 Hz or 230 VAC/50 Hz available on GUPS 2400 U.
- **Rugged and transportable.** Meets MIL-STD-810C, Method 516.2 requirements.
- **Small size.** 7" H x 19" W, ideal for transport cases or 19" rack.
- **Battery backup.** Internal battery provides 5 minutes of backup at full rated load.
- **External rack-mounted battery packs.** Backup time can be extended with optional battery packs.
- **DC input available.** In the GUPS 2400AD, a 24/28V DC to DC converter is provided in lieu of an internal battery.

	GUPS 1200	GUPS 2400 (A, AD and U Models)

DC to AC INVERTERS—SILENT AC POWER ANYWHERE

ENERGY, LTD. presents a superior line of Pure Sine Wave, solid state inverters from 50VA to 1KVA. Our state-of-the-art inverters supply precise frequency control, are virtually noise-free, and provide sine wave, alternating current power from a direct current source.

Provide Inversion of DC Power to Pure Sine Wave AC Power with the market's finest inverters.

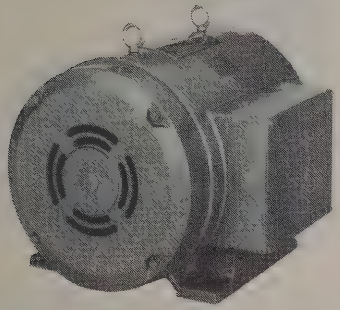
GEORATOR

Frequency Conversion

SERIES 30
60 to 400/50 to 400 Hz

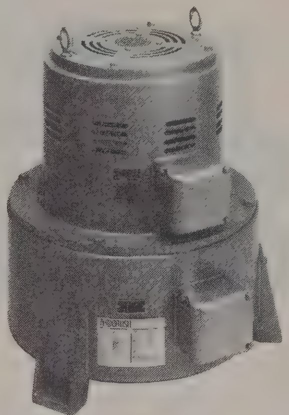


Provides a clean, reliable source of nominal 400 Hz power. Inherent regulation provides excellent voltage and frequency stability. Exceptional MTBF with minimal maintenance. Compact and quiet. 5 year warranty.

Specifications

Power Ratings: 150 VA to 3 KVA
Motor Type: Induction
Alternator Type: Permanent magnet excitation
(Variable output frequency available.)

SERIES 33
60 to 400/50 to 400 Hz

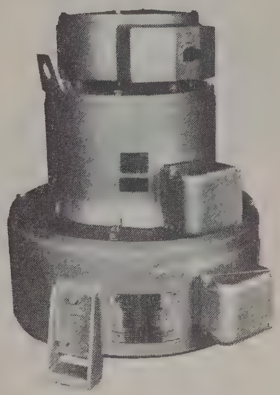


Provides a clean, reliable source of nominal 400 Hz power. Inherent regulation provides excellent voltage and frequency stability. Exceptional MTBF with minimal maintenance. Quiet operation. 5 year warranty.

Specifications

Power Ratings: 2.5 to 20 KVA
Motor Type: Induction
Alternator Type: Permanent magnet excitation
Waveform: THD less than 4%
(Variable output frequency available.)

SERIES 39
400 Hz, Voltage Regulated



Supplies a clean, regulated source of nominal 400 Hz power. All units include a voltage regulator which maintains output at ±1%, from NL to FL. 5 year warranty.

Specifications

Power Ratings: 5 to 15 KVA
Motor Type: Induction
Alternator Type: Permanent magnet excitation
Waveform: THD less than 4%

GEORATOR

Frequency Conversion

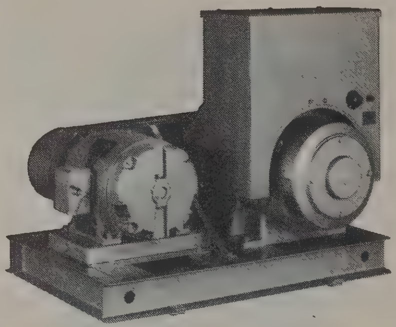
400 Hz, Exact

Ideal for applications requiring a clean, reliable source of exact 400 Hz power, NL to FL. Both voltage regulated and standard models available. 5 year warranty.

Specifications

Power Ratings: 2.5 to 10 KVA
Motor Type: Synduction
Alternator Type: Permanent magnet excitation
Waveform: THD less than 4%

SERIES 37
400 Hz, High Power

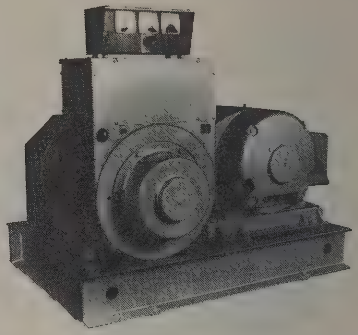


Designed for applications requiring higher output ratings of 400 Hz power. Provides accurate, reliable power and complete isolation from voltage fluctuations, switching transients, and line noise.

Specifications

Power Ratings: 25 to 125 KVA
Motor Type: High efficiency induction
Alternator Type: Synchronous rotating rectifier with voltage regulator mounted.
Waveform: THD less than 1%
(Variable output frequency available.)

SERIES 37
50 to 60/60 to 50 Hz



Provides accurate and stable output power, as well as complete isolation from switching transients, voltage fluctuations, and line noise. Units allow for compatibility between U.S. and International power standards.

Specifications

Power Ratings: 2.5 to 125 KVA
Motor Type: High efficiency induction (Synduction optional on 2.5 to 25 KVA)
Alternator Type: Synchronous rotating rectifier with voltage regulator mounted.
Waveform: THD less than 5%
(Variable output frequency available.)

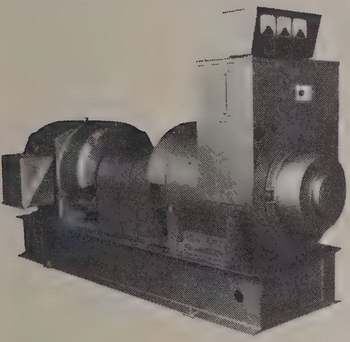
GEORATOR

Power Conditioning/PMA's

SERIES 37
Line Isolators

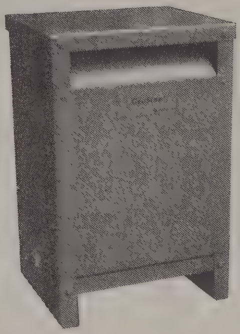


Provides complete isolation between the load and input power, eliminating voltage fluctuations, switching transients and line noise. Maintains approx. 100 milliseconds of ride-through during power outages.

Specifications

Power Ratings: 2.5 to 125 KVA
Motor Type: High efficiency induction (Synduction optional on 2.5 to 25 KVA)
Alternator Type: Synchronous rotating rectifier with voltage regulator mounted.
Waveform: THD less than 5%

SERIES 104
GeoSine Harmonic Line Conditioner

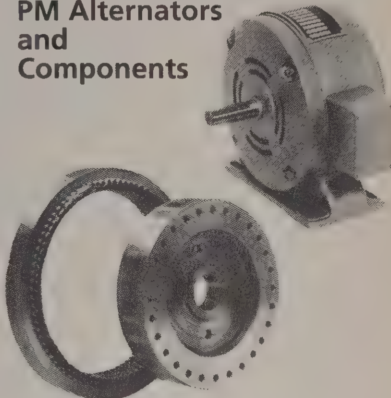


Corrects harmonic distortion caused by non-linear loads, such as adjustable speed motor drives and switching power supplies. Reduces both current and voltage distortion by a factor of 5 or greater. Eliminates the need for K-rated transformers. A more versatile solution than harmonic filters or traps. Standard models as well as units built to customer specs.

Specifications

Input: 480V 60 Hz 3 Phase Delta
Output: Voltage drop at maximum current less than 5%.
(50 Hz, 400 Hz, and non-standard voltages also available)

SERIES 36 AND 38
PM Alternators and Components



Permanent magnet technology makes these alternators ideal for use in special industrial applications, main generator pilot excitation or tachometer feedback, and high voltage isolation or wherever rotational mechanical energy is available for conversion into DC or high-frequency AC power. Standard models as well as units built to customer specs.

Specifications

Power Ratings: .25 to 20 KVA
Frequency: Up to 1000 Hz

**Includes battery-charging requirements and 125% overload capacity with 0.8 power factor load.*
***Nominal with ac load at 0.8 power factor for 120Vdc nominal inverter input.*

The ultimate in line conditioning equipment for heavy duty use in industrial applications, the Hitran HD Series UPS eliminates power outages, line interruptions, brownouts and short term transients such as line spikes and sags. It protects the load against line disturbances resulting from switching in the transmission system, clearing of line faults, starting of motor loads and even lightning strikes.

The Hitran HD Series is intended for critical process and/or manufacturing control computer installations which cannot tolerate power interruption either in an emergency or even for normal maintenance of the UPS or batteries.

Every effort has been made to build a family of systems which offer the highest levels of reliability and, at the same time, are safe and easy to test, service, and maintain without ever disrupting power to the critical load.

Hitran HD series uninterruptible power systems are three phase input/single phase output. They are intended for 120V, 60Hz loads with either sinusoidal or nonsinusoidal current wave form characteristics and excessive surge current requirements.

Electrical Characteristics & System Requirements

Rectifier/Battery Charger

- Input Voltage Variations: ±10%
- Input Frequency: ±5%
- Transient Protection: As high as 4000V for 10 microseconds with 40 ohms or greater transient source impedance.
- Walk-in: 3 seconds from zero to full load.

Inverter

- Overload Design Capability: 125% of full load current for 10 minutes; 150% for 30 seconds; 200% for 0.1 seconds.
- Output Voltage Regulation: ±3% of output voltage steady state for line, load and temperature.
- Output Voltage Transient Response and Recovery: Less than ±15% with recovery to ±3% within 5 cycles
- Output Harmonic Distortion: <5%
- Output Power Rating: Rated KVA from 0.8 lag to 0.8 lead power factor range.
- Frequency Stability: 0.25%
- Output Frequency Regulation: 1.0%

Static Transfer Switch

- No-break forward or reverse transfer capability in less than ¼ cycle

Manual Maintenance Bypass Switch

- Manual, no-break, forward and reverse transfer capability
- Isolates the static switch and inverter from the bypass line and load

Test Load Terminals

- For testing all functions of inverter without interrupting output

Noise Level

Less than 65dBA sound power level at a distance of five feet from enclosure

Ventilation

Natural convection

Control Panel—Status/Alarm/Command

The control panel shows the complete status of the system at a glance via:

- LED indicators for circuit status of all major system operating parameters
- Digital panel meters for critical voltages, amperages and frequencies
- LED alarm indicators for all critical system conditions. Alarms are also audible and can be connected to remote annunciators via a terminal block.

Commands may be entered through the control panel to transfer load to bypass or inverter, cancel and reset audible alarms, reset inverter, test indicator LEDs and to reset the transfer counter display. For security, load transfer commands may be disabled by an internal switch.

System Options

- Remote status alarm panel
- Special input/output voltages

Batteries, Racks & Accessories

Twenty-year lead-calcium batteries are normally supplied mounted in a separate two-tier steel rack. Other battery types are available on request.

Designs and specifications subject to change without notice.

SFR SERIES — SINUSOIDAL FERRORESONANT REGULATOR

The SFR provides low distortion, sinusoidal, computer grade power. It provides a high degree of electrical noise rejection as well as output voltage regulation. Designed to eliminate power line problems caused by brownouts, short term transients and electrical noise, the SFR protects against switching disturbances, clearing of line faults, starting of motor loads and lightning strikes.

Standard Features

- Computer grade sinusoidal output - less than 5% harmonic distortion.
- Electrical noise rejection - Common Mode: greater than 120dB, 1 KHz to 1MHz. - Transverse Mode: greater than 60dB, 10KHz to 1MHz.
- Wide input voltage range - +10%, −20% of nominal input
- Tightly regulated output - ±1% of nominal output voltage.
- Input to Output Coupling Capacitance - Less than 0.005pF.
- Operating Temperature - 0-50°C.

Electrical Specifications

Input

- Nominal Standard Voltages - 1ϕ: 120, 208, 240, 480 (+10, −20%)
- Frequency - 60Hz or 50Hz ±2Hz.

Output

- 1ϕ - 120/240V ±1%
- Frequency - Same as Input.
- Regulation - Static: ±1%; Dynamic: ±4% with recovery to ±1% in 50ms.
- Load PF - 0.8 lagging
- Overload Recovery - Automatic within 50ms.
- Ride Through - Continuous power during line outages lasting as long as 25ms (1.5 cycles).
- Protection - Self current limiting
- Efficiency - Greater than 90%

Complete Line Conditioner Systems

The SFR Series is also available as a Complete Line Conditioner System. It includes all the standard features listed plus the following accessories:

- *Output Ammeter and Voltmeter*
- *Input Circuit Breaker*
- *Input Power "ON" Indicating Light*
- *Output Fusing and Receptacles*
- *Input Receptacles or Line Cord*
- *19-inch Rack Mount or Free-Standing Assembly*

SFR Series

UIS SERIES — ULTIMATE ISOLATION SYSTEM

The UIS effectively eliminates common-mode and transverse-mode power line noise in transformer applications for computers, programmable controllers and sensitive instruments.

Standard Features

- High degree of electrical noise rejection,- Common-mode: greater than 140dB, 1KHz to 1Mhz; Transverse-mode: greater than 60db, 10KHz to 1MHz.
- Input to output capacitance coupling - 0.001pF
- DC insulation resistance - 10,000MΩ
- Dielectric strength - 4000Vac min.
- Operating Temperature - 0-50°C
- Efficiency - 97% min. at full load.
- Line Cord & Output Receptacles - Standard on 120V single phase models up through 2.4KVA.

Electrical Specifications

Powertron® AC Current Sources

Constant Current AC Supplies

In addition to constant voltage amplifiers a full line of constant current amplifiers is available. The inherent ability of these amplifiers to maintain a preset current through a load whose impedance may vary makes them ideally suited tot he testing of ammeters, wattmeters, relays circuit breakers, current transformers, and other current sensitive devices. These amplifiers may be driven by the plug-in oscillators. All amplifiers are protected for open load circuit conditions.

GENERAL SPECIFICATIONS:

Output Frequency: Determined by plug-in oscillator.

Current Regulation: ± 1% for loads ranging from short circuit to maximum rate load impedance for the respective amplifier.

Output Distortion: Less than 1%

Constant current amplifiers may be used with similar outputs in parallel when it is desired to increase the current capacity. Constant current supplies may also be used for 3ϕ wye connected load applications. As the standard output transformers may not always provide the optimum current range and compliance voltage, special output transformers may be supplied to meet user requirements.

ELECTRO-PAC®

Uninterruptible Power Systems

Continuous Regulated AC Power

ELECTRO-PAC Series E power systems are reliable, ferroresonant designs providing true uninterruptible AC power for critical control and communication applications. The system consists of an electronically regulated battery charger, sine wave inverter, a fast acting static power switch and a storage battery bank. The Series E system protects against outages and blackouts; voltage sags, surges, spikes and transients; electrical noise; frequency deviation and wave form distortion. The design also provides inherent protection from momentary overloads and short circuits. A storage battery bank is specified to match the back-up time required by the application.

Quality Features

- *Pure sine wave output.*
- *Regulates, filters & conditions power . . . continuously.*
- *Standard capacities 1 - 20 kVA.*
- *Regulation ±2%.*
- *Up to 85% inverter efficiency.*
- *High output battery charger.*
- *Soft-start charger circuitry.*
- *Overload and short circuit protected.*
- *High quality meters.*
- *Input circuit breakers.*
- *Seven operation indicator lights.*
- *Five alarm contacts.*
- *Full accessibility for service.*
- *Reliable convection cooling.*
- *Class H insulation on magnetics.*

UPS

All *ICS* - Built Power Systems are Made in The United States of America

Lifeline® Uninterruptible Power

Always on-line with regulated, clean power.

LIFELINE® UPS Systems provide economical, no-break AC power, offering protection from power outages, line noise and voltage fluctuations which cause data losses. Applications include uninterruptible power for micocomputers, communications systems, security systems. UL Listing to UL1481 standard & UTRZ listing category applied for. This listing refers to a 600VA UPS with four hours back-up time.

Power Conditioner built-in.

LIFELINE delivers filtered, conditioned, regulated AC sine wave all the time, not just when the utility power is out. Patented circuit gives you full featured UPS at an affordable price.

Quality Features

- *Instant response. No power break.*
- *Up to 90% efficiency.*
- *Capacities from 200 VA or 600 VA.*
- *Maintenance-Free internal battery.*
- *Operates from standard office outlets.*
- *Illuminated status indicators.*
- *Input Voltage: 120 VAC, +10%, -15%, 60 Hz.*
- *Output Voltage: 120 VAC, ±3%, 60 Hz.*

Additional hours of run time can be achieved with external batteries, and/or chargers.

① At full load, Unity Power Factor (200W, 600W)

INVERTERS

Sinewave, solid state control circuitry, special design to assure excellent regulation, low harmonics, line synchronization. Available with optional electromechanical or static transfer switch.

STATIC TRANSFER SWITCHES

Designed to automatically transfer the load to the secondary power source within 4 ms of the primary power source failure. Manual by-pass switch and output voltage regulator available. 0.5 kVA to 20 kVA.

IPDS* Series 3000 Programmable AC Voltage and Current Sources

General Specifications:

- Linear design with high frequency response
- GPIB 488/RS232 control talker/listener
- Data Acquisition provides feedback
- LED Meters for frequency, voltage and phase
- Remote and local control
- Frequency accuracy 50 PPM
- Frequency range 20–25000Hz
- Harmonic distortion 0.5% typical
- Frequency and voltage sweep capabilities
- Individual phase adjustment to .1 degree resolution/accuracy
- Load regulation .5% typical, with external adjustment to .1%
- Short circuit protection
- Thermal overheat automatic shut down

Options:

- Phase angle shift/sweep
- Various programmable wave shapes, arbitrary AC wave available
- Spikes, drop-out, transients and fault simulation capabilities
- Input power 120/220 VAC single or 208/380 VAC

IPDS*-3300 Powerline Fault Simulator, Tester and Calibrator

Voltage and Frequency Monitor Tester (VFMT)

For testing and calibrating back-up AC power sources/generators. The user creates fault conditions on the input of the monitoring sensing device of the generator/AC source. The generator can be calibrated until it reacts properly to the fault condition.

Three phase, 600 VAC @ 100 MA power output line to line, 50–500 Hz, LED display for each phase and frequency. Overload, as well as thermal protection. The tester is a rugged, small unit (19" x 8" x 13") shipped in a water resistant carrying case with cables and manuals.

IPDS*-3010 Three Phase Programmable Sine Wave Generator

An IPDS-3000 controller packaged in a low profile 19" rack mount enclosure

- 1.75" x 19" x 12"
- Weight 8 lbs.
- IEEE488, RS232 and front panel control
- LCD display,
- Frequency range 20–25000Hz
- Frequency accuracy 50 PPM
- Selectable output voltage to 5VAC
- Distortion less than .01%

IPDS*-2000 Series Multi-Phase Arbitrary DC and AC Power Source

A complete DC and AC modular power delivery system for a wide range of test applications.

Use IPDS-2000 to load one of the pre-programmed test profiles from the Library (built into IPDS-2000), or create your own, with our easy to use editing tools. Then you can play the test profile to drive your Device Under Test (DUT) and read the test results on a color monitor.

The IPDS-2000 System is a source for:

- Power source emulator/simulator DC as well as AC
- Harmonics generator
- Transient generator
- Audio/sonar simulator
- And much more...

General Specifications:

- PC platform with color graphics for edit and control
- Menu driven system with extensive capabilities for wave editing and control
- User friendly interface (windows/mouse)
- Library of test profiles
- GPIB/RS232 control
- External intervention and control via event's interrupt for start/stop
- Frequency and voltage sweep
- 12 bit data acquisition
- 12 bit resolution, 8192 locations wave-form generators
- Frequency range DC-500Khz

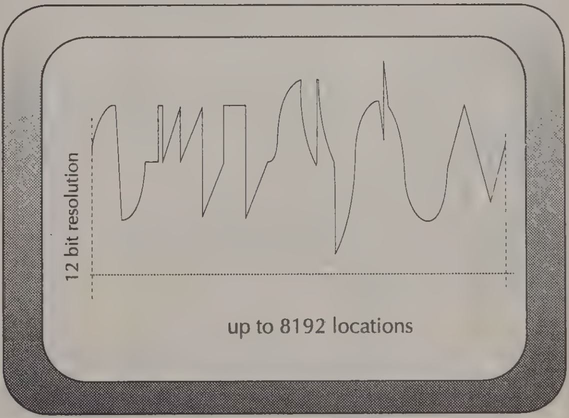
Send for demo diskette.



12 bit resolution
up to 8192 locations

The IPDS*-2000 series can be customized as turn-key Automated Test Equipment (ATE) to become a:

- Power supply tester
- Motor and drive tester
- Q.C. and Life Cycle tester
- Destructive tester
- Relay tester (see our ad)
- Gyro tester

IPDS-2000 SERIES: DC AND AC POWER OPTIONS

Model	Power	Ranges	n=# channels	Notes
IPDS-2050V-n	50VA	+/-50, 100	1–6	Consult factory for other ranges or more synchronized channels
IPDS-2100V-n	100VA	+/-50, 100	1–6

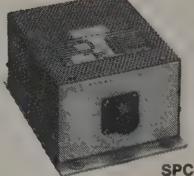
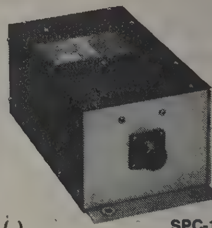
TSO'D 400 Hz STATIC INVERTER

The KGS ELECTRONIC'S static inverter utilizes solid state circuitry to convert 28 VDC to 115 VAC, 400 Hz sine wave power. Design features include sine to sine or square to sine wave power conversion permitting lightweight and reliable operation.



SPC-5 ( )



SPC-10 (F)

GENERAL SPECIFICATIONS

Input Voltage:	20 to 32 VDC
Output Voltage:	115 VAC and/or 26 VAC
Phase/Waveform:	Single/Sine Wave
Frequency:	400 Hz ± 1%
Ampl. Distortion:	Less than 7% (3% typical)
Power Factor:	0.8 to −0.95
Input Overvoltage:	Operates up to 37 VDC input while supplying full rated VA output power. Output voltage under this condition is 115 VAC +5%, −7%
Input Transient:	Withstands transients of 88 volts lasting 1 millisecond on the 28 VDC input line
Overload & Short-Circuit Protection:	Withstands transient damage or degradation load exceeding 150% of rated output to an output dead short. Inverter delivers rated output on removal of above condition
Altitude:	45,000 ft.
Temperature:	−65°F to +160°F (−55°C to +71°C)
Humidity:	Tested to greater than 95% for 10 days, temperature was cycled between 75°F to 160°F
Environmental:	Meets RTCA Paper DO-160 Env. Cat. D2BREXXXXSXBBBA

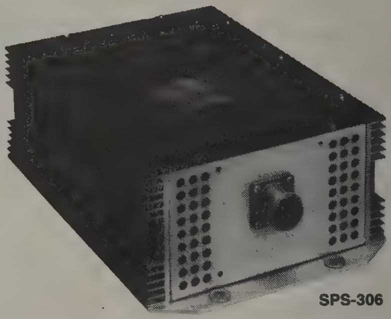
TSO'D 60 Hz/50 Hz STATIC INVERTER

These inverters are applicable as a source of 60 Hz power for the operation of Projectors, Tape Records, TV systems, Typewriters, on Aircraft that have a 28 Volt DC electrical system. For applications requiring greater power, these inverters can be paralleled for higher output.

Inverters available in various voltages, frequency and power are listed in the table below.



SPS-306

GENERAL SPECIFICATIONS

Input voltage:	1. 28 VDC ± 2 Volts, 14 VDC for SPS-316 2. Withstands 88 Volt Transient for 1 millisecond
Power Factor:	0.8 to 1.0
Amplitude Distortion:	Less than 7%
Wave Form:	Sine
Phase:	Single
Short-Circuit:	Withstand for 1 minute or longer
Temperature:	−65°F to +160°F (−55°C to +70°C)
Altitude:	45,000 ft.

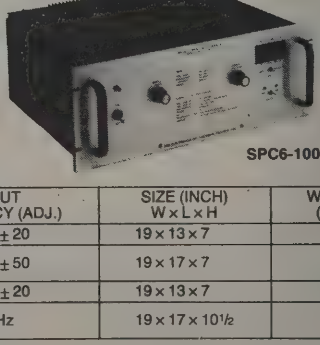
FREQUENCY CHANGER
MODEL SPC-6-( ) SERIES 50 to 60 Hz to 400 Hz

KGS ELECTRONICS' solid state frequency changer converts 115 VAC 50 to 60 Hz to 115 VAC 400 Hz sine wave power. These frequency changers are suitable for use on test benches or labs to check radars, compasses, gyros, synchros, fuel flow gauges, etc. SPC-6-750 is single phase output. SPC-6-1000-3ϕ is three (3) phase output. Output is monitored via analog meter and is adjustable from 105 to 126 VAC line to neutral. Amplitude distortion is typically 2%.
For SPC-2250-3pH the input is 3 phase 47 to 440 Hz and the output is 3 Phase WYE 400 Hz fixed voltage and frequency.



SPC6-1001

Power Protection, Distribution and Control For Rack Mount Systems

Marway provides a convenient solution for power to computer racks. The Marway power unit provides a single point of entry for AC power to the rack. EMI filtering, transient suppression and overload protection support the entire rack. Power distribution outlets furnish AC to each system component in the rack. As an option on many models, remote ON/OFF control allows system power up from a single system switch.

Warranty

Marway provides a 10-year limited warranty on all AC power distribution equipment, with a pass-through provision through the OEM to the end user.

Engineering To Unique Specifications

Marway will design and manufacture a power distribution model to OEM engineers' specifications. Or an OEM engineer can design and Marway will manufacture to OEM drawings and specifications. If desired, Marway can obtain UL, CSA or TUV approval for the model. Marway can generally design, manufacture, and obtain UL, CSA or TUV approval at appreciably less cost than an OEM, and in less time. To put Marway capability to work on your application, contact the factory and discuss specifications with a Marway engineer.

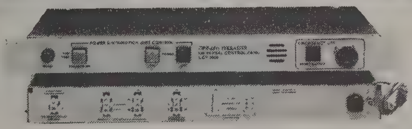
UNIVERSAL CONTROL PANEL



UCP-3000 — COMPLETE POWER CONTROL FOR YOUR SYSTEM. Compatible with any Marway MPD power distribution unit which has the remote ON/OFF feature.

FUNCTIONS:
- System Power Breaker On indicator
- Control Panel Lamp/Alarm Horn Test
- Power ON/OFF Control & Indicator
- Emergency Power Off Control
- EPO Indication and Reset
- EPO Alarm Horn (Optional)

Catalog Available

Over 700 models of power distribution equipment have been designed and built by Marway Products. Some are shown here. Phone for our catalog .

DEC COMPATIBLE SYSTEMS

Direct replacement for the DEC model. Complete mechanical, electrical and DEC bus control compatibility. All have remote ON/OFF Control.

INTERNATIONAL POWER EQUIPMENT

Marway International Models

Shown on this page are several power distribution models Marway has designed for American OEM's marketing product internationally. Like other Marway models, these provide a single point of entry for AC power to the rack, and offer EMI filtering, transient suppression and overload protection for system components on the rack.

Computer Power Models

Most of the models here are rack mount in a standard 19 inch rack or cabinet. Most have IEC receptacles. All make provision for use of local power. All have TUV and some have other agency approvals as well. To accomodate local power, four of the models (MPD-100 IEC, MPD-100R IEC, MPD-110 IEC, and MPD-320) use for input a 16 amp power cord with an IEC connector on one end and a plug for the country of intended use on the other. For convenience Marway stocks such power cords for most European and Asian countries where American companies export.

INTERNATIONAL POWER DISTRIBUTION

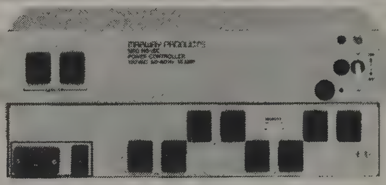
MPD-100 IEC

- Rating is 115 or 230V 1ø 16A
- 10 Unswitched IEC Outlets, 2 Face and 8 Rear
- IEC Input Receptacle on Rear
- Size is Convenient 1 3/4 x 19 x 8 Inches Flush Mount

MPD-100R IEC

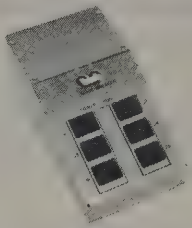
- Rating is 115 or 230V 1ø 16A
- Remote On/Off Control
- 8 Switched IEC Outlets on Rear for On/Off Control
- 2 Unswitched IEC Outlets on Face for Auxiliary Equipment
- IEC Input Receptacle on Rear
- Size is Convenient 1 3/4 x 19 x 8 Inches Flush Mount

INTERNATIONAL POWER DISTRIBUTION



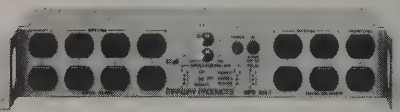
MPD-110 IEC

- Rating is 115 or 230V 1ø 12A
- 10 Unswitched IEC Outlets, 2 on Face and 8 on Rear
- IEC Input Receptacle on Rear
- Size is 3 1/2 x 19 x 8 Inches Flush Mount



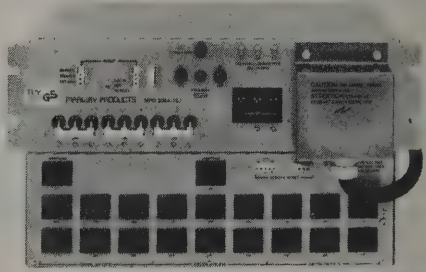
MPD-320

- Rating is 220V 1ø 12A
- 6 Unswitched IEC Outlets on Face
- IEC Input Receptacle may be on Top or Rear
- Size is 3 1/2 x 4 1/2 x 9 1/2 Inches Table Top or Flange Mount



MPD-250T

- Rating is 230V 1ø 16A
- Remote On/Off Control
- 12 Switched NEMA 6-20R Outlets on Face for On/Off Control
- 2 Unswitched NEMA 6-20R Outlets on Face for Auxiliary Equipment
- 15 Foot Power Cord with Non-Terminating End
- Size is 3 1/2 x 19 x 10 1/2 Inches Recessed



MPD-208A-107

- Rating is 220/380V 3ø 20A/ø
- Remote On/Off Control
- 18 Switched IEC Outlets on Rear for On/Off Control
- 2 Unswitched IEC Outlets on Rear for Auxiliary Equipment
- 10 Foot Power Cord with 3 ø International Plug, On Front
- Size is 5 1/4 x 19 x 8 Inches Flush Mount

SEE DOMESTIC MODELS ON PREVIOUS TWO PAGES.

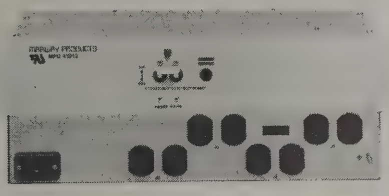
COMPUTER POWER SOURCES

TRANSFORM AND DISTRIBUTE POWER

The MPD-41912 transforms local AC power of 220 or 230 volts obtained on site in another country to 115 volt AC power suitable for use by typical American-made computer equipment, and distributes the power to components in the rack. The unit has an IEC input receptacle on the rear, and uses a 16 amp Marway power cord for input power, with an IEC connector on one end and the plug for the country of intended use on the other.

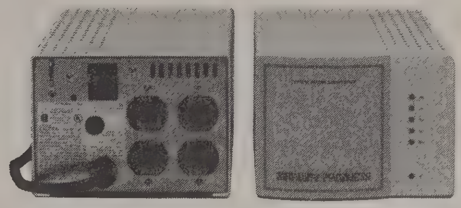


MPD-41912

- Rating is 230V 1ø Input with 115V 1ø Output at 16A
- 8 NEMA 5-15R Outlets on Rear
- IEC 320 Input Receptacle on Rear
- Size is 5 1/4 x 19 x 16 Inches Flush Mount

POWER CONDITIONING

Because power line brownouts can cause computer malfunction and are commonplace in some environments, Marway designed a line of power conditioning equipment. The models are aimed mainly at the power needs of personal computers. The power conditioning models offer EMI filtering, transient and surge protection, and overload protection as well as voltage regulation to automatically correct brownouts and overvoltages.



Model	Rating	Size	Agencies
MPC 600	120V1ø7A	5 x 7 x 9 in.	UL, CSA
MPC 600 IEC	230V1ø4A	5 x 7 x 9 in.	TUV
MPC 1250	120V1ø12A	5 x 7 x 9 in.	UL, CSA
MPC 1250 IEC	230V1ø8A	5 x 7 x 9 in.	TUV

RACKMOUNT UPS SYSTEMS

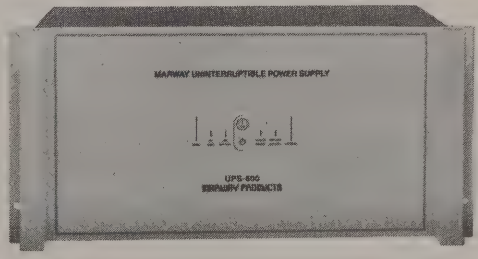
The UPS from Marway is a rack-mount uninterruptible power supply designed to keep a file server operating throughout a power failure of several minutes duration. The unit is recommended for file servers in racks and cabinets that operate outside of a computer room UPS system, and yet in an environment where power is sometimes erratic and computer data files must be protected. To avoid the expense of lost data, corrupted files, and possible damage to hardware just once in the life of a rack more than compensates for the cost of the UPS. In reality an unprotected rack is typically at risk several times a year, not once in the life of the rack.

Typical run-times of the UPS-600 and UPS-1250 at power failure vary with the file server hardware and the operating load of volts times amps drawn. The chart here may be helpful in making estimates.

FILE SERVER		UPS 600	UPS 1250
SYSTEM	LOAD (va)	TYPICAL RUN-TIMES in minutes	
Portable 386	75	113	250
IBM PS/2 30 monochrome	100	85	210
IBM PS/2 30w/VGA, SparcStation 1 w/mon.	150	55	160
PS/2 55sx w/VGA, SparcStation 1PC w/mon.	200	38	120
Compaq 386/25e w/VGA	250	26	90
Compaq 386/33 w/VGA	300	20	70
PS/2 80 server w/VGA	350	17	50
PS/2 95 server w/XGA	375	15	44
386/33 w/19" mon.	400	14	38
RS/6000 320 w/19" mon.	450	11	32
Compaq SystemPro	500	9	27
DECstation 5000	600	6	22
Two PS/2 80 file servers	700	—	17
IBM AS/400 mini	800	—	14
DEC MicroVax	900	—	12
HP 9000 834	1200	—	7

The UPS also contains power conditioning features. A power booster will boost power 12% if utility current is down 15-20%, to save the battery of the unit during brownouts and yet supply constant current. Thus, the operating time of the unit in an emergency can be extended providing longer holdup time when needed. Additionally, the UPS provides EMI filtering, transient and overload protection against noise, surges and spikes.

Two software packages may be used with the UPS to increase operator control over power to the rack. PowerChute Plus is available for Novell and Unix platforms, and PowerDoctor operates on DOS-based systems. Both provide automatic shutdown capabilities as well as diagnostic information about the power to the rack. In the event of a power failure and subsequent draining of the UPS batteries, the software will provide safe and automatic shutdown of the file server. Diagnostic information is routinely available through the software to aid in evaluating power quality to the rack. Both PowerChutes Plus and PowerDoctor software are available from Marway.



Model	Rating	Size (H x W x D)	Agencies
UPS 600	117V1ø7A	8.7 x 19 x 7.25 in.	UL, CSA
UPS 600 IEC	230V1ø3A	8.7 x 19 x 7.25 in.	TUV
UPS 1250	117V1ø14A	8.7 x 19 x 7.25 in.	UL, CSA
UPS 1250 IEC	230V1ø5A	8.7 x 19 x 7.25 in.	TUV
UPS 2000	117V1ø22A	18 x 19 x 7.25 in.	UL, CSA
UPS 2000 IEC	230V1ø12A	18 x 19 x 7.25 in.	TUV

MINIGLOSSARY POWER SUPPLIES

Ambient reference: Refers to the temperature of the still air surrounding the power supply

Case reference: One of the specs that make up the nominal rating. The temperature of the case with the temperature of the surrounding still air at a stated temperature (usually 25°C).

Crowbar circuit: Protects the load. A protective circuit that applies a short circuit across the output immediately upon overload. (See overvoltage).

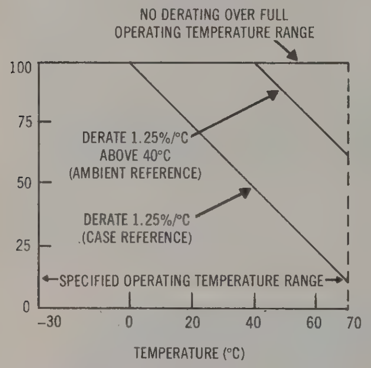

Fig. 1. Power output derating can be referred to ambient or case.

Derating: The degree output is reduced as temperature increases. Usually referenced to ambient case temperature and shown on a graph.

Efficiency: Ratio of the output power to the required input power. Usually expressed as a percentage given nominal environmental temperature.

EMI/RFI: Interference electronic circuitry caused by energy from electromechanical or radio frequency power supplies.

Foldback: Built-in protective circuits that automatically reduce the output voltage and/or current to very low levels in the event of an overload.

Holdover (Holdup): The interval that rated output will continue after input ceases. Usually milliseconds.

Input reflected current: The peak-to-peak alternating current generated by switching transients in DC/DC converters. Should not exceed 1%.

Inrush current limiting: Built-in circuits that monitor high currents through the rectifiers to the capacitors at turn ON. Circuit is usually inhibited as capacitors attain full charge.

Nominal rating: The spec value of the supply at stated conditions of input, output, and temperature.

Overshoot: A transient voltage change occurring during turn ON or OFF or during an abrupt load change.

Overvoltage (Overload) protection: Built-in circuits that protect the load or the supply by shutting it down or providing foldback.

Recovery: The time interval between the termination of an overload and restoration to normal operations.

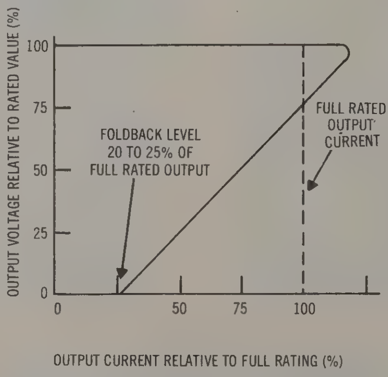

Fig. 2. Current foldback limiting self-resets with removal of fault.

Response: The time interval between a stated step change in input voltage or load current and return of output to normal operating conditions.

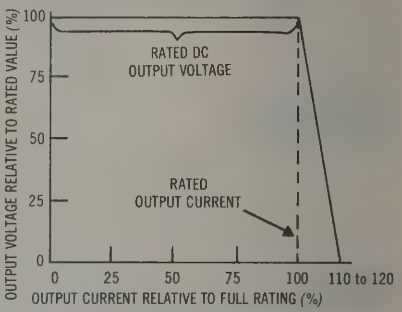

Fig. 3. Current limiting restrictions output current to a valve somewhat greater than full rated output; it resets when fault is removed.

Sensing: Regulation techniques that monitor output voltage and/or current. *Local sensing* refers to the output terminals. *Remote sensing* allows a feedback from the load circuit to the power supply.

Soft start: Allows the supply to start from zero current and/or voltage over a stated period of time during start up to prevent voltage overshoots and current imbalances.

Switchers: Power supplies using switching techniques to achieve high efficiency regulation. These techniques can have attendant EMI/RFI problems.

Tracking: The maintaining of fixed ratios between multiple outlets despite variations in line, load or temperature. Particularly important in supplies with symetrical (+)(−) outputs.

Transient protection: Circuitry designed to protect the supply from high amplitude line transients. Generally expressed in terms of peak voltage and maximum transient time duration.

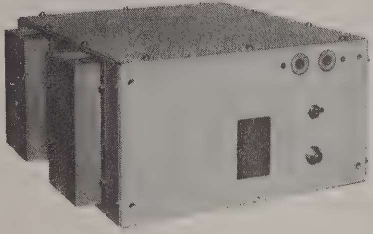
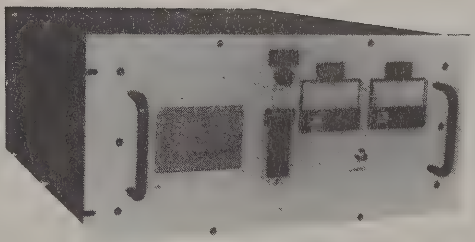
SOLID STATE SINE WAVE INVERTERS



- Input from 10 VDC to 800 VDC
- Output power: 125VA to 90KVA
- 12 VDC inverters for mobile use
- 24 VDC inverters for communications and security systems
- 48 VDC inverters for TELECOMMUNICATIONS
  .5KVA to 3KVA
  Optional solid state transfer switch
- 125 VDC inverters for electric utilities
- 240 VDC inverters for steel mills
- 600 VDC inverters for rapid transit
- Rated for operation to 50°C.
- NEMA 12 enclosures available



1KVA to 5KVA

SOLID STATE SINE WAVE FREQUENCY CONVERTERS

- 50 Hz, 60 Hz, 400 Hz Output
- Single Phase from 125VA to 15KVA
- Three Phase from 5KVA to 120KVA
- 400 Hz systems for Aviation and Avionics
  - Up to 96% Efficiency
  - Self Diagnostics
  - Paralleling
- Rated for continuous operation at 100% loading
- Input Frequency Range 47-440 Hz
- Operate from field generators
- All output voltages in use anywhere in the world.

AC to AC Converters for Power Test Applications, High Quality Laboratory Power, and Frequency Conversion

PAGE 1

- **Manual and Programmable AC Test Power up to 625kVA**
- **20 - 5000 Hertz Frequency Changers**
- **Power Supply Testing**
- **Facility Power Frequency Conversion**

Product Line Overview -- Pacific Power Equipment covers the range from 250VA to 625kVA. All of Pacific's products feature excellent load regulation, fast response to load transients and very low waveform distortion. The benefit of this performance is the ability to supply high quality power to loads that utilize high frequency switching regulators or multiple pulse rectification. Pacific equipment is unconditionally stable into any power factor load. Each phase is independently regulated and has no load balance restrictions.

Pacific Equipment Series

Each equipment series has application capabilities based on technology and design. For example, Pacific's G-Series is highly modularized, flexible, field expandable, and is serviceable with absolutely minimum spares or logistic support. When driven by an internally mounted 301-E Transient/Signal Generator, G-Series Test systems are unsurpassed in the Power Range of 6-90kVA. Tables I and II provide assistance in selecting the best series for your application. Please call your Pacific Representative, or the Factory direct if you would like to discuss your requirements.

TABLE I – Key Specifications By Series

	Power Range (kVA)	Output Freq. (Hz)	Output Reg. (%)	Transient Response (Microsec.)	Harmonic Distortion (%)
Programmable Test Power					
3060 MS-Series	62.5-625	47-500	1.0	<250	1.0
330-3450 G-Series/GO Modules	6-90	47-500	0.1	<50	0.75
330-3450 G-Series/GR Modules	6-90	47-5000	0.1	<10	0.75

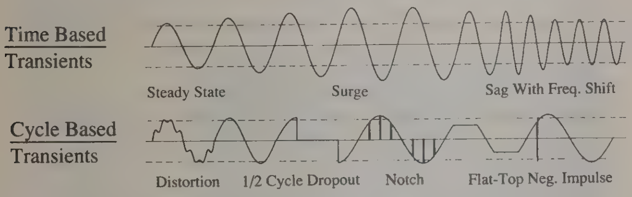
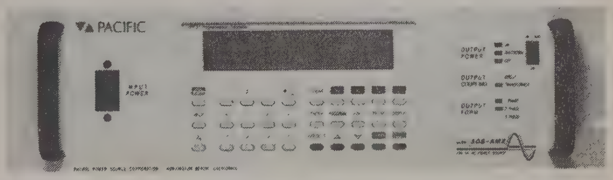
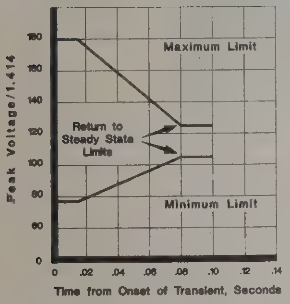
Using Pacific's AMX-Series UPC Controller's waveform edit capability, you can quickly create any steady state or transient condition you can draw.

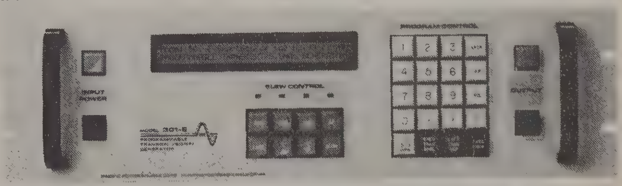




UPC Software commands provide simple to use, yet powerful control over all AMX-Series output parameters.

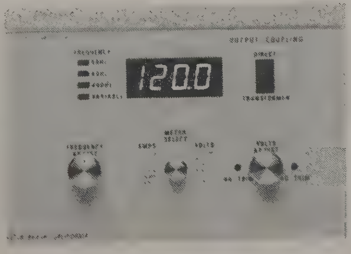


G-Series AC Test Power is provided by the precise, intelligent control of the 301-E Transient/Signal Generator.



The 301-E Transient/Signal Generator is a high performance signal source that provides both steady state and transient AC sinewaves to drive Pacific's G-Series equipment.

Manual Control with Maximum Versatility
Pacific's Manual Controllers provide voltage, phase, and frequency drive signals for our AMX and AT - Series Power Amplifiers.



AMX-Series - UMC-31 Controller

Key Features:

- Digitally synthesized, high quality sinewave
- One, two, or three phase operation
- Fixed or manually variable frequency
- Metering for output volts, amps and frequency

Product Applications

- Laboratory frequency, phase, and voltage converters
- Low impedance power for DC supply testing
- ATE stands where fixed high quality power is required

AMX Series – AC Power Solutions
From 500 VA to 4.5 kVA, 20 to 5000 Hz

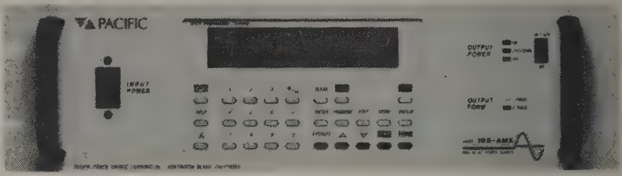
Combine Pacific's latest power amplifier series with your choice of power controllers for the ideal AC Test Power System.

Pacific's AMX-Series meets your AC Test Power needs with the following standard features:

- Manual and programmable models for application flexibility
- Multiple output ranges for voltage limit testing
- High peak current capability (Crest Factor) for electronic load testing
- Three phase/single phase switch selectable models for project flexibility
- High efficiency, quiet, rackmountable units for ATE applications

Programmable Controller

- Total program control over output voltage, frequency, phase angle, waveshape, and current limit
- Stored waveform library offers waveshape selection and total waveform edit capability
- Quickly create your own waveform to simulate distortion, clipping, etc.



Perform cycle or time based transients with Pacific's UPC-31 Programmable Controller.

Manual Controller

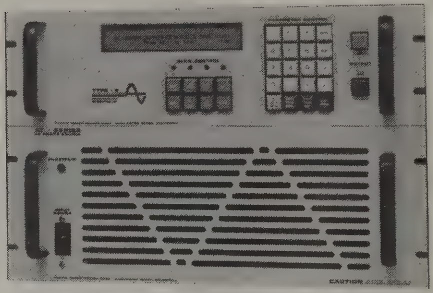
- Select single phase or three phase operation
- Select accurate fixed or variable frequency output
- Clearly visible, digital metering of output parameters.

AT-Series High Performance AC Power
From 1.0 to 6.75 kVA, 47 to 5000 Hz

These high performance, high efficiency power sources provide 2.25 kVA of very high quality power in 12.25 inches of rack space. Three units are field parallelable to achieve 6.75 kVA of single or three phase power.

Key features of this equipment are:

- 6:1 peak current (crest factor)
- Programmable controller
- Output power forms include:
  - 0-132 VAC direct coupled
  - 0-264 VAC direct or transformer coupled
  - 1, 2, or 3 phase output
- Automatic range changing
- Remote voltage sensing with disable
- No load power factor restrictions for output stability
- Electronic current limiting with auto recovery



- 0.1% load regulation with 10% line change
- 0.25% load regulation
- 0.75% total harmonic distortion
- Bandwidth, full power
  - ±0.1 db, 47-500 Hz
  - ±0.25 db, 20-5000 Hz
- Less than 15 microsecond response time to a step load transient

Programmable Controller

Pacific's Type E Controller provides total control over output voltage, current limit, phase, and frequency from the front panel or GPIB BUS. Up to 99 steady state and one transient program may be stored for execution. Up to 32 programmed waveforms simulating distortion, rectifier loads, squarewaves, etc., are easily accessed for the most stringent test application. Other features include full monitoring, steady state and transient sync signals, and an auxiliary input to superimpose harmonics on the output.

Manual Controller

Pacific's Type M Manual Controller is designed for applications requiring either fixed or manually variable AC output power. This cost effective controller provides a low distortion sinewave for both single phase and three phase power systems. It offers excellent control flexibility as well as accurate front panel monitoring of output voltage, frequency, and current parameters.

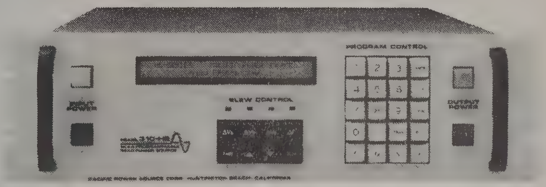
The 310-HE With Smart Source™ Interpreter

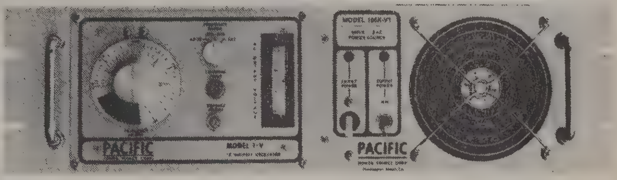
This three phase programmable power source is better by design. High efficiency and superior performance are brought neatly together in a compact package that is competitively priced. Rack mount or benchtop, these 5 1/4" high units combine high power and low profile – delivering 1000 VA from 20-2000 Hz into any power factor load. An IEEE-488 interface enhances application flexibility by providing a variety of talker/listener capabilities which allow the HE to interface into just about any ATE setup. The 310-HE uses its own 20-2000 Hz integrated controller and does not require an optional oscillator.



K-Series – Cost effective power sources from 250 VA to 4.5 kVA

The K-Series family covers the power range 250 to 4.5 kVA, single and three phase, in lightweight one-man portable units. A variety of plug-in oscillators are available for adaptation to either laboratory variable or fixed parameter OEM applications. Key features are:

- High Quality Power: Less than 0.75% distortion from 20-1000 Hz.
- 300% Peak Current Capability: Additional current capability for driving electronic power supply loads that draw current at the peak of the sinewave.
- Excellent Regulation: Less than 0.5% at amplifier output.
- Fast Transient Response: Less than 30 microseconds.
- No Power Factor Restrictions: Output is unconditionally stable into any power factor load.
- Short Circuit Protection: Output automatically recovers from an output short.
- Over 90 Standard Models cover most applications.



Model	Output kVA	Chassis
1xxK - xx	.25 - 1.5	5.25/10.5"
2xxK - xx	.43 - 2.6	5.25/10.5"
3xxK - xx	.75 - 4.5	5.25/10.5"

R - 0 to 125V output
T - 0 to 250V output
Oscillator type
Product Series
Output power (x100VA)
1 - single phase
2 - three phase DELTA
3 - three phase WYE

Oscillator Types

Type	Function	Frequency Range	Metering	Frequency Control
V	Variable frequency	47-500	± 3% analog	Dial. ± 3%
F	Fixed frequency	20-2000	± 3% analog	Preset ± .25%

Note: K-Series models are configured in 250 or 750 VA increments. For example a 315K-VR is a three phase WYE model with an output of 1500VA, a variable frequency analog oscillator and 0-125V output.

The G-Series - The Ultimate in Linear Power System Flexibility From 6 to 90 kVA

AC power sources utilize high performance linear technology to provide the ultimate in a clean waveform. Key features of this equipment are:

- Modular design/expandable/flexible/easy maintenance
- Fail safe circuitry with built-in diagnostics
- Delivers peak currents to 300% of rated capacity
- Fast 50 microsecond transient response time
- Less than 0.75% total harmonic distortion
- ± 0.1% output regulation at sense point
- No power factor or load balance restrictions
- All standard input power forms
- Many standard options
- Convertible to UPS

Systems may be configured to provide fixed, variable programmable frequency, voltage, and phase. Frequency range from 20 to 5000 Hz.

Control and Power Options
301-F Universal Control Module

- Provides for selection of three different control options:
  1. Internal oscillator at fixed frequencies of 50, 60, 400 Hz
  2. External signal generator
  3. Input from the 301-E programmable transient/signal generator from 20-5000 Hz
- Provides for selection of the ouput power form:
  1. Single phase operation or
  2. Three phase operation
- Provides control of the mainframe output contactor to turn output power on and off

301-E Transient/Signal Generator

- Provides total control of the output signal from either the front panel keypad or from a remote computer via the IEEE bus.
  1. Frequency
  2. Frequency transients
  3. Phase angle separation
  4. Phase transients
  5. Amplitude
  6. Amplitude transients

Power Modules

- 120-GO; Standard modules for applications from 45-500 Hz
- 120-GR; Enhanced modules for applications requiring motor starting, high short circuit current, frequencies to 5000 Hz and fast transient and harmonic reproduction

MS-Series High Efficiency, High Power Systems From 62.5 to 625 kVA

Pacific's MS-Series equipment is a family of high performance Line Conditioners/Frequency Converters designed to provide highly flexible yet reliable AC Power from 62.5 to 625 kVA.

Pacific's MS-Series Power Systems Feature:

- Maximum mission reliability with master/slave selection
- Rugged, powerful output of 350 A pulse current
- Facility/test power flexibility of variable/fixed frequency selection
- Simple yet informative display and diagnostics
- Operator safety assured with third party ETL approval

Each 3060-MS cabinet is capable of operating as either the master or slave in a paralleled system up to 10 cabinets.

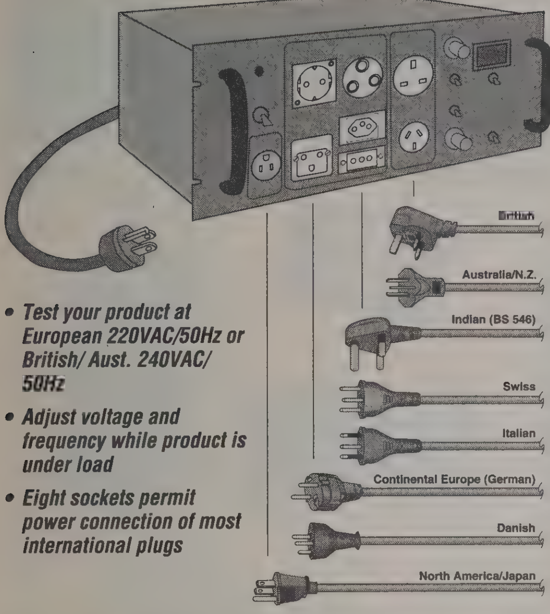
Interpower™ International Power Source



- *Test your product at European 220VAC/50Hz or British/ Aust. 240VAC/ 50Hz*
- *Adjust voltage and frequency while product is under load*
- *Eight sockets permit power connection of most international plugs*

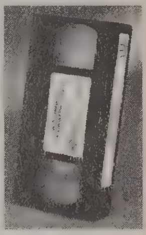
Test your export product...

The Interpower™ International Power Source provides a low-cost, convenient source of 50 Hz power which is important for testing many products that are exported. Output power is delivered through one of eight standard international sockets so that products configured with international power plugs can be conveniently powered during development or just prior to shipment. Output voltages are adjustable in the 0-260VAC range and frequencies can be adjusted in the 47-500Hz range while under load. This flexibility permits testing of products with varying input voltages and frequencies in order to simulate real-world power mains conditions. The power rating of the International Power Source is 750VA or 1KVA, depending on model.

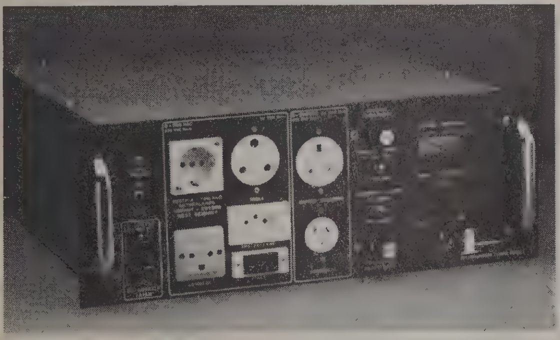
Three models are designed to accommodate U.S. input voltages of either 120V (supplied through a NEMA 5-15P or 5-20P plug) or 230V (NEMA 6-15P plug).

At 50 pounds, the unit can be easily moved between work stations or lab positions as needed. Dimensions: 19" wide x 7" tall x 19" deep behind the panel.

Delivery: stock to six weeks; call PCC Customer Service Department for stock level. ***Rental units are available.***



Call or FAX for a FREE VIDEO TAPE which shows how to use the International Power Source



Three models accommodate different U.S. input voltages:

#85510500: Interpower™ International Power Source converts North American voltage and frequency (120VAC/60Hz) to international voltages and frequencies, typically 220-240VAC/50Hz, single phase. Digital output monitor displays RMS voltage, current, frequency.

> **Input voltage:** 120VAC/60Hz (supplied through NEMA 5-15P plug)
> **Output voltage:** Variable voltage from 0-260VAC
> **Output frequency:** Switch allows range of 47-150Hz or 150-500Hz
> **Output capability:** 750VA

#85510510: Input voltage 20A/105-125V (NEMA 5-20P plug); 1KVA output capability.
#85510520: Input voltage 20A/210-250V (NEMA 6-15P plug); 1KVA output capability.

The sockets included on the International Power Source are listed below, as well as the standard single-phase test voltage/frequencies and maximum socket rating:

Socket	Volt./Freq.	Rating
Continental Eur. German CEE 7/7	220-230VAC/50Hz*	16A
Australia/New Zealand AS 3112 (Also People's Rep. of China)	240VAC/50Hz	10A
British BS 1363	240VAC/50Hz	13A
Denmark Afsnit 107-2-01	220-230VAC/50Hz*	10A
India (old British BS 546)	220VAC/50Hz	15A
Italy CEI 23-16/VII	220-230VAC/50Hz*	10A
Switzerland SEV 1011	220-230VAC/50Hz*	10A
North America NEMA 5-15R	120VAC/60Hz	15A
(also Japan)	100VAC/50& 60Hz	15A

* Note: European standard voltage will be changed from 220V to 230V by 1995.

SPECIFICATIONS:

Input Voltage:	#85510500: 115 VAC – NEMA 5-15P plug #85510510: 115 VAC – NEMA 5-20P plug #85510520: 230 VAC – NEMA 6-15P plug
Input Frequency:	45 to 65 Hz
Output Voltage:	0 to 130 VAC or 0 to 260 VAC; set from front panel potentiometer
Output Frequency:	47–150Hz or 150–500Hz; set from the front panel potentiometer

POWER CONDITIONERS

78VA TO 6kVA
SINGLE PHASE

Power Line Noise. It's one of the last problems you want to worry about when it's your job to keep sensitive electronic equipment on line and operational.

Powervar Power Conditioners are designed for use with switch mode power supplies found in today's sensitive electronic equipment. They provide low impedance isolation from both line and load generated noise disturbances.

A wide range of standard models and configurations are available to fit virtually any power conditioning application. Line cord/receptacle models are standard with a wallmount option in the smaller power sizes. Larger VA ratings feature both line cord/receptacle models as well as hardwired models. There is a wide range of input and output voltage configurations to match virtually every load connection need.

Keep control of the power to your sensitive equipment! For providing the protection you need from power line disturbances, it's Powervar–*the electronic system power specialists!*

FEATURES:

- *LOW IMPEDANCE ISOLATION TRANSFORMER*
  designed for use with loads using modern switch mode power supplies
- *BIDIRECTIONAL NOISE ABSORPTION*
  eliminates both line and load generated noise
- *WIDE RANGE OF MODELS*
  meet virtually all input/output and mounting requirements
- *SAFETY AGENCY LISTED UL, CSA, VDE, TUV*
  approvals fit world-wide applications
- *FIVE YEAR WARRANTY*
  provides unsurpassed reliability

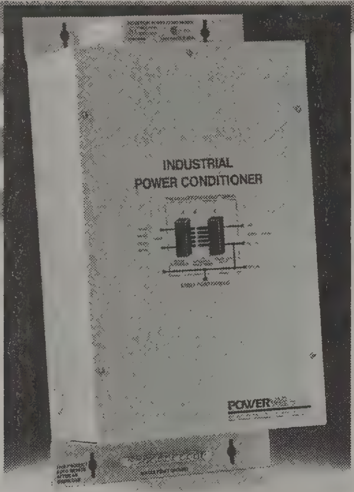
UL544 LISTED

MEDICAL POWER CONDITIONERS

78VA TO 2400VA

FEATURES:

- *UL 544 LISTED/CSA 22.2 No.125 CERTIFIED MODELS* for use in medical applications
- *BIDIRECTIONAL NOISE ABSORPTION* eliminates both line and load generated noise
- *LOW IMPEDANCE TRANSFORMER ISOLATION* provides less than 100 µA leakage current
- *HOSPITAL GRADE PLUG/RECEPTACLES* as required for use in the medical environment
- *OPTIONAL GCX MOUNTING CAPABILITY* provides a wide range of applications
- *FIVE YEAR WARRANTY* provides unsurpassed reliability

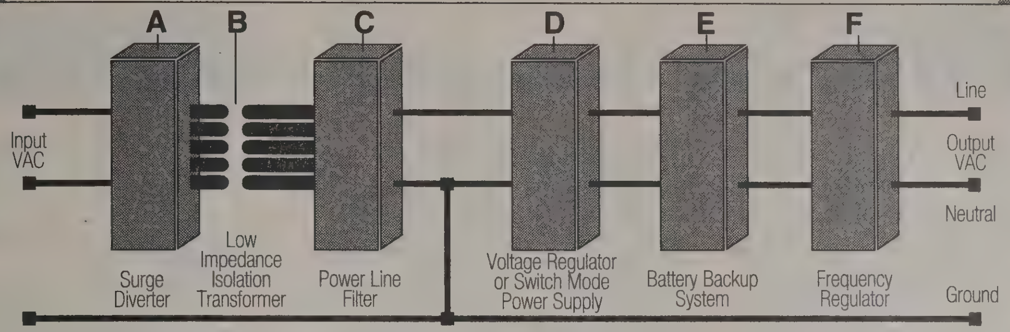


INDUSTRIAL POWER CONDITIONERS

360VA TO 1500VA

FEATURES:

- *FIELD SELECTABLE INPUT VOLTAGE* eliminates need for stepdown transformer and adapts easily to 480, 240, 208, or 120VAC input power
- *LOW IMPEDANCE TRANSFORMER ISOLATION* designed for use with modern PLC and DCS power supplies without oversizing
- *AUTORESETTING THERMAL SWITCH* eliminates inadvertant tripping of breakers
- *SINGLE POINT GROUND BUS* provides multiple equipment grounding re-quired by industrial systems
- *BIDIRECTIONAL NOISE ABSORPTION* eliminates both line and load generated noise
- *SPLASHPROOF WALLMOUNT ENCLOSURE* allows installation in any position or location



THE ABC'S OF POWER CONDITIONING®

A THE SURGE DIVERTER:

This most common "solution" protects your equipment from voltages over 250V, shorting out in the presence of these high intensity impulses. This component acts as a shield against the single destructive event–the ubiquitous lightning bolt–but does little to guard against the daily barrage of noise caused by switch mode power supplies, copying machines, maintenance equipment, air conditioners, elevators or the like. Surge Diverters are unable to correct for ground line disturbances because they do not contain an isolation transformer.

B THE LOW IMPEDANCE ISOLATION TRANSFORMER:

Low Impedance Isolation Transformers protect against common mode voltages: the errant noise and spikes which occur in all office, industrial or commercial buildings. This device blocks disturbances by establishing the vital connection between neutral and ground required by the National Electrical Code. This ensures that no voltage can appear between neutral and ground at the output of the low impedance isolation transformer.

C THE POWER LINE FILTER:

The Power Line Filter component attenuates low voltage impulses, thus providing a higher degree of normal mode noise protection than the Surge Diverter and Isolation Transformer between hot and neutral. The Power Line Filter is a piece that's often missing from power treatment systems. And its absence can often be the source of mysterious glitches and trouble calls, the reasons for which are never discovered.

D THE VOLTAGE REGULATOR:

This piece of the puzzle brings voltages to within the level required by the load for proper operation. Most computers, due to their switch mode power supplies, don't require voltage regulation. However, for equipment which uses a linear power supply, a Voltage Regulator may be recommended by your POWERVAR representative. In those cases, we'll probably suggest a tapswitching type. This prevents the introduction of new transients which can occur with the use of ferroresonant voltage regulators.

E THE BATTERY BACKUP SYSTEM:

This component provides continuing power in the event of a utility power outage. The most common backup system is a standby uninterruptible power system. These operate in a standby mode and turn on when a power outage is detected. The majority of battery backup systems provide limited, if any, ABCD power line noise protection.

F THE FREQUENCY REGULATOR:

Frequency Regulation is accomplished through the use of an on-line uninterruptible power system. The on-line inverter provides constant power to the sensitive load by continually regenerating the AC waveform from a DC source. When a utility power failure occurs, power is continued to the load through the use of the UPS battery.

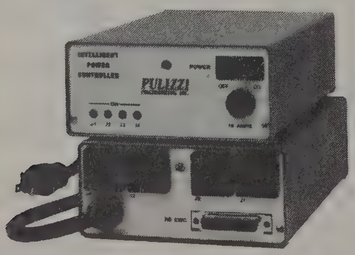
NEW PRODUCT

IPC-3100*



•Patent Pending

INTELLIGENT POWER IPC 3100 SPECIFICATIONS

The **IPC-3100*** is a **micro processor** based AC power distribution system. It can be operated remotely with a switch, or via a modem to power up less accessible equipment or computers.

This unit is 5 3/4" W by 2 1/2" H by 9" D and weighs 2 1/2 lbs. Four NEMA 5-15R outlets, a NEMA 5-15P input plug, 15 amp resettable circuit breaker and indicator lights are provided.

Operation is via an on / off switch and rear-mounted RS 232 serial port. When the unit is turned on, all four outlets power on in sequential order, via the serial port, any or all of the outlets can be turned on or off by a fixed command syntax. The unit is also capable of pre-programmed timed responses. Optional features such s "WATCH DOG" function to monitor communication link, which can also re-boot the system, EMI/RFI filtering and spike and surge protection are available. The basic concept of the IPC can also be packaged for rack-mount applications.

OUTPUTS:
4 NEMA 5 - 15R
INDIVIDUALLY SELECTED
VIA COMMUNICATIONS PORT

INPUT AC POWER:
AC VOLTAGE - 95 / 130
MAX CURRENT 15 AMP

INDICATORS:
LIGHTED ON / OFF ROCKER SWITCH
4 GREEN LED"S, 1 FOR EACH OUTLET

COMMUNICATIONS PORT:
RS 232 - C
CONFIGURED DTE
DBM 25PIN FEMALE
8 BIT DATA, 1 STOP BIT, NO PARITY
2400 BAUD RATE

PROTECTION:
15 AMP RESETABLE PUSH BUTTON
CIRCUIT BREAKER

RACK MOUNTED

Designed to fit standard 19" wide EIA STD.
Rack 1¾" high, 5" deep.
Weight: A&B 7 lbs. C-F 8 lbs.

EMI/RFI FILTER

Dual Protection:
Common mode, line to ground.
Differential mode, line to line.

8 OUTLETS

6 mounted on the rear for easy access to other instruments in the cabinet, 2 additional outlets on the front panel.

OPTIONAL REMOTE FEATURES:

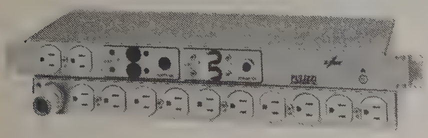
Low voltage remote:
Pins 1 & 4 are for remote on/off with 24VAC between the pins. Pins 2 & 4 are for a remote indicator light with 24VAC between the pins. (Add "RL" to end of standard part number.)

INDICATOR LIGHT

Power to controller switched "ON"

NOTE:
Specifications listed below for models A through D only. Models A, B & C are both UL & CSA. Model D is UL only.

TPC 981



RACK MOUNTED

Designed to fit standard 19" wide EIA STD.
Rack 1¾" high, 7.0" deep.
Weight: A&B 7 lbs. C-F 8 lbs.

EMI/RFI FILTER

Dual Protection:
Common mode, line to ground.
Differential mode, line to line.

INDICATOR LIGHT

Power to controller switched "ON."

12 OUTLETS SWITCHED

10 mounted on the rear for easy access to other instruments in the cabinet and 2 additional outlets on the front panel.
Optional: The 2 outlets can be unswitched and the 10 outlets remain switched.

NOTE:
Specifications listed below for models A through F only. Models A, B, C & F are both UL & CSA. Model D is UL only.*
*Models with optional breaker do not carry agency approvals.

TPC 115-10

delivery

RACK MOUNTED

Designed to fit standard 19" wide EIA STD.
Rack 1¾" high, 8" deep.
Weight: 14 lbs.

EMI/RFI FILTER

Dual Protection:
Common mode, line to ground.
Differential mode, line to line.

10 OUTLETS

8 outlets switched, 2 outlets unswitched, always "ON" for convenient AC Power requirements.

INDICATOR LIGHT

Power to controller.
Power to switched 1 outlets.
Power to switched 2 outlets.

TIME DELAY, POWER UP (MTD™)

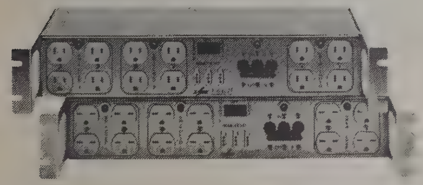
Multiple Time Delay®, approximately 4 seconds between switched outlets 1 and switched outlets 2, provides sequential power up through the 8 switched outlets. Time delay remote power up.

REMOTE POWER CONTROL BUS

5 Remote I/O connectors for either;
A) Remote Power On/Off
B) Emergency shutdown with a mechanical, electronic or Thermo switching device.
C) Power up additional equipment.
D) Sequencing power up of additional equipment with MTD™

NOTE:
Specifications listed below for models A through D only. Models A, B & C are both UL & PENDING CSA. Model D is UL only.

PC 125
DEC® COMPATIBLE WITH
MODEL 871, MODEL 861



RACK MOUNTED

Designed to fit standard 19" wide EIA STD.
Rack 3½" high, 6" deep (excluding recess brackets). Front panel recessed 2½" with convenient side cut outs for cable routing.
Weight: 19 lbs.

EMI/RFI FILTER

Triple noise protection:
Both common mode and differential mode, plus high frequency ground isolation.

NOTE:
Specifications listed below for models A through F only. Models A, B, C & F are both UL & CSA. Model D is UL only.

12 OUTLETS

8 outlets switched, 4 outlets unswitched, always "ON" for added convenience.

INDICATOR LIGHT

Power to controller. Power to unswitched outlets. Power to switched outlets.

REMOTE POWER CONTROL BUS

3 Remote I/O connectors for either:
A) Remote Power On/Off
B) Emergency shutdown with a mechanical, electronic or Thermo switching device.
C) Power up additional equipment down line.

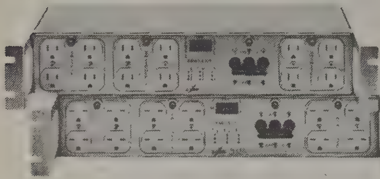
DEC® COMPATIBLE
WITH MODEL 861



RACK MOUNTED

Designed to fit standard 19" wide EIA STD. Rack 3½" high, 6" deep (excluding recess brackets).
Front panel recessed 2½" with convenient side cut outs for cable routing.
Weight: 19 lbs.

EMI/RFI FILTER

Triple noise protection:
Both common mode and differential mode, plus high frequency ground isolation.

12 OUTLETS

8 outlets switched (time delay standard)
4 outlets unswitched always "on" for convenient AC power requirements.

INDICATOR LIGHT

Power to controller.
Power to switched outlets.
Power to unswitched outlets.

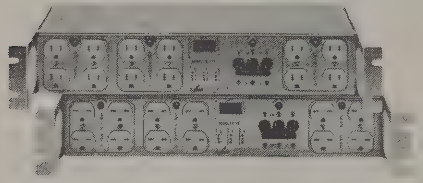
TIME DELAY, POWER UP

Time delay approximately 4 seconds between switched outlets 1 and switched outlets 2.
Models A-F only are UL approved.

REMOTE POWER CONTROL BUS

3 Remote I/O connectors for either:
A) Remote Power On/Off
B) Emergency shutdown with a mechanical, electronic or Thermo switching device.
C) Power up additional equipment down line with a 4 second delayed remote.

PC 585/MTD™
POWER DISTRIBUTION
AND CONTROL SYSTEM



RACK MOUNTED

Designed to fit standard 19" wide EIA STD. Rack 3½" high, 6" deep (excluding recess brackets).
Front panel recessed 2½" with convenient side cut outs for cable routing.
Weight: 19 lbs.

EMI/RFI FILTER

Triple noise protection:
Common mode and differential mode, plus high frequency ground isolation.

12 OUTLETS

4 outlets for each of the three switched sections.

INDICATOR LIGHT

Power to controller.
Power to switched 1 outlets.
Power to switched 2 outlets.
Power to switched 3 outlets.

TIME DELAY, POWER UP

MTD systems incorporate Multiple Time Delay power up and down between the switched sections. This is approximately 4 seconds between switched outlets 1, 2 and 3 powering up and powering down. 1/MTD system incorporate Multiple Time Delay power up between the switched sections only. 585 systems without MTD do not incorporate Multiple Time Delay. All three switched sections power up at one time.

REMOTE POWER CONTROL BUS

3 Remote I/O connectors for either:
A) Remote Power On/Off
B) Emergency shutdown with a mechanical, electronic or Thermo switching device.
C) Power up additional equipment.

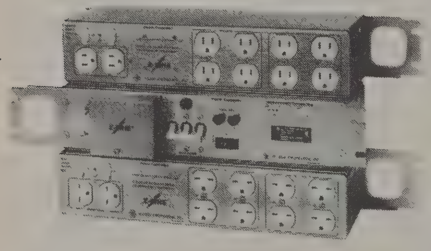
CATALYST PROGRAM



RACK MOUNTED

Designed to fit standard 19" wide EIA STD. Rack 3½" high, 6¾" deep.
Weight: A&B 15 lbs., C-F 18 lbs.

OPTIONAL

Front panel recessed 2½" with convenient side cut out for cable routing.

EMI/RFI FILTER

Triple noise protection:
Both common mode and differential mode, plus high frequency ground isolation.

10 OUTLETS

8 outlets switched, 2 outlets unswitched always "ON" for convenient AC power requirements.

INDICATOR LIGHT

Power to controller.
Power to switched 1 outlets.
Power to switched 2 outlets.

TIME DELAY, POWER UP

Time delay approximately 4 seconds between switched outlets 1 and switched outlets 2 (models C-F).

REMOTE POWER CONTROL BUS

4 Remote I/O connectors for either:
A) Remote Power On/Off
B) Emergency shutdown with a mechanical, electronic or Thermo switching device.
C) Power up additional equipment down line.

MTBF
(MEAN TIME BEFORE FAILURE)

Per MIL-HDBK-217E
PC 874-C 108,897 Hrs.
PC 874-F 116,414 Hrs.

NOTE:
Specifications listed below for models A through F only. Models C & F are both UL and CSA, Models A, B & D are UL only.

SPECIFICATIONS FOR MODEL NUMBERS: PC 874 A-F, PC 420 A-F, PC 585 C-F, PC 585-1/MTD C-F, PC 585/MTD C-F

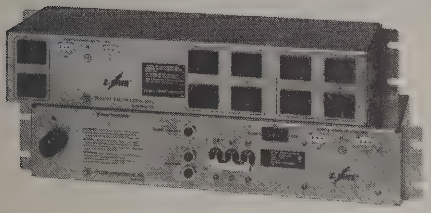
SUN MICROSYSTEMS COMPATIBLE – CATALYST PROGRAM



RACK MOUNTED

Designed to fit standard 19" wide EIA STD. Rack 3½" high, 6¾" deep, with 1" inset mount. Weight: 18 lbs.

EMI/RFI FILTER

Triple noise protection:
Both common mode and differential mode, plus high frequency ground isolation.

10 OUTLETS

8 outlets switched, 2 outlets unswitched, always "ON" for convenient AC power requirements. IEC 320 rated at 10 AMPS/250VAC (VDE) or 15 AMPS/250VAC (UL/CSA).

PLUGS ARE OPTIONAL

TUV: Pin and sleeve 220-240V, 32A. IEC 309.
UL/CSA: Pin and sleeve 250V, 30A. IEC 309.
NEMA L6-30P 250V, 30A.

INDICATOR LIGHT

Power to controller.
Power to switched 1 outlets.
Power to switched 2 outlets.

TIME DELAY, POWER UP

Time delay approximately 4 seconds between switched outlets 1 and switched outlets 2, provides sequential power up through the 8 switched outlets.

REMOTE POWER CONTROL BUS

4 Remote I/O connectors for either:
A) Remote Power On/Off
B) Emergency shutdown with a mechanical, electronic or Thermo switching device.
C) Power up additional equipment.

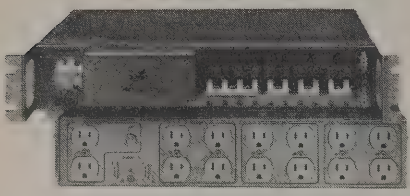
PC 300 and PC 300 MTD™

3-PHASE INPUT,
SINGLE PHASE OUTPUT



RACK MOUNTED
Only 3½" high, 14½" deep and 19" rack mounted. Recessed 2½" to either the front or back panel. Flush mounted panels are also available. Weight: 29 lbs.

EMI/RFI FILTER
30 amps per phase, triple noise protection. Both common mode and differential mode, plus high frequency ground isolation.

14 OUTLETS
Located on the back panel. 4 switched receptacles allotted per phase plus two utility outlets.

INDICATOR LIGHT
1 light to indicate "power on" to system. 3 additional lights to indicate "switched power on" to all phases (X,Y,Z).

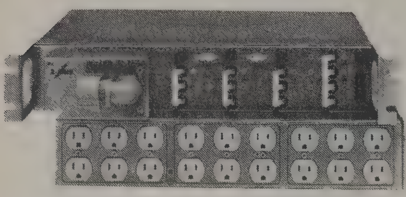
TIME DELAY, POWER UP
Time delay approximately 4 seconds between phase X, Y and Z provides Multiple Time Delay™ power up through the 12 switched outlets. (MTD models only)

REMOTE POWER CONTROL BUS
4 bussed remote I/O connectors allows for:
A) Remote Power On/Off
B) Emergency shutdown with a mechanical, electronic or Thermo switching device.
C) Power up additional equipment down line.

NOTE:
Specifications listed below for models C, C/MTD, D, D/MTD.

PC 726 and PC 726 MTD™

3-PHASE INPUT,
SINGLE PHASE OUTPUT



RACK MOUNTED
Only 3½" high, 14½" deep and 19" rack mounted. Recessed 2½" to either the front or back panel. Flush mounted panels are also available. Weight: 29 lbs.

EMI/RFI FILTER
30 amps per phase, triple noise protection. Both common mode and differential mode, plus high frequency ground isolation.

18 OUTLETS
Located on the back panel. 6 switched receptacles allotted per phase.

INDICATOR LIGHT
1 light to indicate "power on" to system. 3 additional lights to indicate "switched power on" to all phases (X,Y,Z).

TIME DELAY, POWER UP
Time delay approximately 4 seconds between phase X, Y and Z provides Multiple Time Delay™ power up through the 18 switched outlets.

REMOTE POWER CONTROL BUS
2 bussed remote I/O connectors allows for:
A) Remote Power On/Off
B) Emergency shutdown with a mechanical, electronic or Thermo switching device.
C) Power up additional equipment down line.

NOTE:

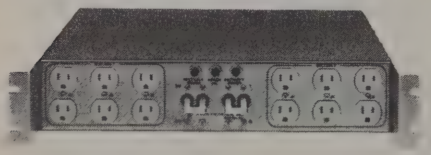
SDC 1559

STEP DOWN VOLTAGE CONTROLLER



RACK MOUNTED
Designed to fit standard 19" wide IEC STD.
3.5" high. 17" deep.
Front panel recessed 2.5".

STEP DOWN VOLTAGE
Plug the SDC 1559 into European current and plug 125V equipment into the SDC 1559. This unit can be configured for step-up voltage applications. Contact factory for more information.

EMI/RFI FILTER
Common and Differential mode SDC 1559-C, & SDC 1559-D are filtered & have spike & surge protection.

12 OUTLETS
Six outlets in section 1 and six in section 2.

INDICATOR LIGHT
Power to controller.
Power to section 1.
Power to section 2.

MINIGLOSSARY
CONNECTORS

Connector terminology is often quite confusing. This confusion starts with the very names of connectors. The name of a connector may derive from its shape, application, type of conductor or even method of termination.

Shape—Circular, cylindrical, and rectangular.

Electrical application—High voltage, RF, microwave, input/output, etc.

Mechanical application—Printed circuit, rack & panel, cable, etc.

Conductor type—Coaxial, flat cable, ribbon cable, flex circuit, etc.

Termination method—Wirewrap, soldercup, solderless, etc.

Hardware such as clamps, hoods, and adapters are frequently used to convert cable connectors to rack and panel types. This adds to the name confusion. A very common telephone connector, for example (the "C" type) got its name from the model number of the original maker.

Contact: The part(s) of the connector that actually provides circuit continuity between its two sections—the parts which are normally mated. The back end of the connector should properly be called the *termination.* This is the point where the wires or PC board is attached to the connector.

Contact alignments: Often called *contact float.* Describes the amount of allowable contact movement within the connector body. Permits self-alignment.

Male vs. female: In the U.S. this describes the contact construction. In Europe this term is more often used to describe the outer shell mating action which may be the reverse of the contacts.

Closed entry: A female contact which prevents entry of a male contact larger than a specific size.

Open entry: A female contact designed for a specific size of male contact but which will allow entry of larger male contacts by spring action.

Hermaphrodite: Contacts or connector bodies which are the same configuration. Male/female designations do not apply. Bodies usually have some mechanical means for maintaining polarity.

Hermetic seal: Glass-to-metal seals at terminations. Often used improperly to describe vacuum-tight seals.

Waterproof seal: May or may not be truly *waterproof.* May prevent easy entrance of casual water by means of a rubber or other boot.

Printed circuit connector: Connectors which are used in conjunction with printed circuit boards. There are two distinctly different styles.

Edgeboard. May be called *edge* or *card.* The printed circuit (PC) board edge enters the connector.

Two-piece: One part of the connecting pair is physically attached to the PC board itself. The other part is attached to something else such as a cable or a motherboard.

Readout: Describes the arrangement at the terminating edge of a PC board. May be single or double. A double readout PC board has termination strips on each side not usually interconnected.

Ribbon connectors: A type of connector which allows flat "ribbon" cable to be attached to a round or rectangular connector but also used interchangeably for flat connectors to flat cable.

Ribbon contact connector: Describes the contacts in a rectangular connector which have a self-wiping mating action. Not the same as ribbon connector.

Solderless terminal: Any style of termination which does not require solder for a permanent connection. See *crimp* and *insulation displacement.*

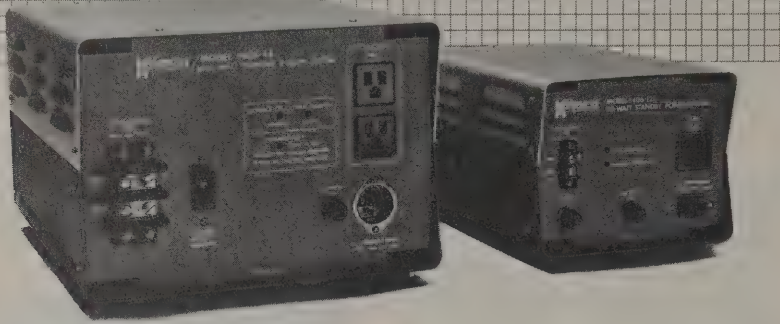
Crimp termination: A stripped wire is inserted into a barrel or trough which is then crimped to the conductor with a suitable tool.

Insulation displacement: Unstripped insulated wire is fitted into a channel containing metal teeth which are forced through the insulation to make contact with the conductor.

Service rating: The maximum rated voltage and/or current which may be applied continuously. May be called *working voltage.* Can be confused with the term used to describe how many times a connector may be mated and separated.

Withstanding voltage: Also called *test voltage.* The voltage a connector must withstand for one minute without breakdown. Applied between connectors and between connectors and shell and any grounding devices of the connector.

Wilmore



DC-To-AC Inverters And UPS/Standby Power Systems

- **Power Ratings From 50 To 1000 Volt-Amperes**
- **Standard Input Voltages 12, 24, 48 Volts**
- **Highly Efficient**

Inverters and Standby Power Systems described on this page provide a three-level step waveshape output having peak, average and rms voltages that approximate those of a pure sine wave while maintaining high operating efficiencies comparable to square-wave output inverters. They are suitable for powering most sensitive electronic loads including personal computers, chart recorders, communications equipment, and test instruments. Most models also provide a 2:1 output-power surge capability for powering loads with high inrush current demands, such as small motors, heating elements, lighting, and small power tools. All models have excellent frequency stability (±0.15 Hz), wide operating ambient temperature range (–20˚C to 55˚C), and low idle-current demand.

DC-to-AC Inverters

Table 1 details the characteristics of Wilmore's heavy-duty portable inverters. Please note that only the 12-volt (or 24-volt for 1000-VA power level) input versions appear on the table. Other versions may be specified for 24-volt nominal and 48-volt nominal inputs. Simply replace the "12" in the model number with the desired nominal input voltage. Also, please note that 230-volt, 50-Hertz versions are available for all models. Replace "115" with "230" and "60" with "50" in the model number to specify such models. For example, a 1000-VA, 48-volt input, 230-Vac, 50-Hz output model would have the following number, Model 1404-48-230-50.

Standby Power Systems

Each Wilmore Standby Power System consists of a dc-to-ac inverter, a battery charger and sensing/transfer circuitry. In normal operation, commercial power is presented directly to the load and the System float charges the user's battery and monitors the ac line. When commercial power is interrupted, the sensing circuitry detects the loss of power and transfers the load to the inverter. This sensing and load transfer takes less than 15 milliseconds. When the commercial power returns, the sensing circuitry will sample the ac line for a period of 5 to 7 seconds to ensure that proper ac voltage is maintained. The reverse transfer from inverter operation to normal ac operation is then accomplished, also in less than 15 milliseconds. With the load again being supplied directly from the commercial line, the battery charger begins to recharge the user-supplied batteries.

Table 1. DC-to-AC Inverters

Output Power (Volt-Amps)	Nominal Input Voltage (Vdc)	Nominal Output Voltage And Frequency (Vac/Hz)	Dimensions (h" x w" x d")	Weight (Pounds)	Efficiency (Typical)	Model Number
50	12	115/60	4.2 x 5.2 x 7	6	60%	**1401-12-115-60**
250	12	115/60	7.7 x 9 x 12	31	80%	**1402-12-115-60**

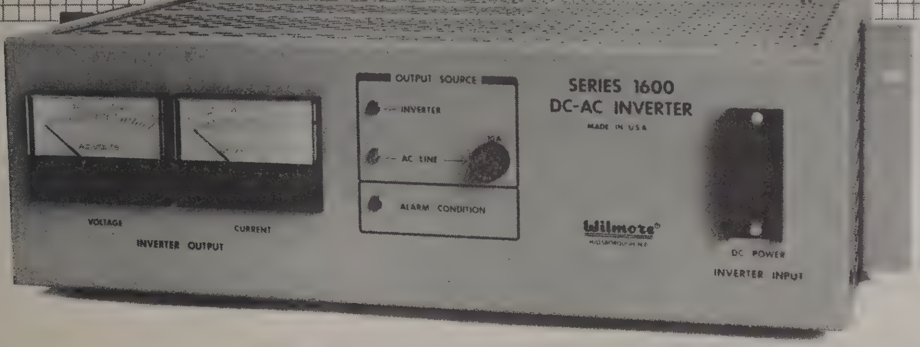
Wilmore

Sine-Wave DC-To-AC Inverters



- **Sine-Wave Output**
- **Power Levels Starting At 500-VA**
- **24, 48, Or 130-Vdc Input**
- **Small, Lightweight**
- **78%-85% Efficient**

Wilmore Electronics introduces a completely new type of dc-to-ac power inverter for telecommunications and industrial applications. The sine-wave-output Series 1600 inverters are true "four-quadrant" power sources. That is, they can provide rated voltage and current regardless of the phase relation of these two power components. Not only are they well-suited to powering waveshape-sensitive equipment; these rack-mount inverters are compatible with many loads normally considered difficult for solid-state power inverters. High surge, nonlinear, high crest factor, and even half-wave-rectified loads can be powered by the Series 1600. In addition there are no practical limitations on allowable load power factor.

Inverter Specifications

The Series 1600 inverters have nominal dc input voltages of 24, 48, or 130 volts. The output waveform is a pure sine wave with very low total harmonic distortion (1-3%). Excellent frequency stability (±0.01 Hz) and a well-regulated output voltage (±1.5% versus dc input line and ±2.5% versus load) are additional features of these highly efficient inverters.

The 500-VA, 120-Vac output inverter measures 5.20″ high x 17.00″ wide x 13.25″ deep. (Weight is approximately 23 lbs.) All versions are designed for 19-inch or 23-inch rack mounting.

Optional Transfer Circuitry

These dc-to-ac inverters are available with optional internal high-speed transfer circuits to provide inverter-to-line or line-to-inverter automatic load transfer. ("Line" refers to commercial ac power.)

In the inverter-preferred configuration, the load power is normally provided by the inverter. However, if the inverter output is interrupted, an internal transfer switch automatically transfers the load from the inverter to commercial ac power. Because the transfer time between inverter and line is short (2 msec. typical) and because the inverter is automatically synchronized in both frequency and phase to the commercial power line, such transfers are normally not detected by even highly sensitive loads. Upon restoration of inverter power, there is a delay of approximately four seconds, during which frequency and phase synchronization are gradually re-established, and then transfer back to inverter power automatically takes place.

In the line-preferred configuration, the load power is normally provided by the commercial ac line and the inverter operates in the standby mode.

Protection

Protection against overloads and short circuits on the output is provided electronically. Recovery to normal operation is automatic upon removal of the fault.

Electronic protection is also provided for undervoltage or overvoltage on the input. Return to normal operation is automatic.

Protection against accidental reversal of the input-voltage polarity during installation is provided by a shunt diode working in conjunction with the front-panel circuit breaker.

Series 1600 New Product Development

The Series 1600 is a rapidly expanding line of rack-mount dc-to-ac sine-wave inverters, beginning with the 500-VA, 120-Vac output version. New versions, varying in power level, input voltage, output voltage and frequency are continually being added.

Please contact Wilmore's sales department for the availability of inverters meeting your power requirements.

Custom-Designed Sine-Wave Power

The majority of our work is designing and manufacturing custom power conversion equipment. If you have an application requiring a low-distortion, well-regulated ac power source, our unique sine-wave power circuitry can make it lighter, smaller and electrically rugged. Whether you would like a quotation on your completed specification or just want to discuss your application, our New Products Group would like to hear from you.

EXTREME ISOLATION TRANSFORMERS

FEATURES

- Commercial, industrial and medical applications
- Guaranteed to stop noise problems
- Eliminates power and system ground loops
- Up to 160dB common-mode rejection
- UL listed
- CSA approved
- VDE certified models
- TWO-YEAR WARRANTY

SPECIFICATIONS

Input:
Nominal voltage ±15% (1 KVA and up); ±10% (750 VA and below); 50-60 Hz.

Load Regulation:
±3% of input voltage, no load to full resistive load.

Common Mode Rejection:
160dB (-3x models); 140dB (-2x models); 120dB (-1x models).

Normal Mode Rejection: 60dB.

Isolation:
Resistance: 10,000 MΩ.
Capacitance: 0.0001pf (-3x models); 0.001pf (-2x); 0.005pf (-1x).

Leakage Current:
≤50μA (EIT, TRI and VDE Series).
≤10μA (LGT Series).

Dielectric Strength:
2500VAC (all EIT, TRI and LGT);
3750VAC (all VDE Series).

Efficiency: Greater than 92%.

Operating Temperature:
Full load up to 40°C ambient.

Approvals:
UL 1012; CSA 22.2-066 and UL 544 (ordinary patient care) on all models.
VDE 0550 on VDE prefix models.
UL 544 (patient connected) on all LGT Series.

250 - 750 VA SINGLE PHASE MINI-ISOs

INPUT	OUTPUT	250 VA	500 VA	750 VA
115V	115V	EIT 250-11	EIT 500-11	EIT 750-11
230V	230V	EIT 250-12	EIT 500-12	EIT 750-12
230V	115V	EIT 250-15	EIT 500-15	EIT 750-15
115V	230V	EIT 250-16	EIT 500-16	EIT 750-16

Note: all models are equipped with 6.5' line cord and duplex receptacles.

1.0 - 5.0 KVA SINGLE PHASE

INPUT	OUTPUT	1.0 KVA	2.5 KVA	5.0 KVA
115/230V[1]	115/230V[1]	EIT 1.0K-20	EIT 2.5K-20	EIT 5.0K-20

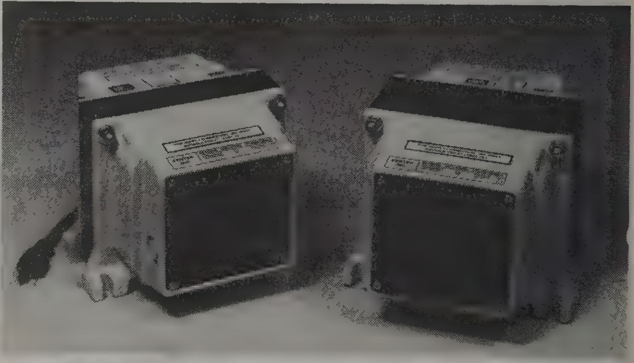
115V	230V	EIT 1.0K-26	EIT 2.5K-26	
Universal[4]	120/240	EIT 1.0K-27 VDE 1.0K-27	EIT 2.5K-27 VDE 2.5K-27	EIT 5.0K-27 VDE 5.0K-27
Universal	120V	EIT 1.0K-28	EIT 2.5K-28	EIT 5.0K-28
Universal	240V	EIT 1.0K-29	EIT 2.5K-29	EIT 5.0K-29

Note: models shown are rated for 140dB CMR. For 160dB CMR, replace the "-2" in the model number suffix with "-3", e.g., for 1.0 KVA, 115VAC input/output with 160dB CMR, specify model EIT 1.0K-31.

[1] All multiple voltage input and output connections are via barrier strip.
[2] All single voltage input connections are via 6.5' line cord.
[3] Single voltage output connections: 1KVA – duplex receptacle; 2.5KVA – single Twistlok receptacle.
[4] Universal input: 100/120/200/220/240VAC.



3.0 - 15 KVA THREE PHASE

INPUT	OUTPUT	3.0 KVA	7.5 KVA	15.0 KVA
208Y/120	208Y/120	TRI 3.0K-20	TRI 7.5K-20	TRI 15K-20
240 Delta	208Y/120	TRI 3.0K-21	TRI 7.5K-21	TRI 15K-21
480 Delta	208Y/120	TRI 3.0K-22	TRI 7.5K-22	TRI 15K-22

Note: models shown are rated for 140dB CMR. For 160dB CMR, replace the "-2" in the model number suffix with "-3", e.g., for 3.0 KVA, 208Y/120 input/output with 160dB CMR, specify model TRI 3.0K-30.

Life-Guard™ Medical Isolation Transformers

FEATURES

- UL 544 Listed for isolated patient connected applications
- Leakage Current less than 10µA
- Hospital Grade line cord and receptacles on most models
- TWO-YEAR WARRANTY

Special care must be taken in medical and dental applications to *isolate* the equipment from common-mode noise and ground-loops and *insulate* the equipment against potentially harmful leakage currents.

All Xentek extreme isolation transformers comply with UL544 leakage requirements for non-patient connected equipment. And Xentek Life-Guard extreme isolation transformer models comply with UL544 requirements for isolated patient connection.

Xentek Life-Guard extreme isolation transformers offer the ultimate in leakage current protection. These top-quality units are fully certified under UL544 for isolated, patient connected applications. Leakage current is limited to under 10µA. And all LGT Series models provide complete protection against common-mode noise and transients.

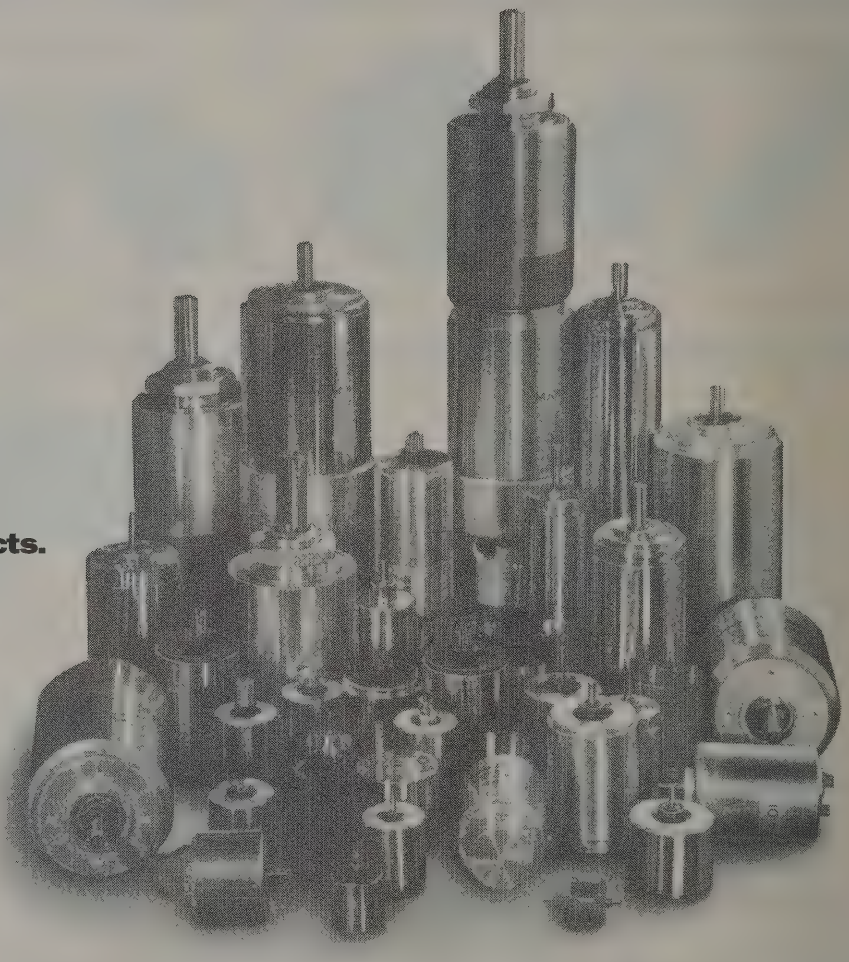
The Original Miniature Component Line:

System Faulhaber® Minimotor™ and Micro Mo® Products With over 30 years of engineering and applications experience in your field of interest.



If you specify components for:
- Sampling systems.
- Asbestos pumps.
- Loggers & monitors.
- Respirators
- Gas analyzers.
- Air purifiers.
- Laboratory robotics.
- Vacuum pumps.
- Portable, remote, and battery operated equipment.

...You should be using Micro Mo® brand products.

WHY?
- Size: 3/8" - 4 3/4" diameters (10mm - 120 mm).
- Reliability (with efficiencies of up to 80% in battery operated devices).
- Very low electrical and mechanical noise.
- Low starting voltage and current consumption.
- No clogging, even at low speeds.

Options:
- Hi-temperature versions (for autoclaving and sterile environments).
- Model ranges from .8 to 48V DC.
- Double shafts.
- Sintered or preloaded ball bearings.
- Special commutations for servo applications or extended lifetime.
- Slip-on and screw-on gearheads, encoders, tachs and tachnogenerators.

Personalized Service:
- "Guaranteed Stock Program" for engineering samples (optional next-day delivery).
- "On-Line Inventory" arrangements for your particular production requirements.
- Over 600 different items currently in production.
- Replacement parts available in 15 countries worldwide for exporting OEMs.
- Specialty lubricants, shafts, adapters, and sub-assemblies.

TS PRODUCTS ➡ *Motion Products*

LINEAR/ROTARY ACTUATORS FOR MICRO-POSITIONING
CLOSED/OPEN-LOOP CONTROLLERS FOR IRONLESS-CORE DC-MOTORS
CUSTOM MOTION SYSTEMS • OEM CONFIGURATIONS

µ-PROCESSOR CONTROLLERS

CONTROL2 *SMARTBOX*

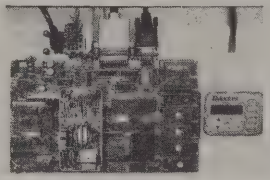
Primarily-designed for Linear and Rotary Actuators, **CONTROL2** links most DC motors to any computer via RS-232/IEEE-488. Closing the position loop through A-QUAD-B encoders, it provides position control by a pseudo-PID-type algorithm operating through an external velocity servo. With programmable start and stop ramps to accommodate various motor dynamics and loads, a comprehensive ASCII command structure provides operational flexibility. A JOYSTICK with programmable response controls six axes from front-panel or optional remote location.

Continuously augmented from user suggestions, **CONTROL2** features zero overshoot on point-to-point movements and high stability in the presence of external loads.

FEATURES

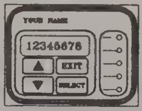
- Simultaneous 2/4/6 axes.
- Built-in progmble Joystick.
- Jog/Slew functions.
- Backlash compensation.
- Triple encoder filtering.
- Limit detection/backoff.
- Emerg STOP functions.
- Power condition outputs.
- Motionless power ON/OFF.
- Rackmount option.
- Accepts ext motor pwr.
- Watchdog timer.
- Remote E-Stop inputs.
- Int non-volatile memory.
- External STOP input.
- Concurrent comms.
- Programmable ramps.
- Vel mod during movement.
- Conditional movement.
- H/P HCTL-2000 Counters.
- 16/32/48 TTL inputs.
- 8 TTL outputs.
- Motion condition outputs.
- Int/Ext Status Indicators.
- 1/2/4X counting factors.
- External limit switches.
- Power OFF coord retention.
- 1ms-2.4hr Delay.
- EMI shielding option.
- Remote Terminal option.

CONTROL3



Stand-alone, programmable multi-axis DC-motor/A-QUAD-B encoder Controller in 10"x12"x2" modules with Remote Panel and built-in Servo for OEM environments. Designed to be *customized* and installed into small spaces. Controls Linear/Rotary Actuators as well as many types of DC motors. Executes an internally-stored program or ASCII commands from RS-232/IEEE-488 Host computer.

- 32 axes Master/Slave.
- Written in "C" for customization.



Remote Panel manages menu information.

IRONLESS-CORE DC-MOTORS

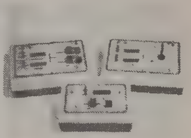
Our components feature formed cylinder and flat armature configurations with *high acceleration and deceleration* due to absence of moving heavy iron laminations or magnets.

BENEFITS High torque/size (weight) ratio • low acoustic/electronic noise • long brush life • vibrationless • straight-line torque/velocity response

MANUAL CONTROLLERS

1000-SERIES

INTEGRATED [1000INT]



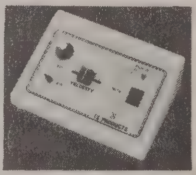
Controlling one or two DC motors, the 1000INT-1, -2, -J are our smallest, lowest-cost, open-loop Controllers with position display and built-in velocity servo. • Joystick version • 6-digit Position Display for each axis • 2x/4x Encoder Counting • 10:1 Slewing and Jogging Range • Limit indicators • Computer interface option

MODULAR [1000MOD]

These Controllers handle 1, 2, and 3 DC motors constructed from modules — Speed Controller • Joystick • Position Display • Position Entry • Mainframe • Remote Control • Power Supply

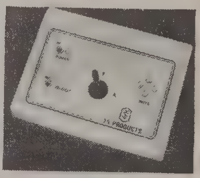
1200-SERIES

4-AXIS SPEED CONTROLLER



A simple DC-Motor mover for open-loop control, the 1200SC controls 1 out of 4 motors — 10:1 Slewing speed range • Direction selection • Limit sensing with backoff • Small step JOG function • 1200SCC computer-interface • 1200-OEM version.

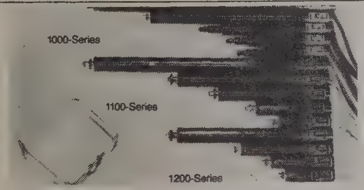
2-AXIS JOYSTICK



Simultaneously controlling two-axes, the 1200J's joystick feels elegant with fast/slow ranges. With a simple computer-interface, the 1200JC, duplicates all front panel functions. Built on a single PCB, the 1200J-OEM version economically fits into your system.

ACTUATORS

LINEAR

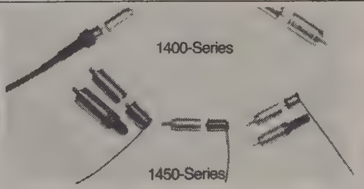


1000-Series High-quality, high-precision for semiconductors, optics, metrology, medicine. • Non-rotating plunger • Position encoder • .5"-6" travel • 100 lb thrust max • 15mm/sec max • 2.5nm resolution min • 2µm/in accuracy • Integral velocity servo • limit-of-travel/torque sensor • Axial/Side cable discharge.

1100-Series Smaller, with encoder for closed-loop operation • Half length of 1000-series • .25"-12" travel • Visual position display • Push/pull adapter • Axial or side cable discharge.

1200-Series Smallest, simple mover • .25"-18" travel • Open-loop operation • Push/pull adapter option • Many custom options.

ROTARY



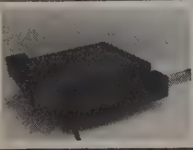
1400-Series

- Built-in encoder for *closed-loop* applications.
- Up to 640,980 counts per revolution.
- Smooth velocity from .04 to 1300 RPM.
- Torques to 2514 in-lb.
- 18 gearratios available.

1450-Series

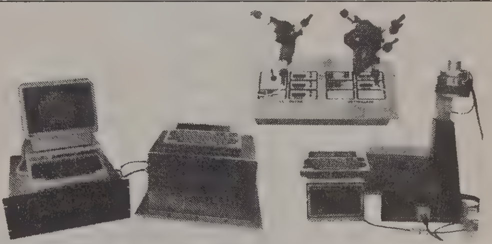
- Similar to 1400-series but 3/4" shorter.
- Encoderless for *open-loop* applications.

SLIDES—TABLES—STAGES



1300-Series ROTARY Heavy-duty, high-accuracy, robust construction for abusive environments • 6" dia • 4" dia.
1500-Series ROTARY Compact; closed-loop and open-loop.
1600-Series LINEAR Ultra-Compact, low-profile, single axis with integral leadscrew • gang into X/Y/Z • closed-loop operation.
CUSTOM STAGE ASSEMBLIES Linear/rotary motion subsystems assembled to your specifications from new design or our vendors.

CUSTOM MOTION SYSTEMS



Using our own or other technologies, we meet your complete motion, mechanical fit, and delivery time specifications. For a quick solution, we use our **CONTROL2**. Instead of complex cams and open-loop control, we use **CONTROL3** for programmable synchronized movement. Replace bulky, inefficient movements with our compact, cost-effective designs.

TS PRODUCTS welcomes the opportunity to supply high-quality motion-producing and motion-controlling products. Although we pay special attention to one-of-a-kind needs, we emphasize OEM configurations of our standard products. Please talk to one of our applications sales engineers about your special needs. Qualifying OEMs receive a quantity discount. Request our dimensional catalog.

SI UNITS

RELATIVE QUANTITY SYMBOLS

≠	not equal to
≈	approximately equal to
∝	proportional to
<	smaller than
≤	smaller than or equal to
«	much smaller than
>	larger than
≥	larger than or equal to
»	much larger than
≡	identical to or equivalent
↑	increases
↓	decreases

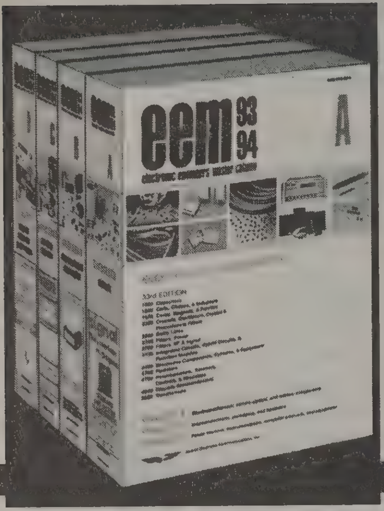
PREFIXES FOR SI UNITS

Multiple	Prefix	Symbol
10^{12}	tera	T
10^{9}	giga	G
10^{6}	mega	M
10^{3}	kilo	k
10^{-3}	milli	m
10^{-6}	micro	µ
10^{-9}	nano	n
10^{-12}	pico	p

Quantity	Symbol	SI Unit	Symbol	Derivation
acceleration	a	m s^{-2}	—	velocity/time
acceleration due to gravity	g	m s^{-2}	—	velocity/time
amount of substance	n	mole	mol	mole fraction (n) used
amplification factor	μ	*a ratio*	—	—
angle	$\theta_1, \varphi_1, \alpha_1$	—	—	—
angle of incidence	i	degree or radian	°	—
angle of refraction	r	degree or radian	°	—
angle, Bragg	θ	number	—	—
angle, critical	c	degree or radian	°	—
anode slope resistance	R_A	ohm	Ω	$\Delta V_a / \Delta I_a$
area	A	metres squared	m^2	$l \times b$
atomic number	Z	a number	—	number of protons
Avogadro constant	L, N_A	number	—	—
breadth	b	metre	m	fundamental unit
capacitance	C	farad	F	charge/p.d.
charge, electric	Q	coulomb	C	current × time
charge on electron	e	coulomb	C	$1{\cdot}6 \times 10^{-19}$ C
conductance	G	ohm^{-1}	Ω^{-1}	reciprocal of resistance
current, electric	I	ampere	A	fundamental unit
decay constant	λ	*a ratio*	—	—
density	ρ	kg m^{-3}	—	m/V
distance along path	s	metre	m	fundamental unit
efficiency	η	*a ratio*	—	work output/work input
electrochemical equiv.	z	g C^{-1}	—	mass/charge
electromotive force	E	volt	V	energy/charge
electron	e	—	—	—
energy	E	joule	J	N m
energy, kinetic	E_k	joule	J	N m. $E_k = 1/2m\upsilon^{2}$
energy, potential	E_p	joule	J	N m. $E_p = mgh$
Faraday constant	F	coulomb mol^{-1}	C mol^{-1}	96,500 C mol^{-1}
field strength, electric	E	V m^{-1}	—	potential gradient: p.d./dist.
field-strength magnetic	H	ampere-turns	—	current × no. of turns
flux, magnetic	Φ	weber	Wb	e.m.f/rate of change of flux
flux density	B	tesla	T	flux/area
focal length	f	metre	m	—
force	F	newton	N	kg m s^{-2}
free energy	ΔG	joule	J	—
frequency	f	hertz	Hz	oscillations/time
gas constant	r	joule	J	energy
half-life,radioactivity	$t_{1/2}$	second	s	fundamental unit
heat capacity	C	J K^{-1}	—	quantity of heat/temp. rise
heat of reaction	ΔH	joule	J	heat energy
heat capacity, specific	c	J K^{-1} kg^{-1}	—	heat capacity/mass
heat, quantity of	q	joule	J	energy

SI UNITS

Quantity	Symbol	SI Unit	Symbol	Derivation
height	h	metre	m	fundamental unit
image distance	υ	metre	m	fundamental unit
inductance, mutual	M	henry	H	induced e.m.f./rate of change of current
inductance, self	L	henry	H	—
intensity of radiation	I	*a number*	—	—
latent heat	L	joule	J	quantity of heat
latent heat, specific	l	$J\ kg^{-1}$	—	quantity of heat
latent heat, molar	L_m	joule mol^{-1}	J	quantity of heat
length	l	metre	m	fundamental unit
magnetizing force	H	ampere-turns	—	—
magnetic moment	m	Wb m	—	torque in unit magnetic field
magnification, linear	m	*a ratio*	—	—
mass	m	kilogramme	kg	fundamental unit
mass number	A	*a number*	—	number of neutrons + protons
molar volume	V_m	(dm^3)	—	volume of 1 mole
molar solution	M	*a ratio*	—	$moles/dm^3$
moment of force	—	N m	—	force × perp. distance
neutron number	N	*a number*	—	number of neutrons
number	n	—	—	—
number of molecules	N	—	—	—
number turns on coil	n	*a number*	—	—
number order spectrum	p	*a number*	—	—
object distance	u	metre	m	fundamental unit
peak current	I_o	ampere	A	see current
peak e.m.f.	E_o	volt	V	see e.m.f.
period	T	second	s	fundamental unit
permeability	μ	$H\ m^{-1}$	—	henry/metre
permeability, vacuum	μ_o	$H\ m^{-1}$	—	—
permeability, relative	μ_r	*a ratio*	—	$\mu = \frac{\mu}{\mu_o}$
permittivity	ε	$F\ m^{-1}$	—	farad/metre
permittivity, vacuum	ε_o	$F\ m^{-1}$	—	farad/metre
permittivity, relative	ε_r	*a ratio*	—	$\varepsilon_r = \frac{\varepsilon}{\varepsilon_o}$
potential, electric	V	volt	V	energy/charge
potential difference	V	volt	V	energy/charge
power	P	watt	W	$J\ s^{-1}$
pressure	p	pascal	Pa	$N\ m^{-2}$: force/area
radius	r	metre	m	fundamental unit
reactance	X	ohm	Ω	E_o/I_o
refractive index	n	*a ratio*	—	—
resistance	R	ohm	Ω	p.d./current
resistivity, electrical	ρ	ohm-metre	—	resistance × length
relative density	d	*a ratio*	—	ρ_{sub}/ρ_{water}
r.m.s. current	$I_{r.m.s}$	ampere	A	see current
r.m.s. voltage	$V_{r.m.s}$	volt	V	see e.m.f.
slit separation	s	metre	m	fundamental unit
tension	T	newton	N	see force
temperature, Celsius	θ	degree C	°C	from kelvin
temp. interval	θ	degree	° or K	—
temp. absolute	T	kelvin	K	fundamental unit
thickness	d	metre	m	fundamental unit
time	t	second	s	fundamental unit
torque	T	Nm	—	see moment
turns ratio	T	*a ratio*	—	n_{sec}/n_{prim}
(unit of electricity)	—	kW h	—	kilowatt × hour
velocity	u, υ	ms^{-1}	—	distance/time
velocity, angular	ω	$second^{-1}$	s^{-1}	angle/time
velocity, e.m.waves	c	$m\ s^{-1}$	—	—
velocity of sound	υ	$m\ s^{-1}$	—	—
volume	V	metre cubed	m^3	l × b × h
wavelength	λ	metre	m	fundamental unit
work	w	joule	J	force x distance (Nm)
weight	W	newton	N	$kg\ m\ s^{-2}$ or mg



eem/electronic engineers master

4,400 PAGES OF TECHNICAL DATA AT YOUR FINGERTIPS!

If you don't have your own EEM/ELECTRONIC ENGINEERS MASTER catalog, you can obtain you own copy by ordering now. Write for your copy or order by telephone as described below.

EEM is the world's most comprehensive and authoritative catalog of electronic products. With over 4,400 pages of technical data from nearly 1,000 manufacturers, you can find the product you need, when you need it, with a minimum of time and effort.

Organized in four separate and "stand alone" volumes, EEM can save you countless hours of search time and - like no other reference in the industry - insure that you find the right product for the job.

THE 1993/94 4 VOLUME SET CONTAINS:

VOLUME A - Electronic Components

VOLUME B - Electromechanical, Electro-optical, & Military Components

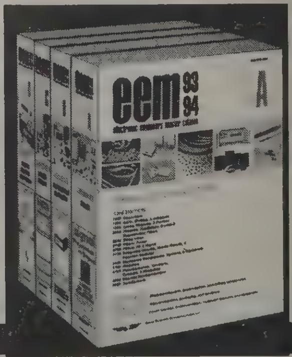
VOLUME C - Interconnections, Packaging, & Hardware

VOLUME D - Power Sources, Instrumentation, Computer Products, & Equipment

IT'S EASY TO ORDER...

- You can order the 1993/94 EEM simply by charging it to your VISA or MasterCard. To place your credit card order call now: 1-800-833-7138.
- Or mail your purchase order and check for $95.00* plus sales tax to :
  EEM/Hearst Business Publishing
  645 Stewart Avenue
  Garden City, NY 11530
  Att: Marie Botta
  (516) 227-1300

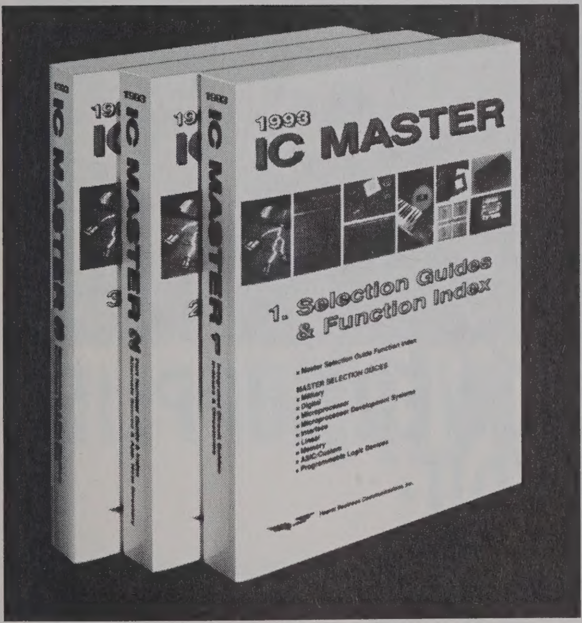
ORDER YOUR COPY NOW!



*Price valid in USA only. Request price for delivery outside the USA.

EEM is published annually in October.

SSSSSUPER
TTTTTIME
SSSSSAVER!



Do you work with ICs? Do you have trouble finding the IC you need? Are you sick and tired of sifting through dozens of manufacturers' data books? Do you have trouble comparing one set of specs to another? Are you sick and tired of wasting time?

Do we have good news for you! Get your hands on the latest annual copy of the IC Master. The Master will save you both time and money. Here's how.

The Master lists every single IC you can buy. Better yet, the Master lists ICs by function. You know what you want to do. The Master tells you who makes what for what you want to do.

There's more! The Master lists every known alternate source to every integrated circuit. If somebody makes a substitute for an IC, the Master tells you. And fast!

Want to find a custom or semicustom IC? The Master tells you who the manufacturers are, what their capabilities are, and what design tools you need.

Looking for a distributor or a local sales office? The Master tells you where they are. Got a technical problem? The Master tells you who to call. Can't figure out a part number? The Master tells you how the part number systems work.

There's more! The Master has a section on microprocessor development tools with complete performance parameters. There's another section on programmable logic devices giving you everything from output configuration to PLD development systems.

Want to know if there's an application note available on a given part? The Master tells you!

If your job has anything to do with integrated circuits, you need the IC Master. Subscribe now by calling (516)227-1314. Ask for Marie Botta. Tell Marie you need the Master now.

If you prefer, FAX Marie at (516)-227-1901. She'll FAX the IC Master subscription form back to you right away.

And, if you tell her you saw it in the 1993/94 EEM, she'll take $10 off the subscription price!

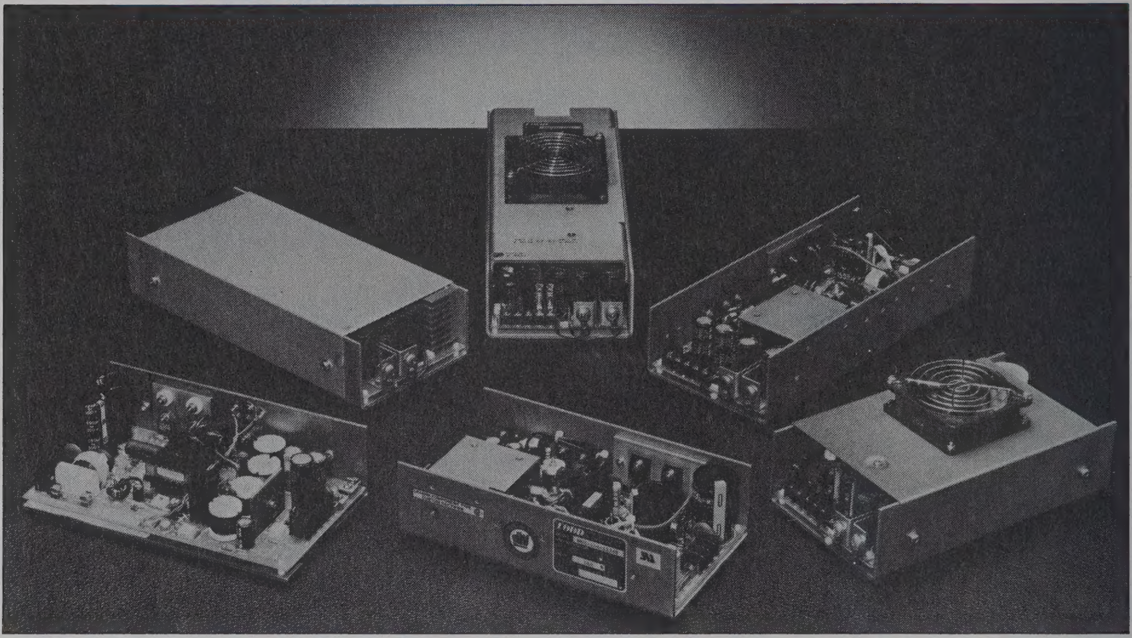
TODD
SWITCHING POWER SUPPLIES FOR OEM PRODUCTS



TODD SWITCHING POWER SUPPLIES OFFER YOU:

- Reliability to over 100,000 hours MTBF
- Power costs as low as \$.50/watt
- Power densities up to 4 watts/in^3
- Sizes 30 to 50% smaller than industry standards
- Active power factor correction to 0.99
- International standards for worldwide marketing
- Simple, rugged construction, low component count
- Cooling options — integral fans or system air
- AC automatic line selection option

For instant information on the complete line of TODD switching power supplies, see our catalog on pages 1967-1996 of this volume of EEM.

1-800-223-TODD

8 6 3 3

THINK OF IT AS THE 911 OF THE POWER SUPPLY INDUSTRY.

Need power supply help in a hurry? Call the TODD Power-Phone. Our engineers are trained to help you solve virtually any OEM power supply problem, from the earliest stages of design to last minute system trouble-shooting.

Need standard, modified, or custom switching power supplies? Just call the TODD Power-Phone. We'll get them to you on time, every time. Guaranteed.

Want general information? One call to the TODD Power-Phone can get you catalogs, spec sheets, prices, or anything else you need for your company's immediate or long-term power supply requirements.

The TODD Power-Phone.
Immediate response, immediate solutions.
It's a real life-saver.

The Power Source

DC/DC converters with the power to meet your design requirements.

HD-PAK
PJ-PAK
TRIPLE-PAK

TRIPLE-PAK™ SERIES TRIPLE OUTPUT

The TRIPLE-PAK Series offers 150 Watts of output power - 5 VDC @ 15 Amps and ±12 or ±15 VDC @ 3 or 2.5 Amps for maximum efficiency.

- 19 W/in^3
- MIL-STDS 704D, 810E, 202
- -55°C to +100°C operation

PJ-PAK™ SERIES SINGLE OUTPUT

The PJ-PAK Series gives you more power density, performance and reliability in a smaller package than any other 350 W military converter. The PJ-PAK Series is available in 28 and 155 VDC inputs.

- 82 W/in^3
- Fixed 250/350 KHz operation
- Parallel operation
- MIL-STDS 704D, 454L, 461, 810E

HD-PAK™ SERIES SINGLE OUTPUT

The HD-PAK industrial converters provide the highest output power available in an industry standard package. It's that simple. Ideal for communications and EDP computer applications, the HD-PAK's high density performance stands alone.

- 54 W/in^3
- 5 VDC @ 60A @ 85°C (45A @ 100°C)
- Parallel operation (current sharing)
- Synchronization - (from an internal or external source)
- Fixed 350 KHz operation
- Up to 90% efficiency
- Input Voltages - 48, 300, 150 and 24 VDC
- Overtemperature shutdown (auto recovery)
- Overvoltage shutdown (auto recovery)
